Mission of the Veterinary Technology Program

The mission of the Veterinary Technology program at Kent State Trumbull is to provide quality learning opportunities for caring and compassionate individuals from a dedicated and professional faculty. Qualified students are challenged with knowledge, as well as technical and critical thinking skills that will enable them to perform as professionals in order to enhance the Veterinary Medical Team. Students will have the opportunity to gain skills that will encourage life-long learning and professionalism. Successful graduates will become excellent providers of quality care for animals and outstanding members of our society.

Introduction

- Kent State Trumbull looks for highly motivated and academically successful students interested in becoming Veterinary Technicians. The program also looks for individuals with veterinary experience who have an understanding of the field of veterinary medicine.
- The Veterinary Technology program allows one admission per year with up to 48 students admitted at the **TUSCARAWAS** Campus, **and** up to 24 students at the **TRUMBULL** Campus.
- The Veterinary Technology curriculum provides combined studies of college level general education courses and rigorous course work in science, animal health, management and veterinary medical concepts.
- All students graduating from an AVMA-accredited program are required to pass a written board examination in order to earn a Registered Veterinary Technician License for the State of Ohio.

Admission Process to Kent State Trumbull and Veterinary Technology

The Veterinary Technology program includes a selective admission process. Below are the steps for applying for admission.

Admission to Kent State

1. Submit an application for admission to Kent State Trumbull. Your application can be completed online at www.kent.edu/admissions/apply or by contacting 330-675-8967 and requesting an application packet.
2. Arrange to have official transcripts of all previous high schools and colleges attended sent to Kent State Trumbull. Verify that official transcripts have been received and are on file.
3. If accepted, you will receive your acceptance packet via land mail. Follow all instructions on your acceptance letter, including setting up your Placement Assessment.
4. Be sure to obtain information about applying for Financial Aid, including but not limited to scholarships, loans, grants or payment plans.
5. You must complete DKSTAR: Destination Kent State @ Trumbull Advising & Registration. This is the university orientation. This orientation is separate from the VTEC Orientation.

Admission to Veterinary Technology Program

1. Attend a **Veterinary Technology Information Session** or meet with the Program Director.
2. Submit an Application for Admission to the Veterinary Technology program by May 15, 2021 for acceptance into the program for Fall 2021. The application is found on our webpage <http://www.kent.edu/trumbull/veterinary-technology>
3. Upon application to the VTEC program, students will indicate their campus preference – **Tuscarawas** or **Trumbull**.
4. Submit the Field Experience form (as applicable) along with the Application for Admission by March 15, 2021.

Frequently Asked Questions

Q: How long is the program?

A: The curriculum is 64 semester hours – not including any required prescription courses. Students may elect to attend on a part-time or full-time basis. The length of time varies depending upon how many hours are completed each semester. Each student should meet with an academic advisor in order to register for classes and establish a timeline for completion of the program.

Q: What classes should I think about taking now?

A: Students interested in Veterinary Technology are strongly encouraged to meet with an academic advisor in order to schedule classes. All new students are required to meet with an academic advisor. It is HIGHLY recommended that students complete placement and general studies/core courses prior to applying to the program.

Below is a list of related courses students can take prior to admission into the program. It is important to note that some students may need to take prescribed math, reading or English courses as designated by the ALEKS and Accuplacer assessment test and/or other science courses recommended by their academic advisor.

CHEM 10050	Fundamentals of Chemistry	BSCI 10110	Biological Diversity
BSCI 20021	Basic Microbiology	BSCI 20022	Microbiology Lab

Q: What are the minimum admission requirements for the Veterinary Technology program?

A: Admission to the Veterinary Technology program is selective and competitive. Below are minimum requirements:

- High school graduate or GED equivalency;
- Cumulative grade point average (GPA) of 2.5 or higher;

- Field experience of (15) REQUIRED hours under the supervision of a registered veterinarian technician demonstrating exposure to the Veterinary Technology field. See below.
- All math placement courses completed prior to admission into the program is required.
 1. If less than a 16 ACT Math subscore, students will need to complete Basic Algebra II if required by ALEKS testing, and MATH 10675 or MATH 11010, or any Math course that satisfies the CHEM 10050 pre-requisites.
 2. If higher than 16 ACT Math subscore, students will need to complete any pre-requisite math courses based on ALEKS testing.

Q: What are the criteria for prioritizing admissions?

