Audi connect plug and play

A smart connection

The Audi connect
plug and play app

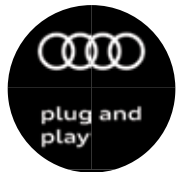

The Audi connect plug and play app (iOS/Android) connects your smartphone via Bluetooth with the Audi DataPlug and your vehicle, turning it into a connected car in no time at all.

The DataPlug can be fitted on a number of models built from 2008*. The next few pages will show you the benefits of always having all key information about your Audi at your fingertips.

*The compatibility check for your vehicle will be available end of 2020 on the Audi connect plug and play website.

You can download
the Audi connect
plug and play
app here.

A better overview in no time

With the latest
vehicle information
about your Audi

My Audi. Welcome. With the Audi connect plug and play app, you can access the latest information about your vehicle at any time.

In the “My Audi” section, you can view information such as mileage, chassis number and fuel level. You can even check how many miles and days are left until your next service appointment. This way, your next service is always at your fingertips.

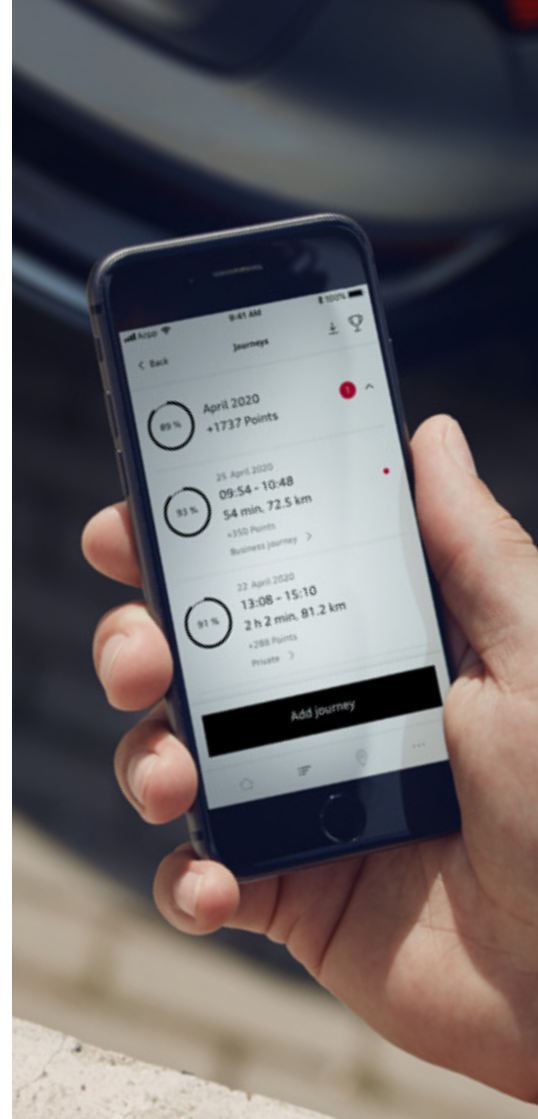

A man with a beard, wearing a dark beanie and a dark, hooded jacket, stands with his arms crossed next to a silver car. He is looking out towards a large, rugged mountain range under a cloudy sky. The scene is set in a high-altitude, mountainous area.

More time for what's important

With the digital
logbook for your
business and
private trips

Trips. The digital logbook makes it simple to document and categorise your business and private trips. The automatic log function makes it easy to record details such as starting point and destination, date and time of day, journey time and route, and export them via the app as required.

More control over your refuelling costs

The digital monitor gives you a complete overview

Fuel monitor. The fuel monitor gives you an overview of how often you are refueling your Audi and monthly fuel expenses. Whenever the Audi DataPlug registers a refuelling process, you receive an app notification and the option to add in the cost, which will update your expenses. The service* automatically records when, where and how much you refuel.

