EXPECTATIONS

*STURDY AND SUSTAINABLE:
SEAMS OF STRENGTH ARE A SOLID FOUNDATION*

When the weight of the world is depending on you; strength matters. At GLI, we know that our inground vinyl liners are the base upon which your entire pool setting is built; we understand the importance of a strong foundation. That's why all GLI liners are carefully constructed and designed with the highest quality vinyl using the most sophisticated, computer-aided technology and leading-edge processes. We custom build each liner to the ideal specifications of your individual needs. GLI cautiously considers every aspect to accommodate the characteristics that make your pool unique (including steps, bar stools or other cut-out necessities).

What is Vinyl MIL?

MIL is a measurement of vinyl's thickness and all GLI liners are offered in no less than 20 or 28 MIL, which is the highest quality standard in the industry. We take into consideration factors such as sun exposure, pool cover time and surface setting when designing your custom liner. Our experts help you select the ideal liner thickness to best suit your needs by consulting with you to determine the most crucial characteristics of your individual pool setting.

GLI offers a variety of options, as follows:

Available as **REFERENCED**
in 20 or 28 Mil.

Available in 28/20 Mil.
Free wall upgrade.
