

Lee Carroll

After graduating with a business and economics degree from California Western University in California, Lee Carroll started a technical audio business in San Diego that flourished for 30 years.

As an award winning audio engineer, where does channelling and Indigo children fit into all this? As Lee tells it, Spirit had to hit him “between the eyes” to prove his spiritual experience was real. The year 1989 was the turning point when finally came together, after some years earlier a psychic told him about his spiritual path and then three years later the second unrelated psychic told him the same thing! Both spoke of Kryon... a name that almost nobody had ever heard.

Timidly, the first writings were presented to the metaphysical community in Del Mar, California, and the rest is history – with a total of fifteen metaphysical books being released in a twelve-year span. There are now almost one million Kryon and Indigo books in print in twenty four languages worldwide – The foreign editions represent Spanish, French, German, Chinese, Hebrew, Danish, Italian, Greek, Korean, Hungarian, Bulgarian, Russian, Lithuanian, Latvian, Japanese, Dutch, Finnish, Slovene, Estonian, Indonesian, Portuguese, Romanian and Turkish.

Lee and the Kryon team continue to visit other countries up to six times a year with very large audiences.

Lee and his spiritual partner, Jan Tober, started the “Kryon light groups” in Del Mar in 1991 and quickly moved from a living room setting to a Del Mar church. The Kryon organization now hosts meetings all over the globe with audiences of up to 3,000 people. In the beginnings of the Internet, Kryon had the largest consistent New Age folder in the history of America Online. The Kryon website contains a multitude of interesting pages and a registry of over 20,000 visits a day to the front page alone.

Also on the website is a free audio page where you can listen to or download over 100 hours of free MP3 audio of past and current channellings.

In 1995, Lee was asked to present Kryon at the United Nations (U.N.) in New York City before a U.N.- chartered group known as the Society for Enlightenment and Transformation (S.E.A.T.). The meeting was so well accepted that they were invited back six more times, in 1996, 1998 then in 2005, 2006, 2007, and 2009. These meetings are held upstairs in the working areas of the UN building, not far from the General Assembly. Only delegates to the UN and guests of the society may attend.

Lee is the author of twelve Kryon books, and co-author of, *The Indigo Children*, *An Indigo Celebration*, and *The Indigo Children Ten Years Later*. (15 books total). The Indigo Child books' web site is: www.indigochild.com These Indigo books introduced the world to the term "Indigo Children" in 2000, spawning many follow-up books by various authors, a movie, a documentary, and lots of interest worldwide regarding our changing kids! The Indigo books have sold almost half a million copies world-wide in the twenty four languages listed above.

In July 2012, during a trip to McCaysville, Georgia, at Delphi Metaphysical University, Lee was surprised with an honorary doctorate degree of Science, Transpersonal Psychology, & Metaphysics! The award indicated: "*For his extraordinary contributions of love, wisdom, and spiritual understanding.*"

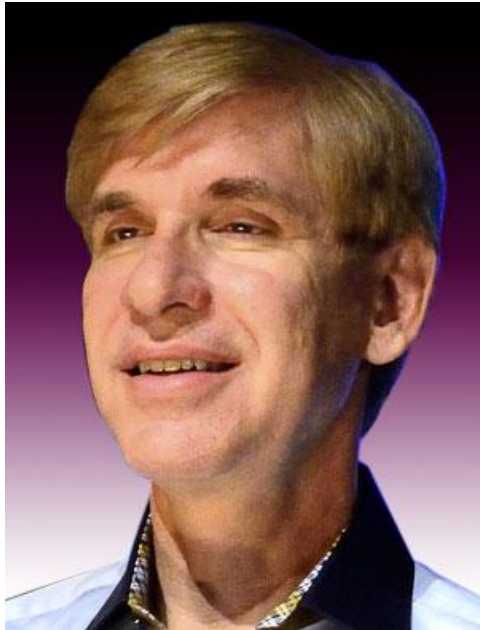

Lee continues to write and travel from his home in San Diego.

Dr. Todd Ovokaitys

Dr. Todd Ovokaitys, often called Dr. Todd by his associates, has had a passion for science from the time he was five. He was first in his class in high school, receiving the Bausch and Lomb Science Award and the Bucky Pioneer Award. At Northwestern University in Evanston, Illinois, he was first in his class of 1800 with a 4.0 grade point average.

After two years at Northwestern, he was accepted into an accelerated combined graduate/undergraduate program at Johns Hopkins University Medical School, which conferred both B.A. and M.D. degrees. Advanced training was at Georgetown University Hospital, with a Residency and Chief Residency in Internal Medicine followed by a Fellowship in Pulmonary and Intensive Care Medicine.

During his Pulmonary Fellowship, the specialty that concerns the lungs, Dr. Todd began his research with cells of the immune system. Many procedures were done on AIDS patients to diagnose their lung problems. Observing this dire disease firsthand and the toxic results of early medical treatments, Dr. Todd developed a passion for finding better solutions. Towards the end of his Fellowship, he became aware of the benefits of Holistic Medicine for improving the function of the immune system while building rather than impairing the function of other systems.

Inspired to learn more, he moved to Southern California to study with practitioners of Complementary Medicine. In the context of these studies, he had an experience so radical that the course of his life and work were forever transformed.

During a meditation class in the summer of 1989, Dr. Todd paired with another student for an exercise. The process was profound and they took turns, one in the process while the other scribed to record any breakthroughs of awareness. Much as in the Jodie Foster movie "*Contact*", the usual anchor points dissolved with the feeling of instant transport to a different dimension of being. There was a doorway or portal

to traverse, with a message of the responsibility taken on through the choice to go further.

Instantly upon walking through this doorway, a living form was seen that filled a room – and had the shape of a DNA strand enlarged millions of times. This form communicated that science only partly understood how DNA worked. The linear understanding of DNA as an enormous data string was correct but incomplete. In addition, DNA was a structure of coils within coils in an environment of moving charges that permitted DNA to send electromagnetic signals much as a radio transmitter. Further, DNA could receive and be conditioned by electromagnetic signals. Most significantly, if it were possible to determine and transmit the correct resonant signals, that it was possible to switch the activity of a sick cell to that of a healthy cell, an old cell to that of a young cell.

This experience brought with it a certainty that solutions were possible. After intensive review of the previous work showing the effects of electromagnetic energy patterns on cellular health and function, Dr. Todd located a colleague with the technical expertise to build the desired invention.

Quote from the South African Journal of Natural Medicine – April 2004:

“In March 2004, Dr. Todd Ovokaitys addressed the South African Natural Medicine Conference in Stellenbosch and received ovations for his work from doctors and professors of medicine who heralded his work as groundbreaking and worthy of a Nobel Prize.

[He] brought the whole audience, and perhaps even the event, to a single moment of wonder with an image of the AIDS virus being destroyed by a single blue light resonating at a frequency that shattered its membrane.

Dr. Ovokaitys also addressed other conferences in Cape Town and Johannesburg, attended not only by doctors and professors of medicine, but also by political leaders who are very concerned about the state of their people’s health. Included in the attendees was Mrs. Winnie Mandela, who thanked Dr. Todd for ‘coming to Africa to help my people.’ ”

Today, Dr. Todd heads up Gematria – a research and development firm in Carlsbad, California, implementing his intuition, and his inventions.

Deborah DeLisi

From a young age, Deborah DeLisi always knew that she was here to be an artist. From crayons to computers, she knew her purpose was to express herself through art and creativity. At the urging of her parents, (who were concerned how she'd make a living) she focused on the employable career of graphic design. Enjoying the left brain/right brain blend of art and business, Deb started her own successful graphic design and illustration company. Her 'cutesy' mainstream art was licensed for home decor products, accessories, gifts and calendars, while her talents in designing packaging, brochures, catalogs and logos kept her graphic design clients happy. In 2005, taking a blind leap of faith, she gave it all up and followed her dreams across the country to the coast of California where she set out creating a new life, new energy and a new direction.