*minimum refuelling level of 10 l

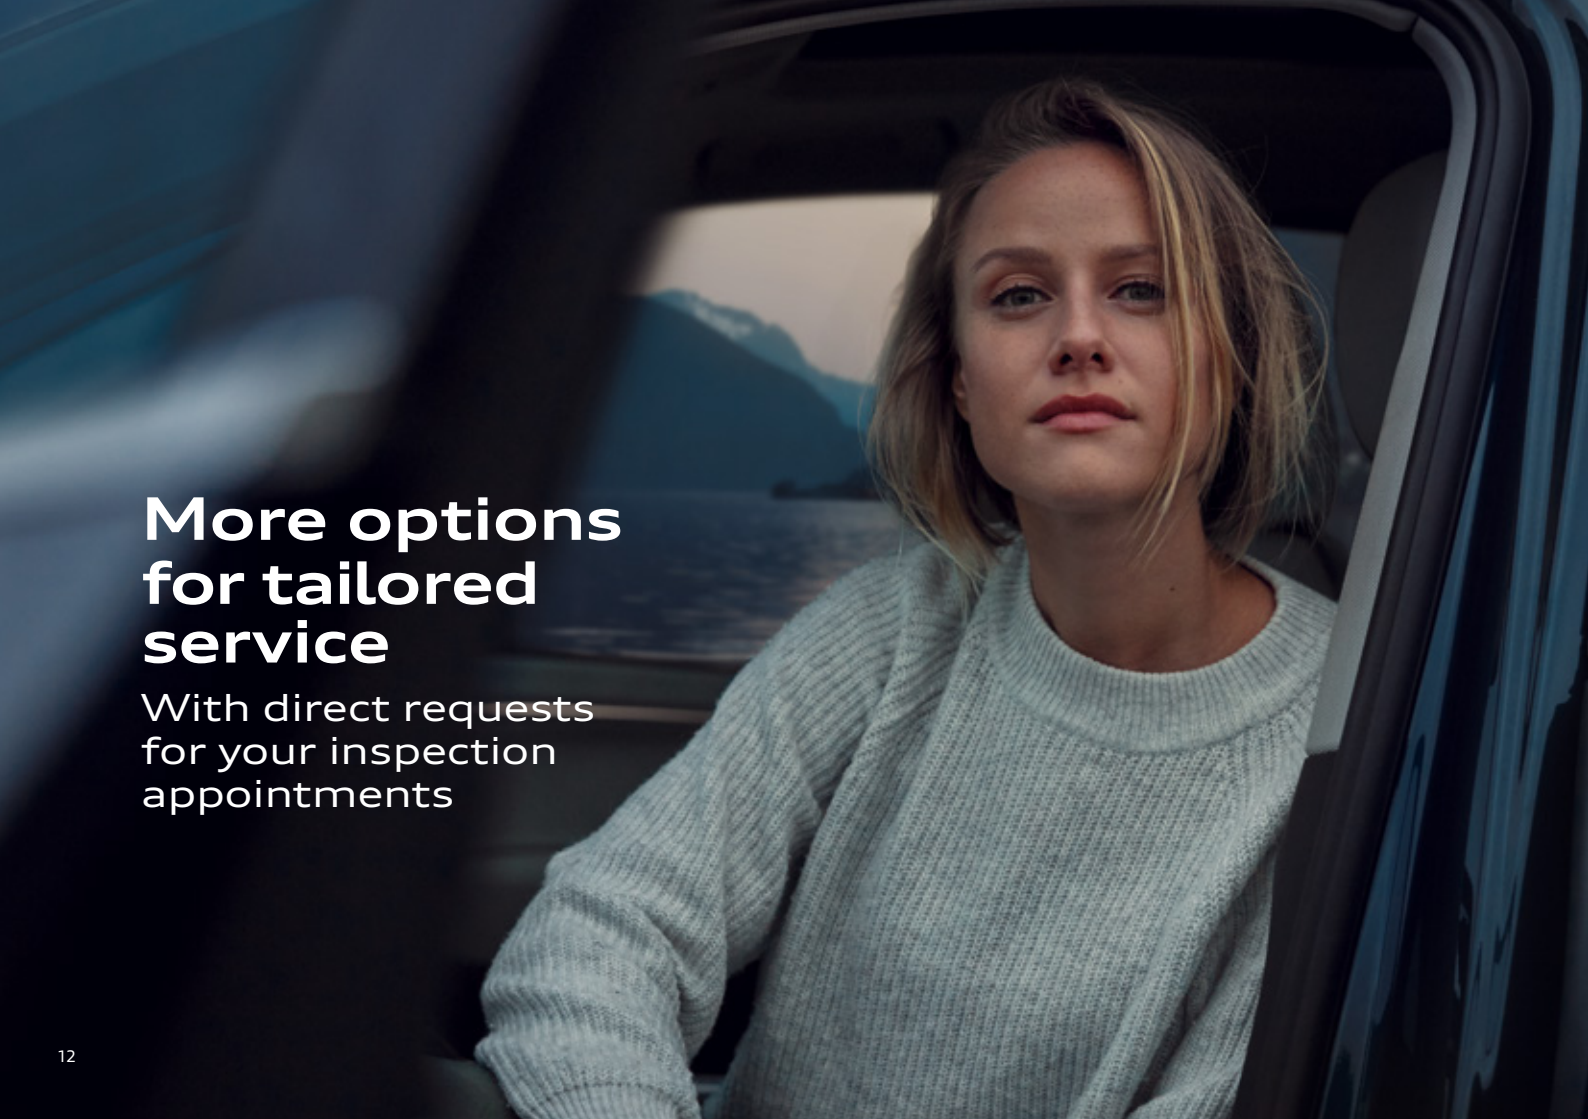

Greater efficiency on daily routes

With custom driving
style analysis and
statistics

Statistics. Audi connect plug and play helps you optimise your driving style.

Personal driving data, such as acceleration, engine speed and braking behaviour, is measured and displayed in a detailed statistical breakdown. This lets you learn from your own driving style and reach your destinations more efficiently.

More options for tailored service

With direct requests
for your inspection
appointments

Service appointments. With the Audi connect plug and play app, you can request an appointment at your preferred Audi Centre at any time.

If your vehicle needs an inspection or an oil service, you have the option of automatically sending a request for an appointment. Your Audi Centre will then contact you as soon as possible and you can opt to provide them with relevant vehicle information from the app.

More fun on the move

New challenges on a journey of discovery

My challenges. Bring some more fun back into driving by taking part in the wide range of challenges available in the plug and play app. By adopting an efficient driving style, taking local discovery tours, visiting your Audi Centre or regularly using the app, you can collect points and trophies. It's a great way to challenge your driving performance again and again in different categories and earn rewards from your Audi Centre*. Level after level after level.

*Only from participating Audi Centres

**More safety
on every trip**
With reliable roadside
assistance for your journey

Breakdown and assistance.

