

The background is a solid black field. Across the upper half, there are several overlapping, wavy lines that flow from left to right. These lines are composed of many thin, parallel strokes. Some are a light grey, while others are a vibrant red. A single, thicker red line also weaves through the pattern. In the lower-left quadrant, a large, glowing, light-blue or white swoosh curves upwards and to the right, resembling a stylized 'C' or a comet's tail. The overall effect is one of dynamic movement and high-tech aesthetics.

PRO
SOUND & VIDEO

IT'S ALL ABOUT PERFORMANCE

CREATING A PROFESSIONAL EXPERIENCE

Today's technology has the power to inspire, motivate, educate, and entertain like never before. It only takes the right knowledge and expertise to know how to apply that technology to create results. That's where Pro Sound & Video comes in. For over 30 years we've been the specialists for audio, video, show control, and technology design for top companies in multiple industries.

A COMPLETE LINE OF SERVICES. AN INTEGRATED APPROACH.

Unforgettable experiences are those that thrill all of the senses. This is why Pro Sound & Video offers a wide variety of services, all with the technical expertise to seamlessly combine any one or a number of services into a complete integrated system.

SOUND

We don't just create and install sound systems . . . we design soundscapes. Immersing an audience in voice, sound effects, and music has never been more impressive.

VIDEO

With the spread of high-definition technology and special effects teams bending the limits of the imagination, true-to-life video is right at your fingertips.

BROADCAST TV

It takes a special kind of discipline to capture the live moments, stage dramatic ones or simply distribute performances and events. Our team is well-versed in the flawless execution and editing of anything meant for television.

SHOW CONTROL

Lights dim, the spotlight comes up, 20-foot video screens drop down in sync as the music starts, performers' voices are amplified as if by magic... this is just the beginning of what is possible with our Show Control systems.

VIDEO CONFERENCING

Now you really can be in two places at once – anywhere in the world. Our state-of-the-art video conferencing solutions offer flawless video and phone integration to make meetings happen from hundreds of miles away or to expand an audience across the globe.

DESIGN + ENGINEERING

At our core, we think and work like engineers, which means we don't just think about what is possible – we also think about what is convenient, user-friendly, and personalized to the needs of our clients and the situation.

Of course, like any business that is serious about technology as is Pro Sound & Video – we are committed to customized solutions on each and every project. Never content to settle for an off-the-shelf answer unless it truly is the best, we pride ourselves on our ability to impress clients with every aspect of a project from start to finish. From providing informed insight, to smart use of budgets, to respecting timeliness, our dedication to excellence is what has made Pro Sound & Video one of the most respected names in audio and video today.

A REPUTATION FOR RESULTS

Across numerous industries and multiple highly technical disciplines, Pro Sound & Video believes it is the end result that is the most important. When you work with us you have the advantage of a precision team ready to make a difference on your behalf, regardless of what industry you are in.

Company Profile

Pro Sound and Video was founded in 1975. Having achieved major success in the live audio and lighting market, the company gradually unfolded its wings to its primary focus: design, engineering, and integration of audio, video, broadcast, and control systems. In the years since, the company has consistently met its goal of being not necessarily the biggest, but the best, as exemplified by its stellar portfolio. Even more impressive, these clients come back time and time again, as a testament to the company's unequalled quality of work. We proudly present our achievements. Highlights include:

- **Arizona Cardinals Stadium** – The only complete Design/Build NFL stadium in the United States.
- **Miami Beach Soundscape** – New York Times described as best outdoor sound system on the planet.
- **Walt Disney World** – We are, by far, the leading audio integrator, having completed in excess of 30 large scale projects, including Illuminations, Fantasmic, Main Street Parade, and most of the Animal Kingdom.
- **Construction of over 45 large scale sporting facilities** (stadiums, arenas, racetracks, etc). Roughly half professional sports franchises and half major universities, including some of the world's most complex.
- **New World Symphony and Walt Disney Concert Hall** – Preeminent concert halls in North America
- **Supported** (5) Super Bowls, (5) NASCAR championships, (1) World Series, (1) BCS championship.
- **US House of Representatives** – Completion of multiple projects for the US House of Representatives.

