Pharmacy Services at The Kingsbrook Jewish Medical Center

The Department of Pharmacy is fully computerized, provides 24-hour pharmacy services, and utilizes a robotic dispensing system. The Pharmacy Department employs over 40 professional and support personnel. The Pharmacy Department dispenses over 10,000 unit dose medications daily. The hospital has a closed-loop drug distribution and administration system. Prescribers utilize the Computerized Physician Order Entry (CPOE) system, where medication orders simultaneously interface into the Pharmacy Computer System, pharmacists validate these orders, the Pharmacy Robot dispenses medications, and nurses administer medications using barcode scanners. Computer terminals are located throughout the hospital and on medication carts. Profiled automated dispensing cabinets are located in every acute care unit and the medication is not accessible for dispensing until a pharmacist verifies the medication order. An Emergency Medicine Satellite Pharmacy and several profiled automated dispensing cabinets supply medications and an Emergency Medicine Clinical Pharmacist provides medication management services to the Emergency Department.

The inpatient clinical pharmacy department provides comprehensive medication assessment and integrated pharmacotherapy specialists in emergency medicine, critical care, internal medicine, infectious diseases, psychiatry, and geriatrics. Pharmacy-led ambulatory care services include anticoagulation, hypertension and diabetes management, smoking cessation as well as general pharmacotherapy management.

Kingsbrook Jewish Medical Center

The Kingsbrook Jewish Medical Center/David Minkin Rehabilitation Center (KJMC/DMRI) is an 784-bed teaching, medical and pharmacy university-affiliated, non-profit, private community institution. KJMC is comprised of a 318-bed acute care hospital and The Rutland Nursing Home, a 466-bed facility offering skilled nursing, rehabilitation, and post-acute care services. KJMC has a medical/surgical and cardiac intensive care unit, traumatic brain injury and coma recovery unit, geriatric psychiatry unit, ventilator unit, step-down cardiac care telemetry unit, cardiac suite, memory disorders program, pain management and treatment center, wound care and hyperbaric medicine center, renal dialysis unit, vascular laboratory, and a 911-receiving emergency department.
