Li-CFx - Historic Point

The first Lithium Cell
commercially
developed in 1970's

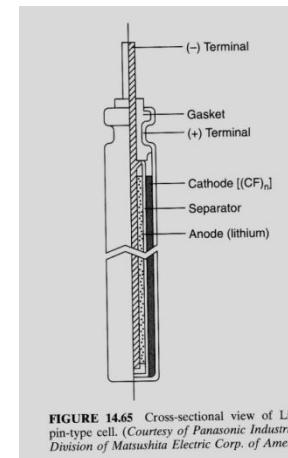

FIGURE 14.65 Cross-sectional view of Li-CFx pin-type cell. (Courtesy of Panasonic Industrial Division of Matsushita Electric Corp. of America)

Lithium Carbon Monofluoride (Li/CF_x)

1. **3.7 - 3.2V Open circuit voltage.**
2. **High energy density especially per weight.**
3. **Bobbin, spiral, coin and cylindrical shapes.**
4. **Low to medium discharge rates.**
5. **-40/+130°C operating temperature range.**
6. **Low self discharge.**
7. **Commercial, Industrial, Military and Medical markets.**

Li-CFx Limitations

- Severe voltage delays at low temperatures.
- High Heat during High Current discharge.
- Low to medium power capabilities.
- High cathode material cost.

Why Li-CFx

Cathode Material	Theoretical Capacity (Ah/Kg)	Theoretical Capacity (Ah/L)	Operating Voltage (V)	Energy Density (Wh/Kg)	Energy Density (Wh/L)
CF _x	864	2330	2.6	2203	5942
SO ₂	418	600	2.8	1150	1650
MnO ₂	308	1540	2.8	847	4235

- Highest theoretical energy density (current cells practically use only 10% of the theoretical value and there is a wide place for development).
- Flat discharge curve.
- Extreme operating temperature range.
- Very low self discharge (<2% a year).
- Thermal stability.
- Reliability.
- Safety.

2009 Li-CFx World Market Share

- Li-CFx is considered to be ~9% of the world's primary battery market (revenue breakdown by chemistry).
- Market share by revenue:
Panasonic ~ 50%
Greatbatch Medical ~ 20%
Spectrum Brands ~ 20%
Eagle-Picher ~ 3%
QinetiQ ~ 3%
Quallion ~ 2.5%
All others ~ 1.5%

Li-CFx Next Generation Cells for Military Applications

- U.S. Army is pushing to increase Primary D-Size cells energy density for extended missions.
- When Li-So₂ D size cell for BA5590 provides 9.2Ah and Li-MnO₂ for BA5390 provides 13Ah, Li-CFx can provide 18-16.5 Ah.
- New programs established for primary battery development:
 - a. Li-CFx cells.
 - b. Li-CFx-MnO₂ cells.
-

Li-CFx Next Generation Cells for Military Applications

- Li-CFx provides higher capacity than LiMnO₂ or LiSO₂, but the raw materials are expensive and considered a low/moderate power system.
- A blend of CFx and MnO₂ cathodes provides slightly less capacity but less expensive material cost and higher operating voltage.

Primary Lithium D-Size Spiral Cells For Military Applications

	Li/SO ₂ Saft LO26SXC	Li/MnO ₂ Ultralife U10026	Li/SOCl ₂ Saft LSH20	Li/SO ₂ Cl ₂ Greatbatch 3B0035	Li/CFx (F1) ** Eagle-Picher LC3355	Li/CFx-MnO ₂ * Saft LH-33550
Capacity (AH)	9.2	13	15	15	16	15.1

Li-CFx Military Battery Market Forecast

- 6 battery companies developing Li-CFx cells for the military market: Saft, Ultralife, Eagle-Picher, Spectrum Brands, Quallion and Contour.
- **BA-5590** is the most popular military battery and is expected to be the first one to use Li-CFx D-Size cells.
- Li-CFx military batteries are expected to be the leading battery technology for the military market within 3-10 years.

Li-CFx Cells for Medical Applications

- Mainly manufactured by Greatbatch, Eagle Picher and Quallion.
- Characterized by a relatively flat voltage discharge profile, low internal resistance and low weight making them useful in drug-infusion pumps, neurostimulators and some pacemakers.

