## Hawaiian Gazette. WINDS AND WAVES RULE WATERFRONT

### The Doric Did Not Dare Go Out Until Daylight.

### ROUGH EXPERIENCES OF THE TUGS FEARLESS AND ELEU YESTERDAY

Kona Storm to Celebrate Kalakaua's Birthday----Captain Cameron In great danger of going on the reef. Nearly Goes to the Coast Against His Will----Yachts Are Damaged.

A raged. It is raging yet, and, according to all the old weather rophets on the waterfront, it is bound o continue for three or four days,

From late Wednesday night, at about the time that the Doric was booked to eave for San Francisco, right on through the day, up to the present time, the furious south-east winds prevailed and had things pretty much their own way at sea, along the shore, on the windward side of this Island as well as on this side.

What tales of rough experiences inthe harbor and in the channel yesterday to satisfy the most exacting lover eral years since Honolulu has been visited by such a windstorm.

As the great waves around the mouth of the channel rose to threatening over the unseen and treacherous bar, boiling and breaking and booming, dashing their spray high into the air, the old natives along the waterfront shook their heads and prophesied still rougher weather for to-day, for, they said, to-day is the birthday of the King and on every birthday of the King the winds and the waves vie with each other in producing a magnificent specscene which legend and ancient story attribute to the gods who are supposed to celebrate the birthdays of Hawailan kings in such royal style.

To-day is the birthday of King Kalaweather to the minds of the older Ha-But the haole sailor thinks naught of

ill this as he strains every muscle and nakes every effort to bring his vessel safely into the harbor through the narrow channel while the angry breakers oar and the fierce Kona rages at his heels, or attempts, with the laboring tug, to assist the ponderous ocean steamer out of the harbor on her way to open sea bound for the Coast.

To look at the breakers from the waterfront, it seemed that there was no mouth to the channel at all. It seemed rather that one continuous line of towering water and boiling foam guarded the harbor, unwilling to allow the entrance or exit of any vessels.

Buoys were torn from their moorings and sent wandering through the shallow waters that hid the coral reefs. vessels lying at anchor in naval row tugged threateningly at their hawsers as if anxious to make a sudden dash for the wharfs, small sailing craft, rowboats and pleasure boats of all derr on the restless, choppy surface of the waters of the harbor.

None dared venture outside either on pleasure bent or for business purposes. Japanese fishing boats lay safely shelered from the storm behind the boat-

Several little yachts have been seriously damaged as a result of being badly pounded in a general mixup near the boathouses during the dark hours of yesterday morning while the storm was at its height. A pilot boat was also a sufferer and a couple of the boat boys were slightly battered into the bargain.

The steamship Doric, which arrived from the Orient Wednesday morning, thirty-six hours behind time on account of the storm, and which was booked to eave at 11 o'clock the same night for San Francisco, remained in port until 6:30 o'clock yesterday morning. Captain Smith refused to take his vessel out while the storm was raging very wisely deciding to wait until daylight so that he could see what he was toing. When daylight came the Doric was all ready for sea. The tug Eleu was on hand to pull her away from the wharf. But the Eleu reckoned without

The wind simply gined the great hulk f the Dorie to the Pacific Mail wharf and kept her there despite the vigorous and continued efforts of the Ricu.

the power of the wind.

Finding that the strength of the Eieu was not sufficient to move the Dorie the Pearless was called upon to do the business. The powerful sea-going tag pull and a strong pull and finally aucceaded in shifting the Doric from the wharf. The Doric got her nose pointed

LL yesterday the Kona storm with the wind, and picking up Pilot Cameron, started through the channel. She had to be very careful and those on shore watched her progress with great interest. She got outside without any trouble but lost the pilotboat, which was trailing along behind, just before the mouth of the channel was reached.

