Configure security software

2. Configure security software

2 Configure security software

The following section explains how to configure your security software for installation and optimum operation of ZEN 2012 (blue edition) properly.

NOTICE

The term security software combines all programs which protect your computer from viruses, unwanted interventions, etc.. This includes virus scanners, firewalls and intrusion detection systems. If you don't adapt the security settings there can be problems while installing or running ZEN 2012 (blue edition). The following topics will show you how to avoid problems with the security software and adapt the settings correctly.

2.1 Before installation

To ensure correct installation, we recommend to perform the following settings:

Lower security rules

Set the security rules from "high" to "low". How you set the security rules, refer to the respective operating instructions of your security software.

Disable security software

In rare cases, you may need to disable the security software completely. Make sure that you enable the security software after installation. How to disable or enable the security software, refer to the respective operating instructions of your security software.

2.2 After installation

To ensure the optimal operation on Windows, we recommend you to perform the following settings after the installation:

Exclude ZEN program files from virus scanning

Exclude the files **ZEN.exe**, **ZENService.exe** and **ZISProtocolServer.exe** from virus scanning. How to exclude files from virus scanning, refer to the respective operating instructions of your security software.

Exclude ZEN specific file extensions from virus scanning Exclude files with the file extensions*.czi, *.zvi, *.zishm from virus scanning. How to exclude file extensions from virus scanning, refer to the respective operating instructions of your security software.

Exclude ZEN specific folders from virus scanning

Under **Help** | **About ZEN** ... | **Show ZEN Information**| **Folders** you can see the program specific folders. How to exclude folders from virus scanning, refer to the respective operating instructions of your security software.

Fig. 1: Program specific folders

2.2.1 Default folders

In the following table you can see the folders in which the captured images will be stored in ZEN 2012 (blue edition) per default.

Operating system	Folder / path
Windows XP	My Documents\My Pictures and
	%USERPROFILE%\My Documents\My Pictures and
	C:\Documents and settings\{user name}\My Documents\My Pictures
Windows 7:	My Pictures and
	%USERPROFILE%\My Pictures and
	C:\Users\{user name}\My Pictures

Change default ZEN image folder

Under **File | Export/Import | Export** or under **File | Save as** change the folder you want to store your images into.

Change default folder for automatic image storage and continuous image acquisition (camera streaming)

Under Tools | Options | Saving | Auto Save Path set your desired path/folder..

Change default folder for images on your operating system

- In Windows XP in the context menu of **My Documents**.
- In Windows 7 in the context menu of My pictures.

2.2.2 Temporary files

Operating system	Folder / path
Windows XP	%TEMP%* or
	Local settings\temp or
	%USERPROFILE%\Local settings\Temp or
	C:\Documents and Settings\{user name}\Local settings\Temp
Windows 7:	%TEMP% or
	%LOCALAPPDATA%\temp or
	C:\Users\{user name}\AppData\Local\Temp

Change default folder for temp files

- First, define an appropriate path for the TEMP environment variable (user context).
- Then define the environment variable SWAP indicating a corresponding path.

For Windows 7 (engllish) this has the following paths or folders that you must exclude from virus scanning:

- C:\Users\{user name}\My Pictures
- C:\Users\{user name}\AppData\Local\Temp
- **%TEMP%**
- SWAP%

2.2.3 System specific folders

If you are using a ZEISS PC system, the location of your images is predefined. The tables show the PC system specific folders.

High End image analysis work station

QuadCore Intel XEON Workstation 2,66 GHz (ZEISS 35A FSC CELSIUS R650) (Art. Nr.:410203-9903-000, 410203-9905-000)

Operating system	Folder / path
Windows XP (English)	D:\User_Data\{user name}\My Documents\My Pictures
	Notice:
	For Windows XP (english) the folder My Documents was moved to:
	D:\User_Data\{user name}\My Documents

High End Bildanalyse Workstation

SixCore Intel XEON Workstation 2,66 GHz (ZEISS 45A hp Z800) (Art. Nr.:410203-9906-000)

