Preface.....	xv
About the Author	xvii
1. Introduction: Five Stages of Lean Manufacturing	1
1.1 Lean Manufacturing.....	1
1.2 Industrial Dynamics and Bullwhip Effect	3
1.3 Three Toolboxes for Lean Manufacturing.....	5
1.3.1 Toolbox 1: From 5S to Kanban	5
1.3.1.1 The 5S System	5
1.3.1.2 Cellular Manufacturing	6
1.3.1.3 Kaizen	7
1.3.1.4 Kanban.....	7
1.3.2 Toolbox 2: From Lean Metrics to Standard Rate.....	8
1.3.2.1 Lean Office	8
1.3.2.2 Single Minute Exchange of Die (SMED)	8
1.3.3 Toolbox 3: From Takt Time to Workflow Diagram	8
1.3.3.1 Total Productive Maintenance.....	10
1.3.3.2 Value Stream Mapping.....	11
1.4 Let's Play a "Lean" Game: Manufacturing a Gyrocopter.....	11
1.4.1 Materials, Tools, and Steps for Manufacturing the Gyrocopter	12
1.4.2 Establish an Assembly Line for Manufacturing Gyrocopters	13
1.4.3 Develop Cost Functions for Manufacturing Gyrocopters	15
1.4.4 Ground Rules and Course for Playing the Lean Manufacturing Game	15
1.4.4.1 Ground Rules.....	15
1.4.4.2 Course of the Game	16
1.4.4.3 End the Game	17
1.4.5 Bullwhip Effect Typical Results for Playing the Lean Manufacturing Game	17
1.5 Five Stages of Lean Manufacturing: Business Bottom-Line Based	19
2. Put Business Bottom Line First: Transfer Function for Production Cost	23
2.1 Production Transfer Function	23
2.2 Short-Term vs. Long-Term Production Transfer Functions.....	24

2.2.1	Lean Manufacturing: Optimize Short-Term Production Transfer Function.....	24
2.2.2	Six Sigma: Optimize Long-Term Production Transfer Function	24
2.3	Short-Term Transfer Function for Production.....	25
2.4	Transfer Function for Marginal Cost.....	27
2.5	The Law of Diminishing Returns: Key to Understanding Lean Manufacturing.....	29
2.6	Transfer Function for Average Fixed Cost.....	30
2.7	Transfer Function for Average Variable Cost.....	32
2.8	Transfer Function for Average Total Cost.....	33
2.9	Transfer Function for Long-Term Cost Analysis	35
2.10	Goal Tree and Success Analysis: From Goal Setting to Successful Goal Setting.....	38
3.	Understanding the Voice of Customers: The Essential Elements	43
3.1	Voice of Customers: Relentlessly Customer Focused.....	43
3.2	Voice-of-Customers Capability: Critical Elements	45
3.2.1	Top-Level Leadership and Sponsorship	46
3.2.2	Turn Voice of Customers into Stories with Business Values	46
3.2.3	Independent but with Traction across the Organization and Beyond.....	47
3.2.4	Strategic Asset Informing Policy, Strategy, Operations, and Communications.....	47
3.2.5	Right Level and Mix of Skills and Experience in the Team and Wider Networks.....	48
3.3	Voice of Customers' Role and Responsibilities	49
3.4	Analyzing Voice of Customers: Law of Demand	50
3.4.1	The Law of Diminishing Marginal Utility	51
3.4.2	The Law of Equi-Marginal Utility per Dollar	51
3.4.3	Condition of Consumer Optimum: Utility Maximization.....	53
3.5	Maximizing Utility to Customers.....	53
3.5.1	Use Indifference Curve to Represent Customers' Level of Preference.....	54
3.5.1.1	Degree of Substitution.....	54
3.5.1.2	Perfect Substitution.....	55
3.5.1.3	Perfect Complements.....	56
3.5.2	Use Budget Line to Reflect Customers' Purchase Power	57
3.5.2.1	Budget Line, Consumption Possibility Line, Budget Constraint	57
3.5.2.2	Budget Equation	58
3.5.2.3	Shifts of Budget Line.....	58

