

ISO55001 Asset Management System Standard Scheme

David Hitchen: Global Scheme Manager, Compliance & Risk,
BSI EMEA, Milton Keynes, UK

Agenda

- The ISO5500X family
- Asset Management Systems – purpose?
- Key decision makers in Asset Management Systems
- Focus of ISO55001 requirements – who?
- Focus of ISO55001 requirements – what?
- Challenges in implementation
- Relationships with other management systems and standards
- BSI ISO55001 Scheme Rules and accreditation
- Audit focus of ISO55001
- Our journey with Scottish Water
- Training

ISO5500X Asset Management Standards

- ISO55000: Asset management — Overview, principles and terminology
 - so we can all speak the same language
- ISO55001: Asset management — Management systems — Requirements
 - auditable and certifiable
- ISO55002: Asset management - Management systems – Guidelines for the application of ISO 55001
 - good value consultancy!

Purpose of an Asset Management System (AMS)

AM is the coordinated activity of an organisation to realise value from assets (ISO55000, p4)

Realising value:

Total cost of ownership: capital, revenue, maintenance, operations, decommissioningregulatory compliance, reputation, political environment, social costs, technological costs.

Service utility

Purpose of an Asset Management System (AMS)

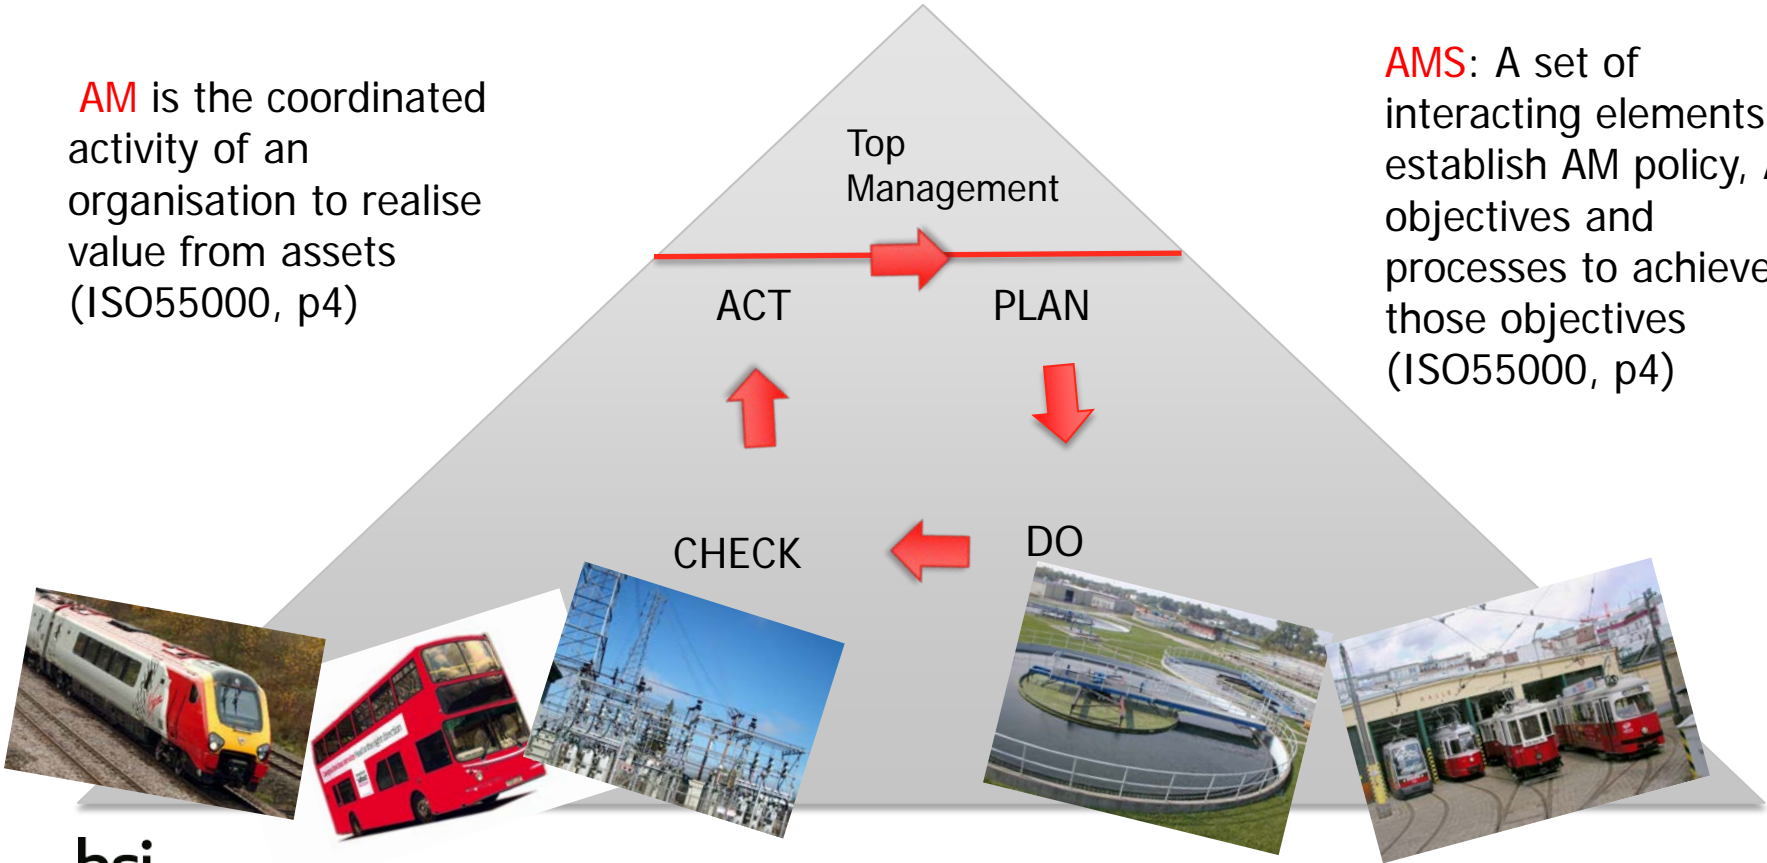

AMS: A set of interacting elements to establish AM policy, AM objectives and processes to achieve those objectives (ISO55000, p4)

