LITTLE-CARS.COM

Iwata Airbrush & Compressor Catalogue

The neo brushes are made for Iwata.

They are ideal for beginners or those looking for a brush for applications such as priming or varnishing. There are two Variants the gravity feed CN and the bottle fed BCN.

The CN Features interchangeable 1.8ml and 9ml paint cups and a general purpose 0.35mm nozzle set. Both brushes are double action internal mix.

The BCN features a large 1oz plastic bottle feed and a large 0.5ml nozzle set. (special order)

5

Both come with a
Year Warranty

LITTLE-CARS.COM

Iwata Airbrush & Compressor Catalogue

Revolution BR / CR

The Revolution range is the entry level airbrush in the Iwata Range.

These are quality built, high performance airbrushes and are used by beginners and experienced modellers alike. And are covered with the 10 year Iwata warranty.

We stock the two most popular brushes the BR and CR.

Both are double action gravity fed brushes.

The Revolution CR features a 0.5mm general purpose needle and nozzle set for general purpose work and a large 9ml paint cup with lid.

The Revolution BR features a smaller 0.3mm needle and nozzle set and a smaller 1.8ml gravity feed paint cup.

Other brushes available to order are the Revolution AR with a tiny 0.9ml paint cup and 0.3mm nozzle set which is great for small area and touch up work.

The Revolution BCR which features a large 0.5mm nozzle set and suction fed bottles starting at 1oz size. A great brush for large area paint coverage.

The BCR is also available as a single action version called the SAR.

Eclipse Airbrush Range

LITTLE-CARS.COM

Iwata Airbrush & Compressor Catalogue

The Iwata Eclipse range of airbrushes are great multi-purpose brushes, with high paint flow and detail to cover a wide range of uses. Great for general modelling work. They feature fixed or side feed paint cups.

We stock three brushes in this range, the fourth, Eclipse BCS features suction fed 2oz bottle and the larger 0.5mm needle set and can be ordered. We also offer the Eclipse derived Kustom CS

All these Eclipse brushes offer :

Ten Year Warranty

Dual-action

Internal-mix

0.35mm needle and nozzle designed for spraying heavier paints while maintaining high detail spray characteristics

Nozzles are large and easy to clean.

Fine detail to 2" (0.35mm to 50mm) spray pattern

Funnel shaped cup for ease of cleaning and efficient paint flow

Iwata quality and performance at a competitive price

This makes dismantling, cleaning and re-assembly of the brush very simple.

A 0.5mm needle/nozzle and head is also available as an accessory for larger area coverage.

The Eclipse CS is currently the easiest Iwata brush to use and maintain. It is great for large areas, with the ability to be used for reasonably fine work as well.

Eclipse CS

LITTLE-CARS.COM

Iwata Airbrush & Compressor Catalogue

The Eclipse CS features a Gravity-feed with large 1/3oz (9ml) cup

Eclipse BS

Great for smaller areas, has a gravity-feed with small 1/16oz (1.8ml) cup

Eclipse SBS

The SBS supplied with a 3.8ml metal cup. Other plastic and metal cups available as are bottles for larger areas.

Kustom CS

(special order) 0.35mm nozzle set, 14ml Paint cup, Preset handle & moisture filter

LITTLE-CARS.COM

Iwata Airbrush & Compressor Catalogue

The HP Plus is a good workhorse airbrush, and is great for fine detail to medium area coverage

We stock both the HP-B plus and HP-C plus brushes, others available .

Both are gravity feed brushes featuring;

PTFE solvent-proof needle packing

Cutaway preset handle

The HP-B plus features a 1.8ml gravity cup & 0.2mm nozzle set

The HP-C Plus features the larger 9ml paint cup with lid & a 0.3mm nozzle set.

Both brushes can be fitted with both the 0.2 and 0.3mm nozzle sets.

Needles and Nozzles are shared with the Hi-line Range.

LITTLE-CARS.COM

Iwata Airbrush & Compressor Catalogue

Hi-line BH & CH

These airbrushes are recommended to modellers who need precise control over their airbrush, for very fine detailed work

Both can be configured with either a 0.3mm or 0.2mm needle set.

