Inspiring excellence in guided surgery

“ Comprehensive digital solutions turned dentistry into a whole new experience.

As an early adopter for many years, I have observed, experienced and consulted on the development of guided surgery software.

The barrier to digital dentistry has been how to combine the crucial pieces of information and external skills needed to treat patients. The development of open and integrated platforms is transforming dentistry in much the same way as social media did with the Internet.

Now, with exoplan, I have a comprehensive solution to combine crucial pieces of implant planning information and turn them into results. The unique software platform from exocad allows me to connect and benefit from every possible device, free of barriers.

All tools are immediately accessible, from smile design through guided surgery to the manufacturing of the final prosthetic.

It continually improves our daily work and makes our treatments even more successful. It is an excellent benefit for our patients and the entire team, and it makes my life easier!

Uli Hauschild, owner of the dental laboratory Uli Hauschild Dental Design in San Remo and vice president of the Digital Dentistry Society

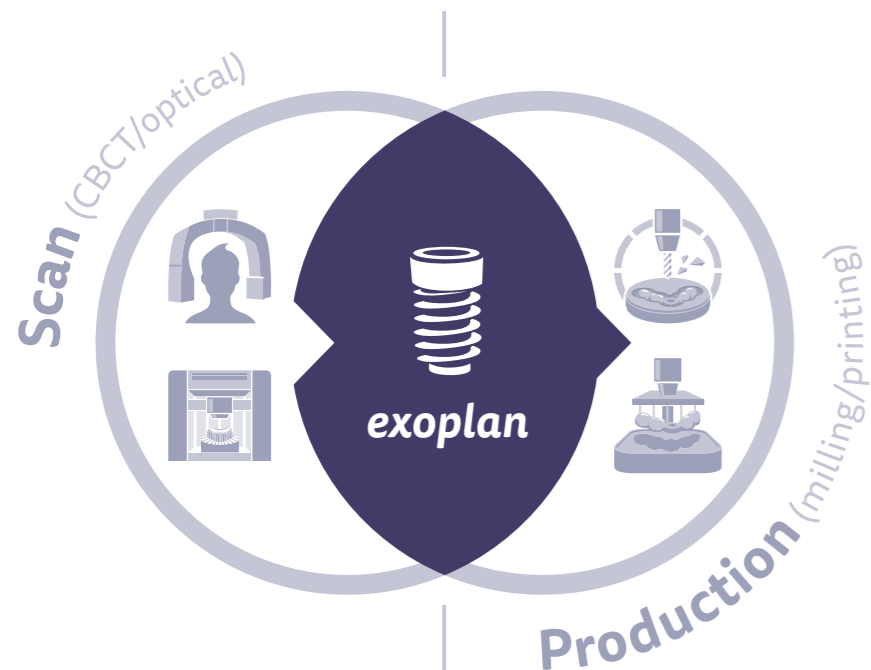

Innovative, intuitive, integrated

Your implant planning with *exoplan*

Discover our powerful implant planning and surgical guide design software *exoplan* – created to provide dental labs, dentists, implant specialists and surgeons with maximum flexibility. Based on the renowned *exocad* platform, *exoplan* guarantees a seamless digital workflow and the highest usability and performance.

exoplan guides dental professionals through the planning of implants and the design of surgical guides in one intuitive, digital workflow. Thanks to the open, vendor-neutral software architecture, open 3D scanners, 3D printers or milling machines can be used. Our integrated software solutions guarantee the seamless functionality of the digital workflow – from virtual, prosthetic-oriented implant planning with *exoplan* to designing surgical guides with our *Guide Creator*. Especially edentulous patients can be treated particularly precisely and predictably with guided surgery. In addition, *exoplan* users can take advantage of seamless integration with *DentalCAD*, *exocad*'s dental CAD software, to facilitate their planning and production of implant-supported, temporary and final prostheses. With the immediate load feature, popular for provisionals, the original prosthesis scan is automatically loaded into *DentalCAD*.

***exoplan* – our high-performance, user-friendly open software solution for your implant planning and surgical guide design.**

Visualize, plan, create

Expand your service offerings with our innovative implant planning platform *exoplan* and its extensive features. With *exoplan*, the choice is yours! You can either plan and produce surgical guides in-house or outsource the planning, design or manufacturing. *exocad*'s proven wizard-based workflows guide you through each step of the process. Benefit from our broad library of implant systems and prosthetic components, which offer you and your customers greater flexibility and choice.

In-house surgical guides – with *Guide Creator* module

Design your own surgical guides and manufacture them in-house with your 3D printer or milling machine to maximize the return on hardware investments. Thanks to the standard data format STL, you have the freedom to choose your hardware and production center.