Purpose of an Asset Management System (AMS)

AM is the coordinated activity of an organisation to realise value from assets (ISO55000, p4)

AMS: A set of interacting elements to establish AM policy, AM objectives and processes to achieve those objectives (ISO55000, p4)

Decision makers for AMS alignment with ISO55001

Top Management supported by **Finance**, **Commercial** and **Asset Management**

Commercial:
Capex & disposals

Finance

Operations

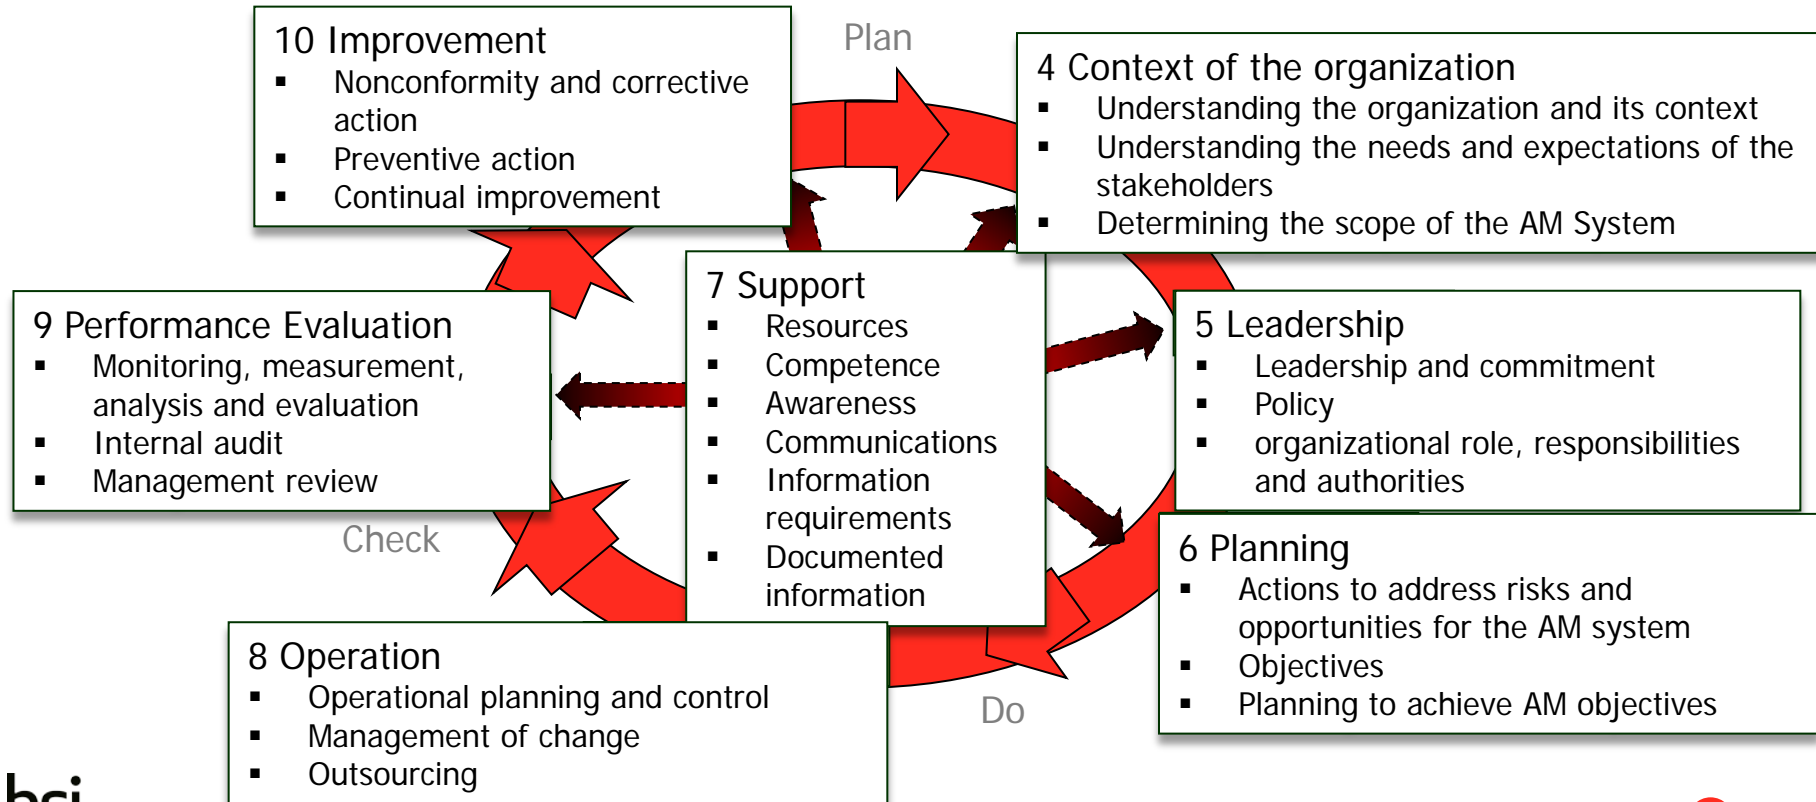

Engineering/
maintenance

Focus of ISO55001 and Organisation Hierarchy

ISO 55001 – Conformance Requirements

Challenges in implementation of ISO55001

Resolving conflicts
between Finance and
Engineering senior
managers/directors

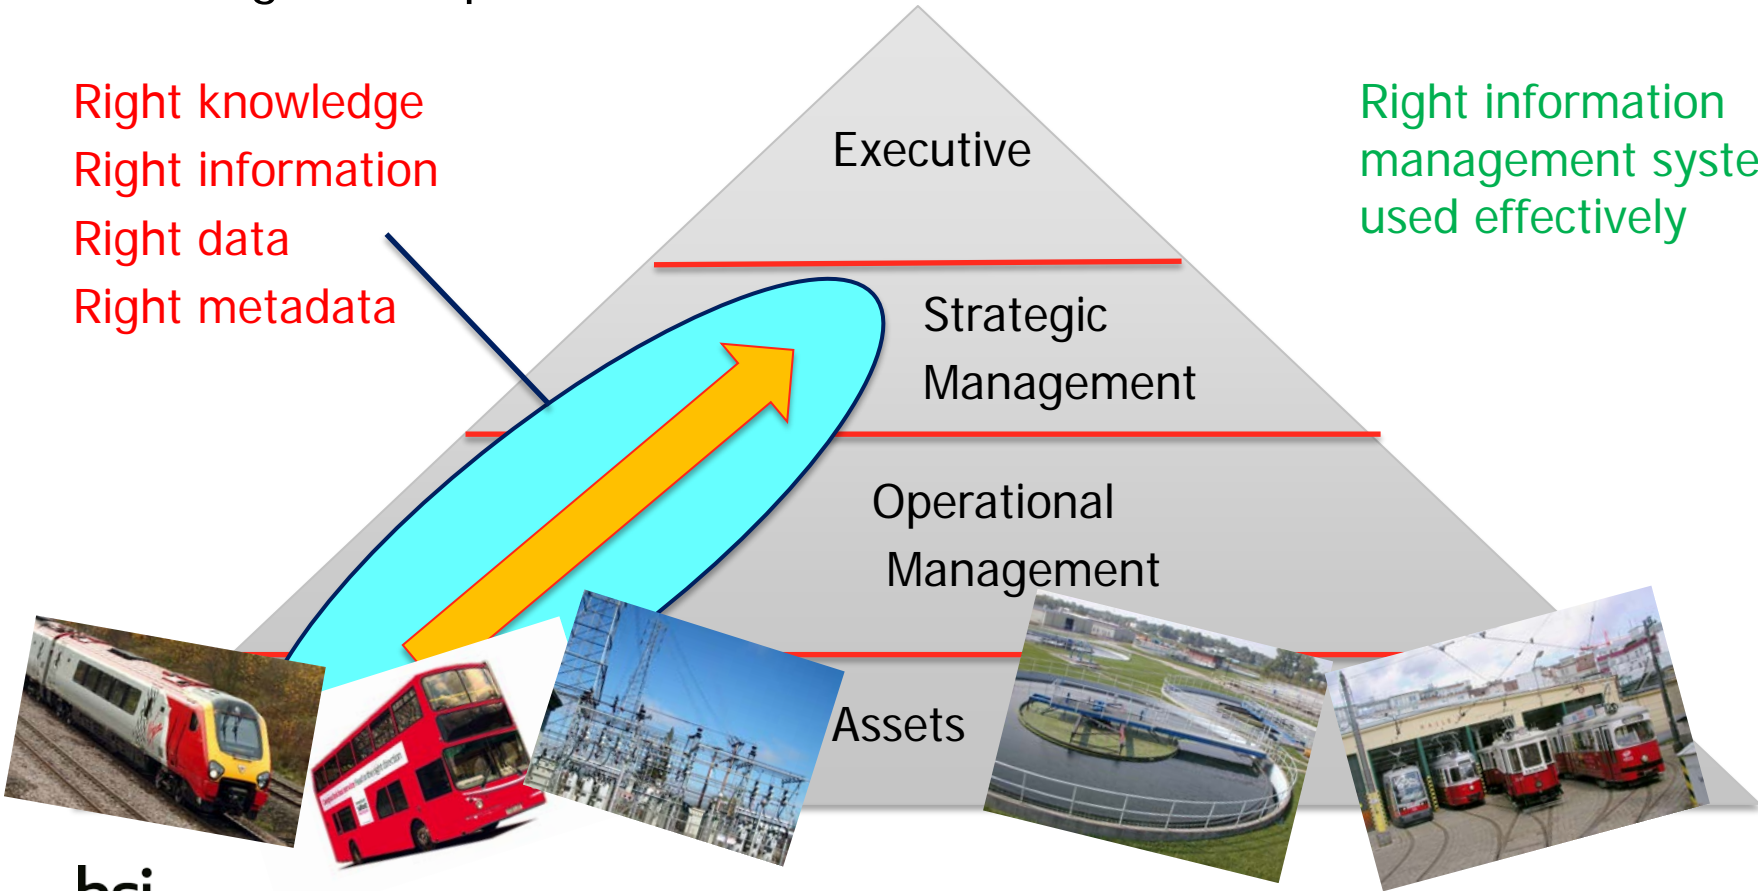

Strategic Asset
Management
Plan (SAMP)

