Mandatory documents…

- List of regulatory and other requirements
- Scope of the BCMS
- Business Continuity Policy
- Business continuity objectives
- Evidence of personnel competences
- Records of communication
- Business impact analysis
- Risk assessment, including risk appetite

… Mandatory documents

- Incident response structure
- Business continuity plans
- Recovery procedures
- Results of monitoring and measurement
- Results of internal audit
- Results of management review
- Results of corrective actions

How to sell the idea to management?

Benefits!

- Compliance
- Marketing edge
- Reduce dependence on individuals
- Prevent large-scale damage

Biggest challenges in ISO 22301 implementation

- The board doesn't want to waste resources on something that is unlikely to happen
- Without a regulatory driver continuity is often given less attention and delegated to less senior oversight
- Risk evaluation, potential threats identification
- Getting the right people in place to accept responsibility and attend meetings
- Training all the employees to perform their part during the emergency situation

Conclusions

Unless you have specific requirement to implement some other business continuity framework, ISO 22301 is most probably the best solution
