Remove special tool 11 3 260.

# **Important!**

Do not damage the cylinder head.

If necessary, machine open-end wrench accordingly.

Align camshafts with open-end wrench.

Turn engine from 30° before TDC position in direction of rotation as far as TDC position.

Secure crankshaft in firing TDC position with special tool 11 2 300.

# **Important!**

Remove special tool 11 2 300 before starting engine.

# **Automatic Transmissions Only:**

Illustration does not show automatic transmission.

## **Important!**

On engines with automatic transmissions, there is shortly before the special tool bore (1) a large bore (2) which can be confused with the special tool bore.
