## INTRODUCING KASOTA VALLEY® LIMESTONE.

**Breathtaking beauty. Multiple color tones and finishes. Complete support.**

Architects choose Cold Spring Granite® for our century-old history of quarrying and fabricating natural stone with unsurpassed quality, integrity and creativity. But our expertise is not limited to granite.

Kasota Valley Limestone is an exceptional building material renowned for its distinctive color tones, construction versatility and beautiful appearance. We offer this premium-quality stone in a variety of colors, cuts and finishes that can be customized to meet any of your needs.

Your partnership with us gives you access to unparalleled industry experience and technical knowledge at every stage of the process. From design, drafting and BIM modeling through project management, you'll get everything you need to succeed from a single, reputable source.

Transform your next project from ordinary to extraordinary with Kasota Valley Limestone and our team of experts.

Honed Finish

Kasota Valley Limestone is a popular choice for a variety of applications ranging from exterior cladding, landscaping and statuary to interior-facing and unique feature pieces.

## STUNNING. STRONG. VERSATILE. YOU'VE FOUND THE IDEAL STONE.

From the rolling bluffs of the Minnesota River Valley comes our Kasota Valley® Limestone.

This visually stunning dolomitic stone is stronger and less porous than commonly used oolitic limestone. These exceptional characteristics make Kasota Valley Limestone an ideal material for building façades and awe-inspiring structures that withstand the elements. Superior abrasion-resistance also makes this stone suitable for a wide range of interior and exterior applications.

- High compressive strength
- Abrasion-resistant
- Low absorption
- Virtually maintenance-free
- Multiple color tones, cuts and finishes
- Endless customization options

Fleuri Cut

## ONE SUPPLIER. MANY OPTIONS.

The unique qualities of Kasota Valley® Limestone allow you to specify this material in different color tones, color blends, cuts and finishes, empowering you to meet the functional and aesthetic requirements of almost any building or landscape project.

### COLORS

Choose Kasota Valley Limestone in any of the available color tones, all of which can be made more subtle or pronounced based on the finish you select. The gray, cream and buff color tones can be selected either individually or in blends of any two or all three colors, giving you superior flexibility to create a unique and distinctive look.

### CUTS

When cut from the sedimentary bed of the quarry, Kasota Valley Limestone reveals dominant patterns, each of which can be used for a different dramatic effect.

We offer both of these cut choices to align with your design intent.

**Fleuri** — A cut in quarried stone that is parallel to the natural bedding plane.

**Veine** — A cut in quarried stone that is perpendicular to the natural bedding plane exposing the veining of the material.

## FINISHES

Add the final touch to your Kasota Valley® Limestone with a broad range of handcrafted and machine-tooled finishes.

**Polish** — A reflective, smooth finish that magnifies the stone's natural appearance by illuminating the vibrant colors.

**Rub & Sand** — Semi-smooth and light in appearance, this finish creates a subtle contrast.

**Diamond® Smooth** — This finish is non-reflective and mutes the stone's natural traits to create subtle contrasts and highlights.

**Textured** — Both rough yet soft to the touch, this finish enhances the natural color of the stone.

**Honed** — This non-reflective, smooth finish draws out the stone's natural colors and variations.

**Rock Pitch** — A rustic finish for veneer stone created with a split or chiseled face, and dressed along the stone's perimeter to produce convex projection. Also known as Rock Face.

**Split** — A rough, natural finish created by splitting pieces of stone in a hydraulic press.

## DELIVERING FOR YOU EVERY STEP OF THE WAY.

Only Cold Spring Granite provides solutions you need for a smooth, worry-free experience with limestone. Our unique combination of advanced technology, vast knowledge and industry experience makes it possible for us to deliver complete support, which translates to superior value and peace of mind for you. We will get involved early and resolve issues creatively, while maintaining complete control throughout.

Wherever you need assistance, we are there. We complement our extraction, fabrication and distribution capabilities with a proven network of sales, design, estimating, drafting and project management specialists. You'll have an expert team ready to provide industry best practices and the total support you need.
