

# LIGHTWEIGHT

*Thermoplastic, Nylon Core and Plastic Modular Belting*

# Lightweight Thermoplastic — *In-Stock and ready for immediate delivery*

## Conveyor Belts

Cover compounds and surface textures are offered for a variety of applications: food processing, packaging, logistics, metal stamping, recycling, building materials and pharmaceuticals.

**Polyurethane**  
**PVC**

**Silicone**  
**Polyolefin**

**Non-Woven**  
**Nitrile**

*Polyurethane belts manufactured by Reveyron®*

- Excellent dimensional stability
- Meets FDA and EU regulations
- Can be used in a wide range of applications
- Belts lay absolutely flat with no edge curling
- Exceptional splice quality
- Several specifications are ideal for corrugated sidewall and/or cleat fabrications

Invention & Innovation

**NITTA**

*Delivers better overall performance*

**PolyBelt™**

Nylon Core

**PolySprint™**

Printing

**Carryflex™**

Live Roller

Nitta stands alone as the only vertically integrated US manufacturer of flat power transmission belting.

Movex® designs and manufactures high quality conveyor belts and components for the beverage, packaging and automotive industries.

- Modular Belts
- Belt Sprockets
- Steel Chains
- Plastic Chains
- Sprockets & Idler Wheels
- Conveyor Components
- Return Components
- Support Components
- Bearings Supports
- Leveling Pads
- Profile UHMW-PE & BluLub

## MODUTECH®

Designed specifically for the food industry, our Modutech® plastic modular belts combat challenges often faced in food applications. Made of the high-quality molding and materials, these belts can be used in food processing and food packaging.

The hygienic design of the belts reduces common plastic modular product cleaning issues. Enhanced belt strength and precise sprocket engagement reduces unscheduled downtime and product damages.

Our complete line of modular belts, chains and conveyor belt components are compatible with other manufacturer's products.

*When the most direct route isn't a straight line*

ProTurn® replacement belts are fabricated to your customers' exact specifications with all guidance hardware installed.

Belts for 45°, 90°, 180° and spiral lift applications include either chain, urethane bead, or bearing/wheel guide systems attached and ready for service.

High speed operations and strict safety standards are a way of life for facility managers at airports and around-the-clock package sorting facilities. When faced with a choice of endless conveyor belt options, distributors can be certain we stock an excellent selection of high performance products.

ZipLink is a breakthrough in belting design that combines time tested rubber cover materials with a structured spiral link mesh that can be easily spliced at any length into a continuous belt without the need for special tools, presses or other equipment.

ZipLink's construction eliminates points of weakness because there is no loss of strength in the splice area, making the belts stronger so they last longer than belts of other seamed or fused materials.

- **Food Handling**

*Optimize Performance with an easy to clean belt*

ProClean PD positively driven belt replaces plastic modular belt in the food processing industry and optimizes the performance of your conveyor with a low tension belt system.

FLAT BELTING

PLASTIC / STEEL LACING

DRIVE BAR

ProClean FB flat belt products have a 100% closed surface, homogeneous thermoplastic structure, and smooth or textured surfaces.

CENTER DRIVE

FABRICATIONS

Surface Selection

## Detectable Products

*Advanced belting with a "safety net"*

An exclusive blend of FDA compliant metal detectable thermoplastic resins.

An X-ray detectable urethane material. Extremely durable with low maintenance and low stretch.

# Fabrications

*Lacing and splicing is offered in a variety of options*

In addition to lacing and splicing, we have a variety of value added fabrications to choose from. These belts include Corrugated Sidewall, Cleating, Perforations, and V-Guide belts.

## Single Finger Splice

## Double Finger Splice

## Perforations

## Cleating

High Frequency/ Welded/ Cast

## Thermoplastic Corrugated Sidewall

## PVC / PU V-Guides

## Mechanical Lacing

- Flexco Clipper
- Flexco Alligator
- Plastic Spiral
- Soft Splice

## Laminations

- Black Neoprene
- Gum Rubber
- Neoprene Foam
- Urethane Foam
