

Indiana Office of Technology

Powering a State that Works

Governor Eric Holcomb
Director and Chief Information Officer Tracy Barnes

IOT Services Catalog

(IOT's Product Code Reference Manual)

Fiscal Year 2023

July 1, 2022 – June 30, 2023

Version 1.32

Purpose

This document provides the Indiana Office of Technology's (IOT) Agency Partner a central place to find information about its 100+ provided services.

Notes:

- There is a separate [IOT Services Catalog - Mainframe](#) for all Mainframe related services.
- A complete **four-year rate history** can be found [here](#).

Contents

The information in this document pertains to:

1. periodic audits to validate IOT's services are provided at competitive rates
2. how this document and IOT's services are maintained
3. IOT's Service Areas
4. Data associated with each service area (code, purpose, dependencies, rate, standard, IOT responsibilities, Agency Partner responsibilities, Service Owner, service level objective, outage impact, restore priority, usage, and reports).

The document also contains information on how to:

1. request a product or service
2. request help if you have an issue with a product or service
3. escalate an active issue
4. monitor the progress of your requests
5. resolve billing issues
6. how to return a product or terminate a service.

Welcome from the Director and CIO

Greetings from the Indiana Office of Technology! It is truly an honor and privilege to serve as the Director of the Indiana Office of Technology (IOT) and as your State Chief Information Officer.

IOT is legislatively tasked with serving as the enterprise technology provider for all of state government. This allows for better service delivery and resource usage to serve all state agencies better and continue taking Indiana to the Next Level. In the past, agencies operated disparate systems and duplicative technologies which they often struggled to maintain. Through consolidation starting in 2005, the state has been able to save an estimated \$14M annually. This is a big win for state agencies and for Hoosier taxpayers as a whole.

Since our creation in 2005, IOT has come a long way in our operational maturity, and we are continuing to identify more ways to better service our agency partners. We now provide 110 products whereas we only provide 63 products in 2010, including new cloud and Cybersecurity offerings to help our enterprise keep pace with the growing industry challenges. As further validation of our delivery, for the fourth year in a row, the Center for Digital Government has given Indiana an A- for its digital technology delivery.

As Indiana continues to deliver next level digital government to Hoosiers, IOT is not only looking near-term on how to best assist in those efforts but also looking at the future of technology and its impending impact on government. The Indiana Office of Technology has developed four key performance indicators that the organization uses to effectively meet its business objectives. Those are: Core Service Delivery, Cost Competitiveness, Executive Branch Security Readiness and Preferred Workplace. IOT measures its KPIs monthly to evaluate its success at reaching specific goals. Thank you for considering IOT for your technology needs. Our executive leaders are aggressively focused on meeting your expectations and continuing to earn your business!

Tracy Barnes, Director of the Indiana Office of Technology and State of Indiana CIO

IOT Introduction

As identified in Article 13.1 of the Indiana Code, the Indiana Office of Technology (IOT) is required to:

1. Establish the standards for the technology infrastructure of the state.
2. Focus state information technology services to improve service levels to citizens and lower the costs of providing information technology services.
3. Bring the best and most appropriate technology solutions to bear on state technology applications.
4. Improve and expand government services provided electronically.
5. Provide for the technology and procedures for the state to do business with the greatest security possible.

Our Team: IOT is comprised of 500 highly skilled IT professionals with over 4,500 years of state experience. We are organized into 46 distinct areas to provide the best IT services at the best rates possible. To learn more about IOT and our individual departments please visit our [website](#) and review “**What We Do**”.

Quality at Competitive Rates

Approximately every three years the IOT hires a third-party company to evaluate its services and rates. The goal is to provide IOT with a comparison to other state IT organizations and private-sector businesses. Since 2006, IOT has undertaken four evaluations, with the last completed (*in process*) in March 2020.

To date, the results have proven favorable for IOT. After each report, areas where improvements are recommended are evaluated by the CIO and staff to determine how to make the necessary adjustments. The final goal is to continue providing the best services at the best rates possible. A complete four-year rate history can be found [here](#).

Note that all services include a portion of IOT’s Overhead and Statewide Cost Allocation Plan (SWCAP).

Overhead includes: all costs not directly associated with providing a product or service (i.e., indirect costs). These costs include salary, benefits, and travel (conferences) for the executive team (CXO’s), the finance team, and the administrative team. Overhead also includes costs for professional services (contractors), software/hardware expenses (Pinnacle billing system), office supplies, office furniture, CDP charges (internal IOT charges), and depreciation on equipment (copiers, software, TV’s, security cameras, etc.)

SWCAP includes costs for the: Operation Division, Procurement, Dept of Personnel, Archives and records Admin, Treasurer of State, Auditor of State, Office of State Based Initiatives, Office of the Inspector General and the Attorney General.

Customer Satisfaction

Customer satisfaction is a very high priority for IOT. We monitor and measure your satisfaction several ways.

1. When your issue/request is resolved, you will receive a brief survey (no more than one per month) asking you to tell us how we did. We would indicate if we met our Service Level Objective or not.
2. Every six months we distribute a Customer Service survey to everyone that contact us within the past six months asking for feedback on our overall service to you.
3. When Projects are completed, the project sponsor is sent a satisfaction survey.

Your responses are review, measured, reported, and acted on by the executive staff. Our objective is to achieve 95% customer satisfaction monthly (for #1) and bi-annually (for #2). These measurements are included as part of our Core Services Delivery Level KPI that is reported to the Governor’s office monthly.

Service Catalog Maintenance

This catalog is maintained by the IOT Deputy CAO of Service Management. It will be updated as services are added, updated, or removed, and annually in late April. [IOT Service Owners](#) are responsible for creating and managing the annual budget for the Service area and thus determining the Service Level Objectives and Rates. Rates are set and posted annually in late June and are typically unchanged for the entire fiscal year.

Service Area Contents & Definitions

The Service Areas are laid out as follows, and clearly define everything a Agency Partner needs to know about the service.

1. Name	Service Name (as seen on Agency Partner's IOT bill)
2. Code	Code (same code as on the monthly Agency Partner's IOT bill).
3. Purpose	What the service does for the Agency Partner.
4. Included	A list of everything provided in the service, including IOT Value Add items .
5. Not Included	A list of non-included items that may commonly be expected by an Agency Partner.
6. Dependencies	Other IOT services that <u>may</u> be required/useful to make full use of the service requested.
7. Rate	Rate and Unit of Measure.
8. Standard	Identifies the current service standard(s) for the state.
9. Responsibility	List of items the Agency Partner, Vendors and IOT are responsible for doing/providing.
10. Service Owner	Toole, John Click here to send the Service Owner a Message .
11. SLO	Service Level Objectives – IOT's targets for Service based on resources, technology, budget. Request: IOT's Target Time to provide a new service. Availability: IOT's Target Availability of the service once provided. Incident: IOT's Target Time to restore service to expected service level.
12. Impact/Priority	Impact to the Agency Partner's business if the service is interrupted (high, medium, low). Priority for IOT to restart the service (high, medium, low).
13. Usage	Annual volume of service provided and growth rate (previous fiscal year).
14. Reports	List of reports IOT uses/provides to monitor/show service usage.
15. Order	Click here to order this service.
16. Cancel	Click here to cancel your existing service.

Requesting Services

IOT provides the following methods for our Agency Partners to obtain services:

- IOT HelpDesk** Contact the HelpDesk at 317-234-HELP (4357) or 1-800-382-1095
- [ASM Self-Service Portal](#) Order a subset of our services, submit an Incident or Request for the IOT HelpDesk, or simply find useful information regarding IOT.
- inwp.in.gov Online forms to submit Web Portal Request for Interactive applications, Enterprise Web Content Management System, Domain Name requests, redirects, Online Calendar, Web Analytics, Website Quality Assurance, Enterprise Email Marketing, online payment processing, and training.

Issue Monitoring

Agency Partners can view progress on tickets submitted by them by using HelpDesk Assistant ([HDA](#)) and selecting "View your existing tickets" in the lower left corner of the window. This only works while connected to the state network.

