Using the Compatibility Matrix:

When a cell indicates shortened release version (such as 10.0): that means it is supported from the first release (e.g. 10.0.x) and continues through the current release.

When a cell indicates release version to another release version (such as 10.0.1 - 10.0.5) that means it is supported only during the indicated release range and is last available in the ending release version.

Additional notes about information contained within this matrix:

Customers are responsible in tracking the end of life support for the 3rd party products consumed and/or required within the Infor Lawson Solution.

Databases may be remote or local on Infor supported platforms as defined in this document. The exception is DB2 on IBM i where it is local.

If your Infor Lawson product requires a non-Infor Lawson application that is licensed through Infor and available from Infor Support Portal, ensure that you download and install the latest version compatible with your Infor Lawson product.

Important Note: This Compatibility Matrix ("Matrix") does not contain information about all products offered by Infor. The intent is to provide information about compatibility and supported versions for Infor's most widely used products. This Matrix does not create or amend any contractual obligations or warranties. Information contained herein is subject to change without notice. Infor makes no warranties or representations with respect to the accuracy of the information contained herein.

As a customer, you are fully responsible to make final decisions regarding products and applications licensed for your organization. You are encouraged to contact your Infor Account Executive for more specific details about product compatibility, especially when planning for a major system or product upgrade. The information in this Matrix is technical in nature and written for system administrators and Infor application administrators.

[1] Reference applicable Infor product sections elsewhere in this document for currently supported configurations/platforms and other related minimum version requirements.

[2] Reference applicable Vertex Compatibility Matrix for supported on premise installation configurations, as these may differ across operating system, database, web server and browser requirements between Infor and Vertex. Each product compatibility needs to be individually adhered to and cross-matched for common configuration supportability. While it is common practice for On Premise Lawson customers to install Vertex on their existing Infor utilized infrastructure, this is not a physical requirement for product functionality. In addition, please refer to said Vertex documentation for support and decommission dates on Vertex O Series versions 6 and 7.

[3] Utilization of Vertex cloud deployment options are preferred to on premise installations.

[4] Vertex O Series Connector utilizes schema 7 format for XML communication protocol via delivered Infor Process Automation flows.

Lawson HR Service Delivery (HRSD)

Lawson Resource Navigator (LRN) and all references to are now called Lawson HR Service Delivery which is now the new suite name. This suite of applications is only available by subscription license. To better align with Enwisen product names, the Lawson Resource Navigator Product names have also been retired and are being replaces with new names. Note that the SKUs used remain the same. The new names are as follows:

Lawson Resource Navigator-Retired Naming	License SKU	New Descriptor
Lawson Employee Resource	LEMPR	Knowledge Base- Employee
Lawson Manager Resource	LMGRR	Knowledge Base- Manager
Lawson HR Resource	LHRP	Knowledge Base-HR Professional
Lawson Total Compensation	LTC	Total Rewards
Lawson HR Call Center	LCTR	Case Management
Lawson Onboarding	LONB	Onboarding
Lawson Offboarding	LOFB	Offboarding

- Current Product SKUs are being used as they exist today to insure continuity between Lawson customer and Enwisen customer product purchases. These SKUs represent product bundles. The content of these bundles will remain the same as what was delivered previously.
- Product pricing for the HRSD applications continues to be the same pricing model used previously. HR Service Delivery pricing can be found in the current Pricing Configurator.
- Lawson HRM customers who license Employee and Manager Self –Service can use the embedded bookmarks in EMSS to link to HRSD applications (once licensed). This configuration makes connecting to the HRSD products easier.
- LTM, former-Enwisen non-Lawson customers and new non-Lawson customers sold HRSD are not required to license Employee and Manager Self-Service.
- Former Enwisen and new non-Lawson customers have no Lawson product dependencies/requirements. Simply order HRSD application by SKU.
