

## JIFFY-JAK

## JIFFY-JAK 1

**Makes easy work of opening even the toughest vehicles.  
Now includes the NEW Jiffy Jak Light!**

The Jiffy-Jak is the original, modern, precision crafted long-reach tool. When properly used, the Jiffy-Jak unlocks virtually all vehicles that are equipped with sash style doors with no damage to the vehicle. The operation of the tool is quite simple and can be mastered in only a few minutes.

The small compact kit includes everything needed to properly lever open a vehicle's door, allowing easy access to the inside lock buttons and handles. Included are two high-impact levers, a rubber backed base plate, a compact carrying case, a 6' opening rod with lighted tip and a Manual on DVD.

Both levers include a specially designed hooked end, allowing damage-free levering. The larger of the two levers includes a radius back edge that mates with the protective base plate for positive control. The small lever includes a flat back, spreading the pressure over a wide base. Used correctly, the Jiffy-Jak can lever open even the tightest fitting door without the risk of damage.

The application chart on the following four pages lists many of the vehicles that the Jiffy-Jak has been tested on. Because individual vehicles may vary, use this chart with care. Be particularly careful on vehicles with aftermarket trim around or near the edge of the door, for these instances the Jiffy-Jak1 is strongly recommended as it includes the LKM227 inflatable wedge.

**TO USE THE CHART:** Begin by locating the vehicle you wish to unlock on the following pages. Make sure that you are using the correct year range for the vehicle. If the \* behind the vehicle listing appears in the "Y" column, the Jiffy-Jak can be used safely on that vehicle. If the \* appears in the "N" column, the use of the Jiffy-Jak is not recommended. If the \* appears in the "C" column, extra caution should be used while unlocking that vehicle with the Jiffy-Jak, usually because of trim or glass located near the edge of the door.

**\*\*SPECIAL NOTES ON "DEADLOCKED" VEHICLES:**

BMW and some Land Rover vehicles use a system referred to as a "Deadlock." If the vehicle is deadlocked, the normal operation of the controls inside the vehicle are disabled. However, in many cases the Jiffy-Jak can still be used if the keys are visible inside the vehicle. The tool can be used to operate the key-fob remote, fish the keys out of the vehicle or to turn the key to the "ON" position if the key is in the ignition. If the key is in the ignition and the ignition is turned to "ON" the vehicle "deadlock" will be turned off.

**To Order Call 800.654.0637 or visit [www.lockmasters.com](http://www.lockmasters.com)**
