Health Education Classes

- ❑ Jai Medical Systems offers Health Education classes to members including:
 - Asthma
 - Diabetes
 - Hypertension
 - Weight Management
 - Smoking Cessation

Quality Initiatives

- Well Child Care
- Lead Screen
- Immunizations
- Annual Visits
- Pregnant Women
- Mammograms
- Diabetes
- BMI
- Asthma
- Blood Pressure

Well Child Care

Adolescent Well Care

- ❑ A well child visit during the year for kids 12 to 21 years
- ❑ *Tip/Strategy: Achieved through outreach to find patients and doctors doing a well-child check regularly, even if it has not been an entire year*

Well Child 3-6

- ❑ Same as Adolescent Well Care, except for ages 3-6

Lead Screen

Lead Screen 12-23 Months

- ❑ One lead test during the child's life by December 31st of the year they are between 1-2 years old
- ❑ Ideally this test should occur around the first and second birthdays

Immunizations

Immunization Combo 3

- ❑ For Combo 3, the child needs 4 DTaP, 3 IPV, 1 MMR, 3 HiB, 3 Hep B, 1 VZV, and 4 Pneumococcal conjugate before their second birthday
- ❑ Most common reason for failing are missing or late 4th DTaP and Prevnar shots
- ❑ *Tip/Strategy:*
 - *MMR and VZV only count after the child is 1 year old*
 - *Only Hep B can be given before the child is 42 days old*

Immunizations

Immunization Adolescent

- Did, before the 13th birthday, the patient receive both a Tdap (or tD) and a meningococcal immunization?
- Tdap must be given between the 10th and 13th birthday
- Meningococcal must be given between the 11th and 13 birthday
- Child will fail if shot given too early or too late

Annual Visits

SSI Adults (Disabled Adults on SSI benefits)

- Any type of office visit for adults over 20 during the year
- Initial diagnosis *cannot* be a mental health diagnosis
- Visit must be outpatient

SSI Children (Disabled Children receiving SSI benefits)

- Same as SSI Adults but for children under 21

Pregnant Women

Postpartum Care

- ❑ A visit between 21 and 56 days after delivery (3-8 weeks)
- ❑ This visit can be performed by a PCP and will pass if they code 88150 for the Pap test
- ❑ This visit should include a pelvic exam or the evaluation of weight, BP, breasts, and abdomen, or a notation of “postpartum care” → they only need 1 of the 3
- ❑ OB provider is the ideal place for this visit, but PCP will count too

Mammograms

Breast Cancer Screening, ages 52-73

- One mammogram in the past 2 years

Diabetes

Diabetics

- ❑ The diabetes measure is looking at labs such as HbA1c, LDL-C and microalbuminuria
- ❑ They also measure the percentage of diabetics with an **HbA1c below 7** and the percentage with it above 9
- ❑ The measure is also looking at **blood pressure which should be below 140/80** or 140/90
- ❑ The measure also evaluates the percentage of diabetics who received an eye exam in the year, or an eye exam in the prior year if they were negative for diabetic retinopathy

BMI

Adult BMI

- Patients aged 18-74 with a BMI documented in the last 2 years
- Document the BMI annually for adults and the BMI percentage for children

Asthma

Asthma – Medication Management, ages 5-64

- People with asthma (based on diagnosis codes and prescriptions filled) who received an asthma controller medication
- This CANNOT be albuterol
- Looks at the percentage of members who filled their asthma prescription monthly at least 75% of the time
- Each medication is assessed independently

Blood Pressure

Controlling High Blood Pressure

- Ages 18-85 with the last BP of the year under 140/90
- Multiple BPs may be taken at each visit
- The lowest results are used
- Patient must have been previously diagnosed with hypertension
