Vision

CEO Sakari Tamminen's strategic statement:

“Our goal is to adopt **customer-oriented** way of working in everything we do. In order to achieve our goal, we have to **harmonise operational methods** in the entire Group and start thinking about the Group as a whole. Our objective is to transform Ruukki into a **single uniform company with a strong sense of unity.**”

Our vision: solutions for specific segments based on customer needs

2003
Reliable steel producer

2008-2010
The most desired solution
supplier

The starting point

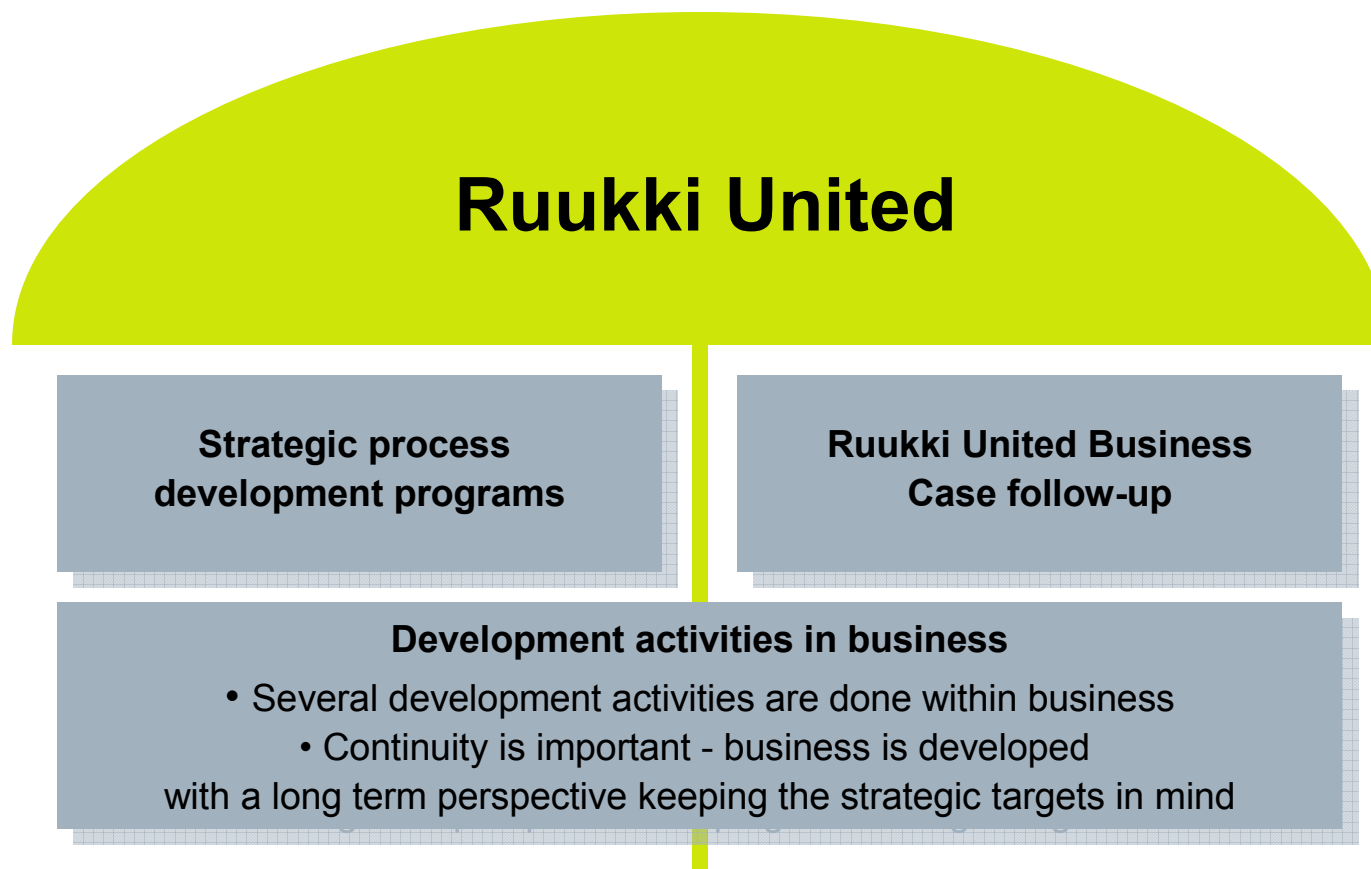

From several independent juridical companies, with own identities, brands and ways to operate.

