# INTRODUCTION

This book contains the essential chord progressions used in Rock-related music from 1950 to the present. Each of the chord progressions in the book may be heard on the accompanying CD's.

Memorize every progression in this book or only those applicable to your personal style. If you wish to memorize only selected progressions, listen to the entire tape first and take note of the ones you like.

You can transpose the progressions to other keys by moving each chord fingering used in the progression up or down the neck a certain number of frets. This will enable you to use the progressions fluently in your own arrangements and recognize them in other songs.

I used a guitar synthesizer in addition to my standard electric guitars. Synthesizer sounds (imitating various instruments) were used to suggest instrumentation appropriate to the style of the chord progression. Without a synthesizer, you can broaden your musical skills by working out chord voicings on the guitar to be used on other instruments.

Here is a list of the guitars and guitar synthesizer patches that were used in recording the tape included with this book:

Charvel Soloist (Stratocaster type) with EMG pickups  
Charvel Soloist (Stratocaster type) with Duncan Pearly Gates (bridge) and Ultrasonic Ref 1 pickups  
Charvel Telecaster with Ultrasonic Ref 6, Ref 1, Duncan Hot Tele and Danelectro pickups  
Gibson ES335 with standard Gibson neck pickup and Duncan '59 bridge pickup  
Roland GR700 guitar synthesizer and GR707 guitar

## ABBREVIATIONS & SYMBOLS USED IN CHORD NAMES

$\Delta 7$	=	major seventh chord
$\Delta 9$	=	major ninth chord
/9	=	add nine chord
m/9	=	minor add nine chord
6/9	=	major sixth, add nine chord
m6/9	=	minor sixth, add nine chord
$\circ 7$	=	diminished seventh chord
R	=	chord root
NR	=	no chord root in this fingering
N3	=	no third of the chord in this fingering
N5	=	no fifth of the chord in this fingering
N9	=	no ninth of the chord in this fingering
N11	=	no eleventh of the chord in this fingering

# FRETBOARD DIAGRAMS

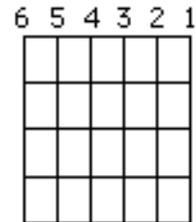

*this diagram.....*

*represents this view  
of the fretboard*

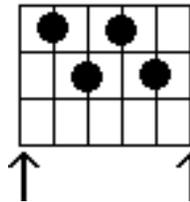

*vertical lines are strings  
(numbered above diagram)*

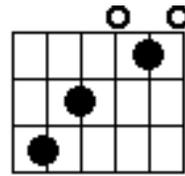

*horizontal  
spaces are frets*

*the actual metal fret is indicated by the  
horizontal line at the bottom of each space*

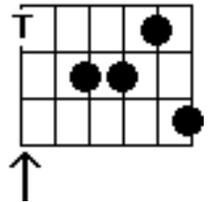

*Dots in these diagrams indicate fingered notes. Chord tones are fingered simultaneously. Scale or arpeggio tones are fingered individually.*

