WEMCO:

An Association of Manufacturers

WHO Are We?

The members of WEMCO are those Manufactures of high quality products and services that focus on supporting the U.S. and International Welding markets.

WHAT Does WEMCO Do?

WEMCO is an organization committed to benefiting its members by sharing information within the Welding industry and provides a common voice to the welding industry, government bodies and technical standards organizations worldwide.

WHY Do We Spend Our Time Doing It?

In order to better serve your customers you need to know what the distributors and end users are really looking for when it comes to purchasing and consuming the products you manufacture. The networking opportunities and communications within WEMCO focuses directly on the issues or questions you may have for the welding markets to help you grow your business and brand awareness.

WHEN and WHERE Can You Find Us?

WEMCO is available to you throughout the year, as well as accessible through monthly e-briefs and quarterly newsletters that are sent to our members. WEMCO works to educate and enlighten its membership with the latest issues and/or trends in the welding industry. Finally, WEMCO is known for hosting one of the most effective and beneficial annual meetings in the industry. The networking available to you and your organization will well surpass your own capabilities as an individual. Some of the benefits you will experience as a member:

- Exposure to the best networking in the welding industry.
- Participate in WEMCO's annual meetings: compelling topics, top-level executive presenters, and invaluable information to your organization.
- Contribute in business forums, and roundtable that provide workable options and better leveraging.
- Receive monthly e-briefs, and quarterly newsletters, economic forecasting reports from the renowned Alan Beaulieu of the Institute for Trend Research (ITR).

WEMCO'S MISSION, VISION AND DEDICATION

WEMCO's Mission

To provide forums for its members to interact socially and professionally; to harmonize efforts for promotion, distribution and acceptance of our products globally; and to contribute to the well-being of the welding industry.

WEMCO's Vision

WEMCO shall provide an alliance between AWS and manufacturers of welding, cutting, and welding-related industry equipment.

WEMCO's Dedication

WEMCO is dedicated to providing senior management members of manufacturers in the welding industry a forum to

- **Promote plans and programs**, which benefit their understanding of welding equipment market trends and needs.
- **Share solutions** to current industry, organizational and business issues/opportunities.
- **Promote their products and services** worldwide.
- **Provide a common voice** to the welding industry, government bodies and technical standards organizations worldwide.
- **Enhance the image of welding as a** career choice; and, as an industry crucial to building and maintaining the world's economic infrastructure.

WEMCO Executive Board

Chair	Hector Villarreal Weldcoa
First Vice Chair	Bob Ranc Superior Products, Inc.
Past Chair	Jim Horvath Thermadyne Industries

Past WEMCO Chairs

Rusty Franklin	1996 -1998
Phil Winslow	1999 - 2001
John Postle	2002 - 2004
Dean Wilson	2005
Frederick Luening	2006
Robert Roth	2007
Dennis Brown	2008
Jeff Deckrow	2009
Jim Horvath	2010

WEMCO Sub-committees

EXECUTIVE COMMITTEE

Chair: Hector Villarreal of Weldcoa

Ensures the strength and integrity of WEMCO by coordinating and reviewing the subcommittees' activities. The Executive Committee also evaluates the governing structure of WEMCO, and recommends changes to the organization's charter and/or subcommittees.

NOMINATING COMMITTEE

Chair: Jim Horvath of Thermadyne Industries

Responsible for nominating the slate of WEMCO officers and Executive Committee members that are presented for a general membership vote at the general business meeting during the WEMCO Annual Meeting.

PROGRAM COMMITTEE

Chair: Bob Ranc of Superior Products, Inc.

Determines the meeting locations, speakers, and the program format for the WEMCO Annual Meetings. Throughout the year, the committee works together to ensure that the WEMCO Annual Meetings are relevant to WEMCO company members, and the welding industry.

MEMBERSHIP RECRUITMENT

Chair: Dick Wilkinson of OKI Bering, Inc.