Our Staff

In keeping with its quality over quantity mindset, the company employs less than 100 people. The average employee has over 15 years of experience in audio, video, broadcast, control systems, RF/TV systems and related disciplines, whereas more senior employees have roughly 20 years or greater.

This hyper-intense focus on knowledge and experience has allowed the company to expand from its 12,000 sq ft / one acre base in Miami, FL to substantial offices in Orlando and Pensacola, with a bonding capacity of \$40 million. We also have a West Coast affiliate, based in Los Angeles. The company currently services much of the US, Caribbean, and South America, with active licenses in over 20 states.

Diverse Facility Experience

We provide design and installation services to stadiums, arenas, convention centers, hotels, nightclubs, theatres, meeting facilities, houses of worship, courtrooms, universities, medical, corporate boardrooms, government, and military, just to name a few.

Our work includes some of the most complex examples of technology in each of these categories, with a remarkable percentage of our work completed as design / build projects.

Engineering Driven

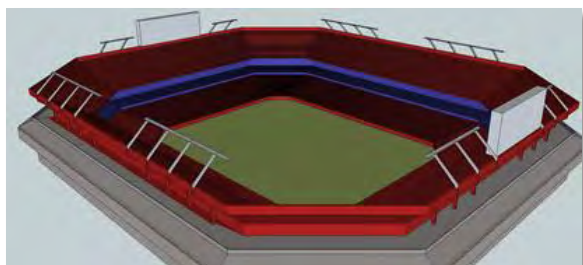

As an engineering-based company, Pro Sound and Video is unmatched. We are on the cutting edge of technology, with state-of-the-art test equipment and training. We are proficient in 3D visualization, networking, programming, acoustic prediction, and system tuning.

As a result, we are often tapped by manufacturers for product development and testing. These strong ties, along with our large purchasing volume, provide unsurpassed manufacturer support and superior purchasing.

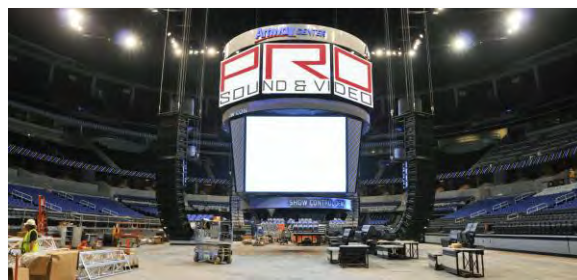

Additionally, the company has an affiliate with over \$1M in rental audio equipment available for support. Communication between all parties is streamlined through custom software and a robust wide-area computer network.

Project Management Focused

Precision engineering is useless without the leadership and resources required to see a job properly implemented from start to finish.

Rather than base our management on paper and bureaucracy, our Project Management model relies first on the knowledge of our enormously experienced staff. With decades of industry experience, we are often the most seasoned force on any team.

Our staff come predominantly from an event production background. We understand our business from an operational perspective and have endless experience with deadlines. Our motto is "The Show Must Go On".

To deliver on this vision, our shops handle extensive pre-fabrication. We have invested heavily in factory grade machinery to automate engraving, wire stripping, wire cutting, crimping, and cable spooling to complement our skilled technicians and produce technology racks that are a work of art.

With dedicated remote access, skilled service technicians, and rock solid warrantee, your investment is protected for years to come.

In-House Machine Shop

The company is also in the unique position of owning and operating an extensive metal fabrication facility on premises.

The facility includes CNC machines, laser engravers, press brakes, wet brushes, large format shears, two computerized engravers, CNC type punch, drill presses, and pimserter. In addition to significant cost-savings, this arrangement allows coordination and turnover times that are unmatched in our industry.

Our machine shop allows us to create custom solutions for every situation. It is the perfect embodiment of our “Nothing is Impossible” attitude that we bring to every single project.