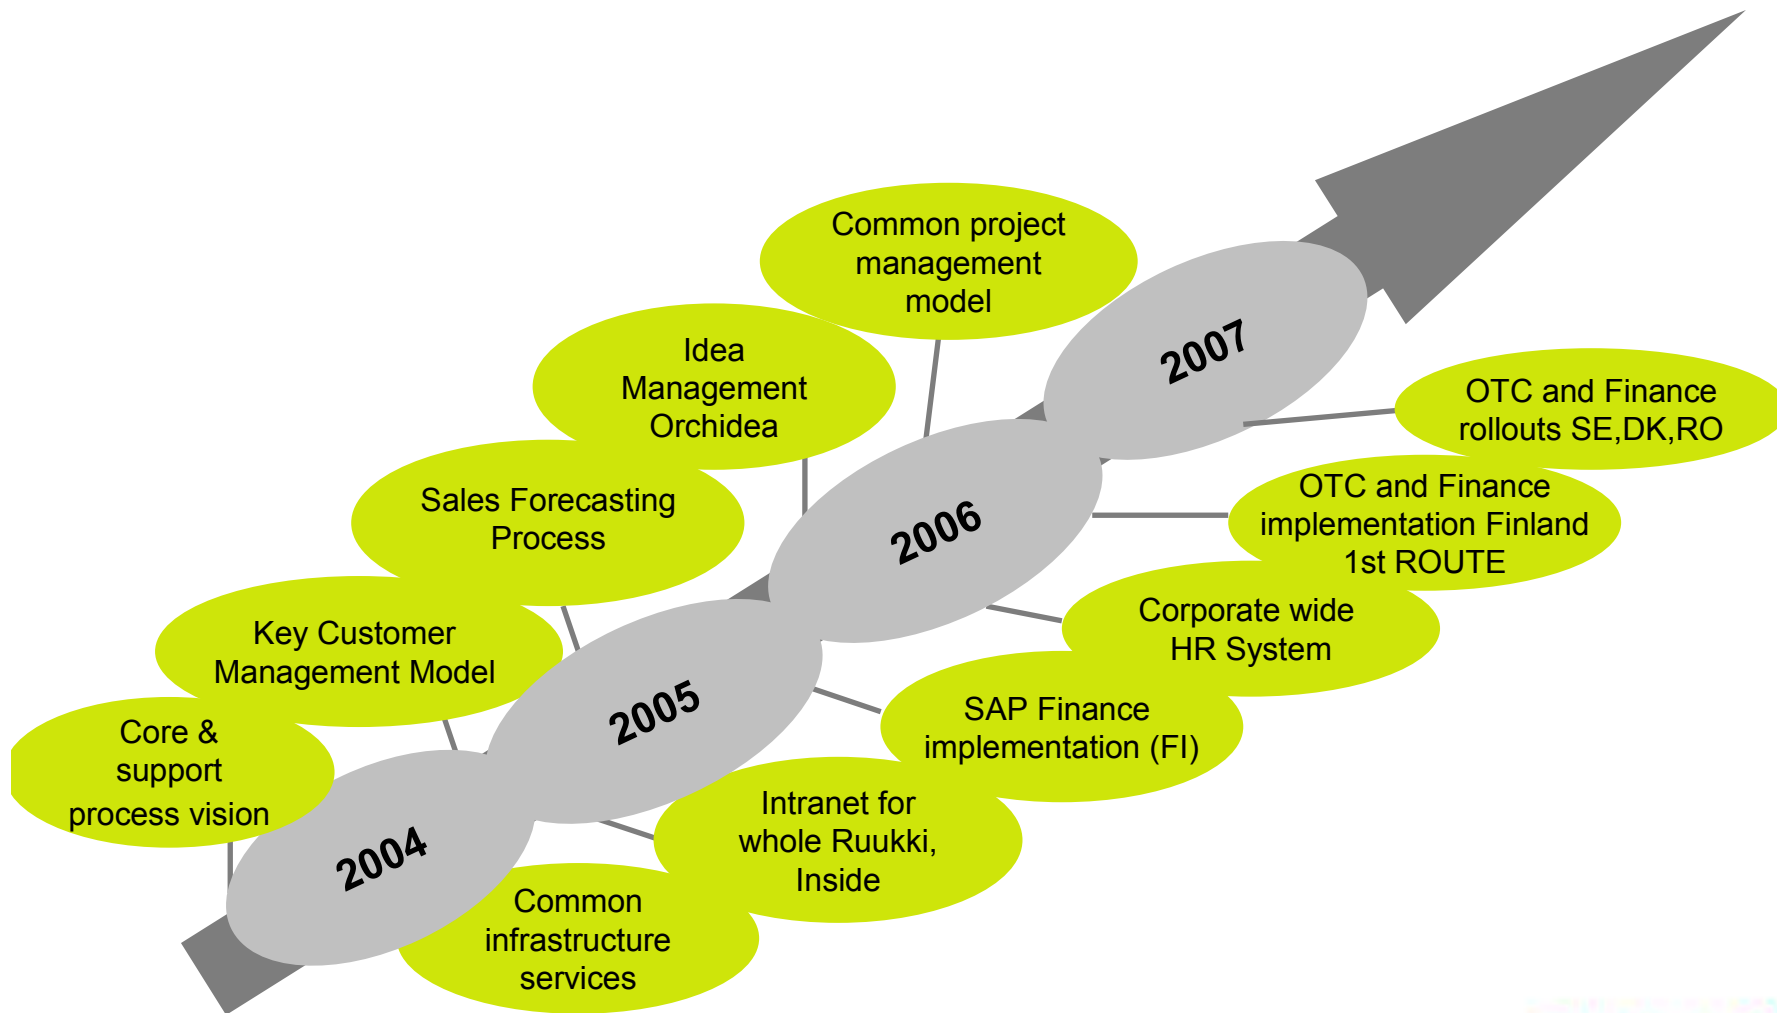

into one unified company

Ruukki United is an 'Umbrella' covering many development activities

Development milestones

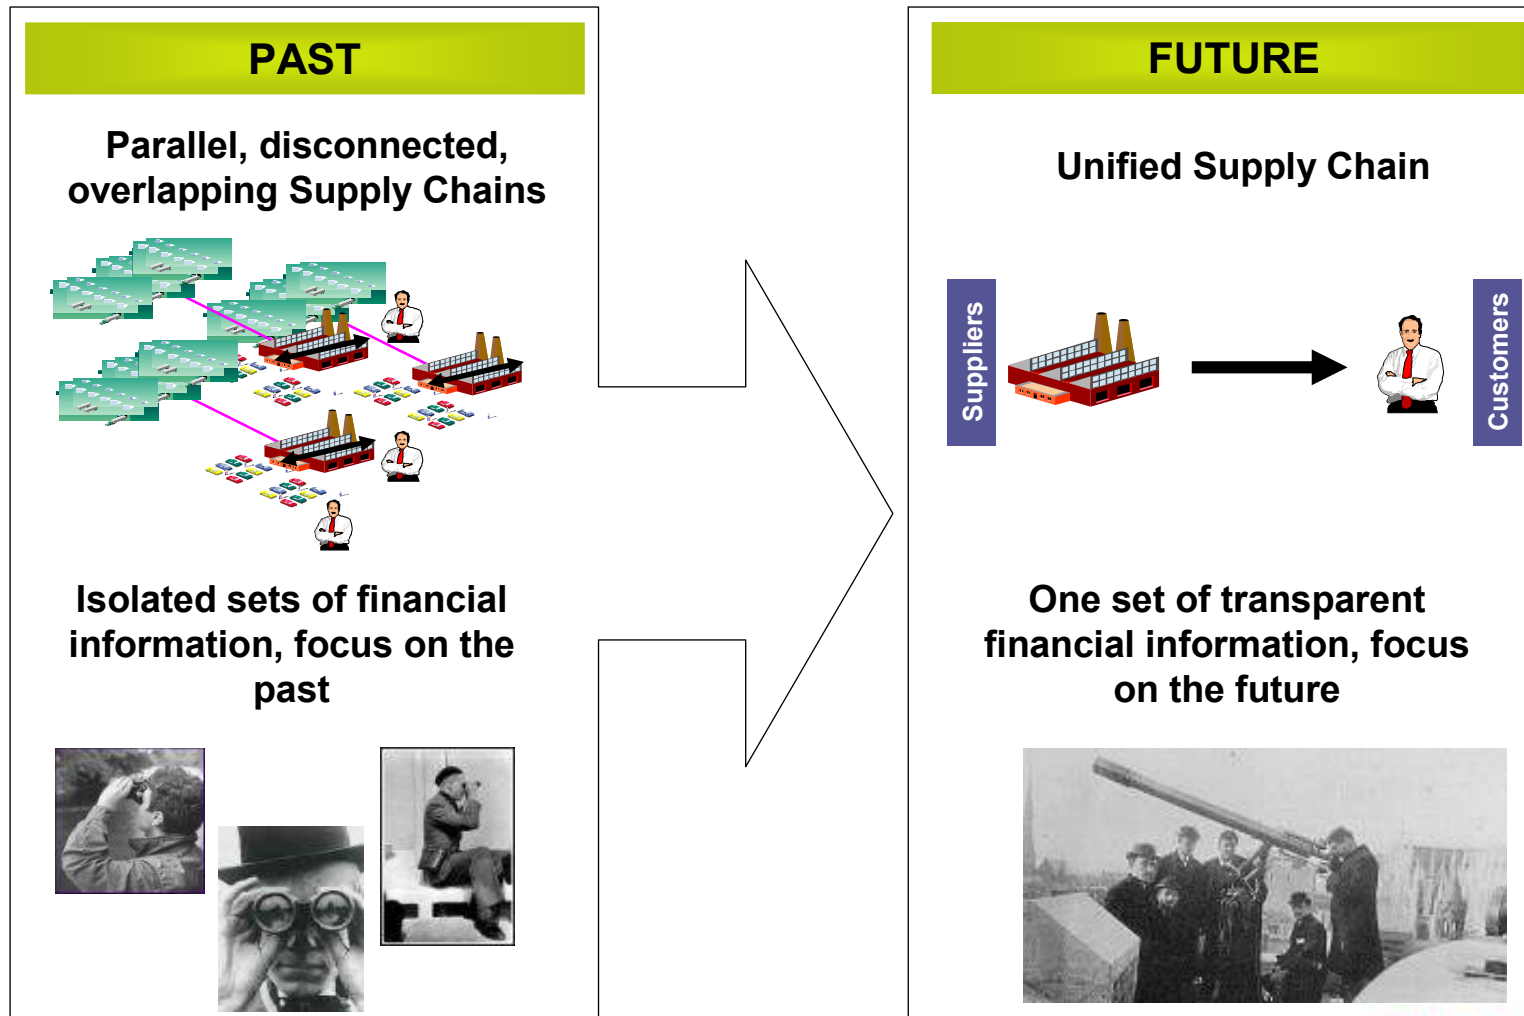

Ruukki's process framework

Ruukki aims at developing and harmonizing processes and working practices.

ROUTE Program develops and implements OTC and Finance processes and solutions.

