WORLD'S THINNEST FLAT PANEL MOUNTING SOLUTIONS

0.4" II

# Nobody

GETS YOU CLOSER

Introducing Slimline...  
the world's thinnest flat  
panel mounting solution  
at only 0.4 inches from the  
wall, only from Peerless.  
Designed for ultra-thin  
LCD's, yet strong enough  
to support the weight of  
standard-depth screens,  
the Slimline's near-invisible  
0.4-inch profile puts the TV  
closer to the wall than any  
other mount in the world.

# Ultra-Thin

DESIGN

Today's flat panel screens are designed to harmonize and enhance any décor. That's the reason we designed our Slimline mount to virtually disappear behind the screen making the flat panel an elegant focal point that appears to be joined directly on the wall.

# Easy

## INSTALLATION

A clean, sleek installation is as easy as 1-2-3. With Slimline's all-steel universal screen adapters and industrial-strength Velcro® latching system, it couldn't be simpler. Install the wall plate, mount the universal screen adapters and hang the screen. That's it.

# Secure

## SUPPORT

Slimline's Velcro® latching system makes hanging the screen on the mount easy, simple and secure. The industrial-strength Velcro® grabs the screen and secures it tight against the wall plate, preventing the screen from being accidentally bumped off the mount.

Specially designed safety tabs on both sides of the wall plate keep the flat panel screen from accidentally sliding off the mount when it is disengaged from the Velcro® during installation and horizontal adjustment for optimal screen placement.

Thanks to these two unique features, your screen stays safe and secure during installation, adjustment and viewing. Plus, our Slimline mounts are designed to support up to 150 pounds. That's enough to support the weight of a standard-depth flat panel screen.

The Slimline mounts flexible design enables placement of the flat panel screen exactly where it is wanted, even if the wall studs are not positioned to align the screen to the desired viewing location. Just pull the bottom of the screen towards you to disengage the Velcro® latching system, slide the screen up to eight inches to the desired location and press it against the mount to secure it.

FLEXIBILITY

# Finishing TOUCHES

Achieve a virtually no-profile clean, stylish installation with your choice of three cable management options:

Keep cords and cables completely hidden from view with the In-wall Box accessory. It's the perfect behind-the-screen solution. Power and cables can be run directly from the screen into the wall. Complete a virtually invisible installation with the unprecedented combination of a Slimline mount and the In-wall Box accessory.

For the ultimate in elegant appearance and functionality, Peerless' AV Wall Furniture keeps cables and a power strip out of sight while displaying up to 80 lb of AV components per shelf.

Use the Cable Management Channel accessory that provides a simple way to conceal cables and cords right on-the-wall. The channels attach easily to the wall and can be painted any color to match the decor. The Slimline mounts are perfectly complemented with this simple on-the-wall cable management solution.

No matter what finishing touch is chosen, the Slimline mounting system delivers a clean, elegant look that complements any décor.