Challenges in implementation of ISO55001

Right knowledge
Right information
Right data
Right metadata

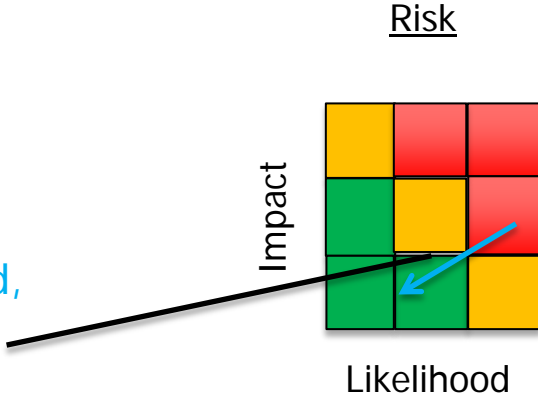

Right information management systems,
used effectively

Challenges in implementation of ISO55001

Risk control:

Reduce likelihood,
Reduce impact,
Reduce both

-  Unacceptable risk
-  Borderline risk
-  Acceptable risk

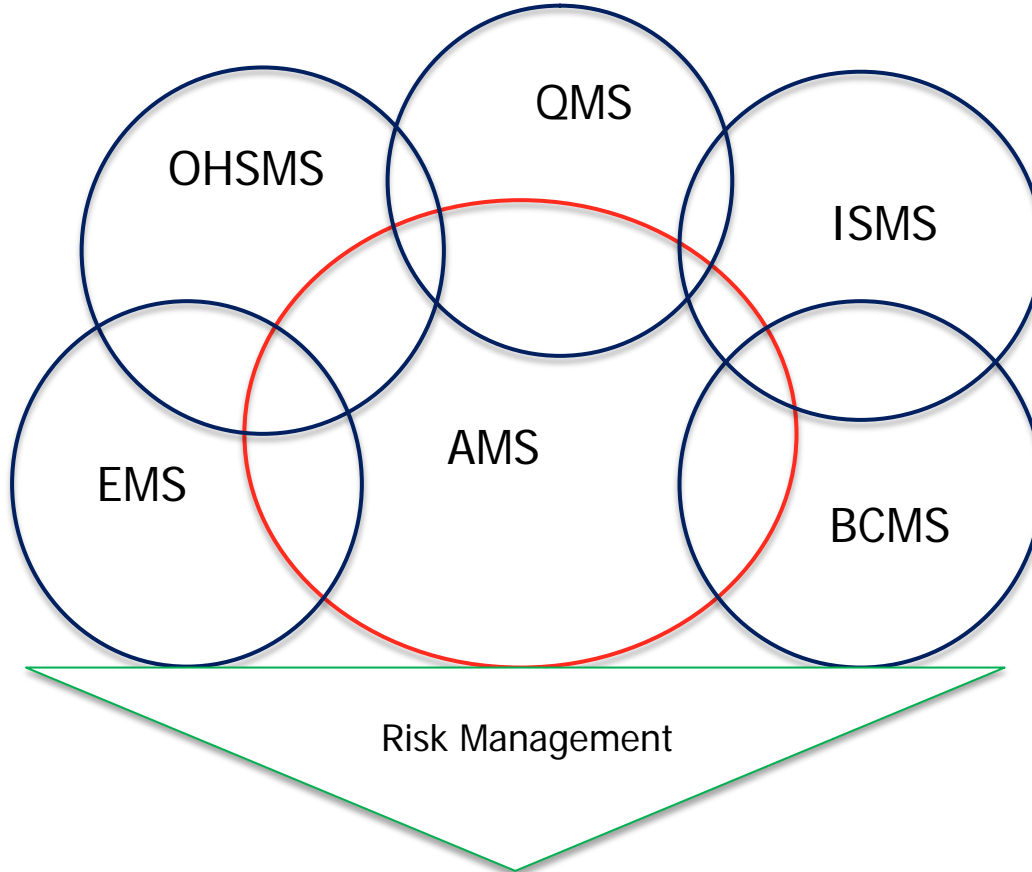

Challenges in implementation of ISO55001

Assessing, ranking,
balancing and controlling
different risk types
against each other