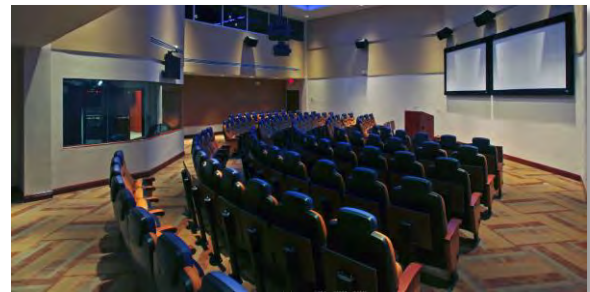

Bringing it all Together

Audio-visual costs are often the most difficult to capture for a construction project. Lowest bid may well produce the best value for drywall and electrical outlets, or even networks and phones. AV systems are custom by their very nature and there is seldom a true apples to apples scenario.

At Pro Sound and Video, we work in technical design and installation, and it is our engineering mindset that elevates the quality of our work as system integrators above our competition.

When you step into your new building, will you have rock solid performance? Pristine work? Useful and accurate documentation? Will the system be intuitive to use? How much thought will be put into the details that will really count over course of your technology investment?

Not the Biggest – Just the Best

At Pro Sound and Video, our best asset is our experience and attention to detail. We deliver a first class experience, on time and on budget, for every single project, no matter the size.

Our staff collectively hold hundreds of technical certifications and we follow rigorous testing procedures to assure flawless execution, both in our shops and in the field.

Many of our competitors are quick to tout their size. While we have a track record of achieving what others said was impossible, our proudest accomplishment is still the quality and diversity of our work, which stands alone in our industry.

Pro Sound and Video. The right experience.

ARIZONA CARDINALS STADIUM

Home of the Arizona Cardinals
Glendale, Arizona
Design/Build Sound, Video & Broadcast Systems

WYNN RESORT & CASINO

Las Vegas, NV
Design and installation of audio, video, control, RF/TV, and satellite systems for ballroom, meeting rooms, sports book, and common areas

CONVENTION, CONFERENCE & HOSPITALITY

For the hundreds of thousands of people attending conventions, conferences, and meetings, the destination provides a unique experience of combining comfort and convenience for their guests. Whether on business or pleasure, or both, the venues seek to provide all of the amenities needed to make the stay one that produces good memories and entices the guest to return again. The meeting spaces must include all types of technology to allow the presentation to impress the attendees and powerfully convey the desired message. Pro Sound & Video has successfully provided these tools for a number of destinations including:

CORPORATE

Today's business world is rapidly becoming a marketplace based on the exchange of multimedia ideas. Meetings now span several different locations thanks to the connectivity of the Internet, video conferencing, and telephone conferencing. Even presentations are now fully interactive experiences, which make meeting spaces, conference centers, and other key business locations more dependent on technology than ever before. To help corporations and businesses put their best foot forward every time, Pro Sound & Video offers responsive and reliable insight and action in developing integrated systems with multiple capabilities. Easy to operate and maintain, our corporate systems have been the choice of:

FP&L JUNO BEACH TRAINING FACILITY

HOUSE OF WORSHIP

As the world changes, so does the celebration and sharing of faith. Today's technology is making it possible for sacred messages to reach hundreds of thousands of people worldwide, and as such, many houses of worship now consider sound, music, lighting, video, and show production to be integral parts of their ministries. Pro Sound & Video can help to create new technology systems from scratch or help an existing system to accomplish new goals. Our current list of worship-based projects includes:

SPORT VENUES

Having a ticket to the game is not the same as it was in years past. The occurrence of attending a sporting event has evolved to where this once simple happening is now a total sensory experience with sound, video, lighting and effects enhancing the game itself. The event has now been transformed into a complete entertainment experience. And as the fan has benefited and enjoyed the new technology they have also demanded more, pushing the envelope of technology further and further. Pro Sound & Video is pleased to participate in the ongoing challenge of taking entertainment technology to the next level for sporting events. A few of our past clients include:

HOMESTEAD MOTORSPORTS

ESPN WIDE WORLD OF SPORTS

TRANSPORTATION

It's almost impossible to count the many millions of passengers and travelers that enter and exit travel destinations each and every day. But it is precisely this immense volume of people that makes flawless communication, sound, and video systems an absolute must. With competition growing increasingly more challenging in all areas of the travel and tourism industry, a rich sensory experience can make all the difference. Pro Sound & Video can make such experiences reality with instructional presentations, engaging entertainment, state-of-the-art interactions and much more. Our work has set the standard for much of the industry, with such exclusive clientele as:
