## MODEL 760

# INSTRUCTION FOLDER and PARTS PRICE LIST

The American walnut stock features a cheekpiece and Monte Carlo comb on the BDL grade. For left hand shooters, a cheekpiece and left hand safety are available in the BDL. In both grades, the form fitting pistol grip has been accentuated with a black cap and white spacer. A black fore-end tip and white spacer are also standard items on the fore-ends of both grades.

Custom checkering has been applied to the stock and fore-end. An attractive basket weave pattern highlights the BDL grade while a neat "skip line" design is offered in the standard. The tough Du Pont RK-W wood finish adds a lustrous quality appearance to both grades.

**SAFETY (Fig. 1)**—Cross bolt type at rear of trigger. Red band marking on safety will not show when safety is pushed across to ON SAFE stop position. Trigger cannot be pulled to fire cartridge.

**Caution:** Before firing make sure barrel is clean, free of heavy oil, grease, snow, or any obstruction.

**To FIRE**—Push safety to FIRE position. Red band marking on safety will show.

**REPEAT FIRING**—Trigger must be pulled each time. Slide fore-end back and forth to eject fired cartridge case and reload barrel.

**TO SINGLE LOAD BARREL**—Push safety ON SAFE. Unlock action by pressing upward on action bar lock (Fig. 1). Slide fore-end back to open action. Drop cartridge into open receiver port and upon empty magazine. Close action to load cartridge in barrel.

**TO MAGAZINE LOAD**—Push safety ON SAFE. Rotate magazine latch (Fig. 1) forward and pull out magazine. Load cartridges toward small front end of magazine. Press cartridges down into magazine one upon the other, until held in a stagger column. When fully loaded, magazine will hold four (4) cartridges. To replace magazine, operate latch again, push magazine evenly into gun. Release latch as magazine clicks into locked position.

**TO UNLOAD MAGAZINE**—Remove from gun and slide cartridges carefully forward and out of magazine. Extra magazines may be carried for fast reloading.

**TO UNLOAD BARREL**—Push safety ON SAFE. Remove magazine. Press action bar lock upward to unlock action. Open action slowly, and carefully remove live cartridge from receiver.

**SIGHT ADJUSTMENT**—Factory sights on Remington high power rifles are targeted at 100 yards and carefully adjusted at factory for average shooters. If your rifle does not appear to shoot accurately it does not necessarily mean that sights are improperly aligned. Individual differences in eyesight or method of shooting may require sight re-alignment. Make sure that adjustable dovetail front sight (where supplied) is centered on barrel. Before attempting to re-align sights it should be realized that the greater the group size the more difficult it becomes to determine where rifle is shooting (center of impact). A consistent method of holding rifle, aiming and squeezing trigger will aid in obtaining a small group size. Different sight settings are required for each cartridge type, bullet type and weight, barrel length, each range and wind condition and, most likely, each individual shooter.

To test rifle for accuracy place large target in safe area at desired range. (Before testing at a longer range it is advisable to fire a few rounds at 50 yards. At this range, bullets will generally hit somewhere on target.)

Shoot from a prone or sitting position giving body and elbows solid support. Fire four or five shots per group, using ammunition with which you plan to hunt. Shoot carefully and deliberately. If groups are at desired point, sights are correctly adjusted. If not, you should adjust sights.

If shots are too high, lower rear sight. If shots are too low, rear sight should be raised. If rifle shoots left, rear sight should be moved right by turning windage screw counter clockwise. Should rifle shoot to right, move rear sight to left, turning screw clockwise. Always move rear sight in direction you want rifle to shoot.

Information about trajectory or ballistics of your favorite load may be found in the Remington Firearms and Ammunition Catalog. A free copy may be obtained from Remington

dealers or by writing to Remington Arms Co., Inc., 939 Barnum Ave., Bridgeport, Conn. 06600.

**HANDLING**—Wipe barrel, receiver, and all steel parts to prevent rusting. Invisible "prints" of moisture can cause rust unless removed. After cold weather use, when gun is returned to warm room temperature, condensation and wetness may form. Take care that this is removed. In particular wipe dry cartridge chamber in breech of barrel, barrel bore, breech bolt, and other action parts. Lubricate sparingly unless for storage, then lubrication should be quite thorough. For cold weather shooting, use dry graphite instead of light oil. Use sparingly—a clean gun performs best.

## INSTRUCTIONS FOR ORDERING PARTS

(Please read carefully)

**WHEN ORDERING PARTS . . . MODEL NUMBER, PART NUMBER and PART NAME MUST BE GIVEN.** Give also serial number (if any), and state caliber or gauge and choke needed. Please identify from the component parts, picture or section view. When ordering interchangeable shotgun barrels, please list on separate order form. This will speed up shipment to you.

Cover only one subject in letter or order. Do not order spare parts and give instructions on repair of a gun or guns in the same letter — this delays service.