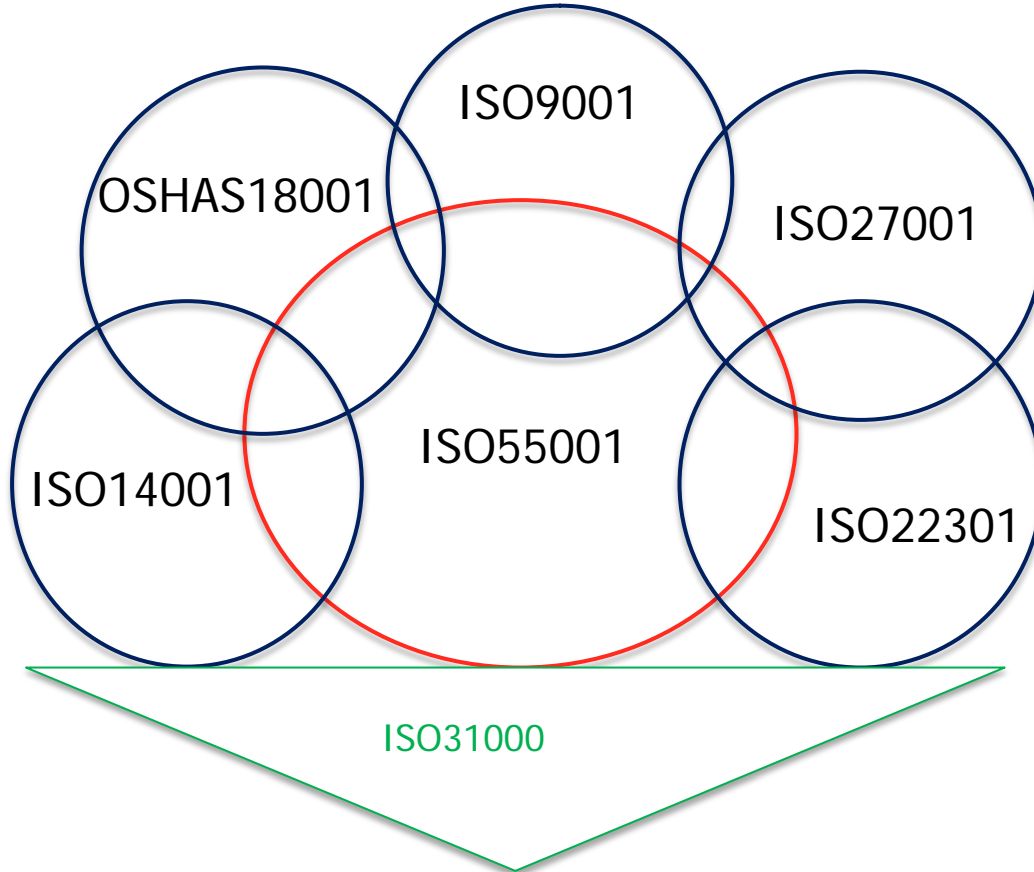

Establish a comprehensive
and consistent risk
assessment and control
process

Relationship between AMS and other formal management systems

Relationship between ISO55001 and other formal management systems standards

BSI Scheme Management

- To ensure that the delivery of our audit and certification service is:
 - Impartial
 - Independent
 - Competent
 - Confidential
- To be able to meet the requirements of ISO17021:2011 –

We can be accredited by National Accreditation Bodies

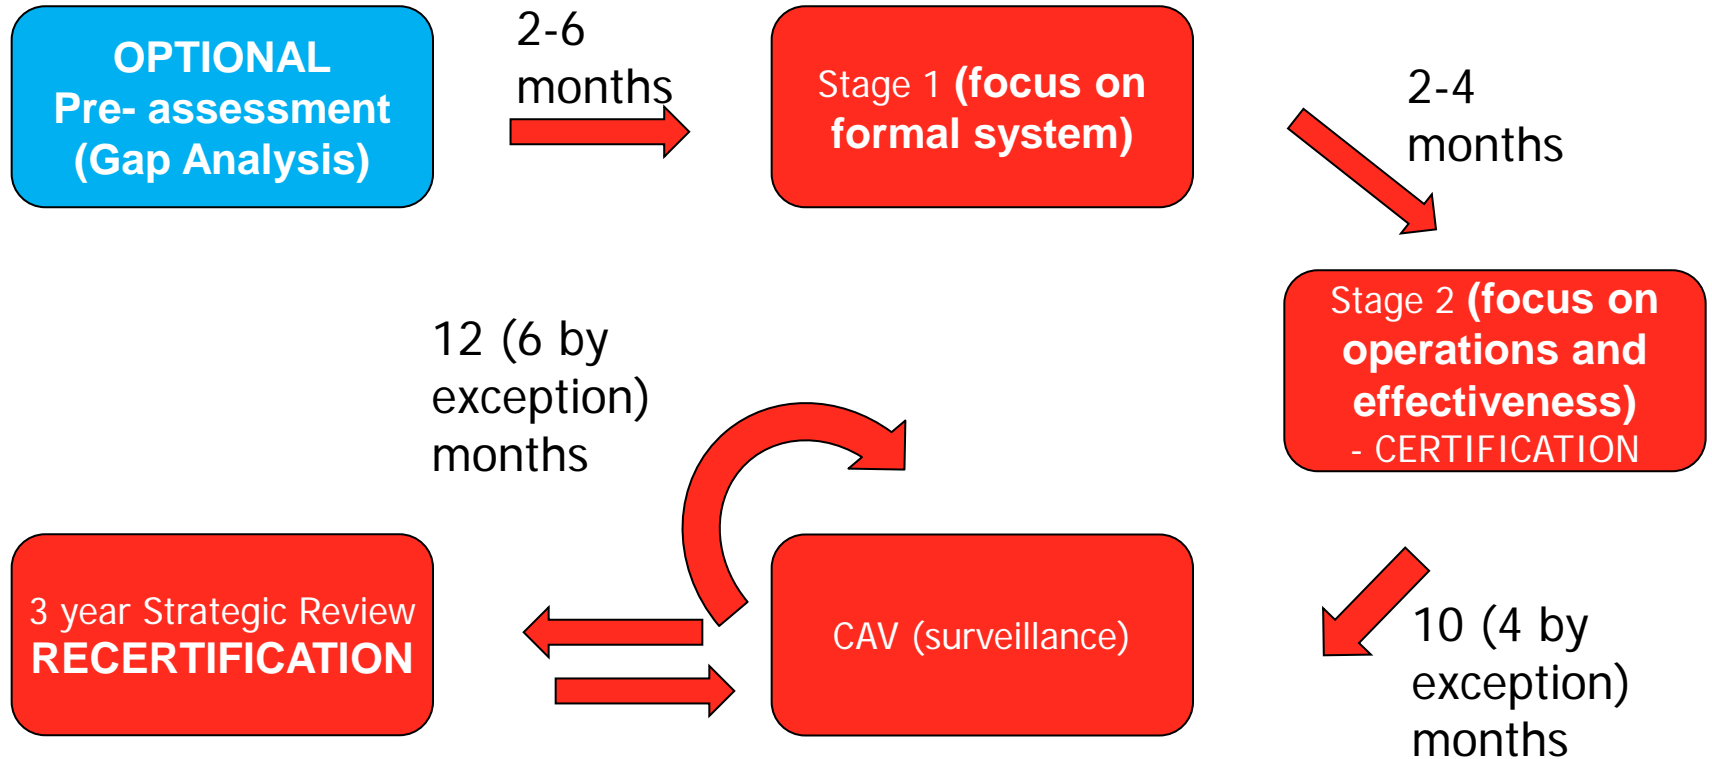

ISO55001 Certificate Scope Definition

- Important!
 - For clarity of understanding of interested parties
 - Integrity of the certification service
- *'The asset management system in relation to governance of 'brief description of the asset portfolio being managed' and 'the service being provided by these assets'*