Focuses on WEMCO's membership growth, as well as continually examine the benefits of being a WEMCO company member to ensure maximum value proposition. The Membership Recruitment Committee—in conjunction with the Membership Retention Committee—will focus on WEMCO marketing and promotions.

MEMBERSHIP RETENTION

Chair: Latham Pali of J. P. Nissen Company

Develops and maintain WEMCO's internal communication between company member representatives through, but not limited to, quarterly newsletters, specialized reporting (global trade and international standards), and bi-annual periodicals. The Membership Retention Committee—in conjunction with the Membership Recruitment Committee—will periodically re-evaluate WEMCO's value proposition to ensure maximum benefits to each WEMCO company member.

IMAGE OF WELDING COMMITTEE

Chair: Phillip Wittke of Lincoln Electric Company

Serves as a catalyst and thought leader in driving industry efforts to raise the overall profile of welding as a career and communicate to potential candidates the numerous opportunities that exist.

GAWDA LIAISON COMMITTEE

Chair: Doug Morton of Eleet Cryogenics, Inc.

Ensures synchronicity and harmonization between GAWDA, WEMCO, and other organizations/committees in the welding industry.

INFORMATION TECHNOLOGY

Chair: Iain Hodgekins of Superior Products, Inc.

Evaluates various electronic issues that relate to business and commerce within the welding industry. This will include, but not limited to, web site issues, VMI, EDI, and others.

Company Description

AMET is a leading provider of precision “turn-key” automated welding systems, offering 3 lines of advanced welding controls, as well as a line of precision weld fixturing. Our XM, Advent and QII controllers, as well as our stand-alone AVC’s, wire feeders and oscillators, utilize the latest Digital Signal Processor technology. Our fixturing includes precision lathes, seamers, manipulators and rotating positioners. AMET provides advanced systems for complex hot-wire bore cladding, multiple head subarc/GMA and coordinated motion applications.

Robert Ellig, President

E-mail: bellig@bluco.com

Scott Ellig

E-mail: sellig@bluco.com

Company Description

Bluco supplies the Demmeler modular fixturing system for welding. The system features welding tables and a complete family of modular fixturing weldments that enable a user to build accurate welding fixtures in minutes. The 5-sided design of the welding table allows for easy extension of the welding table surface for fixturing larger weldments. Multiple welding tables can be joined together where very large parts require a welding fixture. Consider using modular fixturing for short run production on a welding robot tool. Rental options are also offered.

E-mail: keithmcclean@cerbaco.com

Company Description

Cerbaco will provide samples from its line of 500+ configurations of non-metallic weld backings that permit finished-quality, full-penetration welds from one side. For use with structural steel, shipbuilding, pipeline, pressure vessel and tank manufacturing. The backings work with MIG, TIG, Stick Electrode, Sub Arc and Flux Core welding processes to weld carbon and alloy steel, stainless CERBACO LTD. steel, non ferrous metals and aluminum. Where one-sided welding is not desirable, the backings eliminate the need for arc gouging or heavy grinding prior to second-side welding. The company specializes in furnishing custom configurations and formulations. Technical assistance and free custom design services will be offered.

Company Description

CMW manufactures the broadest line of resistance welding consumables in the industry (holders, cold-formed caps, shanks, adapters, electrodes, and more, including threaded button electrodes and Metric-ISO 5821 and Metric Asian-taper cap electrodes). CMW's GCAP® electrode is the most economical cap electrode available for high production welding of galvanized steel without dressing. CMW's Elkonite® copper-tungsten significantly extends electrode life, and can be purchased in bulk or special configurations for resistance welding applications. The new Elkaloy® 20 dispersion

strengthened copper cap electrode (patent pending) and CMW(R) FINNCAPP electrode (patent pending) provide unprecedented life and welding efficiency. Services include design engineering, technical support, and training. CMW also is supported by the highest quality distribution network in the industry. For an Authorized Welding Distributor near you, please call or visit www.cmwinc.com.