A: Admission into the Veterinary Technology program is prioritized on a point system in which the Admissions Committee considers the following areas:

- Grade point average (GPA) – a minimum GPA of 2.5 is required in order to apply to the program;
- Extent of completion of prescribed and general studies courses, related courses, and electives;
- Testing results, i.e. Acuplacer, ACT, SAT;
- Field experience in veterinary technology: field experience hours are **REQUIRED**. Applicants must have 15 hours of required field experience to apply to the program. An applicant can gain additional points for their admission packets if they have 40 or more field experience hours.

Q: What type of field experience should I have in order to apply?

A: Field experience is defined as volunteering, observing, or shadowing at a veterinary practice preferably one in which a registered veterinary technician is employed.

Performance Standards – Veterinary Technician

Performance standards are necessary in a competent veterinary health technician. These standards are necessary for the veterinary technician to be able fulfill the basic duties of the occupation.

1. PHYSICAL REQUIREMENTS

- a) Ability to tolerate walking and standing for sustained periods of time.
- b) Capable of lifting and/or carrying up to 50 pounds from floor to waist level frequently.
- c) Capable of using hands and arms to handle, install, position and move materials.
- d) Capable of handling, positioning and restraining live animals.

2. SENSORY ABILITIES

- a) Visual ability to see details at a close range and to make observations and assessments necessary in animal care. Be able to use diagnostic equipment i.e. microscope, thermometer, refractometer, etc.
- b) Auditory ability sufficient to monitor and assess health needs. Hear auscultatory sounds, monitor alarms, emergency and cries for help. Hear warning sounds from animals and humans of impending danger / injury.
- c) Tactile ability sufficient for physical assessment and to perform nursing duties such as palpation during physical exams, or administering oral, intramuscular, subcutaneous, and intravenous medications.

3. MENTAL

- a) Amenable to learning the safe handling, restraining and working with any species of domestic or exotic animals without fear. These animals may be sick, injured, fractious, or aggressive without fear.
- b) Willingness to assist with or perform a wide variety of routine medical surgical and diagnostic procedures common to the veterinary setting; including humane euthanasia.
- c) Capacities to read and hear, understand, and quickly execute complex verbal and written instructions given in English.

- d) Possess emotional stability when performing duties in animal life and death situations or other stressful situations.
- e) During emergencies, being able to respond promptly and appropriately.

Veterinary Technology Course Descriptions

BSCI 10100 Anatomy for Veterinary Technicians (5 credits)
Compare/identify anatomy and basic physiological functions of domestic animals: skeletal, muscles, integumentary, special sense organs, respiratory, digestive, urinary, reproductive, mammary glands, endocrine, nerves, dental, immune. Lecture 4 hours, laboratory 3 hours weekly. Prerequisite: None.

BSCI 10110 Biological Diversity (4 credits)
Considered first course in biology majors' sequence. Examines the biodiversity of life from its origins to present-day microbes, plants and animals; their behavior, ecology and reproduction. Three hours lecture and two hours lab weekly. Field trips. Prerequisite: None. Special fee: \$4/cr. hr.-subject to change.

BSCI 20021 Basic Microbiology (3 credits)
Principles of microorganisms having a direct relationship on the health and well-being of humans. Prerequisite: BSCI 20020; or BSCI 10100 and 10110; or BSCI 11010 and 11020; or ATTR 25057 and 25058; or EXSC 25057 and 25058; and CHEM 10050 or 10052 or 10054 or 10060.

BSCI 20022 Microbiology Lab (1 credit)

CHEM 10050 Fundamentals of Chemistry (3 credits)
Basic concepts of chemistry (including atomic structure, chemical bonding and reactions) necessary for courses in elementary organic chemistry and physiological chemistry. Prerequisite: ACT math score of 16; or MATH 00007 or MATH 00023 or MATH 00024 or MATH 11009 or MATH 11010 or MATH 11012 or MATH 12002 or MATH 12011 or MATH 12021.

ENG 11011 College Writing I (3 credits)
The study and practice of academic writing, including an introduction to rhetorical principles, the writing process, critical reading, research, and technology. All Kent campus students begin the College Writing sequence with ENG 11011. Prerequisites: ACT English score of 18-25; or SAT writing score of 430-590; or Compass writing score of 69-94.

HUMANITIES ELECTIVE Determined in consultation with an academic advisor (3 credits)

SOCIAL SCIENCE ELECTIVE Determined by consultation with an academic advisor (3 credits)

MATHEMATICS AND CRITICAL REASONING ELECTIVE

Determined by consultation with an academic advisor (3 credits)

US 10097

Destination Kent State: First Year Experience (1 credit)

Assist students in making the transition to the university, improving and refining academic skills, participating in the advising system and selecting or confirming a major. Required of all entering freshmen. Prerequisite: None.