*↑ ↑  
unmarked strings  
are not sounded*

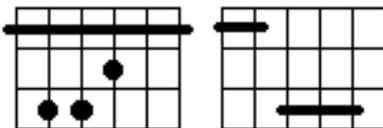

*a circle above a string  
indicates it is played  
open (not fretted)*

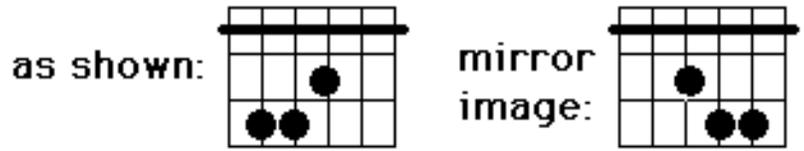

*↑  
"T" indicates a  
note fretted with  
the left thumb.*

**barre'** →

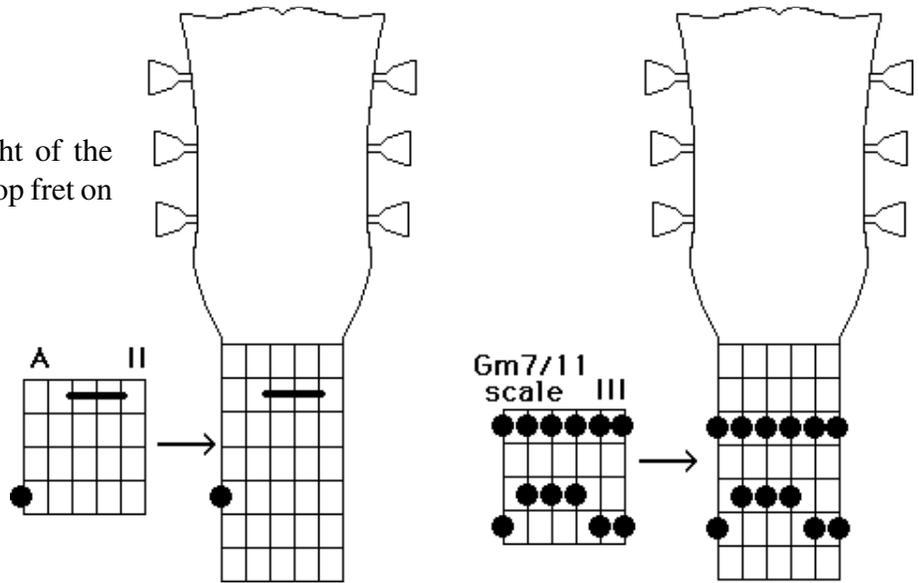

The *barré* is a group of notes all on the same fret of two or more strings fingered with a straight portion of one finger. It uses the classical wrist position. Finger (fret) the barre with the harder edge of your finger when you can. Avoid the creases opposite your knuckles, since they can mute notes.

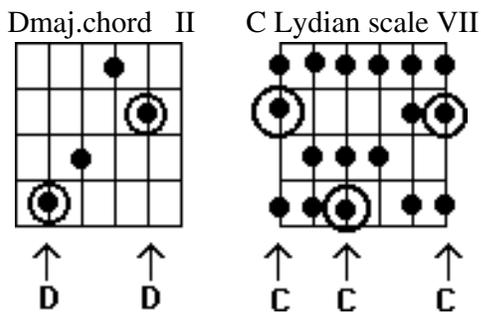

*Left handed guitarists.* Interpret references to the right hand as left hand and vice versa. All diagrams must be imagined in “mirror image”:

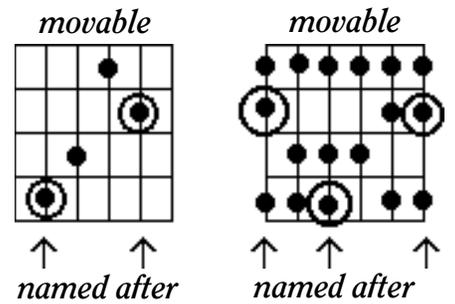

A roman numeral above the top right of the diagram indicates the number of the top fret on the diagram:

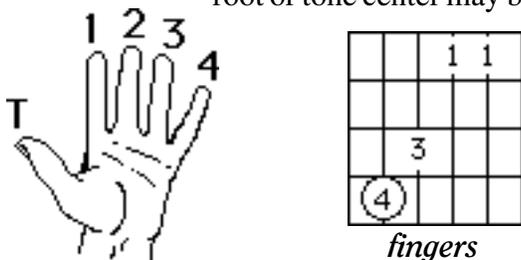

A *chord root* is the note after which a chord is named (“D” is the root of a D major chord). A *tone center* is the note after which a scale is named (“C” is the tone center of a C Lydian scale).

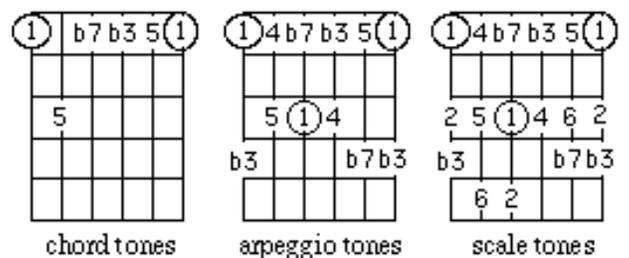

*Movable diagrams* have no roman numeral on their upper right and therefore have no specified top fret number. They may be placed anywhere on the fretboard according to their chord root(s) or tone center(s). If notes on a diagram are indicated by dots, a circled or enlarged dot indicates the chord root or tone center.

