Pitney Bowes

Maximum Reliability And Productivity For High Demand Mailing

Digital Mailing System
with IntelliLink® Technology
DM1100™

Redefining the standard with unrivaled capabilities

Business Mail can mean different things to different people, but most will agree that you rely heavily on the mail to reach your organization's objectives. It is a tool that allows you to acquire new customers, promote the value of your business, fulfill orders and transactions, and strengthen relationships with existing customers and business partners.

Your mail centre is the hub of activity in your company's business. It's how you communicate to your customers and business partners, and you can't miss a beat. High demand operational expectations are the norm, and because of that, you need to count on mailstream equipment that delivers the utmost in reliability and productivity beyond compare. That's where Pitney Bowes comes in. Our goal is to help you achieve your goals. Pitney Bowes is the mailstream industry leader, and as such, we know and understand the environment that you operate in. That's why we have built the DM1100™ which stands at the top of its class. This high-speed workhorse handles all types of mail, of various weights and sizes, without as much as a blink and is always ready when you are. Whether you are processing mail for clients or for your customers and business partners, rely on the best – the one that's been designed with your business in mind.

Engineered for endurance and optimum uptime

Our technologists have designed the DM1100™ to withstand ongoing and long-term operational impact in a high-volume mailing environment. With more capabilities and fewer moving parts to wear, you can depend on consistent reliability of performance.

Simple control centre operation

- **IntelliLink® Control Centre** – This integrated and intuitive interface is your command centre. This allows you to direct your system demands from this single, central location. The command centre swivels so that it can easily be seen from all operation angles, and easily detaches for high-speed Internet connection for faster downloads.

- **Easy-To-Read Prompts** – The IntelliLink® technology is incredibly powerful but has been designed to be simple to use for any level operator. The system guides the user with step-by-step instructions such as set-up, accounting, rating, and processing functions needed to get the mail out.

- **Job Presets** – Doing a lot of routine jobs? No problem! The system can store in memory up to 10 of your everyday jobs so that even new operators can run the application easily.

- **Simplified Rating** – The IntelliLink® Control Centre puts you in command, giving you the flexibility to choose what rate is appropriate for the job. Select from Canada Post's Domestic, U.S. and International rates.

- **Auto Oversize and Auto Class Select** – No need to manually intervene when you have an oversized or overweight piece of mail. The system's intelligence recognizes the piece and applies the correct postal surcharge and/or correct class as appropriate.

IntelliLink® Control Centre
Brings all control of the DM1100™ into a single, central display

Auto Sensors
Automatically align mail for precise imprints

Weigh-on-the-Way™
Allows you to process mixed weight, mixed size mail.

Platform Weighing
Choose from 7, 12 or 35Kg weighing platform options.

Mixed Mail Feeding
Increases productivity by eliminating sorting by weight and size

Stacking Options
Maximize the DM1100's throughput speeds with productivity-enhancing mail handling

Open Immediately

Envelope Ads
Add messages to your mail with a choice of envelope ads

Ergonomically Designed Console
Provides the correct operator working for maximum productivity, minimizes noise and vibration and ample supply storage

Process more mail in less time – eliminate end-of-day bottlenecks

High-Volume Mailers Demand Speed – and get it with the DM1100™. There is no other mailing system in its class that can get your big jobs done at the speeds the DM1100™ can handle. This highly talented system automatically feeds, seals, prints postage and stacks up to 295 pieces per minute of uniformly sized mail. In an operation like yours, time is a precious commodity. And you can rely on the DM1100's advanced technology to help you get the jobs out the door quickly.

- **True Mixed Mail Feeding** eliminates manual sorting of varying types of mail. With specially designed self-aligning rollers and anti-skew sensors, the DM1100™ feeder stack accepts capacity up to 6" of varied types of material in a continuous stream. Even "puffy mail" (bubble-lined envelopes) moves effortlessly through the system with accurate rating and solid postage application.

