
List 4
Approved Manufacturers
of Steel Pipes and Tubes

This list identifies works approved by Lloyd's Register Group Limited (LR) for the manufacture of welded and seamless steel pipes and tubes in accordance with the requirements of LR's Rules for the Manufacture, Testing and Certification of Materials, Chapter 6.

The information listed for each works is a summary and includes the types of steel and maximum diameter, wall thickness approved for both welded and seamless pipes and tubes. It also details those works approved to carry out eddy current testing in place of hydraulic testing. The types of steel include:

carbon
carbon-manganese
alloy
austenitic stainless

Where required further information should be obtained from the current certificate of approval issued to the manufacturer by LR.

Works designated "MQS Approved" are also approved under the Materials Quality Scheme in accordance with LR's Rules for the Manufacture, Testing and Certification of Materials, Chapter 1 Section 2.

Approval only covers the manufacturing location listed, it does not extend to other works owned by the same company.

The local LR surveying office is also listed.

Lloyd's Register Group Limited, its affiliates and subsidiaries and their respective officers, employees or agents are, individually and collectively, referred to in this clause as 'Lloyd's Register'. Lloyd's Register assumes no responsibility and shall not be liable to any person for any loss, damage or expense caused by reliance on the information or advice in this document or howsoever provided, unless that person has signed a contract with the relevant Lloyd's Register entity for the provision of this information or advice and in that case any responsibility or liability is exclusively on the terms and conditions set out in that contract.