The numbers 1, 2, 3 and 4 within diagrams indicate left hand fingers. The finger number on the chord root or tone center may be circled.

When numbers higher than 4 are used in a diagram, all of the numbers indicate scale, chord or arpeggio tones.

# TABLATURE

This system of notation is simply a graph of the guitar strings from the perspective of looking down on the guitar as you're playing it (see below). The numbers on the strings indicate frets and are written from left to right in the sequence they are to be played. In this book, tablature is written below all music notation. The tablature indicates where each note is fretted.

Symbols *below* each fretted note indicate the suggested fretting finger. Left hand finger symbols are “T” for thumb, “1” for index, “2” for middle, “3” for ring and “4” for little finger. “B1” indicates bend an interval of 1 fret. “R” indicates release the bend. “H” means hammer. “P” means pull off. “S” means slide.

Where too many numbers are required to clearly show the left hand fingering for a chord, the chord is diagrammed on a grid above or below the music notation and tablature.

Gm III F I F I Eb III

# PART 1:

# RHYTHM GUITAR

# TECHNIQUE

## TECHNIQUES OF STRUMMING

*Holding the pick.* There are many ways to hold a guitar pick. In the most traditional method, hold the pick between the side of the tip segment of the index finger and the flat surface of the thumb (opposite the thumbnail). Try to extend the tip of the pick 1/4" or less from the thumb for fine control (many players prefer less than 1/8"). Bend the first finger so its tip points toward the base of the thumb. Holding the pick in this manner should allow light pressure between the thumb and first finger.

*The position of the pick in relation to the strings.* To produce the purest string tone, cause the strings to vibrate parallel to the frets, providing maximum clearance and minimum buzzing. Make sure that the pick is held in a plane perpendicular (90°) to the surface of the strings (or to the guitar top), to avoid "catching" the string on upstrokes. Pluck the strings with the tip of the pick. Keep the flat surface of the pick almost, but not quite parallel with the length of the string. Allow the tip of the pick to protrude just barely past the underside of the string (nearest the guitar body).

*Timbrel effects (particular tone qualities).* You can vary the percussive tone quality of picked notes with the part of the pick that contacts the string and the path on which the pick causes the string to vibrate. It is sometimes desirable to increase the buzziness of the string tone. To do so, twist the pick so its surface is less parallel to the string. This increases the force required to sound the string, and causes a harder, more percussive attack with increased scraping of the pick against the string.

Another timbrel effect is produced by tilting the pick to a plane approximately 60° to the surface of the strings (toward the body of the guitar), causing a picked string to vibrate on the frets and buzz. This technique is generally only practical with all upstrokes or all downstrokes.

*Right wrist and hand position.* The shoulder, forearm, wrist and hand should be loose throughout. Apply light, evenly-distributed muscular tension throughout these parts of the hand and arm to support the pick "effortlessly".

The wrist should be slightly bent unless you are using part of the hand to mute. The upper forearm should serve as an "anchor" point against the upper edge of the guitar. The fingertips, side of hand (from the base of the little finger to the wrist), heel of hand, and side of the thumb can touch to judge distance. As you develop your personal technique, you may find yourself touching with various parts of the hand. Analyze your technique to make sure the habits you develop contribute to your control of the pick.

Many players rest the "pinky" side of their hand (between the little finger and the wrist) on the bridge while picking. While this provides stability for the right hand, it sacrifices the tone variation usually available by picking closer to the neck for bass tones or closer to the bridge for treble tones.