Or you can visit the ASM Self-Service Portal ([SSP](#)).

Issue Resolution

IOT provides the following methods for our Agency Partners to obtain issue resolution:

1. **IOT HelpDesk** – Contact the HelpDesk at 317-234-HELP (4357) or 1-800-382-1095
2. [ASM Self-Service Portal](#) – Submit an Incident for the IOT HelpDesk.

Issue Escalation

Please follow this [procedure](#) should you need to escalate an active Incident.

Billing Issues

If you have questions about your monthly IOT Services bill, or require changes because you no longer need the service, please submit a ticket as soon as possible to get the issue resolved.

For IOT billing policy information, [click here](#).

If you have a Pinnacle account, you can view the bill [here](#).

Maintenance Windows

IOT's standard maintenance window for changes to occur are Sunday between 6 AM – 12 PM (noon).

Changes that affect workstations such as software pushes will begin Friday at 8pm and run until Sunday at 6pm unless otherwise noted. Others requested outside of these published windows will be approved on a case-by-case basis with necessary justification. [IOT-CS-ARC-002](#)

Service Level Objective

Typically, IOT provides Standard Support: 6am to 6pm Monday - Friday except on state holidays. After Hours Support is provided, but with reduced functionality and best effort. A few specific services have different business hours, which can be found in the specific service section in this document.

Each Agency Partner "Issue" has an assigned "Service Level Objective" (SLO), or the maximum amount of time the IOT staff must resolve the issue. These times range from one IOT Business Hour to five IOT Business Days (60 Business Hours). See the specific service section in this document for the associated SLO. SLOs are in effect only during specified Standard Business Hours.

Note: When an Agency Partner reported issue is thought to be resolved by an IOT technician, the Agency Partner may receive an automated email indicating they have 60 business hours to verify the issue has been resolved. No reply signifies the issue was resolved to the Agency Partners satisfaction and the issue will be closed.

Project Related Work Requests

In some cases, an Agency Partner's work request may be considered outside the scope of the service defined in this catalog. In those cases, which will be identified by both IOT and the Agency Partner, a Service Order Form will be completed for the requested work, and "consulting" fees over and above the services listed in this catalog may be required. The rate and estimated fees will be determined at the time of the engagement. The complexity and risk of the project will determine the IOT Project Success Center's involvement.

Exceptions to IOT Standard Technology

IOT has identified the standard technology used in each of its service offerings. But there may be cases where a Agency Partner has a legitimate requirement for a non-standard technology. In these cases, IOT management must review and approve the exception. An [Exception Form](#) in Archer (IOT's Standard Policy system) must be completed and signed by the agency head to acknowledge they will not be using IOT standards. IOT's service level objective for this service on non-standard technology will be "best effort".

IOT Services by Area

Below is a list of the current IOT services, organized by Service Area. You may click on a specific **Service Area** to go directly to the specific Service.

1. [Application Development](#)
 - Application Developers
 - Application Software Maintenance
2. [Business Applications](#)
 - Agency Liaison Program
 - Customer Relationship Management (CRM)
 - Geographic Information Systems (GIS)
 - Government Management Information Services (GMIS)
 - ITSM Work Management (ASM)
 - ITSM Workflow Development
 - Microsoft Power BI
 - Oracle WebCenter Content (WCC)
3. [Collaboration](#)
 - Email
 - Teams Conferencing
 - WebEx
4. [Communications](#)
 - Mobile
 - Network
 - Telecommunication
5. [Customer Service](#)
6. [Database](#)
 - Database Hosting
 - Database Maintenance
 - Database Size Overage
7. [Data Exchange Services](#)
 - Mulesoft
 - GoAnywhere
8. [Desktop](#)
 - Adobe Products
 - Legacy Application Access
 - MS Office 365
 - SEAT (Desktop PC or Laptop)
 - Visio
 - Workstation Software Licenses
9. [Hosting](#)
 - Cloud Services
 - Agency Cloud Architect
 - IIS Web Hosting
 - Oracle Application Hosting
 - Physical and Virtual Server Hosting and Management
 - Server Management
 - Racks and Rack Space
10. [IN.Gov](#)

Meet the IOT Service Owners

Service Responsibilities Definition

IOT has developed a RACI Matrix to help their Agency Partners, their Supplier Partners and IOT better understand their specific responsibilities for each of IOTs service offerings. Each service offering described in this document will contain the appropriate portion of that RACI Matrix. Please review that information before requesting the service to make sure you understand your specific responsibilities for the service.

RACI Codes:

The following are the Codes used to indicate specific responsibilities.

Code	Roles	Definition
R	Responsible	Person or People responsible for correct execution - getting the job done.
A	Accountable	Person who has ownership of quality and the end result. Only one person can be accountable for each activity.
S	Supportive	Person that provides additional resources to conduct the work or plays a supportive role in implementation.
C	Consulted	People who are consulted and whose opinions are sought. They have involvement through input of knowledge and information.
I	Informed	People who are kept up to date on progress. They receive information about process execution and quality.
V	Verifies	Person or group that checks whether the acceptance criteria have been met.
O	Signs Off	Person who approves the decision and authorizes the product handover.

Example:

Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Service Name / Activities	Agency Partners	Supplier Partners	IOT
MS Power BI			
Creating and publishing content to Power BI service	RA		
Granting/revoking access to Power BI workspaces, content, data	RA		
Tenant-level configuration, administration, and hygiene of Power BI Service	I		RA
Gateway and workspace provisioning	R		RA
Gateway monitoring, management and administration	RA		R

Billing Management			RA
Reactive break/fix of service features	I	RA	I
Service Health and availability		RA	

Application Development

General

The IOT Application Development team is ready to help you build the tools that will help you serve your customers. Whether it's a web-based application, a client based-application, a mobile application, the IOT Application Development team can build it. Using the .NET framework, we can build an application that works for you. Existing data can be accessed, or a new database can be created.

The IOT Application Development team is also happy to partner with agencies to help deploy a CRM system. With this no code/low code solution, we will work with teams to develop a solution that can track contact interactions, support tracking, and any number of other data points.

Purpose

Custom Development offerings include a business analyst to assess your needs and document the project, a developer assigned to your project, and a designer (based on project complexity) to create the needed graphics and user interface. CRM Deployment also includes a business analyst, a CRM Administrator, and a CRM Architect (based on complexity) to deploy and configure the CRM. CRM platforms available will be Salesforce and Microsoft Dynamics.

Native mobile application development is primarily for iOS and Android. The capability to publish to the Apple and Google app stores for public facing apps is available as are internal apps specifically for your mobile workforce. In-house apps can be securely delivered to mobile devices wirelessly.

Name	Developer Standard
Code	1170
Purpose	Intermediate Software Developers, Business Analysts, and Graphics Designers.
Rate	\$117.00 / Hour
Name	Junior Standard
Code	1170J
Purpose	Beginner Software Developers, Business Analysts, and Graphics Designers.
Rate	\$80.00 / Hour
Name	Developer Senior
Code	1170S
Purpose	Senior Software Developers, Business Analysts and Graphics Designers have more experience and can generate code faster with less refactoring.
Rate	\$129.00 / Hour
Name	Developer Architect
Code	1170R
Purpose	Oversees the design, testing, code review, implementation, and administration of an IOT developed application.
Rate	\$138.00 / Hour
Name	Application Maintenance
Code	1170M
Purpose	Covers bug fixes and minor tweaks to the code.
Rate	\$1,000 per month.

Name CRM Architect
Code 1170CRMR
Purpose Oversees the design, testing, code review, implementation, and administration of an IOT deployed CRM.
Rate \$187.50 Per Hour

Name CRM Administrator
Code 1170CRMA
Purpose This non-coding role assists in day to day CRM operations and in-platform customizations.
Rate \$131.25 Per Hour

Name CRM Developer
Code 1170CRMD
Purpose CRM Developers can customize and apply code changes to an IOT deployed CRM.
Rate \$156.25 Per Hour

Standard Responsibility All IOT development is done in iOS, Android, and .NET.
 R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Name Agency Liaison Program

Code Liaison

Purpose The IOT Agency Liaison Program, which began in Q1 2016, is a free service offered to any IOT supported agency to help improve their business relationship with IOT. A dedicated IOT Liaison meets with the participating agency contact(s) monthly to discuss the following nine topics.

