

# Interconnecting Cisco Networking Devices Part 2 (ICND2)

## Course Overview

This course will teach students about implementing scalable medium-sized networks, troubleshooting basic connectivity, implementing an EIGRP-based solution, implementing a scalable, multiarea network, OSPF-based solution, wide-area networks, and network device management.

### Course Introduction

3m

Course Introduction

### Module 01 - Implementing Scalable Medium-Sized Networks

3h 55m

Troubleshooting VLAN Connectivity

VLAN Review

How to Create a VLAN

What is a Trunk

How to Configure a Trunk

DTP

VLAN Troubleshooting

Troubleshooting Trunks

Summary

Building Redundant Switched Topologies

Problems with Redundant Topologies

How Spanning-Tree Works

Versions of Spanning-Tree

PVST+

Changing the Bridge ID

Reviewing the STP Topology

What if STP Fails?

PortFast and BPDU Guard

Summary

Improving Redundant Switched Topologies with EtherChannel

What is EtherChannel

EtherChannel Protocols

How to Configure EtherChannel

Verify EtherChannel

Summary

Understanding Layer 3 Redundancy

Why Have Default Gateway Redundancy

Default Gateway Redundancy

FHRP

HSRP

HSRP Configuration

Introducing HSRP

HSRP (Cont.)

HSRP Track Interface  
HSRP Load Balancing  
Gateway Load Balancing Protocol  
QoS  
QoS Configuration  
QoS Options  
Marking  
Queuing Methods  
Congestion Avoidance  
Summary  
Demo - Initial Lab Setup  
Demo - Optimizing STP  
Demo - PortFast and BPDU Guard  
Demo - Configuring EtherChannel  
Demo - VTP  
Demo - HSRP  
Demo - QoS  
Module 01 Review

### **Module 02 - Troubleshooting Basic Connectivity**

1h 18m

Troubleshooting IPv4 Network Connectivity  
Troubleshooting End-to-End  
Verify End-to-End Connectivity  
Verify Physical Connectivity  
What is the Current and Desired Path?  
Default Gateway Problems  
DNS Issues  
ACL Issues  
Summary  
Troubleshooting IPv6 Network Connectivity  
IPv6 Address Types  
How to Troubleshoot IPv6 Connectivity  
Verify End-to-End Connectivity  
Identifying the Path  
Default Gateway Problems  
DNS Problems  
ACL Problems  
Summary  
Demo - Troubleshooting an ACL  
Module 02 Review

### **Module 03 - Implementing an EIGRP-Based Solution**

1h 37m

Implementing EIGRP  
Dynamic Routing Protocols  
Administrative Distance  
Features of EIGRP  
EIGRP Path Selection  
The EIGRP Metric  
Configuring EIGRP  
Verify Neighbors

Verify EIGRP  
EIGRP Load Balancing  
Summary  
Troubleshooting EIGRP  
EIGRP Troubleshooting Components  
Troubleshooting EIGRP Neighbors  
EIGRP Routing Table Troubleshooting  
Summary  
Implementing EIGRP for IPv6  
EIGRP for IPv6  
EIGRP Commands for Configuration  
Summary  
Demo - EIGRP  
Demo - Troubleshooting EIGRP  
Demo - Routing Table Issues  
Demo - EIGRP with IPv6  
Module 03 Review

#### **Module 04 - Implementing a Scalable, Multiarea Network, OSPF-Based Solution**

2h 25m

OSPF Overview  
Overview of the Link-State Routing Protocol  
Data Stored in a Link-State Protocol  
Metric  
OSPF Adjacencies  
Establishing OSPF Neighbor Adjacencies (eNotes)  
Building the Link-State Database  
What are OSPF Areas?  
OSPF Router Types  
Types of OSPF LSAs  
Basic LSA Types (eNotes)  
Summary  
Multiarea OSPF Implementation  
Single vs. Multiple OSPF Area  
Planning for OSPF  
Multiarea OSPF Configuration  
Verify Multiarea OSPF  
Summary  
Troubleshooting Multiarea OSPF  
OSPF Neighbor States  
Troubleshooting OSPF  
OSPF Neighbor Problems  
Summary  
Examining OSPFv3  
OSPFv3  
Configuring OSPFv3  
Verify OSPFv3  
Summary  
Demo - Multiarea OSPF  
Demo - Troubleshooting OSPF

Demo - Configuring OSPF for IPv6  
Module 04 Review

**Module 05 - Wide-Area Networks**

3h 32m

Understanding WAN Technologies

What is the WAN

WAN Components

WAN Serial Cabling

L2 WAN Protocols

Options for the WAN

Summary

Configuring Serial Encapsulation

What are Serial Links?

Configuring a Serial Interface

HDLC Protocol

Other Point-to-Point Protocols

Configuring PPP

PAP

CHAP

How to Configure CHAP

Verify CHAP

Troubleshooting Serial Interfaces

MLP

MLP Configuration

Verify MLP

PPPoE

PPPoE Client

Verify PPPoE Client

Summary

Establishing a WAN Connection Using Frame Relay

What is Frame Relay

Topologies

Reachability Issues

Frame Relay Signaling

Frame Relay Mapping

How to Configure Frame Relay

Point-to-Point and Multipoint Frame Relay

Configure Point-to-Point Frame Relay

Multipoint Frame Relay Configuration

How to Verify Frame Relay

Summary

Introducing VPN Solutions

Benefits of Secure VPNs

Other Cisco SSL Solutions

Characteristics of IPsec

Summary

Configuring GRE Tunnels

GRE Tunnel Overview

How to Configure the GRE

Verify the Tunnel

Summary  
Demo - Enabling HDLC  
Demo - Troubleshooting PPP  
Demo - Frame Relay  
Demo - External BGP  
Demo - GRE Tunnel  
Demo - Dialer Interface  
Module 05 Review

## **Module 06 - Network Device Management**

4h 21m

Configuring Network Devices to Support Network Management Protocols

Overview

SNMP Versions

Obtaining Data from an SNMP Agent

Configuring SNMP

What is Syslog?

Syslog Format

Syslog Configuration

NetFlow Overview

NetFlow Architecture

Configuring NetFlow

Summary

Managing Cisco Devices

Internal Components of a Router

What Does ROM Do?

Router Bootup Sequence

Configuration Register

Changing the Configuration Register

How the IOS is Found

IOS Loading

Loading the IOS Configuration File

Cisco IOS Integrated File System

Viewing the Integrated System

Managing IOS Images

Reading the IOS Filename

Backing Up the Image

Upgrading the IOS

Copy Command Results

Managing Device Configuration Files

Recovering the Enable Password/Secret

Summary

Licensing

Overview of Licensing

Verifying the Licenses

Installing a Permanent License

Installing an Evaluation License

Backup the License

Uninstalling the License

Password Recovery

Recovery

Config-Register  
Summary  
Demo - Managing Files  
Demo - Logging  
Demo - Syslog  
Demo - Password Recovery  
Demo - Superlab Initial Setup  
Demo - Superlab  
Module 06 Review  
Course Closure

**Total Duration:** 17h 10m
