Android is a little difficult for us to test each and every device running Android as there are thousands of separate models running Android, however thankfully Android is quite consistent across all devices, so instead of testing each device, we test each version of Android & Chrome.

IMPORTANT: On Android, you must be using at least Chrome 60.0, any version before is not supported and will NOT WORK.

Android Version	Supported?	Recommended?
Android 2 Eclair (2009)	✗	✗
Android 2.2 Froyo (2010)	✗	✗
Android 2.3 Gingerbread (2010)	✗	✗