Included Discussion Topics:

1. IOT's Monthly Performance Reports (agency specific and statewide)
2. IOT's Monthly Bill (make sure the agency understands their bill, and help them minimize it)
3. Service Improvements (what the agency thinks IOT can do better)
4. Issue Escalation (help with issues not getting resolved per standard protocol)
5. IT Security (discuss current issues and upcoming programs)
6. IOT's Services Catalog (contains information regarding IOT's 100+ services and rates)
7. IT System Changes (near-term, IOT's and agency)
8. IT Project Review (what projects are coming that might affect them)
9. IT Training Availability and Needs Review

Not Included This service does not replace the IOT Helpdesk as the point-of-contact for issues and services.

GIS (Geographic Information Systems)

General

GIS is a technology and a practice that connects computer-based maps and databases so that “where” questions can be answered to inform public policy and action. For example, GIS helps state agencies better understand:

- Where are the best sites in Indiana to accommodate a specific industrial plant?
- Where should disaster-response resources be deployed to be most effective?
- Where should “quarantine” zones be established to protect healthy livestock from diseased animals?
- Where has Emerald Ash Borer activity been observed?

GIS efforts within Indiana state agencies are governed by IC 4-23-7.3, Indiana GIS Mapping Standards that created an Indiana Geographic Information Office (GIO) and assigned specific responsibilities to that office. Per statute, the GIO will “function as the chief officer for GIS matters for state agencies.” This function has evolved to include managing the provision and operation of GIS server and desktop software for all state agencies.

In order to recover costs for managing the provision and operation of GIS server and desktop software, two ArcGIS offerings are provided.

Name AGOL Level 1 (Viewer)
Code 1153A
Purpose Read Only Access for Provided ArcGIS and Image Server Access, GIS Data Storage, GIS Data Backup, ArcSDE DB Hosting, Server Support, Disaster Recovery (critical apps/systems), and ArcGIS Server Licensing.

2. GMIS (Government Management Information Services)

General:

This is the state’s ERP system. The Auditor of State (AOS) allocation for HR and Financial Services are determined at the beginning of the fiscal year for the entire year: Major changes in cost/allocation from year to year are discussed at the annual AOS/SBA Town Hall. The allocation is calculated as follows:

HR: Agency percentage of total cost = agency percentage of state employees.

Finance: Agency percentage of subset of transactions over past 12 month period from the following modules:
 General Ledger, Accounts Payable, Purchasing, Inventory, Project Costing, Grants Management, Order Management, Billing Receivables, Assets and Travel Expense.

General: These services are associated with the Oracle PeopleSoft Application. PeopleSoft is comprised of 115+ modules. Various support levels are provided for a subset of these modules.

Sponsors: The key agencies that provide direction/support are: AOS, IDOA, SBA, SBoA, SPD, IOT and TOS.

Name	GMIS Human Resources Management
Code	1120
Purpose	HCM is the State’s official data record for all state employee’s employment and Payroll.
Included	This service, provided by AOS and SPD, includes labor, hardware, software, module rollouts, Agency Partner training, upgrades, issue resolution and ongoing support for the PeopleSoft HR modules The 50% of the GMIS budget used to support these services is allocated to agencies based on headcount.

Licensed & supported modules include

- Benefits Administration
- EBenefits
- EProfile
- EProfile Manager
- HRMS Portal Pack
- Reporting Tools for HR
- Time and Labor
- Fundamentals for Human Capital Management
- North American Payroll

Not Included N/A

Name **GMIS Financial and Hyperion**
Code 1121
Purpose PeopleSoft Financial is the State’s official data record for all state financial transactions. PeopleSoft Hyperion is the Budget agency’s budgeting tool to prepare State Agencies Budgets.
Included This service, provided by IOT, includes labor, hardware, software, module rollouts, Agency Partner training, upgrades, issue resolution and ongoing support for PeopleSoft Financials. The “Core” modules are sponsored by the AOS and SBA and are mandatory for all state agencies. The 75% of the GMIS budget used to support these services is allocated to agencies based on the number of transactions for previous 12 months.

Licensed & supported modules include

Accounts Payable	Asset Mgt
ePro / Purchasing	General Ledger / Commitment Control
P-Card	Project Costing
ROC / AR	Supplier Contracts Management
Accounts Receivable	Billing
Reports & Queries	Travel and Expenses
Catalog Management	Contracts
Grants Management	Grant
Inventory	Order Management
Strategic Sourcing	User Productivity Kit

Additional licensed modules, but not in use

Budgets	Esupplier Collaboration
Esupplier Connection	Scorecard
Supply Chain Portal	Trading Partner Mgt

Training: CBT Training is now available for most of the previous Instructor lead training. The rest are to be completed 4th quarter of 2022.

Requests: All support requests are submitted via Customer Service tickets. Priority of work performed is managed by IOT GMIS management, along with our sponsors from AOS, SBA, SBOA and TOS. GMIS receives 775 financials-related tickets / month, while achieving 95% resolution within 24-business hours.

Collaboration

Name Email-SharePoint G3

Code 1014

Purpose Existing IOT Agency Partners (consolidated agencies) who need a Microsoft Office 365 G3 license for email and/or SharePoint services who do not already leverage a Seat charge. Seat already includes an O365 G3 license. A common use case is a service/automation account that cannot use a shared/resource mailbox or distribution list so is required to be licensed per Microsoft. The only IOT supported method for accessing O365 services (email/SharePoint) is through an IOT approved web browser. For security purposes any off-site access to O365 services will also require Multi-Factor Authentication (MFA).

Included Office 365 services (email, SharePoint, OneDrive for Business, etc.) as well as Self-Service Password Reset (SSPR) and Multi-Factor Authentication (MFA).

Not Included Does not include Office 365 Pro-Plus licensing (Office Desktop Client).

Dependencies Use IOT approved versions of web browsers, billing code, Multi-Factor Authentication and Self-Service Password Reset registration

Rate \$17.22 Per Month Per Named User

Standard Office 365

Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Name **Web Collaboration**
Code 1221 (Basic, E, S, T and V)
Purpose Web Collaboration Services via WebEx or MS Teams. WebEx and MS Teams enables virtually hosted business meetings via the Internet using a browser or desktop client.

WebEx Basic (1221) supports a maximum of 1,000 participants with 200 using video, while **WebEx Enhanced** (1221E) supports a maximum of 3,000 participants. Enhanced includes a Toll-Free number. This service is priced per user per month. The service includes integrated Audio Bridge Conference service that is activated with the WebEx service. WebEx Enhanced toll-free is priced \$0.10 per user per minute.

MS Teams (T) supports a maximum of 250 participants with video and MS Teams Live Events supports a maximum of 250 participants with video and 10,000 viewers. MS Teams Audio Conferencing requires a vFire ticket be submitted for any user wanting the Audio-Conferencing feature enabled for MS Teams.

MS Video (V) supports SIP video address dialer in Microsoft Teams. It is a WebEx Video Integration with Microsoft Teams that enables calling into Microsoft Teams meetings from Cisco and SIP – capable video devices. This integration enhances the experience on video supported devices when they join Microsoft Teams meetings hosted within your organization.

The price includes free long-distance during WebEx or MS Teams meetings for all users calling into the conference from a State of Indiana Voice as a Service (Sol VaaS) phone, computer Voice over IP (VoIP), or a cellular phone.

Included Service, Maintenance, License, Contract Negotiation, Competitive Rates, Managed Service

Not Included Desktop or Laptop

Dependencies Hosting Services with Storage Services

Rate

1221B - WebEx Basic	\$11.11 / Month / Account
1221E - WebEx Enhanced	\$45.00 / Month / Account
- WebEx Enhanced Toll-Free	\$0.10 / Minute / Participant
1221S - WebEx Storage	\$0.08 / Month / Account
1221T - MS Teams Audio	\$0.00 / Month / Account
1221V - MS Video	\$12.45 / Month / Account

Standard WebEx Meeting Center (up to 1000 participants) or MS Teams (up to 250 participants); contact Service Owner for more options.