VTEC 10001

Introduction to Veterinary Technology (2 credits)

Introduction to veterinary technician's career: medical terminology, career choices, occupational safety, human-animal bond, pet loss, euthanasia, animal husbandry and basic nutrition, breed identification, basic animal. Prerequisite: None.

VTEC 10002

Veterinary Nursing I (3 credits)

Introduction to animal nursing: record keeping, kennel sanitation, animal restraint, syringe and needle identification/handling, injection techniques, physical exams, grooming, and administration of medications. Lecture two hours, laboratory 3 hours weekly. Prerequisite: Admission to Veterinary Technology Program.

VTEC 10204

Clinical Laboratory I (3 credits)

Introduction to clinical laboratory: equipment and equipment maintenance; hematology and serology; internal and external parasites. Lecture two hours. Prerequisite: Admission to Veterinary Technology Program.

VTEC 10205

Veterinary Nursing II (3 credits)

Clinical application off-site. Emphasis on skills from 10002: physical exam, meds, blood vessel catheterization, venipuncture, fluid therapy, wound care, dental prophylaxis, first aid, bandaging, CPR. Lecture 2 hours, laboratory 3 hours weekly. Prerequisites: BSCI 10100, CHEM 10050, HED 14020, VTEC 10002, 10204. Pre- or corequisite: VTEC 10001.

VTEC 10206

Pharmacology (2 credits)

Regulations controlling the use of drugs and biologicals, classifications and mechanisms of action of pharmaceuticals, dosage calculations, labeling, packaging, and dispensing of veterinary products. Lecture 2 hours weekly. Prerequisites: BSCI 10100, 10110, CHEM 10052, 10053, HED 14020, VTEC 10001, 10002, 10204. Pre- or corequisite: VTEC 10205.

VTEC 20008

Clinical Laboratory II (3 credits)

Continuation and application of skills from Clinical Laboratory I, including hematology, serology, urinalysis, cytology, and other laboratory skills. Lecture 2 hours, laboratory 3 hours weekly. Prerequisites: BSCI 10100, CHEM 10050, HED 14020, VTEC 10002, 10204. Pre- or corequisites: VTEC 10001, 10205.

VTEC 20215

Veterinary Office Applications (1 Credit)

Introduction to computer systems utilized in Veterinary Offices and office procedures and applications. Prerequisites: VTEC 10001, 10002, 10204.

VTEC 20009

Veterinary Nursing III (3 credits)

Continuing nursing skills/techniques emphasizing large animal species: restraint, venipuncture, behavior, breeds, feedstuffs, food safety, meds, preventive care, surgical procedures, lameness. Lecture 2 hours, laboratory 3 hours weekly. Prerequisites: BSCI 10110, CHEM 10052, 10053, VTEC 10001, 10002, 10204, 10205, 20008. Pre- or corequisite: VTEC 10206.

VTEC 20010

Imaging Techniques (3 credits)

Principles and application of the production of x-rays, processing, radiation safety, storage, patient positioning, and other imaging techniques. Lecture 2 hours, laboratory 3 hours weekly. Prerequisites: BSCI 10100, 10110, CHEM 10052, 10053, VTEC 10001, 10002, 10204, 10205, 20008. Pre-or corequisite: VTEC 10206.

VTEC 20212

Surgery and Anesthesia (3 credits)

Principles and application of the use of anesthetics, patient monitoring, pre-surgery preparation and post-surgical patient care, sterilization, surgical preparation, surgical assisting, equipment maintenance. Lecture 2 hours, laboratory 3 hours weekly. Prerequisites: BSCI 10100, 10110, CHEM 10052, 10053, VTEC 10001, 10002, 10204, 10205, 20008. Pre- or corequisite: 10206.

VTEC 20213**Nutrition and Disease (2 credits)**

Principles of the disease process, disease control and prevention of common diseases of domestic animals. Nutrition principles especially for clinical diseases will be covered. Lecture 2 hours weekly. Prerequisites: BSCI 20021, VTEC 20009, 20010, 20212.

VTEC 20216**Exotics and Lab Medicine (2 credits)**

Students study practical nursing skills for laboratory and exotic animal procedures. Prerequisites: BSCI 20021, VTEC 20002, 20010, 20212.

VTEC 20316**Veterinary Hospital Practicum (5 credits)**

Students gain practical experience in veterinary clinic or approved clinical site to focus on mastery of all clinical skills need for this career. Prerequisites: BSCI 20021, VTEC 20009, 20010, 20212. Corequisites: VTEC 20213, 20214.