Prototype ICD cell

Panasonic

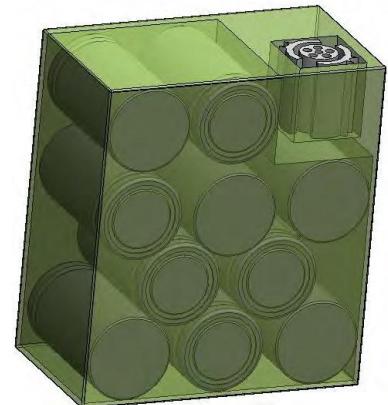

- The biggest player on the Li-CFx cells market.
- Manufacture Pin, Button and Cylindrical cells mainly for the commercial markets.
- Applications like: Calculators, Cameras, Cordless, Translators, Watches and memory backup.

Spectrum Brands

- The second player on the button commercial market.
- 28-year producer of Li-CFx coin cells.
- Developing high rate AA, 5/4D, Tall D, Pouch and D-Size Li-CFx cells.
- Reduce Material Weight by replacing all heavy components (end cup, PTC, washer/vent, grommet).
- Built BA-5590 Lighter and with higher capacity battery than the standard batteries in use.

Telong Energy Technology

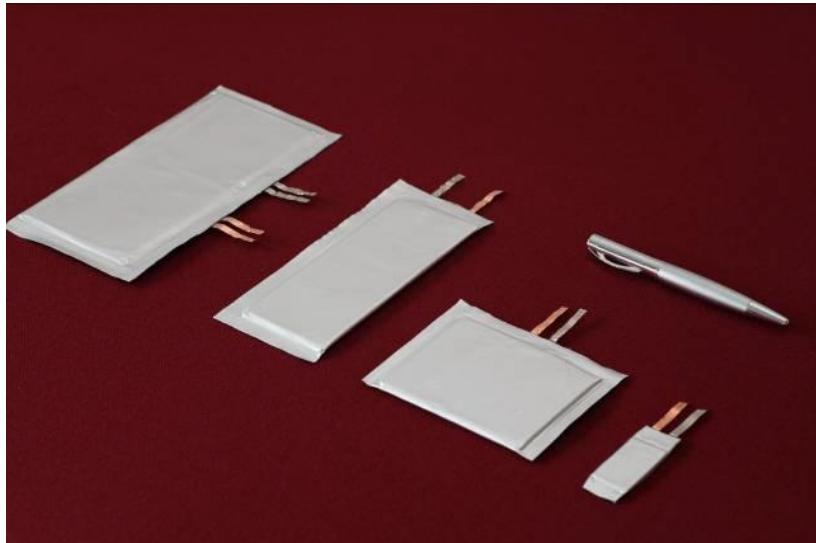

- Li-CFx cell maker from China.
- Full line of Button cells for the commercial market.

www.sztlg.com

QinetiQ Li-CFx Pouch Cells

- The only manufacturer to make Pouch cells (4 sizes).
- The prismatic geometry allows for more efficient packing into rectangular battery packs and thermal cooling compared with cylindrical cells.
- Different cell sizes with capacities between 1Ah to 45Ah and Energy density of up to 650 Wh/Kg.
- 17Ah cells used for the UK Army BA5590 Military battery.

Eagle-Picher Li-CFx D-Size Aluminum Can Cells

- 17 Ah D-Size cell developed.
- First to employ an Aluminum Can.
- 17 grams less than stainless steel can (63 instead of 80 grams).
- Aluminum case increases energy density by 100 Wh/kg on cell level.

Aluminum can is an important development

D cell with Al Hardware
(63 grams)

Contour Energy Systems

- Li-CFx developer with proprietary Fluorinetic™ technology which improves performance versus traditional Li-CFx.
- Main advantages are up to 20-30% more capacity, up to 2x discharge power capabilities, wider operating temperature ranges (up to 220 C) and low to moderate cost.
- Coin, Pouch and cylindrical cells are under development for the Commercial, Medical, Industrial, Automotive and Military markets.

commercial
cells (10/2010)

Contour Energy BR2032

Contour BR2032 Cells

	Capacity mAh	Max constant discharge current (mA)	Discharge operating temperatures (C)
Contour	265	10	-30 to 80
Spectrum Brands	195	5	-40 to 85
Panasonic	190	5	-30 to 80
Telong	180	3	0 to 130
Panasonic CR2032	240	5	-30 to 80