HP-BH

- Fine detail to 1" (0.3mm to 25mm) spray pattern with 0.3mm nozzle
- 0.2mm nozzle HP-BH, HP-AH, HP-SB Plus
- Fine detail to 3/4" (0.2mm to 20mm) spray pattern with 0.2mm nozzle
- Gravity-feed with 1/16oz (1.8ml) cup on HP-BH
- Dual-action , internal mix
- The unique new MAC Valve enabling fine adjustment of airflow at the head of the airbrush. More control of stippling, fine detail and finely atomised background spraying.
- Dual-purpose, cutaway and pre-set handle for easy clean and precise control of paint flow
- Teflon™ needle packing for automotive or other solvent-based paints
- Larger threads on the nozzle give a more secure fit and better centering of the nozzle
- Tapered gravity-feed cups ensure easy clean up and more efficient paint flow
- Single-piece auxiliary lever/needle-chucking guide provides easy assembly

HP-CH

- As HP-BH except
- 0.3mm nozzle
- Gravity-feed with 1/3oz (9ml) cup and snap on lid on HP-CH

Iwata Airbrush & Compressor Catalogue

Revolution TR-0, TR-1 & TR-2 Airbrush

TR2

Featuring a Pistol Trigger with a fixed dual-action operation.

The Iwata Revolution TR Airbrushes deliver comfortable, ultra-smooth performance that's ideal for anything from general modelling to custom automotive painting.

Equipped with the FA450 Iwata Pistol Grip Filter that acts as a superior defence against moisture, the HP-TR1 and HP-TR2 give total control over paint and spray just like conventional airbrushes.

Their designs offer the same comfort and feel typical of a larger spray gun, perfect if you are either used to this type of gun or have any joint problems that restrict your use of a conventional airbrush.

Each is impervious to solvent-based paints thanks to the Teflon packing needle seal, which can be easily replaced.

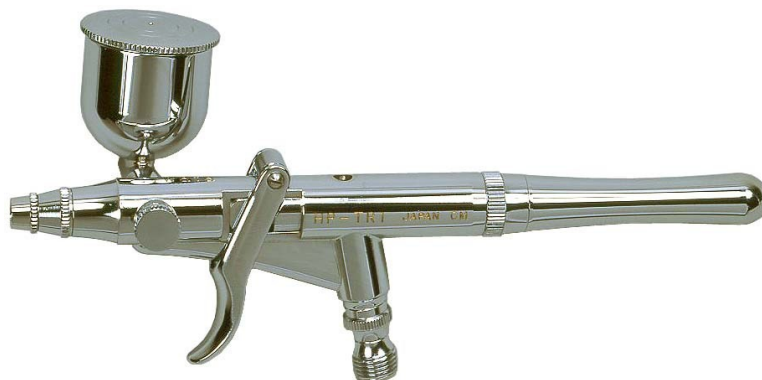

The HP-TR0 (0.2mm) comes with a 7ml side-mount colour cup,

The HP-TR1 (0.3mm) comes with a 7ml side-mount colour cup,

The HP-TR2 (0.5mm) sports a 15ml . side-mount cup.

Note: Compatible with Iwata replacement cups, plastic cups and Iwata 1oz, 2oz side-mount bottle.

An optional custom grip handle (K200) is available as an accessory for even greater comfort

Iwata Airbrush & Compressor Catalogue

Iwata

Iwata Studio Series Power Jet Plus Compressor

The Power Jet Plus has a wide range of pressure settings 0-60psi.

So is great for everyday airbrushing as well as applications that need more pressure. The compressor features:

- Low maintenance, oil-less twin piston air compressor with 1/4 HP induction motor
- 480 cc air tank inside the handle
- Working pressure from 0 psi to 60 psi. .4 CFM (40 lpm)
- Automatic switching reduces running time and motor wear (40 psi on / 60 psi off)
- Air regulator with moisture filter and pressure gauge
- Size: H 34 x W 17 x H 26 cm approx Weight: 7.3 kg Voltage: 220-240V 50Hz

Our compressors are from the same factory that makes the Iwata range that we have been selling for years. So they have a proven track record and should give many years of use.

little-jet compressor

LITTLE-CARS.COM

Iwata Airbrush & Compressor Catalogue

The little-jet is our standard compressor offering.

Controlled by a manual on/off switch with a combined moisture trap and air regulator. It is light, very portable and suitable for either occasional or professional use. It is a robust design manufactured with quality components and is both quiet in operation and affordable.