*Right wrist sweep.* A sweeping, continuous down-up motion of the wrist is used for strumming chords. Here is an exercise to familiarize you with this motion:

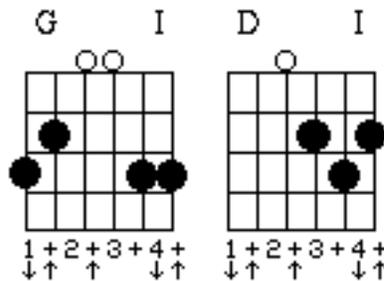

- Move your hand side to side with the same movement as if your hand were palm-down on a table.
- Mute the strings with your left hand and strum down-up alternately on two or three strings as a group; as you would a three note chord.
- Gradually widen the stroke until you are strumming on all six strings.

Note that when strumming alternately down-up on four to six strings, the wrist movement is so wide that it involves a distinct forearm rotation (view the protruding wrist bone nearest the thumb). The weight of the hand will aid the motion of the hand in strumming.

### Rhythmic Selection.

Many accompaniment and melodic rhythms can be played easily when your right hand assumes a continuous motion but you select when the pick contacts the strings. This may be applied to playing single notes or strumming chords.

*Rhythmic selection. Miss the strings where no arrow is shown.*

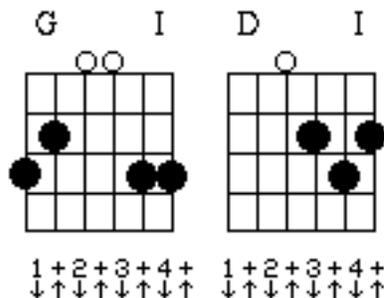

### Strict Down-Up Strumming

In *strict down-up strumming*, each series of continuous notes is strummed strictly (1) down-up-down-up, etc. or (2) up-down-up-down, etc. If you start with a downstroke, the picking order is down-up-down-up, etc. Starting with an upstroke would use the picking order up-down-up-down, etc.

You often pass the strings before strumming them to strictly continue the down-up motion. In theory, the wasted motion is acceptable in order to allow an uninterrupted continuous rhythmic motion.

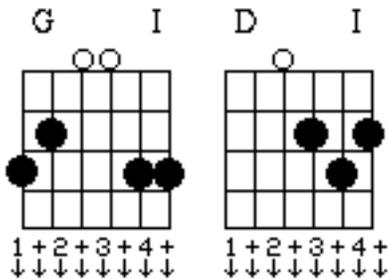

*Down-up strumming exercise. Count evenly: "one - and - two - and - three - and - four - and," as you strum down on the downward arrows and up on the upward arrows.*

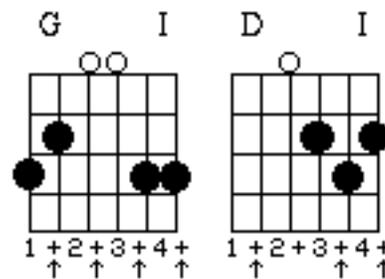

## Exceptions to Strict Down-Up Strumming

*Consecutive downstrokes* or *consecutive upstrokes* provide emphasis and a consistent tone.

*Consecutive downstroke exercise.*

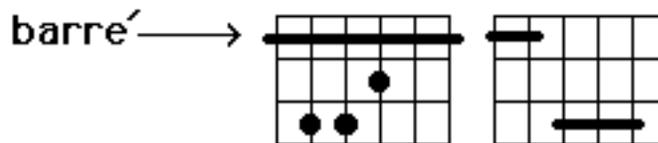

*Consecutive upstroke exercise.*

## LEFT HAND TECHNIQUE

*Fretting techniques.* Fret notes with the fingertip pressing the string up against the left edge of the metal fret. Exert just enough pressure. Contact the string to the fret at precisely the same time the pick touches the string, so that by the time the pick follows through, the note is clearly fretted.

The *barré* is a group of notes all on the same fret of two or more strings fingered with a straight portion of one finger. It uses the classical wrist position. Finger (fret) the barré with the harder edge of your finger when you can. Avoid the creases opposite your knuckles, since they can mute notes.

*Chord cancellation exercise.* This exercise can train you to fret all notes of a chord at once, as they usually should be. Use this exercise when you find yourself “breaking up” a chord fingering.

- Finger the notes of the chord as slowly as necessary, making sure all of them will sound simultaneously;
- Keeping your fingers in place, relax all the fingertips or barring portions of the fingers together, all at once;
- In five steps, move the fingers progressively further from their chord formation, first 1/4 inch away, then 1/2 inch, etc., until the fingers are fully straightened. Return and sound all notes simultaneously after each of the five steps.

