*Essential tools are critical to proper vehicle diagnosis, service and repair. For this reason, Isuzu Truck's Dealer Sales and Service Agreement Standard Provisions require that Dealers obtain and maintain those tools identified by Isuzu Commercial Truck as essential. Before any tool is designated as essential, Isuzu Truck engineering determines the need for the tool, and works closely with Bosch Automotive Service Solutions to validate each tool's function on the applied make/model. Additionally, Isuzu Truck considers any commercially available tool options prior to every tool release. Actual tool costs are driven by timing requirements, design, materials selected, manufacturing process, and low tool production volumes. Each tool is maintained in Bosch inventory for over seven years after make/model end-of-production.*

**IMPORTANT!**