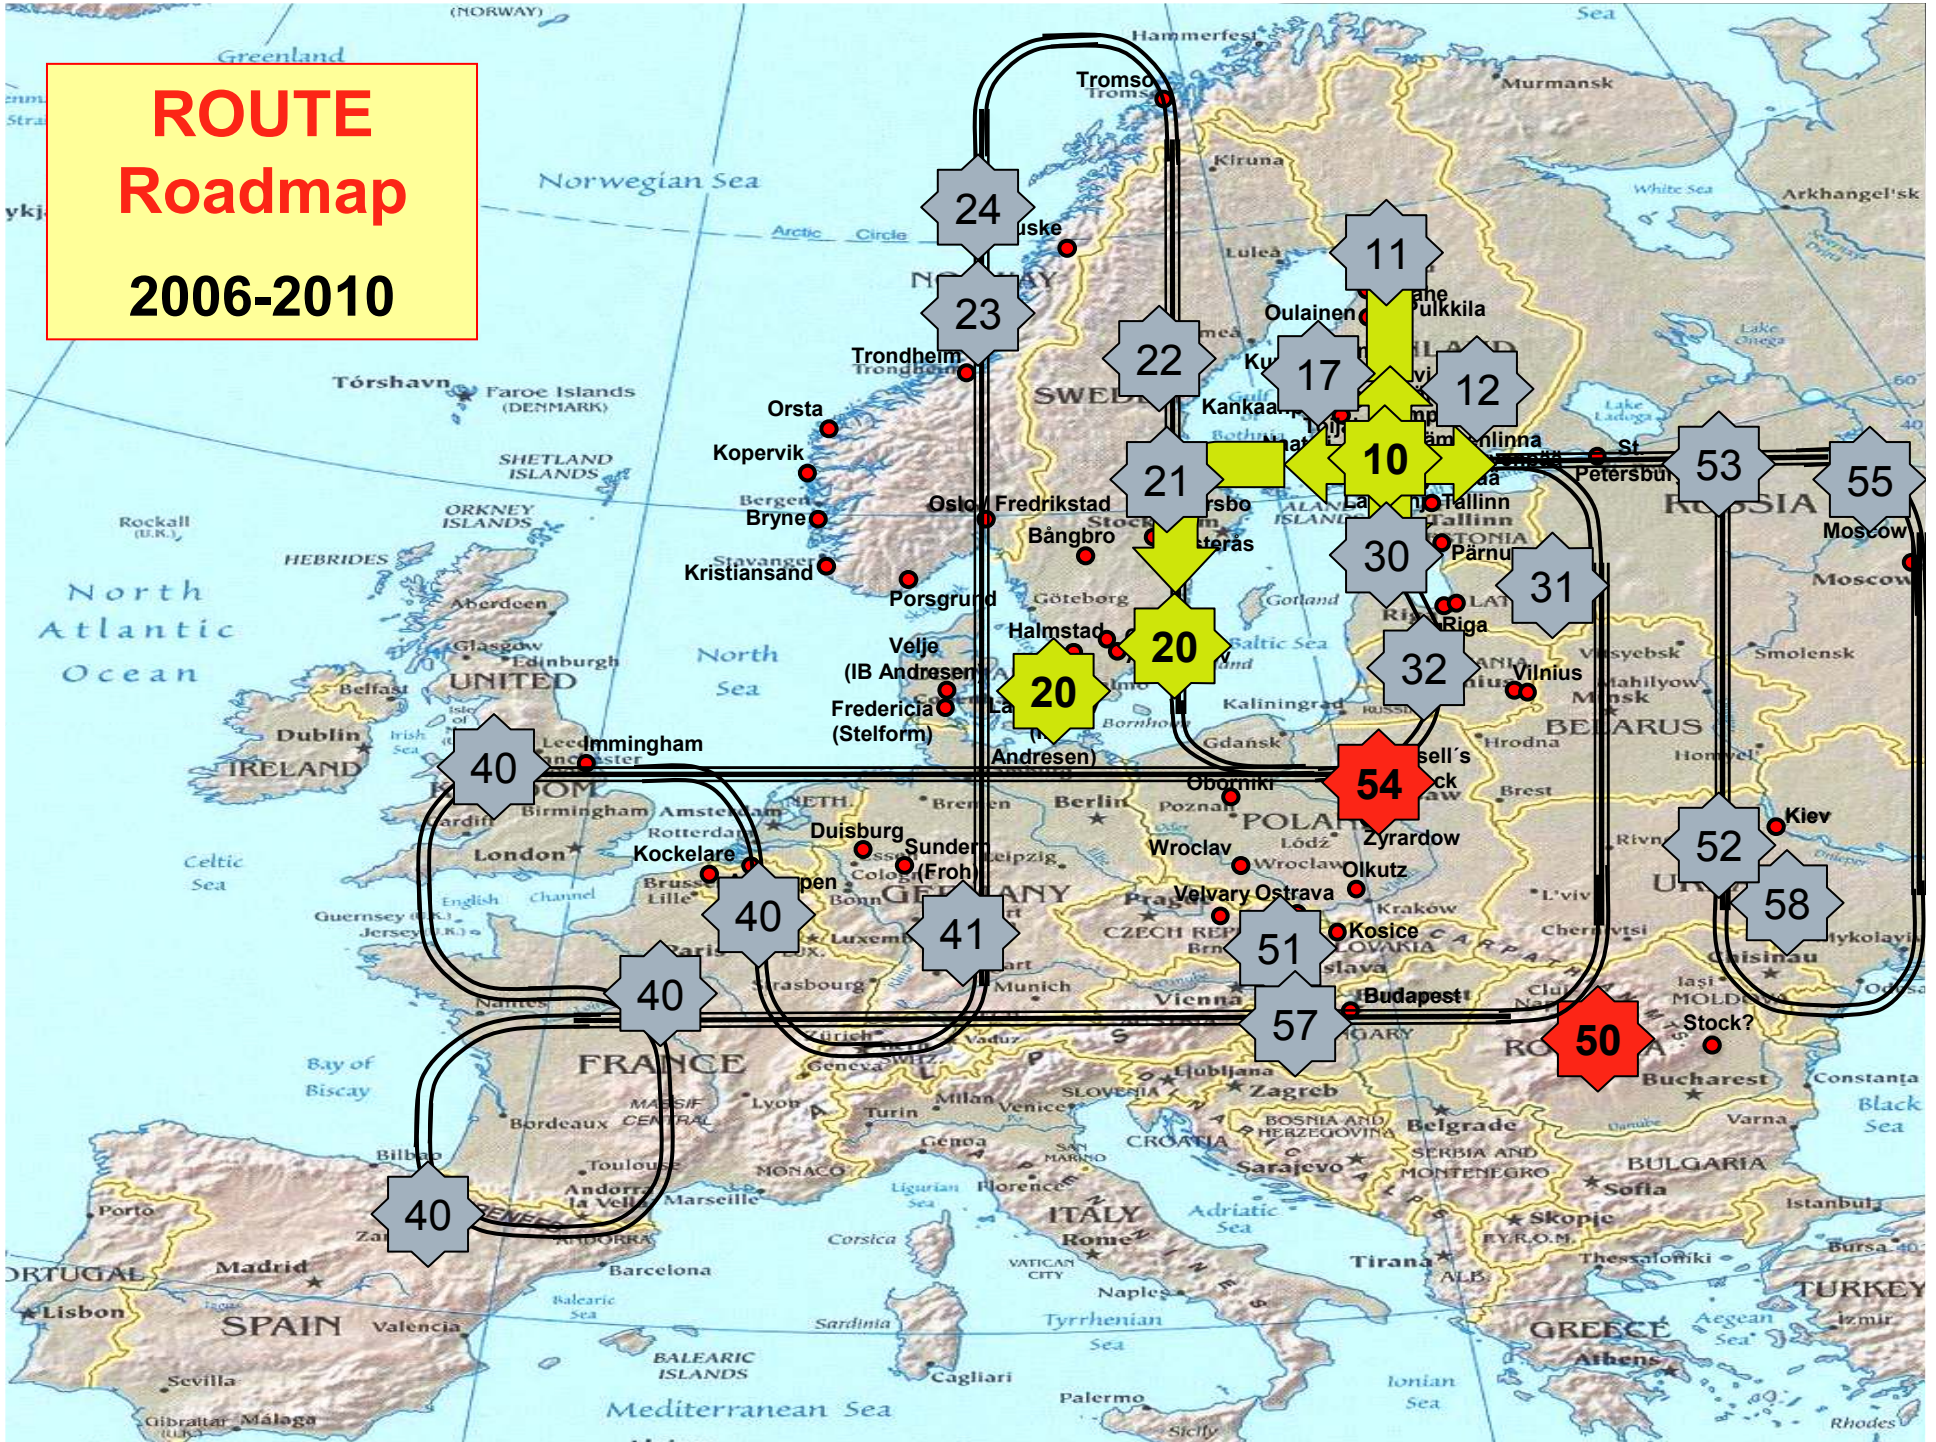

The long-term goal of ROUTE