Database

Data is King and you need a safe and reliable place to keep it. IOT utilizes the power of Oracle databases and the flexibility of MS SQL database to provide solutions that will keep your data available and secure. Built on redundant infrastructure, you can rest assured that your data will be available when you need it.

Management: IOT has a team of system DBAs that manage the infrastructure for all databases (creation, backups, maintenance, patching, upgrades, migrations, decommission, monitoring, etc.) including 24/7x365 on-call DBAs. Agencies with their own DBAs are typically responsible for all application-related items (performance issues, schema changes, data manipulation, etc.). Agencies in need of assistance with application related items may also engage our system DBA's for help (see [1049 - Database Maintenance Services](#)).

Security: IOT adopts a "least privilege" stance when it comes to security access, and where possible utilizes Active Directory or LDAP for authentication. In shared environments this means "system admin" access is never granted unless on a temporary controlled basis and requires explicit review/approval of the Database Services Manager. In dedicated environments "system admin" may be granted on a temporary (or permanent) basis and also requires review/approval. Additionally, use of the database "administrator" account(s) is restricted to the system DBAs and should not be used by any other persons or processes.

Exceptions: IOT has implemented its default processes and policies to follow industry-best-practices, with data availability and safety at the forefront. In situations that require deviation from the norm, IOT management will work with agency management to find a resolution.

Note: Agencies requesting the Oracle High-Availability/Load Balancing RAC technology for services 1114 and 1114b will be charged the standard monthly rate for those services, times the number of instances used.

Name Database Maintenance Services
Code 1049
Purpose Database Consultant for:
 - application trouble shooting
 - restoring databases to Dev or Test locations for troubleshooting activities
 - creation of SSIS or scripts
 - creating or troubleshooting custom agency jobs
Included Database Consultant

Name	SEAT
Code:	1001
Purpose	All direct labor, contracts, hardware, and other direct costs required by IOT to provide IT Service Delivery for the desktop and associated centralized services.
Included	PC Refresh (the replacement of all state PCs on a defined four-year schedule). See following pages for the complete list of included items.
Not Included	Standard User License, Monitors and PCs are considered an upgrade and may result in an extra cost to the agency.
Dependencies	Standard User License (1001L), Hosted Services, Collaboration Services, Storage Services, Network Services.
Rate	\$77.16 Per Month
Standard	Desktop - HP 800, Laptop - HP 650
Service Owner	Allen, Jeff Click here to send the Service Owner a Message
SLO	Request: 90% Installed within 5 IOT Business Days (6am-6pm, M-F excl. Holidays). (Standard machines only, 5 max. / request) Availability: N/A Incident: 90% Resolved within 40 IOT Business Hours (6am-6pm, M-F excl. Holidays).
Impact/Priority	High / High
Usage	20,000 laptops, 16,000 desktops not much change annually, ~10,000 Refreshed annually.
Reports	Statewide Monthly IOT Service Performance Reports can be found here . Agencies receive reports on the number of machines they are using and the rate they are being charged on their monthly bill.

Cancel	Click here to cancel your existing service.

SEAT Services are grouped into seven major categories: customer service, email, file storage, local desktop, network, server and networked printer.

IOT evaluates all out-of-warranty network equipment and networked printer repair issues to determine if it is more cost-effective to repair or replace the device. If the device is repaired, the cost will be covered by IOT. If the device is deemed irreparable, or it is determined it is no longer cost-effective to continue repairing the device (repairs are within 80% of the cost of a new device), the agency is responsible for the replacement cost of the device. Local and mobile printers are not cost-effective repair items and are not supported. Agencies purchasing non-networked printers are encouraged to purchase available warranties offered with the non-networked printers.

The state's local wireless access affords users wireless access on IGC campus and agency sites in conference areas, common areas and/or public areas where users would connect using wireless devices via a centrally managed and secure wireless solution. Agency Partners using a computer or mobile device with specific wireless and security capabilities can take advantage of this Active Directory integrated secure wireless solution. The wireless offering is not meant to provide wall-to-wall or blanket coverage for entire sites or facilities, nor is it meant to be used an alternative to standard wired network connections. The costs of an indoor access point and all the supporting systems, including wireless controllers, management consoles, redundant authentication servers, support and maintenance are included in the network management fee, which in most cases is included in Seat. Physical infrastructure to connect the wireless access point to the wired network may also be included depending on location and availability. IOT does not support outdoor wireless solutions, site surveys or solution specific hardware.

Name	Virtual Server Hosting – Base

Name Shared Server Hosting and Management
Code 1052
Purpose Shared hosting of Virtual Machines (VM) reflecting the varying configurations requested by Agency Partners. The base configuration includes CPU, 1 GB RAM and up to 100 GB disk space.

- Included**
1. High Availability: Automatic failover of VM's between hosts.
 2. Snapshots: A bookmark in time to roll back all changes occurring after this bookmark. Retained for 72 hours as a hard limit.
 3. See IOT Responsibility below

- Not Included**
1. Windows OVA deployments. Windows prepackaged appliances. Windows VM's created outside of IOT.
 2. Guest Operating Systems support/configuration: OS and applications (other than VMware Tools) within the hosted VM.

Dependencies 1177a (SAN), 1187 (Data Circuits), 1155 (Network AS), 1050 (Physical Server Hosting)

Rate \$31.58 Per Month Per Server

Standard Hypervisor: VMware ESXi
 Host VMs (virtual hardware layer) running IOT approved Microsoft Windows and Linux operating systems within supportable lifecycle.

Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Service Name / Activities	Agency Partners	Supplier Partners	IOT
Virtual Server Hosting - Base			
Computer with Network Access	RA		
Physical Hardware Support			RA
Virtual Storage Support			RA
Virtual Networking Component Support			RA
Hardware / Software Support & Parts Replacement		RA	C
Virtual Hardware & Software Support		RA	CI

Service Owner Thatcher, John [Click here to send the Service Owner a Message](#)

SLO **Request:** 90% Installed within 12 IOT Business Hours (6am-6pm, M-F excl. Holidays)
 For virtual hardware layer, base OS and base applications such as anti-virus and DPA Agent (backup/restores). Final OS configurations and application deployments determine the Agency Partner delivery schedule

Availability: 99.9% within IOT Business Hours (6am-6pm, M-F excl. Holidays).
 Example: Guest Windows OS or Linux OS may crash, shutdown, not boot, but the VM can be powered on and available for troubleshooting, re-installation and Guest side resolution at 99.9% uptime/availability.

Incident: 90% Resolved within 40 IOT Business Hours (6am-6pm, M-F excl. Holidays)

Impact/Priority High / High

Usage 3,624 Virtual Servers, 19% increase over previous year.

Reports Statewide Monthly IOT Service Performance Reports can be found [here](#).

Order Click [here](#) to request this service.

Cancel Click [here](#) to cancel your existing service.

Name Virtual Server Hosting (Additional CPU)
Code 1052A
Purpose Custom core count for additional processing as needed.
Included Core count change while powered off.
Not Included Core count change while powered on.
Dependencies 1052 and its dependencies. Guest OS limitations and OS/Application licensing.
Rate \$2.86 Per Month Per Additional CPU
Standard Intel
Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

	Agency Partners	Supplier Partners	IOT
Service Name / Activities			
Virtual Server (extra CPU)			
Computer with Network Access	RA		
Email	RA		
Planning and Scheduling Downtime Window	CI		RA
Validate Core Count Request Limit & Exception			RAC

Service Owner Thatcher, John [Click here to send the Service Owner a Message](#)

SLO **Request:** 4 hours - with an approved downtime window of 1 hour falling within the 4 hour lead-time/schedule-notification (6am-6pm, M-F excl. Holidays)

Availability: Server = 99.9% within IOT Business Hours (6am-6pm, M-F excl. Holidays)
 Example: Guest Windows OS or Linux OS may crash, shutdown, not boot, but the VM can be powered on and available for troubleshooting, re-installation and Guest side resolution at 99.9% uptime/availability.
 Downtime for increasing CPU Core count should be expected and planned for even if a hot-add can accomplish the desired count by multiplying sockets. A 20 core maximum is standard. More will require validated usage and exception.