## LEFT HAND MUTING

To mute a chord, relax all the left hand fingers at once. If there are open strings in the chord, lay one or more left hand fingers across all the strings in the chord. In muting at the 5th, 7th, 12th, 17th and 19th frets, use two or more fingers, since unwanted open string harmonics can easily be produced when muting with one finger.

When you need to move rapidly to another note or chord after muting with the left hand, the muting and movement to a new fingering must be made in one smooth action. Try to leave the strings in a path perpendicular

to the fretboard without any friction (which would sound open strings). Then, immediately curve the path of the fingertip(s) back toward the fretboard to take the shortest possible path to the next fingering.

## RIGHT HAND MUTING

### Right hand full chord muting.

Keep the side of your hand between the little finger and the wrist consistently touching the strings slightly to your left of the bridge. It helps to use the base of the little finger to feel the point where the first string meets the bridge. Muting farther away from the bridge will mute the pitch more and more until it is not discernible.

### Right hand single note muting.

To mute single notes or notes on adjacent strings, keep the right elbow low and the right hand fingers parallel to the strings. Mute with the heel of the hand (near the hairless inside of the wrist). Consistently mute with the heel of the hand, sliding it just to the left of the bridge to cover the strings you intend to mute. Changing strings while muting with the right hand is easier for most guitarists if the guitar head is lowered to where the neck is almost parallel to the floor.

## FINGERPICK TECHNIQUE

In Classical guitar technique, the thumb is positioned nearly parallel to the sixth string, tipping downward slightly. The other fingers are used nearly perpendicular to the strings, their tips leaning slightly toward the fretboard. The fingers (excluding the thumb) are parallel to one another, nearly touching. All plucking should be performed with little movement of the back of the hand. The back of the hand should remain relaxed. There are two basic strokes:

The *rest stroke* follows through to the next string and comes to rest on it. When the rest stroke is used by the thumb, the smaller adjacent string is muted. When the rest stroke is used by another finger, the larger adjacent string is muted.

The *free stroke* curves away from the adjacent string as it follows through. Adjacent strings are not muted at all in using the free stroke.

# PART 2:

# COUNTING RHYTHM

All rhythms can be thought of as selected pulses from a continuous pulse. Continuous pulses are grouped by twos and threes or combinations of twos and threes.

American dance music, including Jazz, Blues, Rock and Metal, usually suggests a special continuous pulse called the “beat.” Listening to dance music, you would commonly tap your foot on each beat. The torso of a dancer usually surges in time with the beat. The simplest bass drum part would involve one note on each beat.

Two, three or more pulses can occur during each beat. These are subgroups or parts of a beat. So the beat is the main pulse, and can be divided into shorter pulses. The beats are counted with whole numbers “1 - 2 - 3 - 4” and so on.

When there are two pulses per beat, the following symbols are used: “1 + 2 + 3 + 4 +” and so on. Syllables for these symbols are pronounced “one - and - two - and - three - and - four - and.”

When there are three pulses per beat, the following symbols are used: “1 T L 2 T L 3 T L 4 T L” and so on. Syllables for these symbols are pronounced “one - trip - let - two - trip - let - three - trip - let - four - trip - let.”

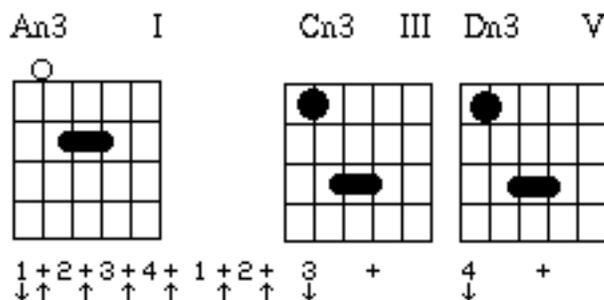

When there are four pulses per beat, the following symbols are used: “1 e + a 2 e + a 3 e + a 4 e + a” and so on. Syllables for these symbols are pronounced “one - ee - and - uh - two - ee - and - uh - three - ee - and - uh - four - ee - and - uh.”

