DBI-SALA® and Python Safety®, two highly respected brands in the fall protection industry, have come together to bring a new level of innovation to safety.

DBI-SALA is known as the premier brand of fall protection and rescue equipment around the world. For more than 70 years DBI-SALA has provided the best solutions for workers at height, no matter which industry you work in.

Python Safety has more than a decade of experience developing products to prevent dropped tools and equipment. Its innovative line of products makes work environments safer and more productive by protecting workers from hazards that can result in personal injury, equipment damage, and tool loss.

With a relentless commitment to innovation, and a tireless determination to respond to the needs of our customers and deliver the best products and services in the industry, we employ the best teams to create innovative solutions to keep workers at height safe around the world.

THIRD PARTY TESTED

Python Safety third-party tests products with Applied Technical Services (ATS), an Atlanta-based consulting engineering firm with sophisticated testing and inspection capabilities. ATS is ISO 9001 Certified, and an accredited testing lab of the Nuclear Regulatory Commission. As a part of Python Safety's product development and quality assurance processes, ATS conducts static or dynamic load tests to determine the safe working load limits based on the solution's intended use.

INTRODUCING SMART HOLSTERS

At Python, we always strive to make your job easier and safer. That's why our next-generation Smart Holsters™ are packed with intelligent new productivity features.

BEACON™ HI-VISIBILITY REFLECTORS

Products equipped with Python Safety Beacon™ Hi-Vis Reflectors are always easy to identify and locate, even when left in dark spaces. Highly reflective material is stitched into the front and back of the holster allowing it to be detected in low light conditions with a flashlight.

BEACON™

A FASTER, SMARTER WAY TO HOLSTER WITH QUICK-MAG™

Quick-Mag™ speeds up your workflow and reduces how often your tools need to be holstered. A powerful magnetic tool staging system allows tools to simply stick to the holster ensuring that your tools are always at the ready.

QUICK-MAG™

BOTTOM DRAIN VENT

Even in rainy weather conditions, holsters with a drain vent stay in outstanding working form. The vent helps keep the holster dry by allowing water to pass through, protecting your tools from rusting, and protecting your holster from dry rot.

SMALL PARTS POUCHES

CAPITAL SAFETY PART #	PYTHON SAFETY PRODUCT #	PRODUCT VARIANT
1500119	PCH-PARTS-CB	Canvas Black
1500123	PCH-PARTSXD-CB	Extra Deep Canvas Black

- Innovative self-closure system that traps objects inside, the pouch makes it nearly impossible for objects to fall out once placed in the bag.

- Easy to retrieve objects since no opening or closing is necessary.

- Compatible with most tool belts.

PATENTED

1500119
PCH-PARTS-CB

Belt loops located
on back of pouch.

The Small Parts Pouch is designed for small parts such as nuts, bolts, screws and nails.

Items are placed inside the pouch, at which point they are immediately secured by the self-closure system.

Even when the pouch is flipped vertically, the pouch traps objects inside, making it nearly impossible for items to fall out.

SAFE BUCKETS

Safe Buckets are designed to be used at height, and each have a built in closure system that helps prevent dropped objects.

CLOSURE SYSTEMS

Every Safe Bucket is manufactured with either a unique patent pending drawstring or hook and loop closure system which helps prevent accidental drops.

BUILT IN CONNECTION POINTS

The Safe Bucket was engineered to be used with tools at height, and includes multiple connection points that can be tethered to.

HIGH QUALITY CANVAS AND VINYL

Safe Buckets are available in both heavy-duty canvas and vinyl variants that are load rated for 45.4kg (100 lbs) and 113.4kg (250 lbs) respectively.

LOCKING HOOK AND LOOP CLOSURE SYSTEMS

Python Safety has engineered a hook and loop closure system that acts as an extra layer of protection to guard against spills during transport and lifting.

Indicator tabs on the buckets closure system act as strong visual cues that indicate when the bucket is in Lockdown mode, or in easy access mode.

PUNCTURE RESISTANT

Sewn into the bottom of every Safe Bucket is hard composite plating that protects the bucket from accidental punctures. A protective leather sleeve covers the inserts that is resilient to the elements and harsh work environments.

CARABINER AND HOISTING STRAP

Instead of rope which is susceptible to fraying, a heavy-duty hoisting/shoulder strap is built into every Safe Bucket. Each bucket is also equipped with a high-quality and lightweight aluminium twist-lock carabiner load rated for 30 kN (6,700 lbs). There is no need to worry about a knot failing, or a non-locking carabiner which may slip off a connection point.