It seems that the line holding the pilot boat was suddenly lost astern afer crushing up againt the iron side of the big vessel. One side of the pilot boat was badly injured and two of the boys were slightly bruised by being thrown around in the boat. The injury coming vessels will have to tell of the to the boat was not serious enough to fury of wind and wave remain to be make her take water to any extent and heard. It was quite rough enough in at first the boys were for going outside the harbor after the Doric to get Captain Cameron who had been left of stormy times and it has been sev- aboard. This was found to be impossible, however, on account of the tremendous waves which were rushing into the channel and mingling with the breakers on the reef until the mouth of heights and dashed in mighty strength | the channel and the reef seemed to be one. So the pilot boat was compelled to put back and the bilot was left aboard the Doric to take a trip to San Francisco unless he was taken off by one of the tugs.

The captain of the Doric did not realize that the pilot boat had been lost until the steamer was outside of the harbor headed for the open sea. Then the pilot made known his desire to go tacle to his glory, an awe-inspiring ashore, looked for his boat and found it The Doric was headed buck togone: wards the mouth of the channel and a signal for a tug to go out immediately was hoisted. The Eleu, seeing the signal started right away for the Doric, kaua: this in itself is sufficient of an ex- thinking that something had happened planation of the condition of the to her machinery or that the vessel

The wind died down about • midnight although the sea continued to be exceedingly rough • It is thought that the severe • storm which has been raging for the past few days has about blown itself out.

rushed against b - upper works until they threatened to be washed over-board, the matter as indeed a serious one and the me ements of the tug were anxiously watched.

At times nothing was to be seen of the Eleu but her smokestack. The great waves swept her decks from stem to stern and burst into the captain's room, drenching his belongings Her plucky captain kept up the one sided fight with the elements, however until it was impossible for him to take his tug any further out. The Elev would not answer her helm and was There was nothing for it but to turn back, and this was finally managed, and the Eleu came plunging on her homeward way with the wind roaring at her heels, and every man aboard drenched to the skin, and a good amount of water in her hold.

Meanwhile the pilot was still aboard.

amount of water in her hold.

Meanwhile the pilot was still aboard the Doric and had to be brought ashore. Then the Fearless started out. It was a test of strength and seaworthiness, and Captain Brokaw of the Fenrless fully realized this fact. But he had the greatest confidence in his boat and started to the Doric, determined to come back with the pilot or to stay outside himself. If the Fearless had been satisfied to go out slowly. to stay outside himself. If the Fear-less had been satisfied to go out slowly she would probably have managed it without taking much water aboard, but she was in a hurry, for it must be remembered that it was not yet known why the Doric had signalled for a tug. Captain Brokaw did not know but what the Doric was in some great dan-ger and needed his assistance at once. So the Fearless forged ahead at full speed taking was after see aboard The speed, taking sea after sea aboard. The water piled up against her bow and broke all over her decks and, in breaking the wind took the spray and tossed it all ever the tug until nothing could be set a of her except the top of her smokes, ck. The Fearless took her smokes ck. The Fearless took aboard just as much water as the Eleu but she was better able to stand it, and although her uppper works were buffeted by the heavy seas, she went through it all right and finally arrived within a safe distance of the waiting Dorie.

Doric.

The captain of the Doric wanted Brokaw to take his tug right along-side the Doric so that the pilot could get aboard by the rope ladder. Captain Brokaw knew better than that, however, for to have taken the Fearless up alongside the big steamer in the sea that was running at the time would have been to mash a hole in the side of the Doric. of the Dorie.

So the tug lay to while a boat was lowered from the Doric and the pilot was sent aboard the Fearless. Then the Doric stood out to sea and the Fearless returned to her wharf triumphant, with Captain Cameron aboard, who had come controlled.

was hoisted. The Eleu, seeing the signal started right away for the Doric,
thinking that something had happened
to her machinery or that the vessel
had perhaps gone onto the reef.