3.5.2.4	A Change in Prices.....	59
3.5.2.5	A Change in Income	59
3.5.2.6	Consumer Optimum	60
3.6	Kano Model: Integrate the Elements for Voice of Customers	61
4.	Balance Production and Demand: Value Stream Mapping.....	63
4.1	What Are Value Streams?	63
4.2	What Is Value Stream Mapping?.....	64
4.3	How to Complete Value Stream Mapping.....	66
4.4	Guidelines for Developing Value Stream Mapping	68
4.5	Kaizen Event Analysis for Value Stream Mapping.....	71
4.5.1	Purpose	71
4.5.2	Benefits	71
4.5.3	Kaizen Event Analysis Guideline	72
4.6	Business Bottom-Line Analysis of Value Streams.....	73
4.6.1	Value Stream Measures	74
4.6.2	Traditional Product-Costing Systems: Problems with Overhead	76
4.6.3	Activity-Based Costing (ABC)	77
4.6.4	How Is Activity-Based Costing Different from Traditional Product Costing	79
5.	From Lognormal to Cobb–Douglas Distribution:	
	Lean Production Analysis.....	83
5.1	Technology: The Production Function.....	83
5.2	Long-Run and Short-Run Production Functions.....	84
5.2.1	Long-Run Production Function.....	85
5.2.2	Short-Run Production Function	86
5.3	Three Stages of Production	87
5.4	Lognormal Distribution	92
5.5	Cobb–Douglas Production Function.....	94
5.6	Quantifying Additional Profit from Productivity Gains	96
5.6.1	Could Sell More Products if Produced More	97
5.6.2	Could Not Sell More Products if Produced More.....	97
5.7	Total Factor Productivity.....	98
5.7.1	Constant Returns to Scale	98
5.7.2	Assess Total Factor Productivity.....	99
5.7.3	New Product Development: Demands for Factor Inputs.....	101
6.	Business Cycles and Demand Fluctuations: Time-Critical Analysis and Decision Making	103
6.1	Business Cycles and Demand Fluctuations	103
6.2	Regression Analysis: Understanding Customer Demand Statistically.....	107

6.2.1	Demand Forecasting on Binary Scale	110
6.2.2	Demand Forecasting on Ordinal Scale	112
6.2.3	Demand Forecasting on Count Scale	113
6.3	What Is Time Series Analysis?	114
6.3.1	Trend	115
6.3.2	Seasonal	117
6.4	Smoothing Techniques	118
6.4.1	Single Exponential Smoothing	119
6.4.2	Double Exponential Smoothing	122
6.4.3	Holt–Winters with an Additive Seasonal Term	123
6.5	Summary	123
7.	How Demand Fluctuation and “Exogenous Shocks” Influence the Bottom Line	125
7.1	How to Shockproof Your Company: A Lesson from Frank Lloyd Wright	125
7.2	Business Risk Assessment	129
7.3	Risk Quadrant Chart	130
7.4	Develop a Business Risk Management Plan	136
7.4.1	Why Would You Develop a Risk Management Plan and Risk Management Table?	137
7.4.2	When Would You Develop a Risk Management Plan?	137
7.4.3	How Do You Develop a Risk Management Plan?.....	137
7.4.3.1	Step 1: Identify the Risks	138
7.4.3.2	Step 2: Analyze and Evaluate the Risks	138
7.4.3.3	Step 3: How Will You Manage or Treat the Risks?.....	139
7.4.3.4	Step 4: Monitor and Review Risks	140
7.4.4	Also Remember: Communicate and Consult.....	141
7.4.5	Who Is Responsible?	141
7.4.6	Who Has Ultimate Accountability?.....	141
7.4.7	Who Approves the Risk Management Plan?.....	142
7.5	Risk Assessment Matrix.....	142
7.5.1	Examples of Application of a Risk Assessment Matrix	143
8.	Lean Production: Business Bottom-Line Based	145
8.1	Approach for Identifying Productivity Improvements	145
8.1.1	Process Flow Diagram	145
8.1.2	Inventory and Material Purchases.....	145
8.1.3	Cellular Manufacturing.....	146
8.1.4	Material Flow	146
8.1.5	Automation.....	146
8.1.6	Quick Changeover.....	146

8.1.7	Quality Control.....	146
8.1.8	Preventive Maintenance	146
8.2	Quantifying Additional Profit from Productivity Gains	147
8.2.1	Productivity Improvement: Could Sell More Products if Produced More	148
8.2.2	Inventory Cost: Couldn't Sell More Products if Produced More	148
8.3	Case Study of a Gyrocopter Manufacturer: Improving Profitability.....	149
8.3.1	Productivity Index as a Measure of Profitability.....	149
8.3.2	Change the Right Things	150
8.3.3	Green Manufacturing: Maintaining the Value of Gyrocopter Products.....	151
8.3.4	Reduce Changeover Time on the Gyrocopter Assembly Processes	151
8.3.4.1	Estimated Savings Reduce Changeover Time.....	152
8.3.4.2	Estimated Implementation Cost.....	154
8.3.4.3	Estimated Simple Payback	154
8.3.4.4	Recommendation	154
8.4	Implement Cellular Manufacturing	154
8.4.1	How to Incorporate Cellular Manufacturing.....	155
8.4.2	Benefits of Cellular Manufacturing	156
8.5	Example of Cellular Manufacturing: Organize Gyrocopter Production Equipment into Cells to Reduce Inventory and Process Time	157
8.5.1	Estimated Savings	159
8.5.2	Estimated Implementation Cost.....	159
8.5.3	Estimated Simple Payback	160
8.6	Example of Gyrocopter Manufacturing: Eliminate Intermediate Spooling Operation	160
8.6.1	Estimated Savings	160
8.6.1.1	Increased Output.....	160
8.6.1.2	Labor Savings.....	161
8.6.1.3	Reduction of WIP Inventory	162
8.6.1.4	Other Savings.....	162
8.6.1.5	Total Cost Savings	162
8.6.2	Estimated Implementation Cost.....	162
8.6.3	Simple Payback	163
9.	Manage Production and Inventory Costs.....	165
9.1	Theory of Constraints: "The Drum Is a Bottleneck"	165
9.2	Identifying and Exploring Constraints.....	166
9.3	The Five Focusing Steps and the Continuous Improvement Goal	167

