

Installing Your WiFi capable imageCLASS Product onto additional computers

Windows OS

*When you are in an IPv6 environment, you may not be able to use the installation procedure below to install the MF drivers.

See "Installing the MF Drivers on the WSD Network" to install the MF Drivers.

*Note that you cannot use the scan functions in an IPv6 environment.

To install the Presto! PageManager or e-Manual please see "Installing using [Custom Installation]" in the e-Manual.

1. Insert the User Software CD-ROM into the slot on your computer.

	Search by IP Address		Lip	date Device List
Search Option		-	Back Next>	Cancel

When no devices are displayed in [Device List] Try the following procedure.

1. Check the following.

- The computer and machine are connected over the network.
- The machine is turned ON.
- The IP address is set correctly
- The computer and machine are on the same subnet
- Security software is disabled
- 2. Click [Update Device List].

<< Previous

If the problem persists, try the following procedure.

- 1. Click [Search by IP Address].
- 2. Enter the IP address of the machine.

*If the IP address of the machine is set between "169.254.1.0 and 169.254.254.255", it means that the IP address is automatically assigned to the machine in the auto configuration procedure.

When the IP address is not a link-local address, set up your computer and the machine to be on the same subnet.

This allows the installer to search the machine.

Search by IP Address