Please do not ship sample parts to Firearms Factory unless it is impossible to identify from the Parts List or Instruction Folder. See shipping instructions concerning FACTORY SERVICE.

Parts will be furnished for discontinued models as long as the supply is available. We are unable to supply parts for models or repair guns not listed in Complete Line Parts List.

The sale of the following parts and certain other parts is restricted because special tools and gauges are required during assembly to make sure the firearm will operate properly.

• Barrel • Breech Block or Bolt • Receiver

The sale of barrels and bolts is restricted. Special tools, and gauges are required for assembly.

All parts will be shipped as ordered, but since they are made to close dimensions, the particular part may require slight adjustment or fitting to assure proper functioning of the arm.

**IMPORTANT: Do not combine Part Orders with Gun Service Orders.**

Please send Part Orders direct to:

**REMINGTON ARMS COMPANY, INC.**  
PARTS DEPT.  
ARMS SERVICE DIVISION  
Ilion, New York 13357

## INSTRUCTIONS FOR FACTORY SERVICE

**Please read carefully before making shipment to the Firearms Plant at ILION, NEW YORK 13357**

Please package carefully when shipping firearms to factory. Use plenty of cushioning material to prevent movement of gun or gun parts in package during transit.

Please do not ship gun in a gun case, or special container that must be returned from the factory. The return of your gun or parts will be greatly speeded if properly packaged in a throw-away carton.

All shipments should have forwarding and return address clearly marked on gun package as well as on attached letter.

To further improve service — please attach complete letter of information securely on outside of each package returned to the factory for repairs.

Please do not return gun accessories such as sling straps, quick release swivels, special boots, covers, telescopes, mounts or any special equipment to the factory with the gun shipment.

Give full details of the contents of the shipment — state whether complete gun or part. List model name and model number, serial number (if any), and caliber or gauge.

Give full condition of contents — stock and fore-end damage (if any), metal damage (if any), barrel bent or damaged (if any), parts missing, etc. A full description will enable us to more accurately list the needed repairs.

Cover only one subject in letter or order. Do not order spare parts

and give instructions on repair of a gun or guns in the same letter — this delays service.

THEN — to avoid all possible delay in starting work on your gun or parts, please include in your first order or letter the trouble you wish corrected, any changes you desire, or parts you wish replaced.

If an estimate is required before the work is started, please advise. Otherwise we will proceed with the necessary work and send a statement of the cost to you. In this manner your gun or parts can be reshipped at the earliest possible date.

Unless you specify otherwise, shipments will be made by way of Parcel Post on small packages, Express on larger packages.

Remington gun parts are not interchangeable with those of any other make of gun. For this reason the Remington Arms Company, Inc. cannot service any gun not of our manufacture.

Repairs will be made on discontinued models as long as the supply of parts is available. However, repairs cannot be made for models which are not listed in Complete Line Parts List.

**IMPORTANT: Before packaging guns for return to factory, ALL LIVE AMMUNITION SHOULD BE REMOVED.**

If live ammunition is included in package, shipment cannot be made by Insured Mail. All other shipments may be made by Insured Mail, Express, Motor Transport, or Freight.

Please send repairs direct to:

**REMINGTON ARMS COMPANY, INC.**  
ARMS SERVICE DIVISION  
Ilion, New York 13357

PARTS AND PRICES SUBJECT TO CHANGE WITHOUT NOTICE

DELIVERIES ARE F.O.B. ILION, N. Y.

**BARREL CLEANING** — Push safety ON SAFE. Caution: Always make certain no live cartridge remains in barrel. Remove magazine, open action, and look into empty barrel chamber. For temporary cleaning, use lightly oiled cloth patches. Pull cleaning rod from breech to muzzle. Scrub bore and cartridge chamber in barrel with cleaning solvent, if necessary. Re-oil very lightly.

During field use, Remington guns will remain clean longer and continue to give all-weather satisfaction, if very little oil or lubrication is used.

**TAKE DOWN INSTRUCTION** — (see Sectional View) Push safety ON SAFE. Open action. Remove magazine. Tap out trigger plate pins and remove trigger plate assembly. Note: **Trigger Plate Assembly** (Fire Control) may be cleaned without further disassembly. (See Fig. 1).

---

This Remington rifle has been designed to satisfy your fullest expectations for excellence. Quality materials and sound manufacturing practices went into the making of this gun. The receiver was expertly milled and finish cut to design specifications. The barrel was forged and rifled by skilled barrel makers. The coloring vats have added a dense gun metal coating to metal parts.

Stock and forearm have been fully seasoned in wood kilns, then shaped by experienced wood workers. Then a durable and long lasting wood finish has been applied to bring out the natural wood grain. All parts have been carefully assembled to make a strong and smooth working action. Finally, gallery testing in shooting butts and at the range have certified that a fine rifle has been produced for your shooting pleasure and lasting satisfaction.
