Preface	xvii
1 Introduction	1
1.1 Compression Techniques	3
1.1.1 Lossless Compression	4
1.1.2 Lossy Compression	5
1.1.3 Measures of Performance	5
1.2 Modeling and Coding	6
1.3 Summary	10
1.4 Projects and Problems	10
2 Mathematical Preliminaries for Lossless Compression	13
2.1 Overview	13
2.2 A Brief Introduction to Information Theory	13
2.2.1 Derivation of Average Information ★	20
2.3 Models	25
2.3.1 Physical Models	25
2.3.2 Probability Models	25
2.3.3 Markov Models	26
2.3.4 Composite Source Model	29
2.4 Coding	29
2.4.1 Uniquely Decodable Codes	30
2.4.2 Prefix Codes	33
2.4.3 The Kraft-McMillan Inequality ★	34
2.5 Algorithmic Information Theory	37
2.6 Minimum Description Length Principle	38
2.7 Summary	39
2.8 Projects and Problems	40
3 Huffman Coding	43
3.1 Overview	43
3.2 The Huffman Coding Algorithm	43
3.2.1 Minimum Variance Huffman Codes	47
3.2.2 Canonical Huffman Codes	50
3.2.3 Length-Limited Huffman Codes	52
3.2.4 Optimality of Huffman Codes ★	55

3.2.5	Length of Huffman Codes ★	56
3.2.6	Extended Huffman Codes ★	58
3.2.7	Implementation of Huffman Codes	61
3.3	Nonbinary Huffman Codes ★	65
3.4	Adaptive Huffman Coding	67
3.4.1	Update Procedure	68
3.4.2	Encoding Procedure	71
3.4.3	Decoding Procedure	73
3.5	Golomb Codes	75
3.6	Rice Codes	76
3.6.1	CCSDS Recommendation for Lossless Compression	77
3.7	Tunstall Codes	79
3.8	Applications of Huffman Coding	81
3.8.1	Lossless Image Compression	81
3.8.2	Text Compression	83
3.8.3	Audio Compression	85
3.9	Summary	86
3.10	Projects and Problems	87
4	Arithmetic Coding	91
4.1	Overview	91
4.2	Introduction	91
4.3	Coding a Sequence	93
4.3.1	Generating a Tag	94
4.3.2	Deciphering the Tag	101
4.4	Generating a Binary Code	102
4.4.1	Uniqueness and Efficiency of the Arithmetic Code	103
4.4.2	Algorithm Implementation	106
4.4.3	Integer Implementation	111
4.5	Adaptive Arithmetic Coding	119
4.6	Binary Arithmetic Coding	120
4.6.1	The QM Coder	125
4.6.2	The MQ Coder	125
4.6.3	The M Coder	126
4.7	Comparison of Huffman and Arithmetic Coding	127
4.8	Applications	130
4.9	Summary	131
4.10	Projects and Problems	131
5	Dictionary Techniques	135
5.1	Overview	135
5.2	Introduction	135
5.3	Static Dictionary	136
5.3.1	Digram Coding	137
5.4	Adaptive Dictionary	139

5.4.1	The LZ77 Approach	139
5.4.2	The LZ78 Approach	143
5.5	Applications	150
5.5.1	File Compression—UNIX compress	151
5.5.2	Image Compression—The Graphics Interchange Format (GIF)	151
5.5.3	Image Compression—Portable Network Graphics (PNG)	152
5.5.4	Compression over Modems—V.42 bis	153
5.6	Beyond Compression—Lempel-Ziv Complexity ★	156
5.7	Summary	158
5.8	Projects and Problems	159
6	Context-Based Compression	163
6.1	Overview	163
6.2	Introduction	163
6.3	Prediction with Partial Match (<i>ppm</i>)	165
6.3.1	The Basic Algorithm	165
6.3.2	The Escape Symbol	170
6.3.3	Length of Context	172
6.3.4	The Exclusion Principle	173
6.4	The Burrows-Wheeler Transform	174
6.4.1	Move-to-Front Coding	177
6.5	Associative Coder of Buyanovsky (ACB)	178
6.6	Dynamic Markov Compression	179
6.7	Summary	182
6.8	Projects and Problems	182
7	Lossless Image Compression	183
7.1	Overview	183
7.2	Introduction	183
7.2.1	The Old JPEG Standard	184
7.3	CALIC	186
7.4	JPEG-LS	190
7.5	Prediction Using Conditional Averages	192
7.6	Multiresolution Approaches	193
7.6.1	Progressive Image Transmission	193
7.7	Facsimile Encoding	198
7.7.1	Run-Length Coding	199
7.7.2	CCITT Group 3 and 4—Recommendations T.4 and T.6	200
7.7.3	JBIG	203
7.7.4	JBIG2-T.88	209
7.8	MRC-T.44	211
7.9	Summary	213
7.10	Projects and Problems	214