Her first glimpses of this new direction came about unexpectedly, with some help from a person Deb views as a scientific visionary and the greatest mind of our time, Dr. Todd Ovokaitys, of Gematria Products Inc. In 2004 while attending a science seminar where he was presenting, Deb experienced his Pineal Toning Technique™. The group toning during the seminar was a catalyst that expanded her creativity. With eyes closed and hearing only the vocal tones, Deb was surprised to see colors, energy and geometric shapes moving in her mind's eye, as clear as an 'inner movie'. She quickly sketched what she was seeing, and for many months afterward, would occasionally ponder what information was in the forms she saw. There seemed to be an inner understanding that went beyond the linearity of words.

Two years after experiencing those initial tones, and at the request of Dr. Todd, Deb turned her first sketch into a complete piece of digital artwork: 'Level 1'. The Pineal Tones Art series was born. Encouraged by the responses she continued illustrating the other pineal toning sounds or 'levels'. One layer at a time, she creates each piece of art digitally, painting with light. Both Deborah and Dr. Todd are inspired by a deep inner knowing – a remembering – of a connection to the energetic resonances that

create and sustain our universe. The songs of light, sound and color that remind us of our 'home' are deeply transforming personally, while also uplifting the planetary vibrational field as a whole. The tonal frequencies can send intensified waves of healing throughout the entire global energy system.

What started out as a 'coincidental' encounter with pineal sounds, opened up a path for Deborah that continues to expand. As an artist, Deb feels it's important to make her work purposeful, and more than simply a wall decoration. Helping others to know the full potential of who they truly are – beyond the physical body – is what she hopes to achieve. Today Deb continues to add to the ongoing Pineal Tones series, with over two dozen pieces complete. She loves bringing the visions to life, and each finished work of art never fails to surprise her and remind her what a wondrous universe we live in.

Anders Holte

Anders Holte was born and raised in Copenhagen, Denmark and is known today as a singer, composer and sound channel. But that's not how it all started out.

In 1982, when he was studying to become an actor, his teachers weren't too impressed with his acting, but when he started to sing...that's when they listened. He finally got the message and so his journey into music began.

Shortly after quitting acting he got signed to a major record label with the well-known Danish rock-pop band *Paris Paris*. However this too was soon to change. According to Anders he felt a yearning to really educate himself musically and just to be sure he chose the "classical way". He gained admission to the Royal Danish Academy Of Music and graduated as a classical singer, voice teacher and choir conductor.

He sang with The Royal Danish Opera Choir, was a steady member of The Danish Radio Choir and toured the world with the distinguished a cappella ensemble Musica Ficta. However, Anders was increasingly unhappy only performing music hundreds of years old and exclusively singing what was on the note sheets. He felt something new had to happen.

And so he quit his jobs and moved away from Denmark, leaving behind a successful career as a classical singer, ensemble leader and voice coach. Instead of singing the music of others he now began to follow his own intuition, entering the world of sound awareness.

The next time Spirit 'knocked on the door' was after a Kryon event (of course!) in 2006 when he and his wife Cacina decided to stay for Dr. Todd's seminar. At the end of that day Anders and Dr. Todd ended up spontaneously toning together, forehead to forehead.

This event was a trigger for Anders' further awakening to his own sound awareness. A few days later he began recording the beginning tones of what was to become his first album *Lemurian Home Coming*. With the birth of this CD his musical work took a whole new direction, resulting in the creation of a unique interdimensional music.

Today Anders is known for creating a sacred space at live events, aligning the many voices of an audience into a sense of oneness. His Tonal Sound Music as well as his uplifting songs and lyrics have reached people all over the world. He also offers workshops where people learn to deepen their spiritual connection through tone and sound.

Since 2011 Anders has been travelling with Lee Carroll in Europe, performing at Kryon events, and he also performed at the Kryon Summer Light Conference 2012 in Sedona.

On December 21, 2012 he joined Dr. Todd on Maui (Hawaii) in leading the Lemurian Choir consisting of 900 singers. During this unique galactic solstice event Anders also released his CD album *Dream Of The Blue Whale*, created together with his partner Cacina Meadu.
