Key Definitions

“Distributable Earnings”: Commencing for all periods ending on or after December 31, 2020, the Company has elected to present Distributable Earnings, a measure that is not prepared in accordance with GAAP, as a supplemental basis to KREF’s net income as determined in accordance with GAAP as the Company believes it would be useful to investors in evaluating the Company’s operating performance and its ability to pay its dividends. Distributable Earnings replaces the Company’s prior presentation of Core Earnings, and Core Earnings presentations from prior reporting periods have been recast as Distributable Earnings.

The Company defines Distributable Earnings as net income (loss) attributable to stockholders or, without duplication, owners of the Company's subsidiaries, computed in accordance with GAAP, including realized losses not otherwise included in GAAP net income (loss) and excluding (i) non-cash equity compensation expense, (ii) depreciation and amortization, (iii) any unrealized gains or losses or other similar non-cash items that are included in net income for the applicable reporting period, regardless of whether such items are included in other comprehensive income or loss, or in net income, and (iv) one-time events pursuant to changes in GAAP and certain material non-cash income or expense items agreed upon after discussions between the Company’s Manager and board of directors and after approval by a majority of the independent directors. The exclusion of depreciation and amortization from the calculation of Distributable Earnings only applies to debt investments related to real estate to the extent the Company forecloses upon the property or properties underlying such debt investments.

While Distributable Earnings excludes the impact of the unrealized current provision for credit losses, any loan losses are charged off and realized through Distributable Earnings when deemed non-recoverable. Non-recoverability is determined (i) upon the resolution of a loan (i.e. when the loan is repaid, fully or partially, or in the case of foreclosure, when the underlying asset is sold), or (ii) with respect to any amounts due under any loan, when such amount is determined to be non-collectible.

Distributable Earnings should not be considered as a substitute for GAAP net income. The Company cautions readers that its methodology for calculating Distributable Earnings may differ from the methodologies employed by other REITs to calculate the same or similar supplemental performance measures, and as a result, the Company’s reported Distributable Earnings may not be comparable to similar measures presented by other REITs.