8	Mathematical Preliminaries for Lossy Coding	217
8.1	Overview	217
8.2	Introduction	217
8.3	Distortion Criteria	220
8.3.1	The Human Visual System	223
8.3.2	Auditory Perception	224
8.4	Information Theory Revisited ★	225
8.4.1	Conditional Entropy	225
8.4.2	Average Mutual Information	228
8.4.3	Differential Entropy	229
8.5	Rate Distortion Theory ★	232
8.6	Models	240
8.6.1	Probability Models	240
8.6.2	Linear System Models	243
8.6.3	Physical Models	248
8.7	Summary	248
8.8	Projects and Problems	249
9	Scalar Quantization	251
9.1	Overview	251
9.2	Introduction	251
9.3	The Quantization Problem	252
9.4	Uniform Quantizer	257
9.5	Adaptive Quantization	268
9.5.1	Forward Adaptive Quantization	269
9.5.2	Backward Adaptive Quantization	271
9.6	Nonuniform Quantization	277
9.6.1	<i>pdf</i> -Optimized Quantization	278
9.6.2	Companded Quantization	282
9.7	Entropy-Coded Quantization	287
9.7.1	Entropy Coding of Lloyd-Max Quantizer Outputs	288
9.7.2	Entropy-Constrained Quantization ★	289
9.7.3	High-Rate Optimum Quantization ★	289
9.8	Summary	292
9.9	Projects and Problems	293
10	Vector Quantization	295
10.1	Overview	295
10.2	Introduction	295
10.3	Advantages of Vector Quantization over Scalar Quantization	298
10.4	The Linde-Buzo-Gray Algorithm	304
10.4.1	Initializing the LBG Algorithm	309
10.4.2	The Empty Cell Problem	315
10.4.3	Use of LBG for Image Compression	315
10.5	Tree-Structured Vector Quantizers	320

10.5.1	Design of Tree-Structured Vector Quantizers	323
10.5.2	Pruned Tree-Structured Vector Quantizers	324
10.6	Structured Vector Quantizers	324
10.6.1	Pyramid Vector Quantization	326
10.6.2	Polar and Spherical Vector Quantizers	327
10.6.3	Lattice Vector Quantizers	328
10.7	Variations on the Theme	332
10.7.1	Gain-Shape Vector Quantization	332
10.7.2	Mean-Removed Vector Quantization	332
10.7.3	Classified Vector Quantization	333
10.7.4	Multistage Vector Quantization	334
10.7.5	Adaptive Vector Quantization	335
10.8	Trellis-Coded Quantization	337
10.9	Summary	340
10.10	Projects and Problems	342
11	Differential Encoding	345
11.1	Overview	345
11.2	Introduction	345
11.3	The Basic Algorithm	348
11.4	Prediction in DPCM	352
11.5	Adaptive DPCM	357
11.5.1	Adaptive Quantization in DPCM	358
11.5.2	Adaptive Prediction in DPCM	358
11.6	Delta Modulation	361
11.6.1	Constant Factor Adaptive Delta Modulation (CFDM)	363
11.6.2	Continuously Variable Slope Delta Modulation	364
11.7	Speech Coding	365
11.7.1	G.726	366
11.8	Image Coding	369
11.9	Summary	371
11.10	Projects and Problems	371
12	Mathematical Preliminaries for Transforms, Subbands, and Wavelets	373
12.1	Overview	373
12.2	Introduction	373
12.3	Vector Spaces	374
12.3.1	Dot or Inner Product	375
12.3.2	Vector Space	375
12.3.3	Subspace	377
12.3.4	Basis	377
12.3.5	Inner Product—Formal Definition	379
12.3.6	Orthogonal and Orthonormal Sets	379
12.4	Fourier Series	380
12.5	Fourier Transform	382