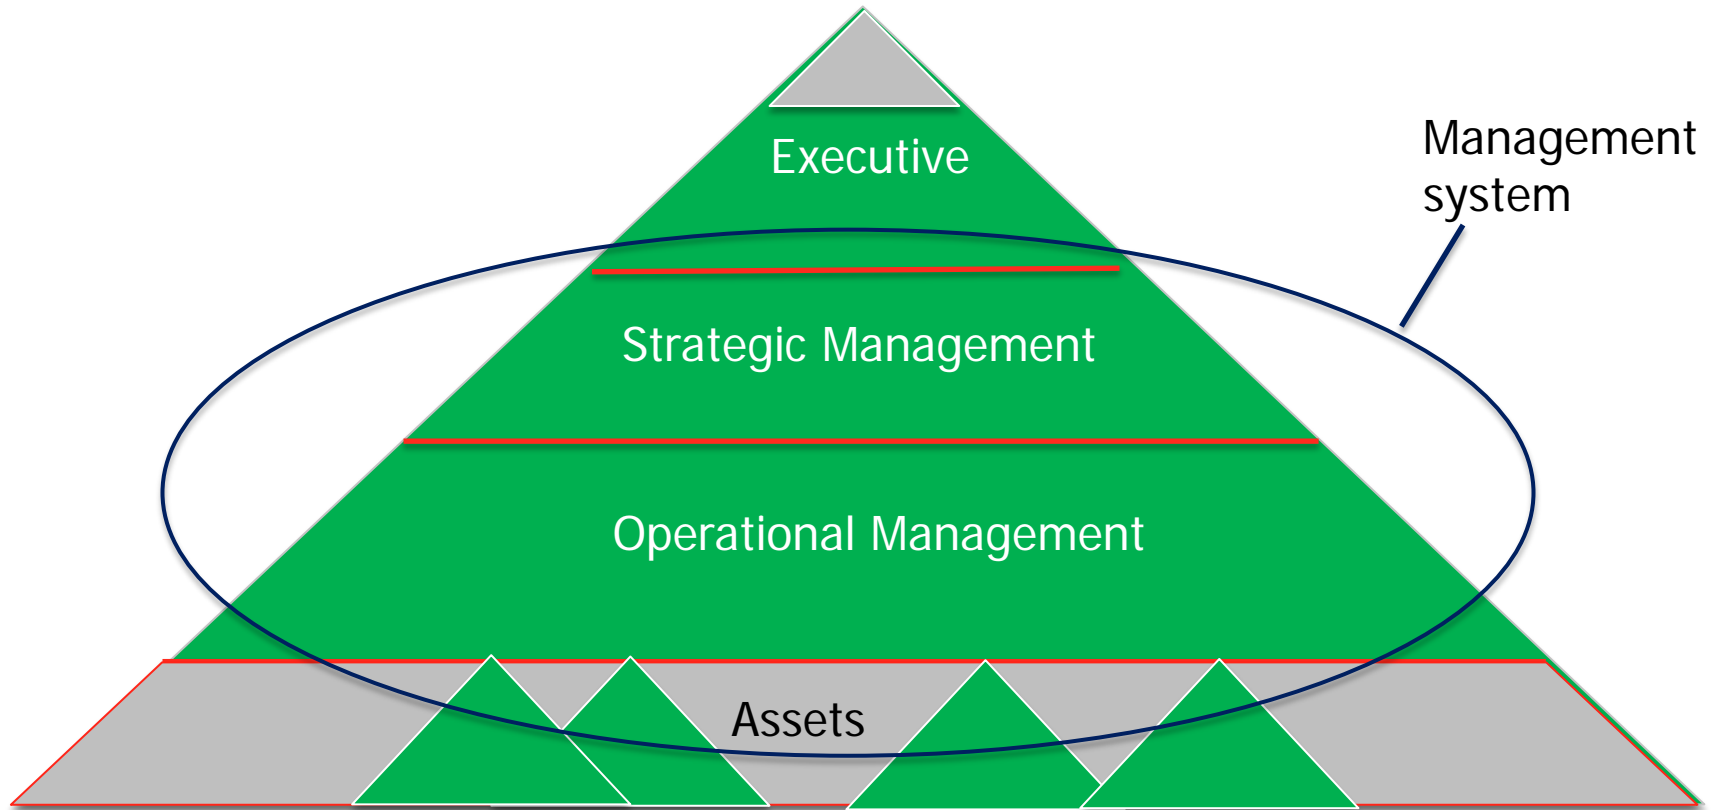

Auditing

- Optional **systems 'gap analysis'** – informal review of the documentation structure and function.
- **Stage 1 audit** – formal assessment of organisation's documented system, governance structure and plans for implementing and operating the management system.
- **Stage 2 audit** – formal assessment of the operation of the management system and its effectiveness in achieving the management objectives.
- **CAV (Continual Assessment Visit)** – surveillance of the operation of the management system.

