On or off the scalp

Maximum
processing time is
50 mins.

No heat
recommended

*Processing time for Permanent Color is 30 mins for standard color services, 45 mins for resistant gray

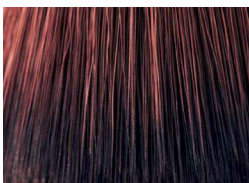

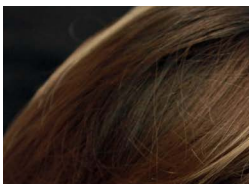

PERMANENT

Kadus Professional is dedicated to helping you work smarter, not harder, and this chart is designed to help you do just that. You'll be able to identify which Kadus shades may be applied to achieve similar color results to the brands you may be using today. Remember that color results are dependent on the base color of the virgin hair, the hair quality, and of course the pre-existing coloration on the hair.

Please remember that each color brand is unique and color results may vary when changing supplier. This tool serves as a direction only to support you. Every color brand has its own character and therefore color deviations could be experienced from one brand to another.

BLONDING POWDER

USE BLONDING POWDER FOR:

- Highlighting services
- Removing unwanted color
- Color Correction

MIXING AND PREPARATION

- Depending on the desired degree of lightening and consistency, mix with Kadus Professional Extra Rich Crème Developer, ratio of 1:1.5 up to 1:2.
- For on-scalp application, use 20vol (6%) or lower volume Kadus Professional Extra Rich Crème Developer.

POST COLOR TREATMENT

To instantly stabilize and lock in color pigments, use Kadus Professional Post Color Treatment.

- Once hair color is processed, rinse thoroughly with water.
- Use Kadus Professional Color Vibrancy Shampoo.
- Rinse hair.
- Apply Kadus Professional Color Vibrancy Post Color Treatment to neutralize oxidation residue. Leave for 5 to 10 minutes.
- Rinse hair.
