Lead-Based Paint Inspections, Risk Assessments, Specifications, Clearance Testing & Abatement

Statement of Qualifications

Company Profile

Hina Environmental Solutions, LLC, is a Columbus, Ohio based environmental company focusing on Testing and Abatement of Asbestos, Lead-Based Paint, Meth Clean-up and Mold Remediation.

Vision Statement

To be recognized as the abatement company who changed the perception of the abatement industry.

Mission Statement

We will accomplish our vision by providing superior, innovative solutions to our client's environmental needs and to provide our team members with meaningful work and advancement opportunities which, commands a sustainable competitive advantage.

Our Core Values

Customer Relationships: We are committed to the highest ethics and integrity. We exist to serve our customers and to earn their trust, confidence and repeat business.

Team Work: We strive to produce results far beyond the capabilities of individuals by working as a team. Our Team Members are creative and enterprising specialists.

Team Leaders: Each member of our Team is fully licensed by the Ohio Department of Health and is trained to meet and exceed all regulations by the Federal EPA, Ohio EPA, NESHAPS and OSHA. We use a certified merit system for hiring and evaluating our Team Members. Our success requires us to trust in our Team Leaders, respect their individual contributions and make a commitment to their personal and professional development. Our Team Leaders are trustworthy, honorable, respectful, treat others with dignity, have integrity and take ownership of our work.

Action / Flexibility: We will act aggressively with clear purpose and a sense of urgency yet be flexible and adapt to change quickly. We encourage our Team Members to make a difference in your life.

Economic Mission: We will operate the Company on a sustainable profitable growth but only from the work that satisfies customer needs and that benefits the partnership. We strive for our client's seal of approval.

Productivity / Recognition: We foster and cultivate an environment where high performance and break through achievements are valued and recognized for their efforts.

GOALS

In pursuing our Vision Statement, Mission Statement and Values Hina Environmental Solutions, LLC will continue to build our foundation and future success by partnering with our client's. Through open communication with Customers, Team Members and the community we will adapt to our changing times while holding true to our fundamentals that support our growth and future.

Safety Statement

Hina Environmental Solutions, LLC safety policy is to maintain safe working conditions for all employees under all conditions. Most of our work is performed under adverse conditions, and risks for asbestos and lead exposure and accidents are elevated.

It is the goal and commitment of Hina Environmental Solutions, LLC to continue to have a safe work place for all employees and to set an example for all other working personnel on the site. Under the direction of our Safety Professional and OSHA competent Supervisors, Hina Environmental Solutions, LLC has developed a comprehensive general Health and Safety Plan for our employees as well as site-specific Health and Safety Plans for individual projects.

Each field employee is required to partake in a medical monitoring program and all field personnel employees maintain First Aid and CPR certification. Each field employee is certified under applicable Asbestos Supervisor, Asbestos Worker, and Asbestos Hazard Evaluation Specialist training programs. In addition, each employee is certified under applicable Lead Risk Assessor, Lead Contractor, Lead Worker training programs.

Your problem “IS” Our problem.

Below is an abbreviated project list to provide a broader picture of HES' experience in these areas:

Lead Paint XRF Testing, Risk Assessment, Project Design & Clearance Testing

HES Vice President, Brian Hina, Chad Melick and Brian Walker, have conducted XRF Lead Inspections, Risk Assessments, Spec writing and Clearance Testing for **MORPC, Meigs County, Homes on the Hill, Columbus Housing Partnership, Columbus Housing Network, Cambridge Community Development, City of Chillicothe CHIP, Ohio Regional Development Corp., Portsmouth Rehab, City of Newark Lead Program, Otterbein College, Ohio Wesleyan, City of Chillicothe, City of Zanesville, City of Coshocton CHIP, City of Dover CHIP, Holmes County, Tuscarawas County CHIP, Buckeye Community Development,** and numerous residential and commercial properties.

Lead-Based Paint Remediation & Renovation Projects

Ohio State Highway Patrol Firing Range

HES, completed this 24 stall firing range cleanup in 3 weeks.

City of Dublin Firing Range

HES, personnel completed a lead dust abatement project at the City of Dublin Firing Range. In total there were 10 rooms and 4 hallways that had to be cleaned to the Navy specs.

Mid Ohio Regional Planning Commission (MORPC)

HES personnel have completed numerous projects for MORPC in the Central Ohio area. These projects included lead-based paint inspections, risk assessments, asbestos abatement activities, and renovation activities within residential and multi-family complexes.

City of Columbus – Columbus, Ohio

HES personnel completed a lead-based paint project for the City of Columbus under their lead grant program. In total there was 22 windows, 4,100 square feet of new vinyl siding, interior encapsulation and door replacement.

MORPC Kingwoods – Columbus

Hina Environmental Solutions executed the Lead (Pb) reduction for this residential property. The scope of work included new gutters and downspouts, roofing, vinyl siding, new picture window, and garage door. Pictures below show the before and after work was finish on time and the homeowner was very pleased.

Murdock Rd - Greene County

Hina Environmental Solutions employee scraped and removed lead base paint prior to encapsulation. The work was completed on time and met ODH standards for a lead-based paint poisoned child.

Lead-Based Paint Abatement Projects

Battelle – Columbus Ohio

HES personnel worked on a research project with Battelle for the Federal EPA. The objective is to provide information on which types of lead test kits worked to the acceptable levels as established by the EPA. This information will be utilized in the development of EPA standards.

Greene County

HES completed this Elevated Lead Poisoned Child case residence for Greene County CHIP. This project was located at 2281 Murdock Road in Cedarville, Ohio and consisted of encapsulation of exterior of residence and chicken coop, as well as, encapsulation of all interior trim. The total abatement cost was \$70,000.00.

Meigs County CHIP

HES completed this residence in Rutland, Ohio for Meigs County CHIP. This project consisted of the replacement of doors and windows as well as encapsulation of interior trim. The total abatement cost was \$9,500.00.