Free choice – comprehensive implant and component library

The *exoplan* library comprises over 520 different implant systems from top-tier manufacturers – such as Straumann, Nobel Biocare, Dentsply Sirona, Zimmer and Camlog – as well as numerous local suppliers. Users can also access *exocad*'s comprehensive library of over 60,000 compatible prosthetic components.

Highest accuracy – alignment of scan data

Combine CBCT and surface scan data of a model by taking advantage of *exoplan*'s robust alignment tools. Additional refinement features maximize the accuracy of the aligned scans.

High usability – wizard and expert modes

Thanks to *exoplan*'s intuitive guided approach, implant planning with consistent results has never been easier. *exocad*'s proven wizard-based workflow guides you through every step of the process. In *exoplan*'s expert mode, you can access extensive supplementary features and tools.

Ultra-fast – *exoplan*'s DICOM viewer

Get enthused with *exoplan*'s high speed in processing large CBCT files. Due to optimized data-handling algorithms and snappy graphics rendering, *exoplan* provides market-leading DICOM loading and visualization speed.

Secure – planning reports and surgical protocols

Facilitate your communication with surgeons through detailed reports and surgical protocols. Document every case and component configuration automatically.

One of the most exciting advantages of *exoplan* is its platform – the worldwide renowned and leading *exocad* CAD software. It makes *exoplan* a very proven and stable software application with numerous user benefits. *exoplan* can easily and seamlessly be integrated with all *exocad* products and modules related to implant indications. Our software solutions offer you the perfect symbiosis of prosthetics and implant planning – for reliable results that are cost and time efficient.

Exceptional flexibility with *exoplan* Control every step according to your requirements

Implantology is an integral part of modern patient treatment. It can involve many steps and parties from implant planning to surgical guide design and manufacturing. Enjoy freedom of choice and manage your individual process for guided surgery with *exoplan*!

Thanks to open yet integrated solutions for digital dentistry, you are in control of the desired workflows. While surgeons may only need our *exoplan* planning tools, dental practices and laboratories benefit from the complete solution, including our *Guide Creator* module.

Diversity in every field Comprehensive selection of implant libraries

To allow for the optimum use of *exoplan*, exocad provides a large range of validated and tested implant, drill and drill sleeve libraries for customers to download free of charge. The range is expanded every day. Manufacturer-independent platform switching concepts are supported, as is the option of using

compatible components from third-party providers in the original manufacturer workflow. The extensive selection of leading implant manufacturers allows for the free choice and use of any preferred implant system. No hidden costs

Maximize your profits with our simple and transparent pricing model. *exoplan* has no click fees and no hidden costs. With a low annual fee – which includes updates to future versions – you have access to our software for an unlimited number of cases. The modular software structure with our implant planning component and *Guide Creator* module ensure that you only pay for what you really need. Thanks to its open and vendor-neutral software architecture, you can use *exoplan* with your existing equipment, such as any open 3D scanner, milling machine or 3D printer.

Purchase exocad through one of our many partners

Rather than selling directly, exocad works with manufacturers, system integrators and dealers to provide integrated solutions, tailored for you. Our resellers provide their customers with extensive training and competent support. For comprehensive product support, offers or more information, contact one of our partners.

At a glance

Why dental professionals trust our software solutions

Faster workflows, improved proficiency

Save time by working with high-performance software that runs robustly, even when dealing with large and complex cases. Quick response times and optimal usability help speed up your daily work.

Reliability you can trust

You can rely on us to create software that you will continue to appreciate and profit from. Our product has proven its stability time and time again because we always pay the greatest attention to quality and detail. Furthermore, our reliable upgrades are always driven by your needs and provide new possibilities for handling a wide range of cases.

Easy to use and surpasses your high expectations

The exocad software makes even complex procedures simple. By working closely with dental professionals such as yourself, we gain a deep understanding of your processes, allowing us to create more accessible dental software for the digital age.

Independent and innovative

Our software puts you at the forefront of innovation. Since our foundation, our dedicated team of engineers and researchers has consistently developed state-of-the-art innovations for the dental industry and redefined the limits of digital dental technology and dentistry. As an independent and hardware-neutral technology provider, our goal is to push the limits of CAD/CAM digital dentistry through software solutions.

Flexibility as you require it

Experience maximum flexibility and freedom through exocad's modular and open approach. It is not just the software that is flexible; the business model is too. Mix and match modules – it is all your choice.

Truly future-proof

We are the dental CAD/CAM software provider with the widest choice of integrated solutions using third-party scanners, mills, printers and materials. And we are always open to new ideas – ready to support the best solutions of today and tomorrow – to meet and exceed our customers' requirements.

Our solid foundation – dental CAD software from exocad

exocad was founded under the principle of being truly open and connected. As the leading OEM manufacturer for dental CAD software worldwide, our core competence is to establish interoperability standards. Manufacturers can thus integrate their databases, products, libraries and services. These integrations allow companies to focus on their core business while we continue to expand the depth of supported indications.