12.5.1	Parseval's Theorem	384
12.5.2	Modulation Property	384
12.5.3	Convolution Theorem	385
12.6	Linear Systems	385
12.6.1	Time Invariance	386
12.6.2	Transfer Function	386
12.6.3	Impulse Response	387
12.6.4	Filter	388
12.7	Sampling	390
12.7.1	Ideal Sampling—Frequency Domain View	390
12.7.2	Ideal Sampling—Time Domain View	392
12.8	Discrete Fourier Transform	394
12.9	Z-Transform	396
12.9.1	Tabular Method	399
12.9.2	Partial Fraction Expansion	399
12.9.3	Long Division	403
12.9.4	Z-Transform Properties	404
12.9.5	Discrete Convolution	404
12.10	Summary	406
12.11	Projects and Problems	407
13	Transform Coding	409
13.1	Overview	409
13.2	Introduction	409
13.3	The Transform	414
13.4	Transforms of Interest	418
13.4.1	Karhunen-Loève Transform	418
13.4.2	Discrete Cosine Transform	420
13.4.3	Discrete Sine Transform	423
13.4.4	Discrete Walsh-Hadamard Transform	423
13.5	Quantization and Coding of Transform Coefficients	424
13.5.1	Operational Rate-Distortion Bit Allocation	428
13.6	Application to Image Compression—JPEG	432
13.6.1	The Transform	432
13.6.2	Quantization	432
13.6.3	Coding	434
13.6.4	Format—JFIF	438
13.7	Application to Audio Compression—The MDCT	440
13.8	Summary	443
13.9	Projects and Problems	444
14	Subband Coding	447
14.1	Overview	447
14.2	Introduction	447
14.3	Filters	452

14.3.1	Some Filters Used in Subband Coding	456
14.4	The Basic Subband Coding Algorithm	459
14.4.1	Analysis	459
14.4.2	Quantization and Coding	461
14.4.3	Synthesis	461
14.5	Design of Filter Banks ★	462
14.5.1	Downsampling ★	463
14.5.2	Upsampling ★	466
14.6	Perfect Reconstruction Using Two-Channel Filter Banks ★	467
14.6.1	Two-Channel PR Quadrature Mirror Filters ★	470
14.6.2	Power Symmetric FIR Filters ★	472
14.7	M-Band Quadrature Mirror Filter Banks ★	474
14.8	The Polyphase Decomposition ★	477
14.9	Bit Allocation	482
14.10	Application to Speech Coding—G.722	484
14.11	Application to Audio Coding—MPEG Audio	485
14.12	Application to Image Compression	486
14.12.1	Decomposing an Image	488
14.12.2	Coding the Subbands	490
14.13	Summary	492
14.14	Projects and Problems	493
15	Wavelets	497
15.1	Overview	497
15.2	Introduction	497
15.3	Wavelets	500
15.4	Multiresolution Analysis and the Scaling Function	504
15.5	Implementation Using Filters	510
15.5.1	Scaling and Wavelet Coefficients	513
15.5.2	Families of Wavelets	516
15.6	Biorthogonal Wavelets	516
15.7	Lifting	523
15.8	Summary	527
15.9	Projects and Problems	528
16	Wavelet-Based Image Compression	529
16.1	Overview	529
16.2	Introduction	529
16.3	Embedded Zerotree Coder	532
16.4	Set Partitioning in Hierarchical Trees	540
16.5	JPEG 2000	547
16.5.1	Color Component Transform	548
16.5.2	Tiling	549
16.5.3	Wavelet Transform	549
16.5.4	Quantization	551