## Syncopation.

When notes are not played on the beat, they are said to be played on the “offbeat.” When a note on an offbeat is followed by (1) a silence, (2) a sustain, or (3) a markedly lesser accent on the next downbeat, “syncopation” occurs.

The following example illustrates syncopation caused by silences on the beat (the numbers).

### *Syncopation strumming example.*

**Pulse groups: subdividing the beat into two, three or four parts.**

There are twenty five possibilities of rhythms that involve two, three or four parts per beat by choosing pulses. These are shown below with counting symbols and direction of strumming.

*Examples 1 through 3 involve two parts per beat. Count: “one-and-two-and-three-and-four-and,” strumming where indicated.*

Example 1

1+2+3+4+

## MIXOLYDIAN HARD ROCK RHYTHM GUITAR EXAMPLES

*Mixolydian Hard Rock Example 1. "A" Mixolydian, except "A" harmonic minor mode V during the Dm chord. Repeat and end on the first chord.*

The following example is played with a combination of strumming and fingerpicking. The downward arrow indicates a downstroke, which should be performed with the right thumb. The right thumb should be used on the fourth string, the right index on the third string, and the right ring finger on the second string.

The "+" symbol represents the syllable "and." Count "one - and - two - and - three - and - four - and" evenly while plucking the strings indicated below the counting symbols. For example: Strum down on the first beat; play nothing on the "+" after the first beat; pluck string four on the second beat; and pluck the third string on the "+" after the second beat.

An3 II	A7n3 II	D II	Dm II
1+2+3+4+	1+2+3+4+	1+2+3+4+	1+2+3+4+
↓ 43 243	↓ 432343	↓ 43 243	↓ 4321234

*Mixolydian Hard Rock Example 2. "A" Mixolydian. Repeat and end on the A chord.*

*Aeolian Metal Example 2. "E" Aeolian. Repeat and end on the first chord.*

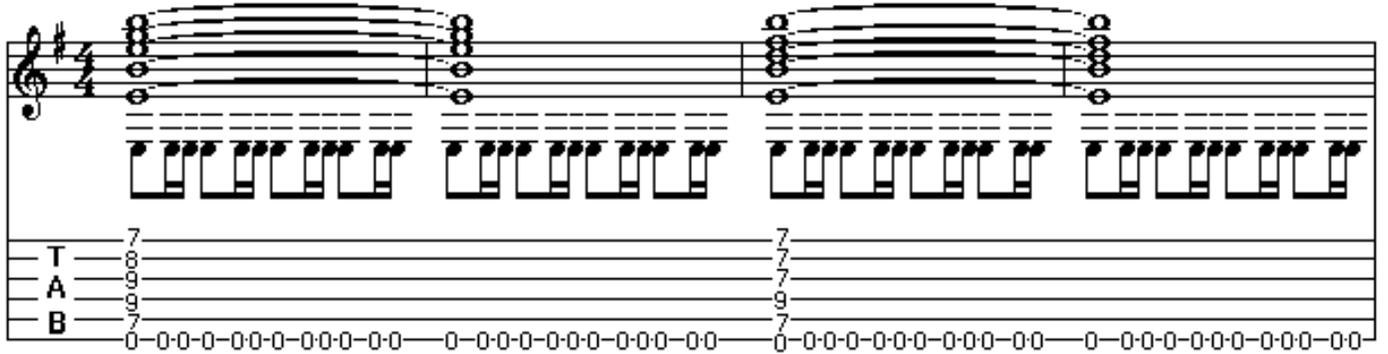

Read the music notation or tablature, using the chord grids to learn the chord fingerings.