Incident: 90% Resolved within 40 IOT Business Hours (6am-6pm, M-F excl. Holidays).

Impact/Priority **Delivery** = Medium / Medium

Uptime = High / High

Usage 9,645 extra CPU beyond the single CPU included in 1052

Reports Statewide Monthly IOT Service Performance Reports can be found [here](#).

Order Click [here](#) to request this service.

Name Cloud Service Provider (CSP)
Code 1053
Purpose IOT has negotiated and holds the master accounts with our Cloud Service Providers (Microsoft Azure and Amazon Web Services as of writing) and manages the overall account structure. Each Agency provides IOT a billing code, and we create a tenant account under that master account for the agency at the appropriate CSP. As the agency turns up services at the CSP, those service charges are passed through to the agency based on consumption and as billed to IOT.
Included This service is a pass through of actual CSP consumption.
Not Included IOT Cloud Operations Support (1053a).
Dependencies There are no dependencies on this service, however it can be purchased in addition to any other IOT services.
Rate Pass-Through - As billed by the CSP
Standard N/A
Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Service Name / Activities	Agency Partners	Supplier Partners	IOT
Management of Turn Up & Turn Down Services	RA		
Pay Associated CSP Charges	RA		
Implementing Processes to Track & Use Notifications to	RA		
Overall Relationship with CSP			RA
Ingesting Usage Data in Billing System			RA
Financial Transfers			RA

Service Owner Stahl, Ben [Click here to send the Service Owner a Message.](#)
SLO **Request** IOT will work with the agency contact to make the Agency Tenant available as soon as is practicable.
Availability N/A
Incident N/A
Impact/Priority NA / NA
Usage As of 1/6/23 we have 29 Agencies using IOT as a Cloud Service Provider..
Reports Monthly Billing Statement. It is possible to activate “notifications” from the CSP based on spend limits to track usage and give the agency the opportunity to make changes to services over the course of the month. (This is what is currently is, so no changes needed).
Order Click [here](#) to **order** this service.
Cancel Click [here](#) to **cancel** your existing service.

Name	Cloud Operations
Code	1053A
Purpose	The Cloud Operations organization within IOT provides the operational overlay between the agency and the cloud service provider (CSP). This is the same role as IOT plays between our on-premises infrastructure and the Agency Partners.
Included	This service includes the Architecture and Policy governance work to align CSP implementation with the State Security and Compliance standards. In addition, IOT provides the operational support for CSP services including a team that is ready to respond to tickets and outages 24*7. This support is requested through the IOT ITSM tools and HelpDesk processes. Finally, this service charge covers the monitoring and management tools necessary to align services consumed from a CSP into the State Standards.
Not Included	This does not include the service costs from the CSP for compute, storage, backups, disaster recovery configurations, custom software and other application specific items.
Dependencies	There are no dependencies on this service, however it can be purchased in addition to any other IOT services.
Rate	25% of the cost of the CSP services consumed by the agency.
Standard	Cloud Consumption / Availability Standards
Responsibility	R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Service Name / Activities	Agency	Supplier	
	Partners	Partners	IOT
Manage Hub and Spoke Model	I	SC	RA
Manage transport between CSP and On-Premise Networks	I	SC	RA
Provide baseline compliance and security monitoring	I	SC	RA
Maintain Service Availability and Integrity	I	RA	C
Solution Design	RA	S	CI
DevOps Pipeline Setup	CI	S	RA
Testing and Tuning	RA	S	CI
Identity Management	CI	S	RA
Control Consumption Burn Rate	RA	S	CI

Service Owner	Stahl, Ben	Click here to send the Service Owner a Message.
SLO	Request	IOT will work with the agency contact to enable the CSP tenant infrastructure and billing information. Once requirements are clear, this is typically 1 business week.
	Availability	Per the CSP standards.
	Incident	Per the CSP standards.
Impact/Priority	Impact	will vary based on service, however IOT can work with the Agency Partner to ensure that the appropriate redundancy & resilience are architected into the solution.
	Priority	will be determined by the CSP.
Usage		IOT provides Cloud Operational support services for all 29 agencies using IOT as a cloud service provider as of 1/6/23.
Reports		Monthly billing and usage reports can be scheduled by IOT within the cloud service provider portal.
Order		Click here to order this service.
Cancel		Click here to cancel your existing service.

Name Oracle Application Hosting
Code 1191
Purpose Oracle Applications provides agencies with a shared WebLogic Server environment which offers a highly available and secure platform for deploying enterprise applications including Oracle Forms, Oracle Reports, Oracle Portal, Oracle Internet Directory and custom Java Apps.
Included Infrastructure required to host these services and the Oracle WebLogic Server Suite licensing.
Not Included Agencies are responsible for the database costs affiliated with their application as well as any licensing not covered by the IOT license. Agencies requesting a dedicated environment require the agency to be responsible for the additional licensing and server hosting fees.
Dependencies Storage Services, Server Hosting, Database Services
Rate \$2,042.77 Per Month Per Site
Standard Oracle WebLogic
Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Name	Server Management
Code	1195
Purpose	This is a standard fee for server management for any server hosted in the State of Indiana's Datacenters.
Included	Troubleshooting, Support and OS configuration. Recommendations for redesign and configuration of operating systems and system applications. Solutions design for new projects.
Not Included	3 rd party application support. While we don't know your applications as well as you do, we will always be open to help you figure out solutions or collaborate on how to resolve the issue.
Dependencies	N/A
Rate	\$117.94 Per Month Per Server
	Each physical and virtually hosted server in the IOT datacenter that is managed by IOT will be assessed this fee on top of the monthly rate. Salaries of all IOT intermediate and Senior System Administrators that are assigned to the Server Administration team are included here along with VMware admins and datacenter management.
Standard	Make OS and Application-Level configuration changes and troubleshoot issues impacting operability. Collaborate with Agency Partner and vendor to analyze and provide solutions.
Responsibility	R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Usage	5000+ Servers	
Reports	Statewide Monthly IOT Service Performance Reports can be found here .	

Note: This service is not purchased “directly” by the Agency Partner.

Name Rack Hosting (Agency Partner Provided Rack)
Code 1200F (Floor Space Only)
Purpose To allow state agencies or other municipalities, when not infringing on IOT's ability to deliver on its' core function, the ability to host their server racks in our data center.
Included The Agency Partner will be provided with a minimum of 2 redundant power feeds that both have UPS and generator backed up included. Cooling. State of the art fire suppression system. A secured facility with 24x7 onsite staff to monitor the environment and video cameras throughout which is monitored and kept for a minimum of 30 days.
Not Included Rack, servers or networking hardware required to populate the rack.
Dependencies Network Services will be generally available to Agency Partners availing themselves of this service. However, it will need to be evaluated on a case-by-case basis. The Agency Partner must understand that IOT will maintain the right to conduct network maintenance which may periodically result in loss of connectivity. These changes will follow the standard change process so notification will be provided well in advance of any planned service.
Rate \$300.00 Per Month Per Rack.
Standard Server Rack not exceeding 42 U in height.
Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

IN.Gov

General

The IN.gov program consists of 5 major components: Web Portal Services, Web Applications, Single Sign-on and Authentication (SSO), Payment Processing, and Local Government Solutions. Check out our services and let us know how we can help with your IN.gov needs!