Certification Cycle

Focus of Auditing to ISO55001

Audits

- Need to visit example asset types, at Stage 2 and CAVs
- ...to verify and validate asset system performance or condition against records.
- Resource intensive and time consuming and is not the focus of systems conformance, so is undertaken on an **example** rather than **sample** basis.

Audit Trail: Themes

'Purpose'

4 Context of the organization

5 Leadership*

'Line of sight'

5 Leadership*

6 Planning

8 Operation

'Support'

7 Support

'Measurement and Improvement'

6 Planning*

9 Performance evaluation

10 Improvement

* Selected subclauses

Assessment Plans

Stage 2 Assessment Plan

Report Number: SMO 1234566

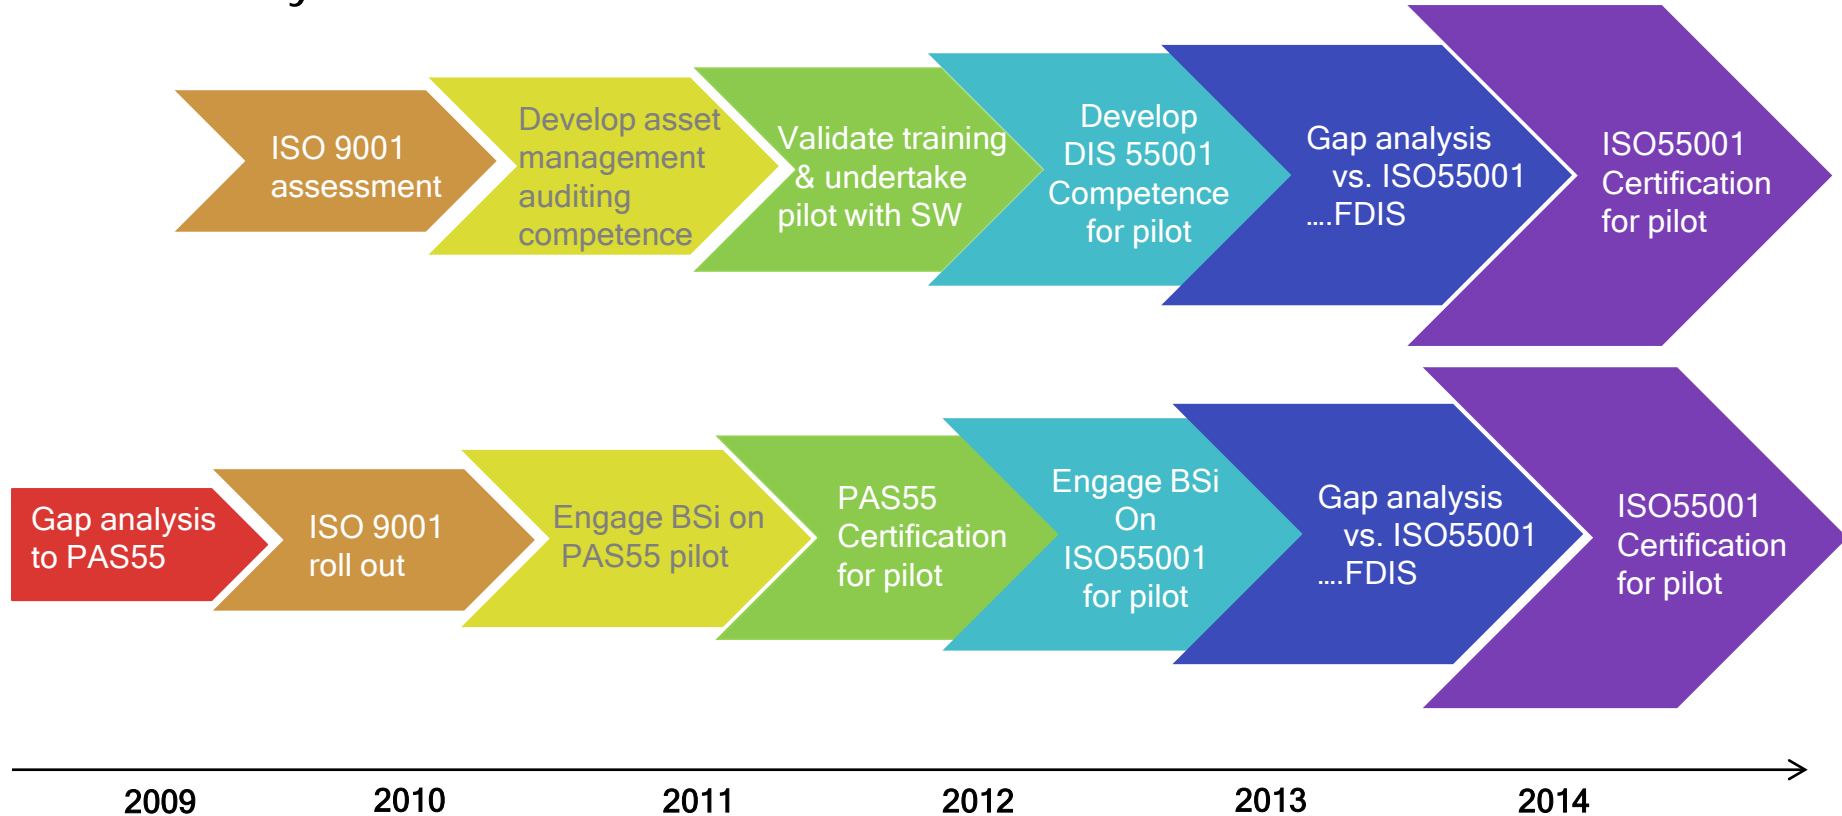

Sheet Number : 1 of 3

Client: Isle of Sodor Railways			
Visit Objectives: Stage 2 Assessment to ISO55001			
Visit Scope: Organisation's AMS including all assets on the Isle of Sodor			
Management Standard:	ISO55001	BSI Team: Leader:	Ivor Nencey
Opening Meeting Date/Time:	18/3/14 9:00	Members:	Willie Dooan Areseay
Closing Meeting Date/Time:	19/3/14 16:00		
Company Representative:	Sir Topham Hatt (MD) Jack O'Falltrades (Ast. Mgr)		
Language of Assessment:	English		8 man days