16.5.5	Tier I Coding	552
16.5.6	Tier II Coding	559
16.5.7	JPEG 2000 bitstream	561
16.6	Summary	568
16.7	Projects and Problems	568
17	Audio Coding	569
17.1	Overview	569
17.2	Introduction	569
17.2.1	Spectral Masking	570
17.2.2	Temporal Masking	571
17.2.3	Psychoacoustic Model	572
17.3	MPEG Audio Coding	573
17.3.1	Layer I Coding	573
17.3.2	Layer II Coding	575
17.3.3	Layer III Coding—mp3	577
17.4	MPEG Advanced Audio Coding	581
17.4.1	MPEG-2 AAC	582
17.4.2	MPEG-4 AAC	586
17.5	Dolby AC-3 (Dolby Digital)	587
17.5.1	Bit Allocation	588
17.6	Other Standards	589
17.7	Summary	589
18	Analysis/Synthesis and Analysis by Synthesis Schemes	591
18.1	Overview	591
18.2	Introduction	591
18.3	Speech Compression	593
18.3.1	The Channel Vocoder	594
18.3.2	The Linear Predictive Coder (Government Standard LPC-10)	596
18.3.3	Code-Excited Linear Prediction (CELP)	603
18.3.4	Sinusoidal Coders	606
18.3.5	Mixed Excitation Linear Prediction (MELP)	608
18.4	Wideband Speech Compression—ITU-T G.722.2	611
18.5	Coding of Speech for Internet Applications	613
18.5.1	iLBC	613
18.5.2	G.729	618
18.5.3	SILK	621
18.6	Image Compression	623
18.7	Summary	631
18.8	Projects and Problems	632
19	Video Compression	633
19.1	Overview	633

19.2	Introduction	633
19.3	Motion Compensation	635
19.4	Video Signal Representation	638
19.5	ITU-T Recommendation H.261	644
	19.5.1 Motion Compensation	644
	19.5.2 The Loop Filter	646
	19.5.3 The Transform	647
	19.5.4 Quantization and Coding	647
	19.5.5 Rate Control	649
19.6	Model-Based Coding	649
19.7	Asymmetric Applications	650
19.8	The MPEG-1 Video Standard	652
19.9	The MPEG-2 Video Standard—H.262	655
19.10	ITU-T Recommendation H.263	658
	19.10.1 Unrestricted Motion Vector Mode	660
	19.10.2 Syntax-Based Arithmetic Coding Mode	660
	19.10.3 Advanced Prediction Mode	661
	19.10.4 PB-Frames and Improved PB-Frames Mode	661
	19.10.5 Advanced Intra Coding Mode	661
	19.10.6 Deblocking Filter Mode	661
	19.10.7 Reference Picture Selection Mode	662
	19.10.8 Temporal, SNR, and Spatial Scalability Mode	662
	19.10.9 Reference Picture Resampling	662
	19.10.10 Reduced-Resolution Update Mode	662
	19.10.11 Alternative Inter VLC Mode	662
	19.10.12 Modified Quantization Mode	663
	19.10.13 Enhanced Reference Picture Selection Mode	663
19.11	ITU-T Recommendation H.264, MPEG-4 Part 10, Advanced Video Coding	664
	19.11.1 Motion-Compensated Prediction	664
	19.11.2 The Transform	665
	19.11.3 Intra Prediction	666
	19.11.4 Quantization	666
	19.11.5 Coding	668
19.12	MPEG-4 Part 2	669
19.13	Packet Video	670
	19.13.1 ATM Networks	671
	19.13.2 Compression Issues in ATM Networks	671
	19.13.3 Compression Algorithms for Packet Video	672
19.14	Summary	673
19.15	Projects and Problems	674
A	Probability and Random Processes	675
A.1	Probability	675

A.1.1	Frequency of Occurrence	675
A.1.2	A Measure of Belief	676
A.1.3	The Axiomatic Approach	678
A.2	Random Variables	680
A.3	Distribution Functions	681
A.4	Expectation	683
A.4.1	Mean	685
A.4.2	Second Moment	685
A.4.3	Variance	685
A.5	Types of Distribution	685
A.5.1	Uniform Distribution	685
A.5.2	Gaussian Distribution	686
A.5.3	Laplacian Distribution	686
A.5.4	Gamma Distribution	686
A.6	Stochastic Process	687
A.7	Projects and Problems	689
B	A Brief Review of Matrix Concepts	691
B.1	A Matrix	691
B.2	Matrix Operations	692
C	The Root Lattices	697
	Bibliography	699
	Index	717
