Languages supported by OmniPage Pro 12

OmniPage Pro offers broad language support. Three alphabets and 114 languages can be recognized. They are listed in the following table. The columns in the table present the following information:

Language: the nine languages with <u>underlines</u> are recognized with the Cyrillic alphabet; the eighteen **in red** have dictionary support. Alternate names appear in square backets [thus].

Location: This indicates the principal areas where each language is spoken.

� ♀ : This reflects the number of speakers. Broadly, ☐ has under half a million speakers, ☐ under 5 million, ☐ under 15 million and ☐ over 15 million.

Accented letters: This presents the accented letters that are automatically validated for recognition when the language is chosen.

Language	Location	♂ ♀	Accented letters

114 languages			*Over 460 characters recognized*

It is sometimes difficult to determine a precise list of accented letters needed for a given language. This may change over time; it may vary between dialects, variants and the field of use. It can also depend on transcription norms used for languages with other alphabets.

For an alphabetical listing of the accented characters with their Unicode, ASCII and ANSI codes, showing for which languages they are validated, click here.