Fax: 440-365-3594
E-mail: info@gasflux.com
URL: www.gasflux.com

Bob Farquhar, President

E-mail: bob@gasflux.com

Company Description

Since 1938, the Gasflux Company has promoted its specialized process of introducing a flux automatically into the flame for torch brazing. The Gasflux

™ Process is designed to work with steel, copper, and brass using silver and bronze as a filler metal. The advantages are quicker brazing times and little or no post braze cleanup. The process can easily be adapted to work with most manual or automatic brazing systems. The Gasflux Company also manufactures fluxes in paste and powder forms for low, medium, and high temperature braze applications along with supplying quality braze alloys. The Gasflux Company not only sells a “flux” but promotes and supports a process which enables one to braze in a cost efficient manner.

Company Description

Mathey Dearman is recognized as the world's foremost authority on preparing pipe for welding. Since the 1930s, we have been designing and building cutting and beveling machines and clamping, aligning, and reforming systems for pipe, tubing, and vessels. Over the years, we have also developed other tools and equipment which are recognized throughout the welding industry for their high quality, precision and ease of use, and value-for-money. These products include measuring and layout tools, gauges and inspection devices, and welding electrode and flux ovens.

Company Description

Established in 1971, Prodomax Automation Inc. is a leading automation “solutions” provider to the North American manufacturing industry. With facilities in Barrie, Ontario, Rochester Hills, Michigan and Monterrey, Mexico, we employ over 250 people to design and manufacture automation systems incorporating assembly, welding and machining processes to produce components such as frame rails, engine cradles, seating systems, emissions components, suspension components and door modules.

Prodomax emphasizes that we provide automated manufacturing “solutions” since automated machinery is only productive if all factors, such as ergonomics, throughput and product design are considered when designing automation. Our objective is to become an extension of our clients’ product development and manufacturing engineering resources. Prodomax’ capabilities enable our clients to reduce costs, improve quality and bring their products to market on schedule. We are committed to developing the best manufacturing system, designing and building the appropriate automation machinery and supporting our customers throughout the process of bringing a new product to market.

Company Description

Weiler is *the* source for brushes and abrasives for the welding industry. Our high-quality, heavy-duty power brushes include wheel, cup and end brushes; hand-held scratch brushes; and our popular Roughneck® weld cleaning products. Roughnecks get the job done fast, improving weld quality and reducing weld cleaning costs. Weiler's coated abrasives include flap discs and flap wheels – "Tiger®" for high production and "Vortec Pro®" for low to medium production environments. Our bonded abrasives line include cut-off and grinding wheels. Weiler...trusted by welding professionals.

Steven Smith, CEO

E-mail: steve@weldaid.com

Company Description

Started in 1958 to maximize efficiency of the MIG welding process. NOZZLE KLEEN® coatings maximize tip, nozzle and diffuser life by preventing spatter build-up and insure optimum gas coverage. WELD KLEEN® coatings minimize the need for grinding by preventing spatter build-up on welded parts and fixtures. LUBE-MATIC® coatings maximize tip and liner life by cleaning and lubricating welding wires. BRITE ZINC® coatings provide a high luster zinc rich, rust inhibiting coating for the repair and maintenance of galvanized and bare steel.

Doug Rhoda, President, CEO

E-mail: doug.rhoda@wolfrobotics.com

Company Description

Wolf Robotics is an integrator/manufacturer of robotic metalworking automation. We have installed over 7,000 robotic arc welding and cutting systems worldwide. We also have an installed base of over 1,500 systems for machine tending, material handling and material removal processes. Our specialty is custom engineered systems for large equipment manufacturers. We also offer standard modularized systems and related peripheral equipment (i.e. towers, gantries, positioners, track systems, system process controllers, etc.). In addition, we provide complete 24/7 service, replace and spare parts, and assorted training including CRAW certification and off-line programming.