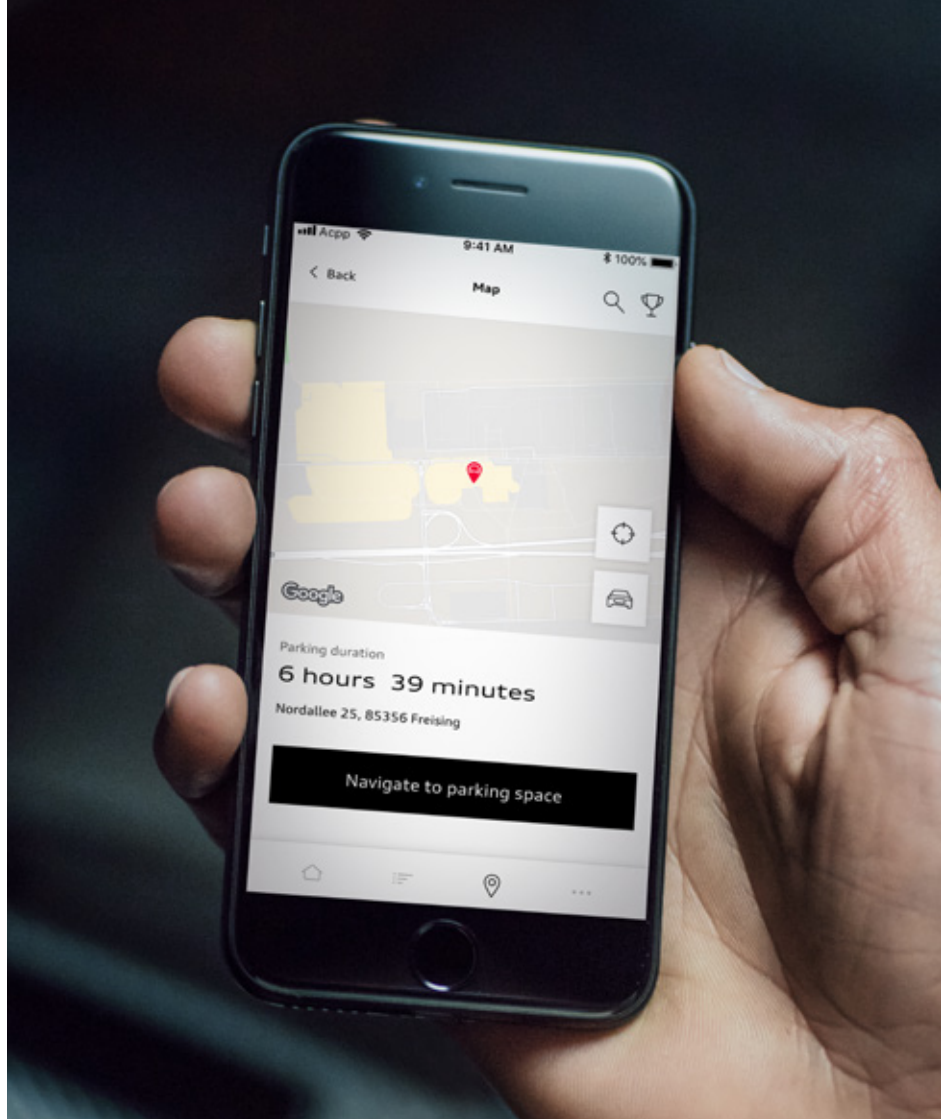

Fast assistance wherever you are should you have a breakdown or accident. Because the app’s “Breakdown and assistance” function connects you with national 24-hour roadside assistance or with the Audi service hotline*. You have the option of transmitting your location and vehicle information as well as calling up important tips for what to do in an emergency.

The app also displays a selection of your vehicle’s warning and control lights. Additional explanations help you identify these correctly and respond appropriately should a control light be activated. This is what safety feels like.

*Costs are calculated according to the relevant tariff from your provider. Roaming charges may be incurred when calling from abroad.

More connected to your car

With navigation to
your parking location

Parking space. With Audi connect plug and play, you always know precisely where you last parked your vehicle. Allow the app to conveniently guide you to your car – or share the GPS coordinates, for example with your friends. You can even keep an eye on how long you’ve been parked.

Connecting what's important to you

The Audi DataPlug
and the Audi connect
plug and play app

Thanks to Audi connect plug and play, many Audi models released in or after 2008 can become connected cars, capable of sending information to your smartphone via Bluetooth. No complicated installation necessary. The required Audi DataPlug can be obtained from your Audi Centre and is then easily connected to your vehicle's diagnostics interface. A minor installation for a major plus in mobility and safety.

Your benefits:

- > free app with simple and intuitive operation
- > connected on the move with key vehicle information
- > easily accessible contact details for customer services and Roadside assistance available in the app*
- > complete control thanks to smart tools and a digital logbook
- > direct contact with your Audi Centre to request an appointment

*Costs are calculated according to the relevant tariff from your mobile services provider. Roaming charges may be incurred when calling from abroad.