The intentions of the Eleu were all
right but she is not a sea-going tug and
when she started to buck against the
great waves and the fierce winds it was
plainly seen that, if she succeeded in
getting to the Doric at all, she would
have an exceedingly rough time of it.
She started out bravely enough but
hardly had she gotten to the middle of
the channel before the full force of the
storm struck her. First she stood on
her stern, it seemed as if the waters
pushed her bows out of the water, then
the next moment it seemed that she

### rowboats and pleasure boats of all descriptions were tossed hither and thith-A LIVE WIRE LAST NIGHT

ALLEN electric light and telephone wires at the corner of Lilina and School streets almost electrocuted a hack horse belong to driver Harrub of hack 236 last night at 9 o'clock. A Chinese store was almost set on fire and a series of accidents were averted by the prompt and heroic action of the police and several citizens.

Ed. McInerny while walking toward Nuuanu street on School street discovered that a large algeroba tree had fallen across the street, carrying with it several wires. A back was coming behind him, the driver evidently nor knowing the dansor. A mark was coming behind him, the driver evidently not knowing the danger. Mr. McInerny shouted to him to drive on the left hand side of the street.

At the time he saw that a telephone pole had also failen and its wires were entangled with those of the Government electric light. The telephone wires were
not touching the electric light wires at that time and Mr. McInerny lifted them so
that the horse and hack could pass under. Instead of other injunction the
driver went to the right and was about 4s feet away when he saw sparks flying
and sputtering from the Iron shoes of the horse. The horse fell down apparently
head.

A telephone message was sent to the Police Station for assistance. Deputy Sheriff Chillingworth, Captain Fox and an officer went to the seems and found Mr. McInerny trying to out the telephone wires with a hatehot. The officers provailed opposition to stop his dangerous action as there was a phore circuit with a heavy voltage which would have killed a man had it made the lowesty through him. The electric light company was telephoned and asked to shut off that current in that strends.

electric light company was telephoned and arked to sent off that current in that circuit.

Superintendent Cochran of the telephone company responded to a call and rendered valuable assistance in discitanting the wires. Mr. Molnerny procured a pair of insulated pincers and cut the Wires agreed the horse and freed him from further contact with the chatticity. Superintended the borse and freed him from the relephone wires from those of the electric company to through a rope over them and pulling them away. In doing this one of the wires dropped down upon the corrupted from roof of a fulliance stare and the entire algorithm one was treated to a brittent display of protectables. The street was lighted up by a glate as great as a down are luminated have glave.

After getting this wire chair Deputy Species religious world found that the store might have caught fire. After researched knowings on the door the latter was broken down. An investigation of the intestor of the front roution showed that nothing had taken fire. They went to the real and knowled a result through the store of the trends along him to the objects of the police star. In this quest said found the friends a mornish with it is breaking of the shoulders and military proceeded to make him the shoulders drope.

The Romain staring line, was called a superior drope.

First The horse staggered and gasted and finally became quite decide.

### WIRELSS TELEGRAPH A SUCCESS AT LAST

### Messages Are Sent From This Island Over to Molokai.

### HONORS FOR **EXPERT GRAY**

### Experiments Yesterday Proved System was Allright.

(From Wednesday's Daily.)

OU can say to all the world that the wireless telegraph system in the Hawaiian Islis an unqualified success," said Manager F. J. Cross of the company to an Advertiser representative last night. "Between Kaimuki and Molokai absolute communication by the wireless elegraph has been established."

Manager Cross wore a smile of riumph last evening. After months of truggling with the mysterious forces which Signor Marconi discovered and meeting with skepticism at every hand of late, he has the satisfaction of knowng that his efforts have been crowned with success.

