

World's best-in-class accuracy 2D measurement system A sophisticated height gage offering exceptional accuracy of $(1.1+0.6L/600)\mu m^*$ (* L = measured height in mm)

SMALL TOOL INSTRUMENTS AND DATA MANAGEMENT

LH600E LINEAR HEIGHT High Performance 2D Measurement System

Bulletin No. 2104(2)

World Leading Accuracy High Performance 2D Height Series LH-600E/EG

feature 1 World-Class Accuracy

Achieved accuracy: (1.1 + 0.6L/600) μm

Best-in-class accuracy is achieved by using a high-accuracy scale unit and high-accuracy guiding mechanism manufactured in our dedicated scale plant.

Displacement accuracy when measuring a height of 600mm: 1.7 µm

feature 2 Superior Ease of Operation

Easy operation with a single touch of a key

Each frequently used measurement type is initiated by one dedicated icon type command key.

Even a novice can immediately start measurement without instruction.

Color TFT LCD

This improves legibility and operability.

Unlimited USB memory

Compatible models support more than 2 GB of USB memory.

High-accuracy air suspension assists measuring

The Linear Height can move without friction over a surface plate using an air bearing incorporated in the base powered by the small built-in compressor.

A semi-floating mode is also provided that allows measurement with the gage barely floating with no influence on the measuring accuracy.

This mode is effective in operations such as scanning measurements of a hole or shaft on a large workpiece and displacement measurements performed while moving the gage.

Additionally, the power grip model (518-352A-21 LH600EG) improves handling operability.

feature **3** Numerous Functions and Options

Powerful measurement/calculation functions (See page 4 for details.)

Numerous types of measurement such as displacement/ straightness/squareness are possible in addition to basic measurement functions including height and circle measurement. This gage is also equipped with the 2D measurement function, tolerance judgment function, and others.

Standardization of measuring procedures

Teaching the gage a series of measuring operations for a workpiece is possible (Repeat function). This function is very effective when measuring large batches of workpieces. Upon execution of the Repeat function, the probe automatically moves to the next measurement position (height). If an operation procedure manual is available, measurement can be standardized.

Supporting quality control with statistical processing functions

GO/NG judgment is performed in real time on measured data. Up to 60,000 pieces of data can be stored in the database which can be used to performed various statistical calculations such as average, standard deviation and process capability. Quality control is also supported by graphic display of histograms.

Highly capable data processing unit

The high-performance CPU supports future software upgrading. Measurement results are output in CSV format, thus allowing users to reuse those results with their own software.

Versatile external interfaces

A printer interface is provided which is installed in the main unit to connect a thermal printer or letter-size printer.

The USB interface allows a USB memory to back up and restore part programs and measured data that are stored.

Moreover, the RS-232C interface can output measurement results to an external device such as a PLC.

Numerous optional probes

This gage is provided with various types of probes and interchangeable styli flexibly compatible with complicated workpiece profiles and various measurement features.

Mitutoyo's lineup of options offers various interchangeable styli for ø5 ball probes, depth probes, dial indicator holders, etc.

The optional probes extend their flexibility with an M2/M3 threaded shank that allows various CMM styli to be attached.

Measurement System

Reflective-type linear encoder & guide achieve world-class accuracy

Numerous accessories compatible with many types of workpiece and measurement features provided in addition to standard ø5mm ball probes

High-accuracy air bearing can be operated in semi-floating mode while making highly accurate measurements and fully floating mode for frictionless travel over a surface plate

5.7 Inch color TFT LCD display

Icon-type command keys provide simple one-touch operation to drive powerful functionality

A complete cordless system with a built-in compressor and battery allowing frictionless movement on a surface plate

Functions

The touch of a single key automatically runs the instrument until the last result is displayed. This eliminates the need to execute key operations at each step in the measurement process allowing you to concentrate 100% on workpiece inspection.

2D measurement	easurement 2D origin setting, X/Y axis setting, Element recall, Polar coordinate recall, Coordinate distance calculation, 2D distance calculation, 2 elements intersection-angle calculation, Pitch-circle calculation	
Tolerance judgment function	Tolerance/nominal value setting, Tolerance judgment result output, Warning functions

*1 Guaranteed when using the standard eccentric $\, arphi$ 5 probe.

*2 Guaranteed when using the Lever Head (MLH-S21), Mu-Checker (M-511). Perpendicularity for horizontal direction is not defined. If the workpiece is cylindrical, measurement

- error may be observed.
- error may be observed.
 *3 Optional large-capacity battery pack (12AAF675) for longer battery-powered operation (8 hours when operated and 16 hours on standby).
 *4 Mitutoyo does not guarantee the operation of all commercial USB memories except for the following. Mitutoyo recommends those USB memories made by SanDisk Corporation or IO DATA DEVICE, INC. and that meet the following requirements.
 - Those that are not compliant with USB3.0
 - Those that have no security function such as encryption and fingerprint authentication
 - Those that have no write-protect switch function
- It is recommended to use the Linear Height on a surface plate of high flatness accuracy.

Standard Accessories

• Ø5mm probe

- Battery pack
- Clear cover Hex wrench
 - · Carrying handle
 - Manual set

• AC adapter

Ball-diameter compensation block

- · Auxiliary weight (2pcs.)
- · Power cable for AC adapter
- Cap
- Inspection certificate