9.4	The General Application of Theory of Constraints to Operations: Drum–Buffer–Rope Approach	168
9.5	Plant Types for Operations	171
9.6	The Thinking Processes for Implementing Theory of Constraints	172
9.7	Learning as Actively Addressing Constraints.....	173
9.8	Learning to Negotiate the Meaning of Constraints	175
9.9	Accounting Systems for Lean Manufacturing.....	176
9.9.1	Minimal Path Sets	177
9.9.2	Socratic Method	178
9.10	Case Study: Marion Gyrocopter Corporation (MGC).....	180
9.10.1	What Is the Problem?	180
9.10.2	How Do You Know?.....	180
9.10.3	What Is Our Recommendation?	180
9.10.4	How to Change?	180
9.10.5	What Is Your Expected Result?	181
9.11	Conclusion about the Case Study	183
10.	Kanban: Align Manufacturing Flow with Demand Pull	185
10.1	Kanban-Based Systems.....	185
10.2	Why Use Kanban?.....	188
10.3	How Kanban Works.....	189
10.4	The Rules for Kanban	190
10.5	Steps for Implementing Kanban	191
10.6	Types of Kanban.....	193
10.6.1	Dual-Card Kanban.....	193
10.6.2	Single-Card Kanban.....	193
10.7	Kanban Development.....	193
10.8	Kanban Design to Achieve Manufacturing System Objectives	194
10.8.1	Unit Cost Coupled with Operation-Focused Engineering	195
10.8.2	The Manufacturing System Design Decomposition	196
10.9	Kanban Card Calculation	200
10.10	Summary	203
11.	Jidoka: Implement Lean Manufacturing with Automation.....	205
11.1	What Is Jidoka?	205
11.2	Ladder Logic: A Tool to Implement Jidoka.....	206
11.3	Boolean Functions for Ladder Logic	210
11.4	Implement Jidoka Using Ladder Logic	213
11.4.1	Logic Operations in Ladder Diagrams.....	213
11.4.2	Implementation of Ladder Diagrams	216
11.5	Additional Functionality for Manufacturing Autonomation	216

12. Pull System, One-Piece Flow, and Single Minute Exchange of Die (SMED)	221
12.1 Establish a Pull System.....	221
12.1.1 What Is a Push System?.....	221
12.1.2 What Is a Pull System?.....	222
12.2 Why Use Pull Systems and One-Piece Flow?.....	222
12.3 Overcome Barriers: Two Old Beliefs.....	223
12.3.1 Inventory Protects	223
12.3.2 Large Batches Reduce Changeover Time.....	224
12.3.3 Inventory Hides Problems	224
12.3.4 Reduce Changeover Time by Reducing Changeover Time	224
12.4 Single Minute Exchange of Die (SMED)	225
12.5 How to Implement Single Minute Exchange of Die (SMED).....	227
12.5.1 Formal Method	228
12.5.2 Key Elements to Observe.....	228
12.5.3 Effects of Implementation	229
12.6 Case Study: Flow Management of an Integrated Circuit Packaging Work-in-Process System.....	230
12.6.1 Bill of Materials (BOM).....	232
12.6.2 Data Mining	232
12.6.3 Computer-Integrated Manufacturing (CIM).....	232
12.6.4 Semiconductor Manufacture Processes	232
12.6.5 Data Mining	233
12.6.6 Ant Colony Optimization	234
12.6.7 Run-to-Run Control.....	234
13. Lean Manufacturing Business Scorecards	237
13.1 What Are Lean Manufacturing Business Scorecards?	237
13.2 How Have Lean Manufacturing Business Scorecards Been Evolved?	238
13.3 Lean Manufacturing Business Scorecard for Planning and Policy Deployment	240
13.3.1 Business Plan Process	242
13.3.2 Manufacturing Councils	242
13.3.3 Policy Deployment	242
13.3.4 Marion Production System (MPS).....	243
13.3.5 Total Productive Maintenance (TPM)	244
13.3.6 Manufacturing Engineering (ME)	244
13.3.7 Energy Management Efficiency Program.....	245
13.4 Lean Manufacturing Business Scorecards for Problem Solving and Continuous Improvement.....	245
13.4.1 Dashboards.....	246
13.4.2 Scorecards.....	246
13.4.3 Total Value Management (TVM).....	247

- 13.4.4 Single Point Lessons (SPLs)..... 247
- 13.4.5 Shutdown Monitoring 248
- 13.4.6 Best Practice Replication..... 248
- 13.4.7 Six Sigma..... 248
 - 13.4.7.1 Define 248
 - 13.4.7.2 Measure 249
 - 13.4.7.3 Analyze..... 249
 - 13.4.7.4 Improve..... 249
 - 13.4.7.5 Control 250
- 13.5 Building the Business Intelligence Strategy 250

- Bibliography..... 255**

- Index..... 259**