Em VII

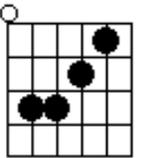

Em7sus2 VII

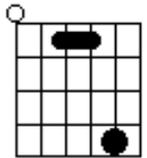

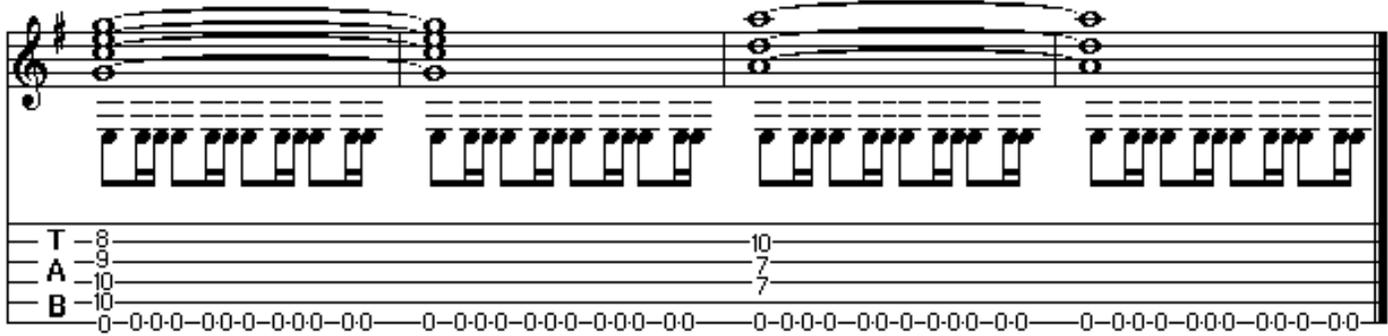

C VIII

Dm3 VII

*Aeolian Metal Example 3. "G" Aeolian. Repeat and end on the Gm chord.*

Read the music notation or tablature, using the chord grids to learn the chord fingerings.

Chord grids for Gm, F, and Eb are shown above the musical notation. The notation includes a treble clef, a 4/4 time signature, and a key signature of one flat. The music consists of a series of chords and melodic lines. Below the notation is a guitar tablature with three strings labeled T, A, and B. The tablature shows fret numbers and string indicators for each note.

**DORIAN METAL RHYTHM GUITAR EXAMPLES**

*Dorian (altered) Metal Example 1. "E" Dorian. Repeat and end on the first note.*

The "Bb" and "F $\sharp$ " act as blue notes.

The notation shows a treble clef, a 4/4 time signature, and a key signature of one sharp. The music features a series of chords and melodic lines. Below the notation is a guitar tablature with three strings labeled T, A, and B. The tablature shows fret numbers and string indicators for each note.

*Dorian Metal Example 2. "A" Dorian. Repeat and end on the An3 chord.*

Read the music notation or tablature, using the chord grids to learn the chord fingerings.

## MIXED MINOR BLUES RHYTHM GUITAR EXAMPLE

Mixed Minor Blues Example 1. "B" Aeolian, optionally using "B" harmonic minor during the Gma7 and F#7 chords. Repeat and end on the first chord.

The musical score is divided into three systems, each with a treble clef and 4/4 time signature. The first system is labeled **Bm7** and contains 8 measures. The second system is labeled **Em7** and **Bm7**, containing 8 measures. The third system is labeled **Gma7**, **F#7**, and **Bm7**, containing 8 measures. Each system includes a melodic line in the treble clef, a guitar tablature line, and three string-specific lines labeled T (Treble), A (Acoustic), and B (Bass). The tablature uses numbers 1-4 for frets and slash marks for string selection. Some notes are marked with an 'S' for slide. The piece concludes with a double bar line.

Detailed description: The image displays five rows of guitar chord diagrams, each representing a stepwise progression of parallel major chords. Each row is numbered in a circle on the left. The chords are labeled above each diagram. The diagrams show the fretboard with dots for fingerings and horizontal lines for barre positions. The strings are numbered 1 to 6 from top to bottom. The progressions are: Row 35: G III, B $\flat$  III, C III, E $\flat$  III, F III, G III. Row 36: G V, B $\flat$  VI, C V, E $\flat$  VI, F V, G V. Row 37: G VII, B $\flat$  VIII, C VIII, E $\flat$  VIII, F VIII, G VII. Row 38: G X, B $\flat$  X, C X, E $\flat$  XI, F X, G X. Row 39: G XII, B $\flat$  XIII, C XII, E $\flat$  XIII, F XIII, G XII.