Services provided by the IN.gov Program include:

- Website Design & Development
- Web Application Development
- Creative & Branding Services
- Mapping & Location Services
- Payment Processing: Online, Over-the-Counter, and Mobile
- IN.gov Domain Registration
- Single Sign-On and Authentication services (Access Indiana)
- Local Government DNS services

Code	1131
Service Owner	White, Mike Click here to send the Service Owner a Message
Dependencies	Web Application Service requires Database Services
Usage	100 state agencies and 60+ local agencies with IN.gov hosted websites 5000 IN.gov domains in use statewide 120+ customized applications to each agency's unique needs 78 State and local agencies processing \$2billion+ annually SSO via Access Indiana with over 1.8 million users accessing 120+ state applications daily
Website	https://www.in.gov/inwp/

Name	Access Indiana ID Verification
Code	1225
Purpose	Provide identity verification options for agency applications.
Included	LexisNexis Identity verification uses Instant QA to assess a customer’s identity. IOT supplies the interface and transmits the success/failure to the agency.
Not Included	Agencies are responsible for authorizing customers that fail the identity verification questions.
Dependencies	Client/application integration with Access Indiana
Rate	<p>Minimum of \$500/month, costs are shared between agencies and prices vary depending on whether the user is new or already verified within an agency application.</p> <p>Agencies voted on a shared cost model that is based on an approved formula.</p> <p>Maximum cost is \$0.50 per verification, but all agencies combined must meet a minimum of 1,250 verifications per month or there is a flat \$500 charge divided equally among participating agencies.</p>
Standard	Access Indiana
Responsibility	Customer is responsible for properly integrating their client to receive data from Access Indiana and to manage failed identify verification tests.
Service Owner	Lubsen, Graig Click here to send the Service Owner a Message
SLO	<p>Request: Response within 3 business days – client setup times vary</p> <p>Availability: 99.9% 24/7</p> <p>Incident: LexisNexis service for Severity Levels 1 & 2 are within two to four hours.</p>
Impact/Priority	High / High
Usage	<p>Planned for 12,000 users per year, paying for 1,250 verifications per month (\$500/month).</p> <p>100 state agencies and 60+ local agencies with IN.gov hosted websites</p> <p>5000 IN.gov domains in use statewide</p> <p>120+ customized applications to each agency's unique needs</p> <p>78 State and local agencies processing \$2billion+ annually</p> <p>SSO via Access Indiana with over 1.8 million users accessing 120+ state applications daily</p>

IT Business Continuity

Disaster Recovery Premium (Formerly **MHA**) and Traditional Planning (**DRP**) are the components of IT Business Continuity Services. Please refer to standards [20.1.1 Business Continuity](#) and [20.1.1 Disaster Recovery](#) for more information.

It is highly recommended for the agency to work on their overall Business Continuity Plan (COOP – Continuity of Operation Plan) which is handled by the Indiana Department of Homeland Security (IDHS). Part of the Business Continuity Plan (COOP) indicates the agency is responsible to prioritize their critical systems to partner and collaborate with IOT on a plan for recovering their systems in the Secondary Data Center in case the Primary Data Center is impacted by a disaster event.

Disaster Recovery As A Service purely concentrate on the IT recovery of critical systems hosted in the IOT Data Center to the Secondary Data Center with prescribed Recovery Time Objective - Downtime / Recover Point Objective - Data Loss (RTO/RPO) timelines, provided the agency has partnered with IOT to perform a yearly DR test and have a current documented Recovery Plan.

The Disaster Recovery Plan should not be assumed as a High Availability option provided the system is architected with Multi-site High Availability which is currently in testing phase (certain conditions and restrictions may apply).

IOT will provide consulting and operation support to agency business continuity efforts in the Primary Data Center. This document dictates day-to-day operations recoverability and business continuity of critical systems hosted in the Primary Data Center.

IOT also offers limited rack hosting services in the Secondary Data Center for vendor supported DR solutions. IOT explores all the logistics and technical requirements before offering this as a service to IOT and agencies.

What is ISI (Information System Inventory)?

ISI is an Archer based authoritative inventory of all information systems maintained by state agencies. An “information system” is broadly defined as any process, whether electronic or paper-based, that processes information for recordkeeping purposes.

<https://isi.iot.in.gov/>

Who updates the information in Archer (ISI – System of Records)?

All “state agencies” can update the information in Archer

Who has access to Archer (ISI – System of Records)?

All “Agency system owners” should have access to ISI to update their system information

How to request an Access to Archer (ISI – System of Records)?

Access to Archer can be requested through the ITSM ticketing tool and route it to IOT Security Group

RTO and RPO:

IOT DR team focuses on Business Continuity (Recovery Time Objective/ Recovery Point Objective) and Disaster Recovery (Recovery Time Objective/ Recovery Point Objective) in ISI ARCHER to set expectations to the agencies on their Operations Recovery Plan and the Disaster Recovery plan. This timeframe will help IOT meet service level objectives for systems that have operational production outages in the primary data center and also in a Disaster scenario where the primary data center no longer exists, triggering the DR declaration by IOT CIO upon advice from Governor.

Some of the Systems Architecture decisions will also be made based on these timeframes provided by the agencies.

Business Continuity Recovery Time Objective (Downtime):

Business Continuity - Recovery Time Objective(BC-RTO) is the targeted duration of time and a service level within which the system must be restored after an outage at Primary Data Center (hardware, network, or software issues), during that outage agency business enacts their Business Continuity Plan to continue their operations with alternate business functions while IOT works to recover the system back on operations on the prescribed RTO timeframes agreed upon by the agency and IOT

Business Continuity Recovery Point Objective (Data loss):

- Business Continuity - Recovery Point objective (BC-RPO) is the maximum targeted period in which data might be lost from an IT service due to issues with the servers (hardware or software related). The RPO gives the specified timeframe the agencies can recover from the data loss during the outage of hardware or software failure in the primary data center.

IOT performs a backup of servers everyday so the RPO for most of the systems would be 24 -48 hours any reduced RPO timeframes need to be negotiated and worked on with IOT operational teams

Ex: Database backup frequencies need to be worked on with the respective Database teams to understand what they can offer to reduce the RPO for your systems. Additional costs might incur.

Disaster Recovery Time Objective (Downtime)

- Disaster - Recovery Time Objective (DR-RTO) is the targeted duration of time and a service level within which the system must be restored after a disaster (e.g., data center catastrophe) in the secondary data center when the primary data center no longer operational upon evaluation by IDOA

Disaster Recovery Point Objective (Data Loss):

Disaster - Recovery Point Objective (DR-RPO) is the maximum targeted period in which data might be lost from an IT service outage due to a major disaster experienced in the primary data center and the restoration triggered in the secondary data center. The RPO gives the specified timeframe the agencies can recover from the data loss during the disaster recovery situation.

Name Rack Hosting Service
Code 1137R
Purpose Applies to a dedicated rack supporting any non-standard or vendor supported servers, appliances, storage, or tape library hosted in a Rackspace at the Secondary Data Center (currently the IU Data Center in Bloomington).

This fee recovers those costs incurred by IOT for the space, power, cooling, and infrastructure in the Secondary Data Center.

Note: Space is limited at Secondary Data Center. IOT may not be responsible for operational support for the hardware and software, testing and the recovery of the system hosted in those dedicated racks. The agency is expected to have a contract with the vendor with all the support expectations documented in it.

Included Rack Space in Secondary Data Center.
Not Included Rack, Power Outlets, CDUs, Support of hardware or application hosted on that rack.
Dependencies None
Rate \$433.44 Per Month Per Rack Space
 Contract with the vendor stipulates the one time and monthly costs to host the rack.
Standard NA
Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Project Risk Management

Large IT projects are extremely complex, costly, risky, and challenging. In response to these challenges, the IOT Project Risk Management (PRM) team developed and now owns and manages a full lifecycle PRM Framework that is **REQUIRED** for all SOI IT projects with a budget of \$1M or more, the project is deemed “Critical” by the Governor’s Office, the Office of Management and Budget, or IOT Leadership, or the agency that owns the IT project requests risk management services and the IOT PRM team approves. As part of the overall PRM Framework, a member(s) of IOT’s PRM team leverages experience and expertise to deliver senior risk consulting services and own and manage IV&V contracts and performance to help project teams identify and mitigate project risks and to enhance the opportunity for project success.

