(11-2012)
10 CFR 110

U. S. NUCLEAR REGULATORY COMMISSION

APPROVED BY OMB: NO. 3150-0027

EXPIRES: (11/30/2015)

**APPLICATION FOR NRC EXPORT OR IMPORT
LICENSE, AMENDMENT, RENEWAL,
OR CONSENT REQUEST(S)**
(See Instructions on Pages 4 and 5)

Estimated burden per response to comply with this mandatory collection request: 2.4 hours. This submittal is reviewed to ensure that the applicable statutory, regulatory, and policy considerations are satisfied. Send comments regarding burden estimate to the Information Services Branch (T-5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by internet e-mail to Infocollects.Resource@nrc.gov, and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0027), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

ADDITIONAL INFORMATION (Reference applicable block numbers from page 1 and/or page 2 for each entry)

- 1) We are submitting this request with a detailed letter of explanation
- 2) The change we are requesting is in reference to the below, which has also been detailed in the cover letter

This amendment is to request:

A- the removal of the United States for the country destination list and

B- to remove the second paragraph, which states: "Sealed sources will remain in the custody of either licensee or its subsidiaries onshore and /or offshore at all times, and when not in use, will be stored in a secure facility controlled either by licensee or its subsidiaries." from current License PCB135a.00 for the export.

C- Halliburton Energy Services, Inc. also requests this amendment to be expedited due to pending jobs and changes to Russian regulation changes which will take effect January 1 of 2014.

- 3) Note the list of Countries on current License PCB135a.00

Albania, Algeria, Argentina, Australia, Austria, Azerbaijan, Bahrain, Bangladesh, Belarus, Belgium, Bolivia, Brazil, Bulgaria, Cameroon, Canada, Chile, China (Hong Kong and Macao), Congo, (Brazzaville), Czech Republic, Denmark, Ecuador, Egypt, Equatorial Guinea, Estonia, Ethiopia, Finland, France, Gabon, Germany, Greece, Hungary, Ireland, Italy, Japan, Kazakhstan, Latvia, Lithuania, Luxembourg, Malaysia, Mexico, Namibia, Netherlands, Netherlands Antilles, New Zealand, Norway, Papua New Guinea, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Singapore, Slovakia, Slovenia, South Africa, South Korea, Spain, Suriname, Sweden, Switzerland, Taiwan, Thailand, Turkey, Ukraine, United Arab Emirates, United Kingdom, Venezuela, and Vietnam

RE: HES3133 Application for Expedited License Amendment for the Export of Americium in amounts exceeding SI Limits – NRC 10 CFR, Part 110

Deputy Director,

Halliburton Energy Services, Inc. is applying for an amendment to remove the United States for the country of ultimate destination list and to remove the second paragraph, which states: “Sealed sources will remain in the custody of either licensee or its subsidiaries onshore and /or offshore at all times, and when not in use, will be stored in a secure facility controlled either by licensee or its subsidiaries.” from current **License PCB135a.00** for the export of Category 2 Americium-241, Americium-241/Be sources for shipment that are in the excess of the 0.6 terabequerels threshold and Cesium-137 sources for shipments that are in the excess of the 1.0 terabequerels threshold.

Halliburton Energy Services, Inc. also requests this amendment to be **expedited** due to pending jobs and changes to Russian regulations which will take effect January 1 of 2014. These materials will be used to calibrate down hole well logging equipment for the completion of an oil or gas well. These items are subject to the export licensing jurisdiction of the U. S. Nuclear Regulatory Commission. Enclosed please find Halliburton’s check no. 0007195395 in the amount of \$1400.00 (Fourteen hundred dollars) as the application fee for this license.

Halliburton Energy Services and its subsidiaries provide personnel, equipment, sources, materials, and services worldwide in offshore and in shore locations for oil and gas drilling and services.

Halliburton Energy Services in consideration of Title 10, Part 110.42 (c) of the Code of Federal Regulations submits that the NRC-Controlled Items proposed for export are not inimical to the common defense and security of the United States and the proposed exports are consistent with the policies and objectives of the United States Government.