- **Weigh-On-The-Way™ (WOW™)** In-line weighing processes mail faster than ever before at 145 letters per minute, handling mixed-sized mail up to 12" x 15" and weighing up to 500g (16oz) automatically. WOW™ individually weighs your mail pieces, measures the size and sets the system to print the correct postage on each piece. This maximizes the overall throughput of your mail and eliminates end-of-day bottlenecks.

- **Seal in Open and Closed Flap** Minimize hand-sorting with the DM1100™. The system is highly intelligent and accommodates mixed envelope flap configurations. If you have a stack of closed flap, open flap and pre-sealed mail all mixed together, it's no problem. The DM1100™ handles them effortlessly.

- **Postcards and "Dark Mail"** can be difficult to process. But not for the DM1100™. Equipped with advanced detection sensors located throughout the feeding and transport path, difficult material is processed painlessly. The sensors automatically align the mail piece to protect its contents while ensuring precise postage imprinting.

- **Jet-Spray Sealing with Sensor Controls** gives you the confidence that any style envelope is securely sealed. Exclusive sensors identify and follow the contours of the envelope flap, applying the appropriate amount of sealant to the glue line. The system's unique interlocking pressure rollers apply just the right amount of pressure to ensure tip-to-tip sealing.

- **Differential Weighing** – This feature enables you to place mixed mail pieces on the scale platform, and as you remove a single piece from the stack, the correct rate is calculated and the proper postage is printed. This greatly speeds the processing of mixed weight mail and parcels, and increases your mailroom efficiency.

- **Auto Tape Mode** – Processing heavier mail that requires a tape can be repetitive and time consuming. This feature sets the system to automatically generate a tape when material is placed on the scale.

- **Dual Tape Capability** – The DM1100™ Drop-In Roll Tape system is designed with efficiency in mind. You can use the feature with either gummed or pressure-sensitive tape and deliver the tape either wet or dry. Your supply usage will be trimmed down since each tape is cut to the exact size.

- **Standard Accounting** – Tracks and displays expenses for up-to 300 accounts. A built-in keypad allows the full naming of accounts, and speed codes provide for quick selection.

The DM1100™ with coveted IntelliLink® technology gives you operational authority

At the end of the day when the mail needs to get out, the DM1100™ is a vital necessity and an integral part of your operation. With the easy-to-use Control Centre in front of you, it puts you in the driver's seat and gives you the power to make the right decisions for your business mailing needs. The system comes fully equipped with the revered IntelliLink® technology, an integrated and intuitive interface that delivers single-point access to everything you need to manage your operation efficiently and effectively. You can easily activate and control all of the functions of the DM1100™ directly from the IntelliLink® Control Centre, giving you access to dynamic capabilities.

Intellilink® Technology — gives you direct access to a complete suite of management information and service capabilities that will help raise your mail centre to new levels of productivity and efficiency.

High Speed Downloads

- Ability to interface with a high speed internet connection such as your LAN for 24/7 speedy downloads of postage and rate updates.

- Fast upload of Statement of Mailings to Canada Post.

IntelliLink® Package Services

- Save a minimum of 8% on postage costs for your packages.
- Save time - eliminate time consuming paper work. IntelliLink® Package Services automatically weighs, rates and records the shipping details of each package.

PitneyWorks™

- Why keep YOUR money tied up in postage when it could be in your bank account.
- PitneyWorks™ is a convenient alternative to prepaid postage.
- Enjoy convenience and peace of mind knowing that you will never run out of postage.

IntelliLink® Power

- Get instant updates to your DM Series™ operating system for maximum performance and productivity.

Exclusive Pitney Bowes Services

- "My Account" at www.pitneybowes.ca allows you to order supplies, check on the status of your order and even request service! Our professional services ensure peak performance of our equipment solutions.

Built to last and designed for maximum uptime

- Advanced engineering has produced a system with more capabilities and fewer moving parts.

Flexible accounting options

Money management at its best. Whether you want to track 1 or 1,000 accounts, the flexibility is yours. Take advantage of one of our Standard Accounting packages, Budget Manager™ or Business Manager. Mail accounting allows you to effectively manage, track and charge-back departmental or client costs.