Name	Project Risk Management – Senior Consultant
Purpose	Deliver risk services to help agencies successfully strategize, plan, and deliver large IT projects.
Included	<p>Services are offered throughout the large IT project lifecycle and include, but are not limited to:</p> <ul style="list-style-type: none"> • Managing the intake process to include creation of the Project Investment Proposal (PIP) • Providing feedback and proven questions and artifacts for agency procurements • Providing guidance on agency contracts and Statement of Work (SOW) documents • Conducting a Risk Profile Analysis (RPA) to determine areas of heightened project risk • Establishing the delivery of independent risk management services by either: <ul style="list-style-type: none"> ○ Procuring an Independent Verification & Validation (IV&V) vendor, managing IV&V vendor performance, and owning the associated IV&V vendor contract OR ○ Delivering Project Assurance (PA) services at an agreed upon capacity • Owning and administering required SOI large IT project status reporting and visibility by: <ul style="list-style-type: none"> ○ Preparing the large project dashboard and training the agency PM ○ Generating and distributing monthly project status reports ○ Maintaining the large IT project document repository • Managing project escalation activities as deemed needed • Other high level strategic and consulting services as needed
Not Included	IOT delivered Project Management services via the Project Success Center and any project specific work beyond the processes and activities described in the PRM Framework and those activities identified and described in product codes 1220v and 1220m.
Dependencies	Levels and types of services vary by project and are dependent on the overall risk landscape.

Name Project Risk Management – IV&V Vendor Services
Code 1220v
Purpose Enable IOT to bill back for IV&V vendor charges to agencies that own large IT projects.
Included IV&V vendors deliver independent risk management services for the project to help agencies identify and mitigate current and approaching project risks to enhance project success. In doing so, IV&V vendors will follow the requirements established in the PRM Framework for delivering independent risk management services.
Not Included No work by the PRM team is billed through this product code. That includes the work required to manage and own the IV&V vendor and associated contract. Those charges and all other charges for work by the PRM team is billed through the 1220 Project Risk Management – Sr. Consultant or the 1220m Project Risk Management – IV&V Vendor Management Product Codes.
Dependencies Levels and types of IV&V vendor services vary by project and are dependent on the overall project risk landscape.
Rate Monthly rate is dependent on cost of vendor selected during IV&V vendor procurement process.
Standard Project Risk Management Requirements for Large-Scale and Critical IT Projects (IOT-CS-OPS-014)
Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

	1209	CICS

Project Success Center

General. A poorly run project will ultimately result in a longer duration, with more effort, and heightened cost. Let the Indiana Office of Technology (IOT) Project Success Center (PSC) team take your project from conception to completion and bring it home on time and on budget.

For agency-owned projects, the PSC team provides project management services for only the IOT specific project activities OR for both agency and IOT project activities. Additionally, the PSC team also offers various Project Management and MS Project Online training services. *Let the PSC team take your PMO to the next level by migrating your agency projects to IOT's MS Project Online. This service includes consulting, configuration, and training.*

The PSC team's goal is to promote the successful delivery of quality products or services for the State of Indiana utilizing industry-best project management practices and using a structured project management framework developed by the PSC team. Refer to the [IOT PSC home page](#) for more information about the PSC Framework.

To get started today, email the PSC team at PSC@iot.in.gov or submit a project request via the PSC Project Request Form (from link above). Once a project request is received, a member of the PSC team will conduct a Project Classification Assessment with the requesting agency to evaluate the project and to generate the priority, complexity, and risk scores for the project. Those scores guide the PSC team to determine which role(s) are best suited to provide PSC services to the requesting agency for that project. The service options and rates below reflect that guidance.

Starting July 1, 2021, IOT's Project Success Center (PSC), will not be charging a PM service fee for managing the IOT portion of any agency-initiated project.

The IOT Project Success Center's mission is to Organize, Execute and Deliver a quality product or service for the State of Indiana utilizing industry best practices and a structured framework.

Listed below are the criteria for non-fee and fee-based PSC services.

Agency Initiated Projects — non-fee-based

- Agency will be responsible for creation of Charters, Statement of Work and Master Schedule for work to be done between agency and vendor(s).
- The IOT PSC project manager will create a Project Charter for the IOT work only. The charter will be reviewed, approved and signed by IOT and Agency Project Sponsors.
- The IOT project manager will work with vendor and/or agency project manager to add IOT tasks to master schedule.
- IOT will work with agency project team to create a RACI (Roles and Responsibilities Matrix).
- IOT project managers will provide a project status report for the IOT work to be completed.

PSC Service — fee-based

- The PSC performs the Business and IT project management services for a project.
- Business Analysis work.
- Process Improvement work.
- Project management training and mentoring.
- Consulting and setup of Project Online.

Name MS Project Plan 5 (formerly MS Project Online Premium) License/Support

Code 1199PR

Purpose This provides Agency Partners a Microsoft Project Plan 5 license and IOT Project Online administration support. The license provides portfolio-level cross-project analysis dashboards/reports in addition to project-level dashboards/reports, online project management, project sites, and the Microsoft Project Professional client software. This provides enterprise-level project management, collaboration, and resource management/time recording solution which enables an organization to easily create and manage custom team-focused and project-focused sites based on the environment configured for each agency and managed by IOT.

Included Microsoft Project Web App, Project Professional, Project sites, Project for the Web, and project reports.

Not Included Initial environment setup. Initial setup as well as subsequent enhancement requires Code 1182c (Project Management Specialist). The setup “project” will be scoped, and the cost estimate will be provided to the Agency Partner.

Dependencies Project Management Specialist to set up the Project Online environment.

Rate \$45.00 Per User Per Month
MS Project Plan 5 license + IOT site administration/update fee*.

Standard Microsoft Project Online (Plan 5, Plan 3, Plan 1, or Essentials) and Microsoft Project Professional.

Included All flash SAN storage as with base hosting in 1052
Not Included Raw Device Mapping to VM
Dependencies There are no service dependencies for the default offering of 1177a, however the features provided to 1137* depends on site-to-site physical connections.
Rate \$0.389 Per Month Per GB over 100 GB
Standard Storage Hot-add in increments of 1GB (while the VM and Guest OS are online). Once added, the server administrator must access the OS and expand the OS disk before recognizing the additional space.
Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Service Name / Activities	Agency Partners	Supplier Partners	IOT
Provide a computer with network access and State of Indiana Email.	RA		
Provide service uptime 24/7/365 measured from 6am to 6pm business days			RA
Provide Hardware/software support and parts replacement		RA	C

Service Owner Thatcher, John [Click here to send the Service Owner a Message](#)
SLO **Request:** 90% Installed within 4 IOT Business Hours (6am-6pm, M-F excl. Holidays)
Availability: 99.9% within IOT Business Hours (6am-6pm, M-F excl. Holidays)
Incident: 90% Resolved within 40 IOT Business Hours (6am-6pm, M-F excl. Holidays).
Impact/Priority High/Medium
Usage 401,236GB 20% growth over previous year

Name Tiered Isilon File Storage & Overage
Code 1177K - Fast Tier
Purpose Additional Gigabyte beyond each user’s home drive file storage limit of 10GB. Separately, the additional Gigabyte beyond **agency shared** file storage limit of 5GB multiplied by the Agency User count. E.g.: Agency user count is 100. 100x5GB = 500GB included storage for the agency-share. The only charge will be each Gigabyte above 500GB within the agency-share.
Included Data Protection (backups/restores)
Not Included Data retention. User access, account, and permission management.
Dependencies 1187 (Data Circuits) and 1155 (Network AS)
Rate \$0.2146 Per Month Per GB
Standard Provide enterprise shared filer and home folder storage.
Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

	Agency Partners	Supplier Partners	IOT
Service Name / Activities			
Provide a computer with network access and State of Indiana Email.	RA