License Amendment and Request:

This amendment is to request the removal of the United States for the country destination list and to remove the second paragraph, which states: "Sealed sources will remain in the custody of either licensee or its subsidiaries onshore and /or offshore at all times, and when not in use, will be stored in a secure facility controlled either by licensee or its subsidiaries." from current **License PCB135a.00** for the export. Halliburton Energy Services, Inc. also requests this amendment to be expedited due to pending jobs and changes to Russian regulation changes which will take effect January 1 of 2014. This application is for RA sources exporting to a group of countries we currently do business in and for countries we may have future business in.

This application criteria is based on business requirements to fulfill Halliburton Energy Services, Inc. and its subsidiaries oil and gas field service work both onshore and offshore throughout the world for shipments that exceed NRC threshold limits per 10 CFR Part 110.

The regulation requires the use of the 'sum of calculations' methodology for multiple or consolidated shipments. Halliburton has several RA sources that are less than the threshold but could exceed the limits if consolidated.

Scope of Work:

Halliburton Energy Services, Inc. (HES) is one of the world's largest providers of products and services to the oil and gas industries. HES offers a broad array of products and services to upstream oil and gas customers worldwide. The Drilling and Formation Evaluation segment is primarily involved in drilling and evaluating the formations related to borehole construction and initial oil and gas formation evaluations and RA sources are a necessary element to the evaluation. RA sources will be used to provide logging and perforating services to our clients worldwide.

Halliburton's Corporate Radiation Safety Program:

Halliburton Energy Services, Inc. (HES), its entities, and its subsidiaries ensure compliance with radioactive source regulations by Company Policy and through the training, execution, and monitoring of our Corporate Radiation Safety Program (CRSP). The purpose of the CRSP program is to define and implement processes that minimize radiation exposure of personnel, property, and the environment resulting from working with radioactive materials and sources used by the company. Key areas covered by the program include:

- Organization and Authority Descriptions
- Radiation Safety Procedures Development and Maintenance
- Radiation Safety Training
- Radiation Exposure Control

Rec 107
1273

- Procedures for Receipt, Handling, Identification, and Disposal of Radioactive Materials
- Radiological Emergencies and Incidents
- Radiation Protection Equipment Calibration and Maintenance
- Recordkeeping

It is the policy of Halliburton Energy Services, Inc. (HES) that the CRSP be executed both nationally and internationally. HES facilities located in countries with less restrictive regulations shall comply with this program as the minimum acceptable standard of radiation safety. A copy of these guidelines can be provided as required.

End User Authorization to Receive and Possess the Material:

Halliburton Energy Services, Inc. (HES), its entities, and its subsidiaries will be the end users of these materials in the following countries where HES operations.

Licensed materials will be stored at approved Halliburton Energy Services, Inc. facilities only. All current facilities are licensed for use and storage as required by local and international law. All future facilities will also be licensed for use and storage as required by local and international law before import or exports or source are allowed.

The licensed materials shall be used by, or under the supervision and in the physical presence of the Halliburton Energy Service's Radiation Safety Officer, or individuals who have been trained as specified in Halliburton's materials license of individuals designated as users.

Random compliance audits check the effectiveness of each facility's radiation safety program maintenance while providing oversight by the Global Radiation Safety Group. The audit covers all major aspects of all the radioactive material usage. This audit is conducted by a Global Radiation Safety Officer (GRSO), and Associated Radiation Safety Officer (ARSO), a Region Radiation Safety Manager, or a qualified individual designated by a GRS).

Concern for Diversion:

The RA sources authorized for export under this license will only be used by trained employees of Halliburton Energy Services, Inc. and trained employees of its subsidiaries.

Halliburton's Corporate Radiation Safety Program provides auditable processes for storage, usage, transportation, monitoring, and recordkeeping for all radioactive sources as well as training and internal management review to ensure the safety of the people and the environment.

All movements of radioactive sources are pre-screened and approvals are required prior to shipment by the Radiation Safety Group and the International Trade Compliance Department.

The RA sources authorized for export or import will not be used for any nuclear activities or by any nuclear end users.

The commodities will not be resold without prior approval and notification as required by the NRC and local regulations.

Halliburton Energy Services, Inc. has consistently maintained, monitored, and reported to the Nuclear Regulatory Commission on all licenses related to the control of radioactive materials.