Features of the little-jet:

- Low maintenance, oil-less single piston air compressor
- Quiet running 1/8 Hp motor
- Pressure gauge, moisture trap & Air pressure Regulator
- 12-16 litres of air per minute.
- Manual Power switch
- Supplied with a 6mm black vinyl hose with a standard 1/8th connector.
- Voltage: 220-240V
- Size: 26.5 x 14.5 x 17cm
- Weight: 3.5kg
- One year Guarantee

We have options to convert the supplied hose to fit all popular airbrushes

little-tank compressor

This is our premium compressor. Like the other little-cars compressor this unit is made in the same factory as the Iwata range and is the same high quality and should give many years of use.

The motor is an up-rated 1/6th hp version of the reliable unit that is used in both the Iwata Sprint Jet and little-jet compressors.

This motor sits above and feeds a 2.5 litre air tank.

Once the tank pressure reaches 60psi the motor cuts out automatically. It then starts up again when the tank pressure goes below 40psi.

Other Features;

- A combined moisture trap/regulator is fitted to the front of the tank.
- Airflow is quoted at 23-26lpm, so two airbrushes can be fed at once
- The unit is normally supplied with two large 1/4inch take off points (one is capped off)
- A 2.5m heavy duty clear vinyl hose is supplied and we have options to convert the supplied hose to fit all popular airbrushes
- Size is 27 by 16 by 37cm high and the unit weighs about 8Kg
- It is quiet in operation; rated at 39dB
- The steel case and soft rubber feet help dampen vibration
- And the top carry handle make it easy to move the unit around. The compressor carries a two year guarantee from little-cars.

LITTLE-CARS.COM

Iwata Airbrush & Compressor Catalogue

Graphicair A300S-D

Made in the UK and with a lifetime guarantee this is the most cost effective solution we have found to clearing particles and fumes from the room.

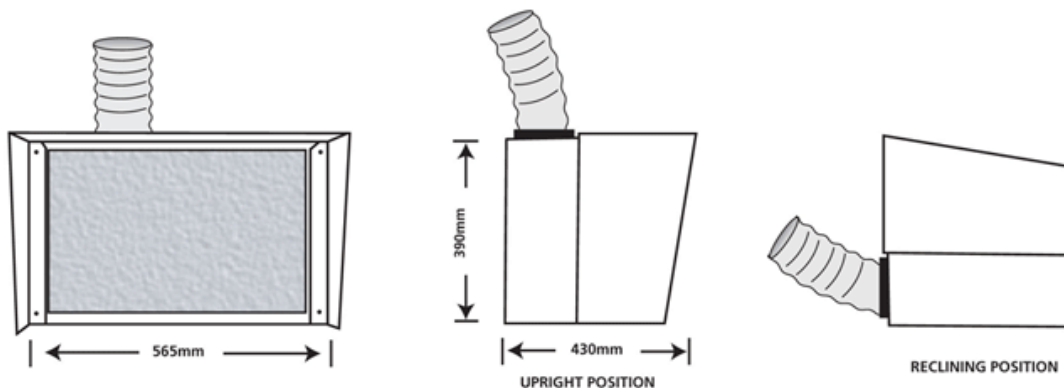

Featuring a metal case, centrifugal blower mounted in front of a brushless motor. All wiring and switches are sealed.

The unit is supplied with a 2m by 100mm flexi-duct and carrying handle. This can be attached to standard domestic vents.

A replaceable fume/spray shield is attached to the the front of the unit.

The unit can be used upright for airbrushing, modelling and soldering application, or on its back for spraying lacquer, fixatives etc to artwork up to A3 in size.

A300S-D Weight = 10 kgs

Filtration

The particulate (intake) filter is a three stage graduated fibre filter with a high 'dust' holding capacity for long life. Filtration to 5 micron particles. NB: Spray particulate sizes vary from 10 to 20 microns.

The dual process of filtration and then extraction to atmosphere via flexi-duct, vastly reduces and/or eliminates operator exposure to potentially hazardous substances.

Specification

Model Number	Fan Motor* Spec	Air Volume At Free Air	Ave. Air Velocity At Filter Face	Ave. Air Velocity At Shield Face	Noise Level LAeq dB(A)
A300S-D	230V 50Hz 105W	355 m3/hr	0.6 m/sec	0.50 m/sec	58

* 110 Volts 50 or 60Hz available if required

This unit is intended for Hobby & Workshop environments, for immediate operator protection from airborne contaminants. Not recommended for continual commercial applications. Other models are available; please contact us with your requirements.