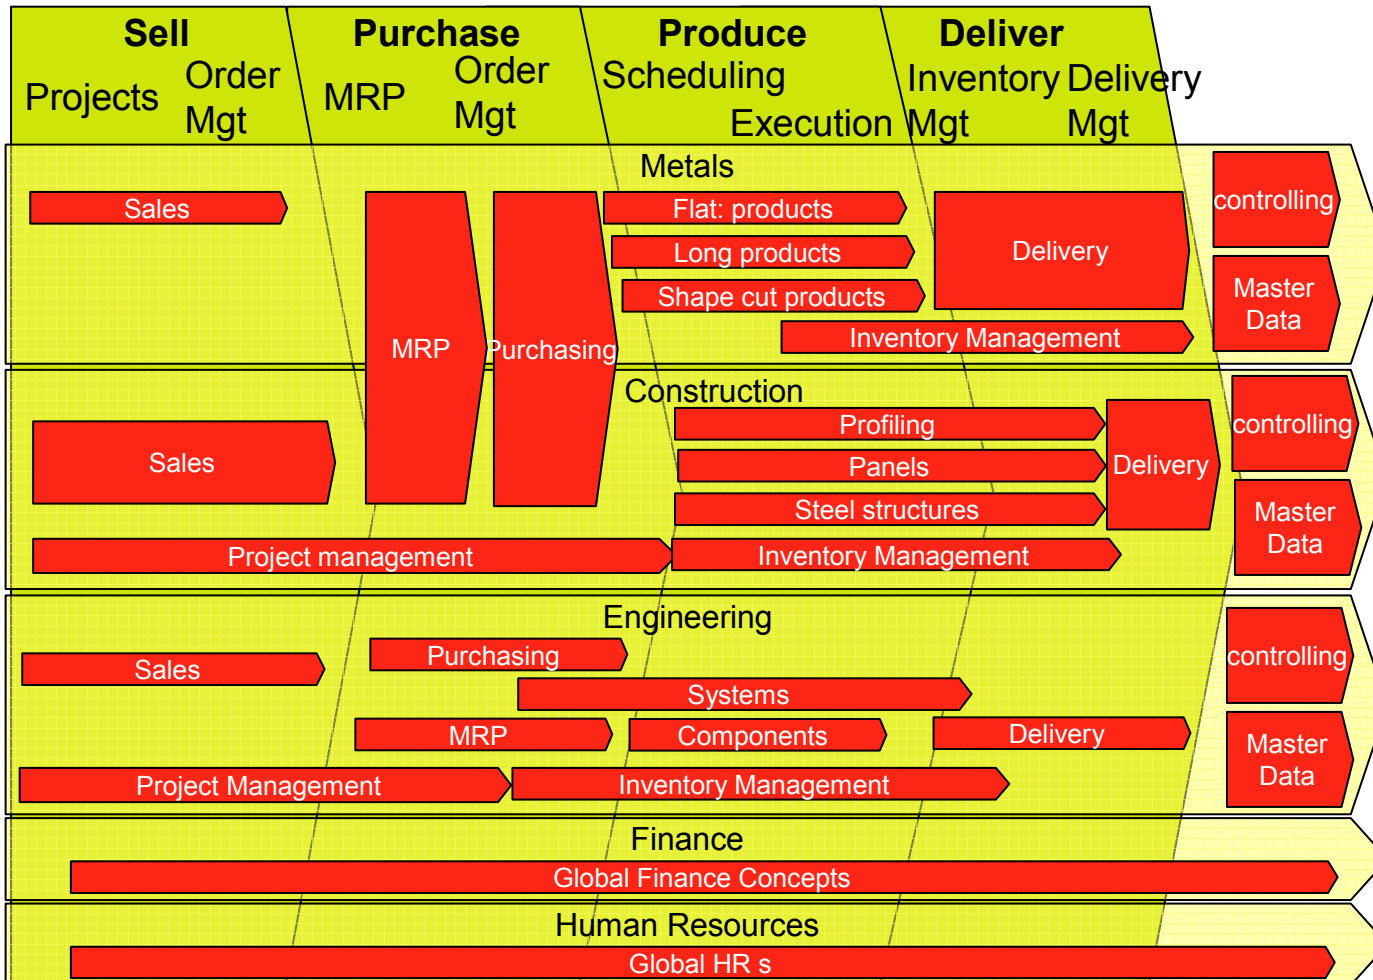

What is ROUTE?

- ROUTE program consists of several solution development projects and rollouts, focusing especially on developing and implementing unified working practices and supporting common systems to Ruukki's Order to Cash and Finance processes.
- ROUTE is an abbreviation of **Ruukki's One Unified Template**.
- Implementation of the template in the organization is carried out as a project. Implementation projects are called ROUTE rollouts.
- Template is a pre-defined set of concepts, working practises and supporting tools
- The goal is to improve Ruukki's ways of working and create cost savings
- ROUTE projects are scheduled until 2010, and they affect all Ruukki's units.

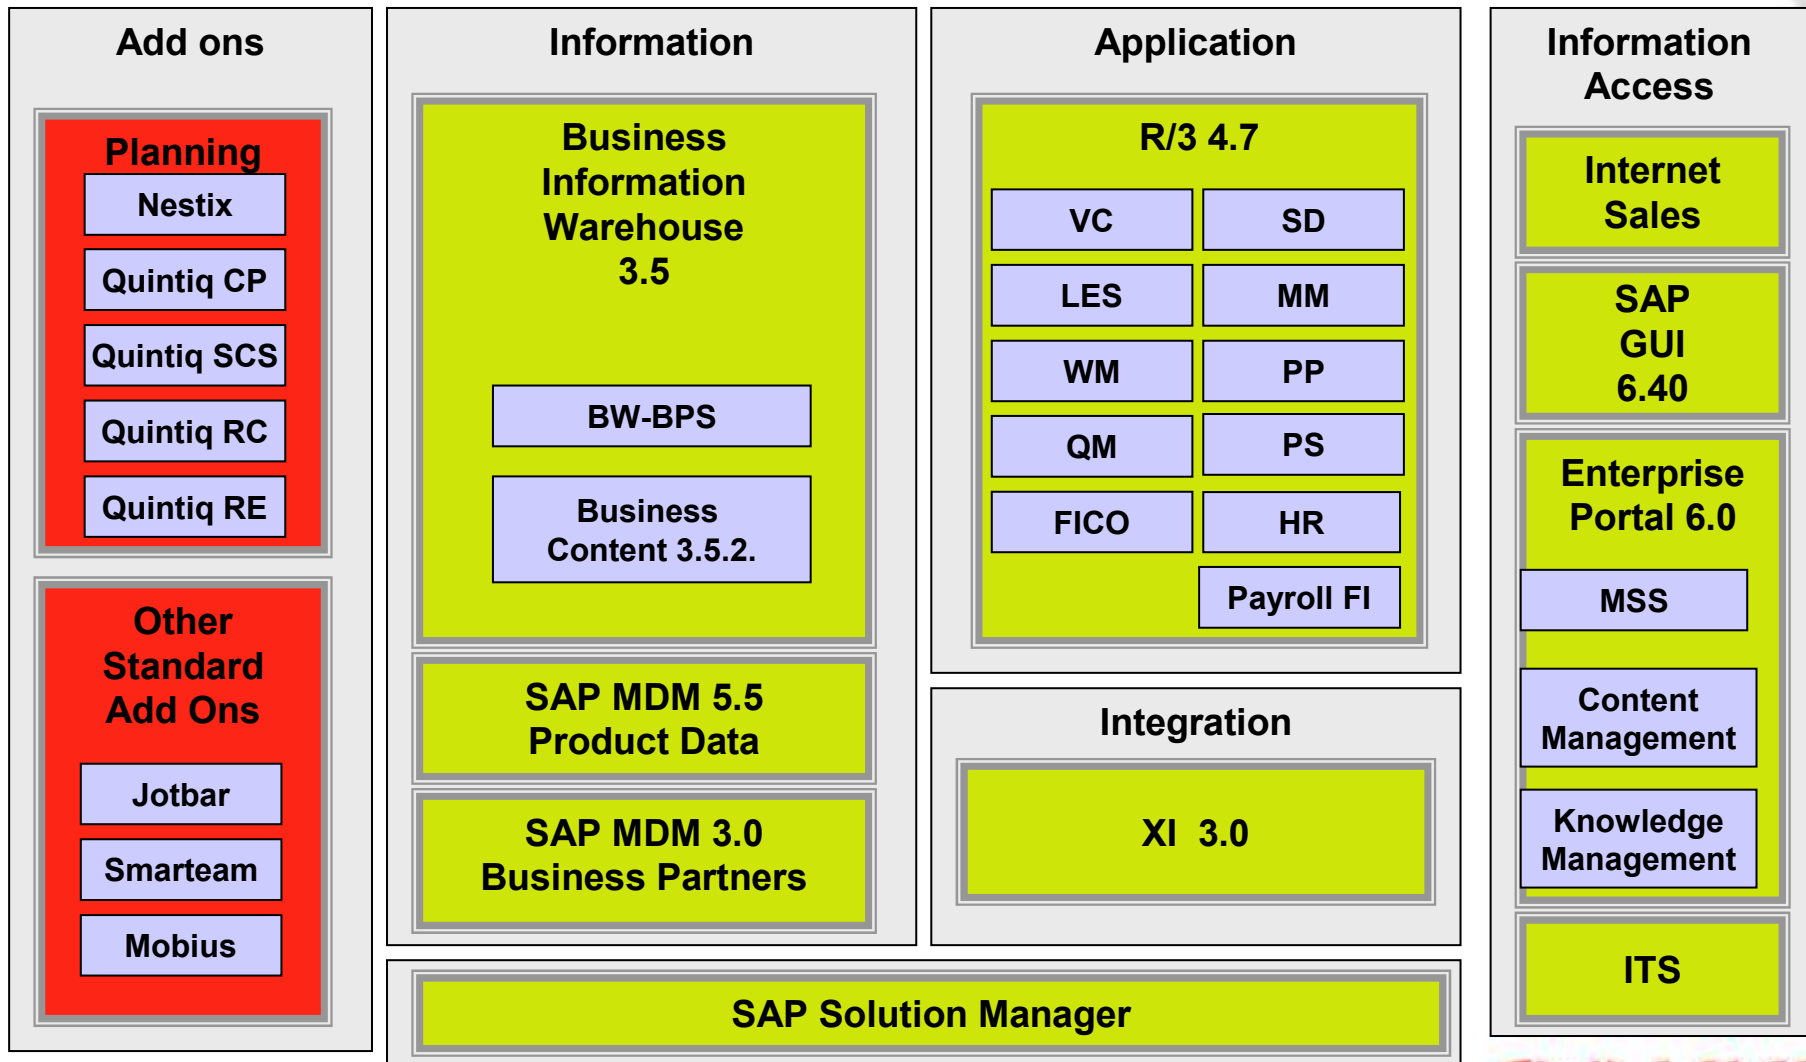

ROUTE Roadmap 2006-2010

Project methodology overview

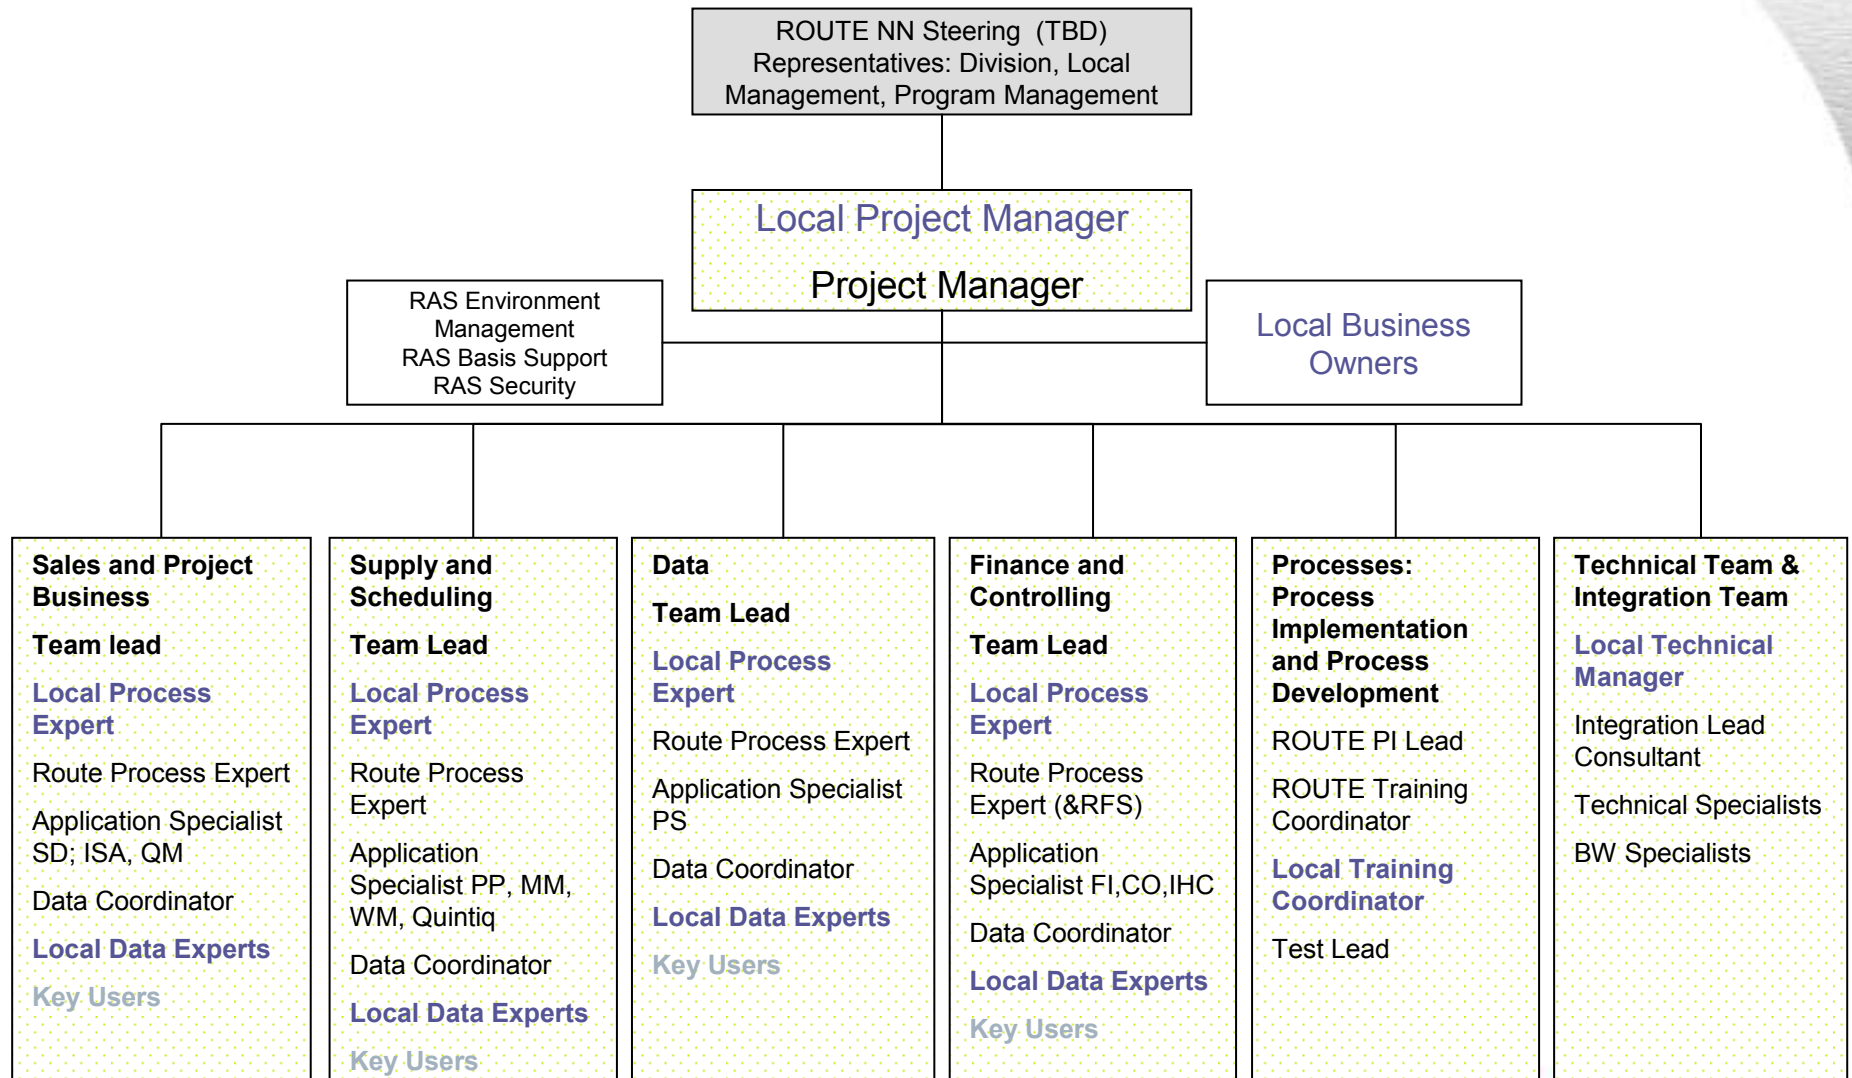

Project Management and Communication

Ruukki release management model

ROUTE project organization model

Project governance

- Process development steering (monthly/bi-monthly)
 - Decides/prioritizes projects, approves budget
- Project steering (monthly)
 - Makes decisions on business related issues, approves design and CR's, approves project phases, approves go live
- Program management (weekly)
 - Makes decisions on resources. Solves issues within program, makes quality reviews for gates and makes recommendations to project steering
- Project manager (daily)
 - Makes decisions within the limits approved plan and budget
- Team meeting (weekly/daily)
 - Makes decision within the limits approved plan and budget (for team)
- Other parties:
 - Business management, concept owners, architects

Lessons learned

- Be realistic with implementation timetable.
- Business is The Customer but remember to "teach" business general IT project restrictions and way of working.
- Prioritise business requirements immediately when they come up.
- Nominate and engage Key Users early in project phase.
- Prepare to run into a severe resistance for change.
- Plan user training and communications carefully.
- Follow design quality carefully.
- Avoid iteration: design – build – test – design – build – test.
- Avoid changing the standard (modifications) as much as possible.
- Don't underestimate time needed for testing. And remember to test against design not against "wishing well".
- Manage application (configuration and own development) changes in releases (according ITIL).
- Set up change management process (according ITIL).
- Set up support services immediately after first GoLive.

ITIL, Information Technology Infrastructure Library

From Wikipedia, the free encyclopedia

- The Information Technology Infrastructure Library (ITIL) is a framework of best practice approaches intended to facilitate the delivery of high quality information technology (IT) services. ITIL outlines an extensive set of management procedures that are intended to support businesses in achieving both high financial quality and value in IT operations. These procedures are supplier-independent and have been developed to provide guidance across the breadth of IT infrastructure, development, and operations.
- ITIL is published in a series of books (hence the term *Library*), each of which covers a core area within IT Management. The names *ITIL* and *IT Infrastructure Library* are Registered Trade Marks of the United Kingdom's Office of Government Commerce (OGC).

SAP community in Finland

- Almost all big and midsize companies use SAP.
 - Many of the customers have not done the upgrade to SAP ERP2005/2007+NW2004s. The biggest change from old releases (4.6c) to new releases is the change in platform. Old BASIS technology platform is now NetWeaver business application platform.
 - Some companies have in recent years done renewal of their old SAP installations. First installation lifecycle in these cases was 6-8 years.
- SAP is currently focusing strongly on public sector and SMB.
- SAP consultancy business is AGAIN going through change.
 - Trend is to "spin-off" from big companies and set up smaller companies or even one-man-companies and then work as sub-contractor in big projects.
- There is a shortage (hundreds) of SAP consultants in Finland.
 - SAPETTAAKO – recruitment campaign by Ciber at spring 2007.
 - Young professionals program at Ruukki to grow own application specialists.
- SAP Finnish User Group (www.sapfinug.fi)
 - Very active user group, also in european scale.

SAP as a career...

- ... Long hours and usually lots of travelling.
- ... Short holidays, last minute cancellations always possible.
- ... Quality requirement for work higher and higher.
- ... Timetable tighter and tighter.
- ... Flexibility and ability to accept change and unstable environment required.
- ... Ability to get excited about the same challenges again and again in different business environments.
- ... Not always so glamorous!!!
- Salaries at customer side approx. +10-20% compared to IT overall: <http://www.tietoviikko.fi/palkkatutkimus.jsp>
- Consultants can "make more money", if they have long and broad experience (usually 8-15 years) and suitable character...
 - Consultant pay cheque usually heavily bound to different bonus criteria such as work time billed from customers and work quality.

**"Begin at the beginning" the King said, gravely,
"and go on till you come to the end; then stop."
Alice's Adventures in Wonderland - Lewis Carroll**

Discussion & Questions?