Name Archive Storage ECS
Code 1224A
Purpose House archival data for systems using large volumes of rarely accessed data.
Included Replication to Disaster Recovery site/datacenter.
Not Included Multi-user access. Application support.
Dependencies 1187(Data Circuits) and 1155(Network AS)
Rate \$0.0138 Per Month Per GB
Standard Low cost archival and low speed storage for approved systems.
Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Service Name / Activities	Agency Partners	Supplier Partners	IOT
Provide Compatible front-end source	RA		
Provide service uptime 24/7/365 measured from 6am to 6pm business days			RA
Provide Hardware/software support and parts replacement.		RA	C

Name Data Protection
Code 1224B
Purpose: To provide business continuity by protecting state data from disaster or accidental deletion. Agency Partner is charged for each gigabyte of data per server that exists on the backup media at the point in time when billing is collected monthly.
Included: 11 backup cycles are kept. Back cycles are defined as points in time where data can be restored from. The original data and all daily incremental changes during that time period are kept.
 Small = Base 11 cycles
 Medium = Base + 12 months of monthly cycles
 Large = S/M + 3 years of yearly cycles
 XL = S/M + 7 years of yearly cycles
Not Included: TBD
Dependencies: EMC Avamar, EMC Data Domain, and EMC ECS.
Rate: \$0.1800 Per Month Per GB
Standard: Base = 11 Backup cycles
Responsibility R=Responsible, A=Accountable, S=Supportive, C=Consulted, I=Inform, V=Verifies, O=Sign-Off

Appendix A - File Retention & Recovery

Agencies are responsible for managing their electronic mail (email). Like all government records, email is subject to the state's Access to Public Records Act (APRA) requests and litigations. Agencies are responsible to adhering to their agency specific retention schedule on electronic documents. Not adhering to these retention schedules could be a violation of Indiana Code. Please direct all question about retention schedules to the Indiana Archive and Records Administration. Agency specific retention schedules can be found here, http://www.in.gov/apps/iara/retention/iara_retention.

Email retention schedules are set by the Indiana Archives and Records Administration (IARA). Each message must be evaluated for content and purpose to determine the length of time it must be retained according to the proper retention schedule. Each department or agency should adopt a policy that notifies employees about their responsibilities for retaining official email and identifies how email should be stored. IOT is not responsible for retention of emails; this is the responsibility of agencies.

IOT Email Recovery

Mailboxes hosted in Office 365 (Exchange Online) have a 30-day deleted item retention as Microsoft no longer provides traditional backup methods. Mailboxes using on-premise email servers have daily full backups for 30 days and year-end backups of email servers are kept for three years. These backups are to be used to protect the email servers from system failures, unintentional deletions, or tampering. These backup procedures are for emergency recovery purposes and do not constitute a long-term record-keeping solution for email. Email content is managed by the agency and should follow their respective retention schedules as dictated by IARA.

IOT Home and Shared Files Retention

Agencies are responsible for managing their electronic documents. Like all government records, electronic documents are subject to the state's Access to Public Records Act (APRA) requests and litigations. Agencies can be held liable if electronic documents are kept too long, if they are not properly destroyed, or if they are destroyed too soon.

File retention schedules are set by the Indiana Archives and records Administration. Each department or agency should adopt a policy that notifies employees about their responsibilities for retaining official electronic documents and identifies how email should be stored. IOT is not responsible for retention of electronic documents; this is the responsibility of agencies.

IOT Home and Shared Files Recovery

All IOT-hosted systems are configured to feature regular backup. These backups are to be used to protect from system failures, unintentional deletions, or tampering. These backup procedures are for emergency recovery purposes, however, and do not constitute a long-term record-keeping solution for electronic documents. IOT protects Home and File Shares by keeping 30 days of file changes. These Home and File Shares are then backed up every quarter. The quarter backups are kept a year and then are expired. IOT does a year-end backup, and those backups are kept for three years, and then they are expired.

Jeff Allen and Jason Littrell

Appendix B - IOT Data Center

Many IOT services are dependent on the data center. Below is a description of the data center and of some of the ways IOT maintains a 99.9% up-time.

The IOT data center covers more than 26,000 square feet and supports servers, storage, network, and other peripherals. It is protected with a FM125 fire suppression system, and there are two legs of power running into the room. Additionally, if there is a loss of power, three UPS's and three generators provide quick return to operation. The 24x7-staffed data center is protected by cameras and requires badge access, which is restricted only to Data Center staff. Prior to entering the temperature- and humidity-monitored facility, visitors are required to sign in.

Housed within the IOT data center are two mainframes supporting Indiana State Government, the City of Indianapolis and Ball State University. More than 4,000 Windows/UNIX/AIX virtual and physical servers support hundreds of applications and 4,000 databases for 28,000 state employees. There is 650,000 GB of online, near-line and archived storage being managed across multiple storage platforms using high-speed networks.

The VMware virtual environment is backed by encrypted all-flash storage arrays, a space-efficient blade center and highly available fabrics along with scripted/automated processes. These solutions allow quick deployment, resizing, protection and migration of virtual machines, virtual networks and virtual storage between clusters and datacenters.

Physical servers maintain the flexibility of multiple storage solutions ranging from flash technology to high density along with encrypted platforms. Additionally, the global site selector allows optional planning for high availability and load balancing between data centers.

The storage networks include flash storage arrays, tiered disk arrays, synchronous data, and asynchronous replication between data centers to provide fast storage, dense storage or a combination of both.

The data center network provides full redundancy at the aggregation and access layer utilizing Cisco Nexus virtualization technologies. The network is seamlessly extended to multiple geographic locations via Cisco OTV providing multi-site high availability and clustering services between disparate data centers.

Todd Baxter

Appendix C - Minimizing Your IT Bill

Listed below are a few suggestions that may help you reduce your monthly IT bill. You may also review the has a [billing dashboard](#).

1. Run a Report

While on the state network, run a detailed report of your IOT billing using the IOT Billing Dashboard located <https://dataviz.in.gov/#/site/IOT/workbooks>. This will provide six months of detail of your IOT charges. Audit your charges by starting with the areas where your charges are greatest. If you don't need all the resources, place a ticket to have the service reduced or disconnected. If you need access to the IOT Dashboard, please have your security coordinator submit a ticket.

2. Database

View your detailed database charges and verify with your internal app support groups that they are all still needed. Many times, databases are no longer needed and IOT isn't notified, so we continue to host and charge for it.

3. Desktop

- a. Look at the detailed report and verify the workstation count aligns with the number of employees and contractors in your agency.
- b. There is an associated user with each desktop to help you audit your bill. This is the user we have on record as having logged in last, it may or may not be the primary user. IOT produces monthly reports to ensure of up-to-date accounts.

4. Physical Server Hosting

- a. Are you still using the servers?
- b. Can you move your application to a virtual machine? Virtual servers can now run most applications and are less expensive than a physical server.

5. Virtual Server Hosting

- a. View your detailed billing, does your app need all the allocated CPUs and RAM, or will it run on less? IOT can provide tools and reports upon request for agencies' application development teams to review.
- b. Are you using all the virtual machines on your bill?

6. Telecom

We recently completed moves for all the campus and many remote office telephones to a new IP based voice system, Sol VaaS (State of Indiana Voice as a Service). During that project we validated billed lines used. We highly recommend you continue auditing your Sol VaaS charges (Product 1186). Additionally, if you have remote office telephones that have not been migrated to Sol VaaS, you should audit other telecom services found in Product 1044. Potential savings could be achieved with increased functionality by replacing older telecom services with Sol VaaS.

7. Cell Phones

Audit your detailed bill and make sure all phones you are paying for are in use. Verify the assigned person still needs to have a state-issued cell phone.

8. Adobe Software

Adobe software is billed monthly per assigned user. Audit the bill and ensure all assigned users still need Adobe software for their job.

9. File Storage

- a. Storage is generally associated with a server so if the server is not needed you will also save on storage.
- b. IOT charges for allocated space, not used space. What this means is if you tell us that you need a terabyte, and only use a gigabyte, you are still paying for the other 999 gigabytes that you aren't using. Submit a ticket with the server's name and IOT can run a report to compare allocated versus used storage.