Operating system	Folder / path
Windows XP (English)	D:\Users\{user name}\My Documents\My pictures
	Notice:
	For Windows XP (english) the folder C:\Documents and Settings was moved to: D:\Users
Windows 7	D:\Users\{user name}}\Pictures
	Notice:
	For Windows 7 the folder C:\Users was moved to D:\Users
	by using a symbolic link ("junction")

Microscopy High-End, Mid-Range and Compact work stations

- QuadCore Intel XEON Workstation 2,66 GHz (ZEISS 50A hp Z820) (Art. Nr.:410203-9907-000, 410202-0000-000)
- QuadCore Intel Core i5 (ZEISS 558C FTS Esprimo P920) (Art. Nr.:410201-9908-000)

Operating system	Folder / path
Windows 7	D:\Users\{user name}}\Pictures
	Notice:
	For Windows 7 the folder C:\Users was moved to D: \Users
	by changing the registry keys:
	HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft \Windows NT\CurrentVersion\ProfileList \ProfilesDirectory
	Default: %SystemDrive%\Users
	Modified: D:\Users

2.3 Summary

To ensure correct operation of ZEN 2012 (blue edition) it is necessary to ensure that the security software on your computer is not blocking the program. For full functionality you should have made the following settings:

- You have disabled the security software during installation or reduced the security settings.
- You have excluded the entire application, the defined paths or relevant files from virus scanning.

Installing ZEN

3 Installing ZEN

NOTICE

Do not install an old ZEN version over a new ZEN version. If a version of ZEN is already installed on your PC, this version will be transformed in the current release during the installation.

- **Prerequisites** You have read the chapter Configure security software [> 15] attentivley.
 - If you have inserted the product DVD into the DVD drive, the installation will start automatically. When automatic playback has been deactivated on your computer, perform the following steps to start the installation:

Procedure 1 Click on **Computer** in the Windows start menu.

2 Double-click on the **DVD-RW drive** in the **Devices with Removable Media** section.

You will see folders and contents of the product DVD.

3 Double-click on the **Setup.exe** entry.

Depending on the security settings on your computer several warning messages could appear. Ignore the messages or confirm with **Ok**.

After a short while you will see the installation dialog with the overview of all products available. Continue with the installation of the desired product.

4 Click on the **ZEN** (x64/x32) tab.

The language selection dialog window is displayed.

5 Select the language in which you want to run the installation program from the dropdown list and click OK.

The InstallShield Wizard opens.

6 Click on **Next** button to start with the installation.

The License Agreement dialog is displayed.

🚼 ZEN x64 - InstallShield Wizard		
License Agreement Please read the following license agreement carefully.		
General Terms and Conditions of the License for ZEN and ZEN lite		
By downloading or installing the software "ZEN / ZEN lite" (the "Software") the licensee accepts the following terms and conditions.		
1a. Only valid for ZEN: This program is protected by copyright laws and provisions of international agreements. It is an offence to reproduce or sell this program (in full or in part) without authorization. Such action will lead to prosecution under criminal and civil law and may result in serious penalties or claims for compensation.		
I accept the terms in the license agreement Print I do not accept the terms in the license agreement		
InstallShield 		

- 7 Select the I accept the terms in the license agreement radio button.
- 8 Click on **Next** button.

闄 ZEN x64	- InstallShield Wizard
Destinat Click Ne	ion Folder xt to install to this folder, or click Change to install to a different folder.
	Install ZEN x64 to: C:\Program Files\Carl Zeiss\ Change
InstallShield .	< Back Next > Cancel

The **Destination Folder** dialog is displayed.

9 Click on **Next** button to install to default folder or click on **Change** button to select a different folder.

The **Customer Information** dialog is displayed.

		< Back	Next >	Cancel

The **Device Driver Installation Wizard** will be started after a while.

16 Click on the **Next** button.

The device driver installation wizard will be executed several times now because some drivers have to be installed separately. Accept the installation of the drivers by clicking on Next. After the driver installation is complete you will see the Completing Driver Installation dialog.