Contour BR2032 are
the best cells in the
market

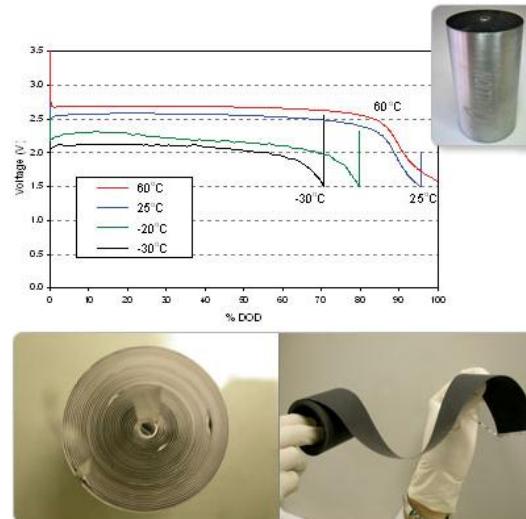

Contour Energy BR2032

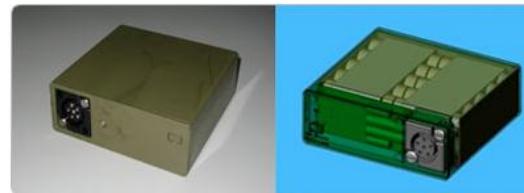

Quallion

- Developing Li-CFx cells for the medical, aerospace and military markets.
- 15Ah D-Size cells with maximum current discharge up to 3A.
- Further development needed.

The jellyroll inside of a D-cell case. There are more than 30 winds present inside the D-cell case.
13b. The flexible thin-film coated CFx electrode used inside the D-cell.

Tracer Technologies

- Lithium battery maker, Boston U.S.
- Manufactures Li-CFx cells for the oil exploration market (High Operating Temperature Cells).
- No information about the cells or the manufacturing capabilities.

www.tracer-eco.com

Saft

- As a part of a program done with the U.S. army, Saft developed a Hybrid cathode Li-MnO₂:CF_x D- size cell (LH-33550).
- 15.1 Ah capacity.
- -30 to 90 operating temperature range.
- Further development is needed.

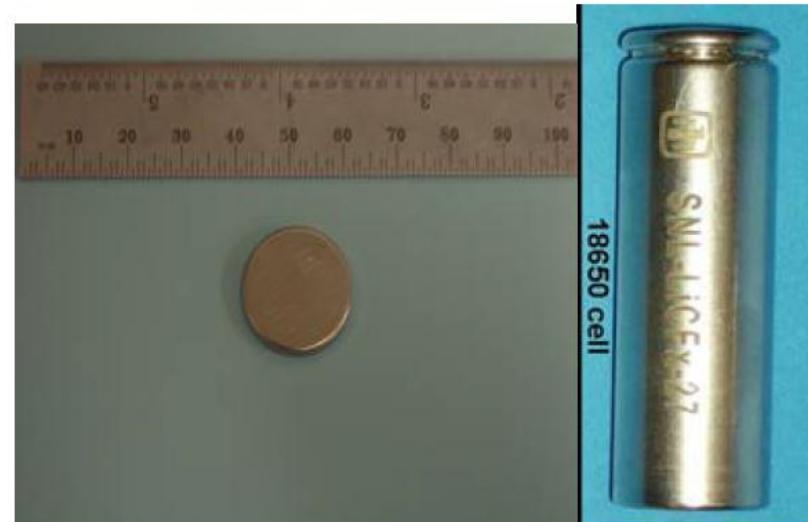

Ultralife

- As part of a program completed with the U.S. Army Li/MnO₂– CF_x hybrid chemistry has been developed.
- Higher energy density than Li-MnO₂.
- Higher power density than Li-CFx.
- No voltage delay on LT.
- Relative low cost compared to Li-CFx.
- D-size cell capacity of ~ 17Ah achieved on the Lab.

Li-CFx Development at Sandia

Development of
Li-CFx 2016 coin and
18650 primary cells at
Sandia National Lab

Type	Capacity (Ah)	Weight (gr)	Energy Density (wh/kg)
18650	3.6	28	347

Summary

- The Li-CFx batteries market is expected to grow due to technology advantages and manufacturing cost reduction.
- Its higher energy density and low self-discharge characteristics make Li-CFx important to the military and other markets.
- Most battery makers manufacture the traditional Poly-Mono carbonate technology.
- Contour Energy is developing promising advances in Li-CFx technology with superior performance.
- QinetiQ succeed to develop a promising pouch cells for military applications.