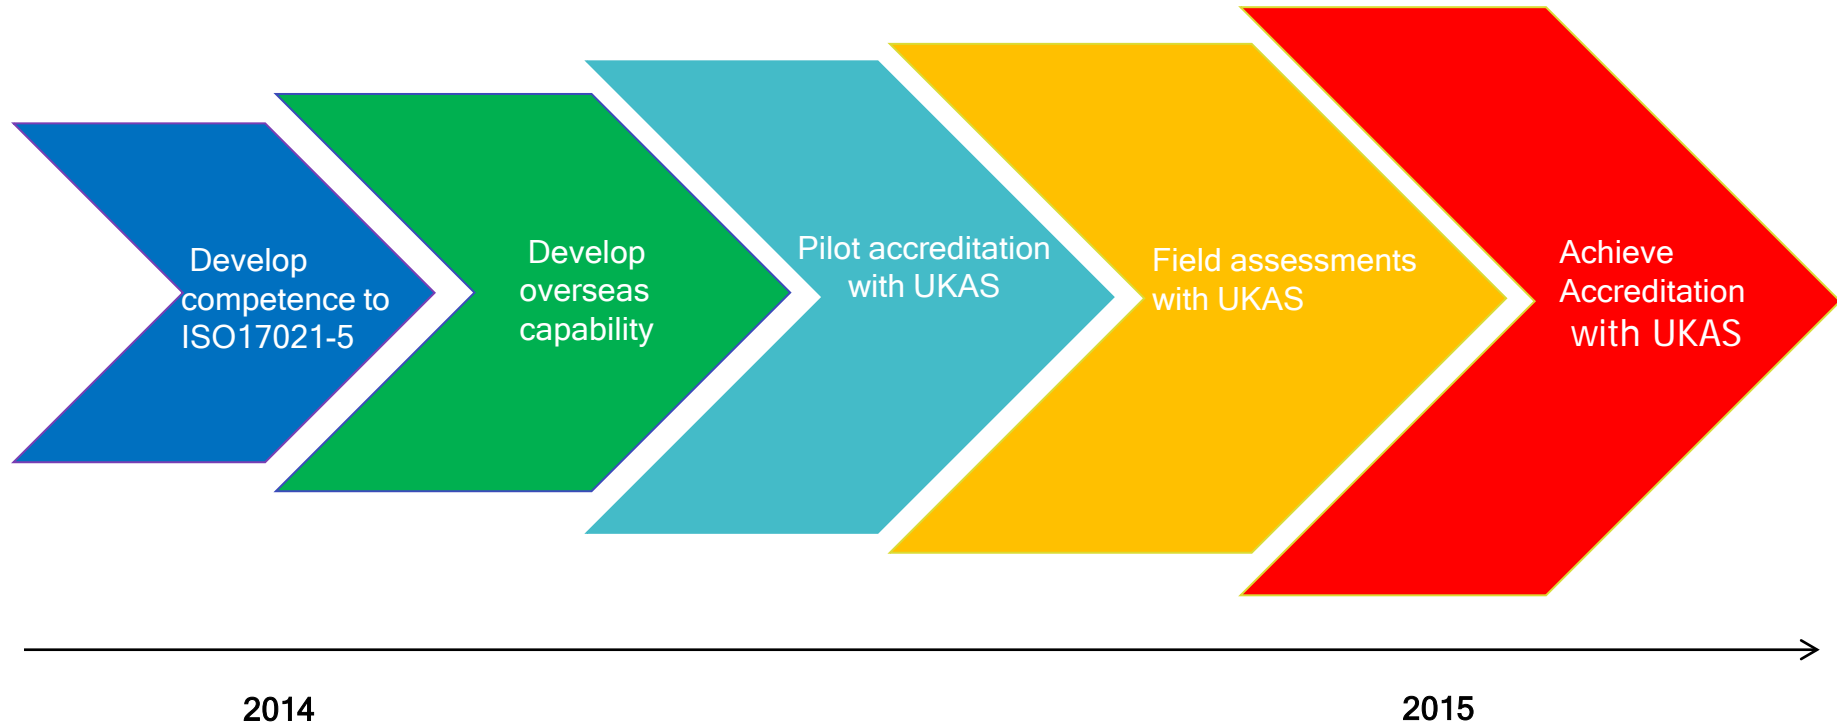

Date	Time	Assessor	Area/Process	Clause	Client

Summary

- Asset Management Systems (AMS) are designed to maximise value from assets.
- ISO55001 represents a formally codified internationally recognised asset management system standard.
- Organisation's success requires top management commitment: **SAMP, Good information systems: used effectively, Comprehensive risk assessment and controls.**
- BSI Certification of your organisation to ISO55001 provides **independent assurance** of the organisation's governance and processes for maximising value from assets. For your assurance, your business partner's assurance and to benchmark against your competition. BSI Training can help you on each step of this journey.