Device Driver Installation Wizard		
	Completing the De Installation Wizard	vice Driver I
	The drivers were successfully in:	stalled on this computer.
	You can now connect your devi came with instructions, please re	ce to this computer. If your device ad them first.
	Driver Name	Status
	Carl Zeiss Microscopy G	Ready to use
< Back Finish Cancel		

17 Click on the **Finish** button.

The question for changing **Windows Firewire driver** to **support legacy drivers** is displayed.

Question	
?	To allow using the AxioCam(s) in Windows 7, the Windows Firewire driver has to be changed to support legacy drivers. If you like to install the Firewire legacy driver press YES, to skip this step press NO!
	Yes No

18 Click on the Yes button if you want to allow it. This will install the Firewire legacy driver. This is necessary if you want to use Axiocams with your system.

The InstallShield Wizard Complete dialog window is displayed.

岩 ZEN x64 - InstallShield Wizard		
	InstallShield Wizard Completed	
	The InstallShield Wizard has successfully installed ZEN x64. Click Finish to exit the wizard.	
CV Cont	Copy License Files	
	Show the Windows Installer log	
	< Back Finish Cancel	

- **19** Click on the **Copy License Files** button to copy the license files from the supplied removable medium to your computer.
- 20 Click on the **Finish** button.

You have successfully installed ZEN 2012 (blue edition) on your computer. Start the software by clicking on the ZEN blue icon on your desktop.

Changes on the operating system

4. Changes on the operating system

4 Changes on the operating system

NOTICE

Installation of software, hardware drivers, changes to operating system settings or other system interference beyond the actions needed to operate ZEN 2012 (blue edition) are always in the responsibility of the customer, because the potential impact can not be estimated.

The following modifications have, in our experience, no effects on the functionality of the PC system:

- Network integration possible
- Installation of security software / antivirus software (highly recommend if your PC is attached to a network)
- Logon as Domain Users in an Active Directory environment (possibly with local administrator privileges if user needs to install software)
- Installation of standard software (eq Microsoft Office)
- Installation of printers
- Windows automatic updates and third-party software updates (Windows Service Packs are to be considered different).

Recommended settings:

Allow option "Check for updates but let me choose whether to download and install them". That prevents, for example, aborting time series experiments if an automatic restart is performed after an automatic update.

Information about allowed Windows service packs can be found under System requirements [> 9].

Effects of following modifications can't be estimated:

- Modifications in the Windows operating system
- Implementation of group policies and scripts
- Installation of third-party software with hardware support.
- Installation of third-party software for generating large data rates (such as backup software) due to possible performance problems of the simultaneous operation of Fast Acquisition Systems
- Storage of data on network drives by redirecting folder structures (eg, there can occur performance problems in case of Fast Acquisition systems or limitation of the available data storage capacity (disk quota))

If problems occur, the system can be restored to the state of delivery by a ZEISS service technician.

Compatible cameras

5 Compatible cameras

The table below reveals, which camera of the **AxioCam**-series is compatible to your installed Software:

Name	ZEN 2012 SP2 (blue edition)	ZEN 2012 (black edition)	AxioVision Rel. 4.9 SE 64	AxioVision Rel. 4.8.2 SP2 32-bit
AxioCam MR Rev.1

Axiocam 105	x		x	x
Axiocam 506 c/m	x			

x= compatible

Install 3rd Party Drivers

6 Install 3rd Party Drivers

Prerequisites I You see the installation dialog with the overview of all products available.

Procedure 1 Click on the **3rd Party Drivers** button.

The **3rd Party Drivers** dialog opens. You see the overview with all 3rd party drivers available.

2 Click on the driver you want to install.

The installation routine of the specific driver starts automatically. Confirm occuring messages with OK.

You have successfully installed the driver. The following drivers are available:

Manufacterer	Description
PVCam	camera driver
QImaging	camera driver
Hamamatsu Phoenix	camera driver
Hamamatsu FireWire	camera driver
Andor	camera driver
Matrox Solios	camera driver
PCO SDK	camera driver
PCO Silicon Interface	camera driver
BMC Fast Acquisition	Trigger board driver

Tab. 2: 3rd party drivers available