Not only has the wireless communiation been established between the Islands of Oahu and Molokai, but the rest of the Islands-Maui, Lanai and Hawaii are linked by the mysterious electrical waves which will make it ossible for all to put themselves in ommunication with their friends hundreds of miles away in very short time. On Monday afternoon Expert-in-Chief Gray and his assistants were flying a kite from a wagon at Waialae. A set of wireless telegraph instruments were in the wagon. The kite was provided with a wire point. Mr. Gray was endeavoring to put the kite wire and the station at Kaimuki, not far distant into active communication with each

other Suddenly the delicate instrument bean to tick. At last success was at hand. The paper reel began to move inder the needle automatically and the written character of the Morse Contimental code began to appear before the straining eyes of the expert and his assistants. Gradually the characters were formed and as the period was ticked off, Mr. Gray read

"I have received your last six mes-

Expert Gray thought it was sistant, Mr. Pletts, who is in charge of the Kaimuki instrument. He placed his fingers on the sending key and inquired if Pletts was sending the mes-

Molokai instrument near Lae o ka Laau point. Mr. Gray directed his en-Molokai instrument, and at 4:30 p. m. back came the message from Hobbsand the wireless telegraph had come to

Then the little instrument began ticking its message in dots and dashes on the thin, narrow strip of paper which slowly unreeled from the big All was quiet. The experts knew the code and read the characters off at a glance. Foot after foot of the paper was reeled off automatically, dots and dashes intermingling in an apparently unreadable string.

when a final period was recorded and the instrument stopped. The expert fore off the six feet of paper and with pencil filled in the letters designated by the cabalistic characters. When he had concluded the message was a ludicrous

Expert Hobbs is a humorist. Despite he serious altuation brought about by the success of one of the most marvelous inventions of the 19th centuriy, yet the very first authentic message flashed through the air from Molokai to Oahu

and he called again: Within fifteen seconds a reply came from Expert Hobbs. The time was taken by Mr. Farrington, who, watch in hand, waited for the responsive ticking in the receiver. The message read:

Who are you, and how are you?" "Who are you, and how are you?"
This was the first time Manager
Cross had heard the Kaimuki instrument in connection with the one across
the channel, and he became as enthusiastic as a boy. He threw his hat in
the air and demonstrated his pleasure
by allowing a smile to lighten up his
worried features, for months of unsuccessful attempts to make the system
work have worried him.

A return message was sent to Mr.
Hobbs telling him that the Kaimuki
station was "talking," and telling him
who were in attendance.

Hobs telling him that the Kaimuki station was "taiking," and telling him who were in attendance.

"Good morning to Mr. and Mrs. Cross," was the distinct answer read on the white tape. It continued: "Send me 200 feet of two and one-half inch by steamer leaving this afternoon." Thus it was established that the wireless telegraph was not a toy or an amusement, but had a commercial value beyond computation,

Expert Gray states in explanation of the successful tests that the heavy rains of the past month have caused the entire Kaimuki district to become damp, thus giving the wires a wet grounding place, and accounting for the present success. Despite this he says it would never do to leave the pole and instrument in its present location. He told Mr. Cross that it should be moved down near the season the ground wires will not be affected. so that in either the dry or wet season the ground wires will not be affected. By being established near the water the wires will always be grounded in a damp place. All the other stations have sea-grounding connections. Another important change will also occur in the stations bearings.

have sea-grounding connections.

Another important change will also occur in the stations elsewhere. At present, for instance, there are three poles—one on Oahu, one on Molokai, and a third on Lanai, "Suppose," says Mr. Cross, "that Oahu and Lanai both commence talking at the same time the messages will become jammed on the Molokai instrument and messages cannot be successfully recorded.

"Mr. Gray believes that two poles on each Island should be erected, these to be connected by telegraph wires on separate instruments. Thus the system complete would be as follows: One station at Waialae, Oahu, which would connect with a pole on windward Molokai, thence a telegraph wire would connect it with a pole on the other side of Molokai. A jump would be made to a pole on the near side of Mauf, thence a telegraph wire to connect with a pole on the opposite side, and thence a jump to the pole at Mahukona, Hawaii. This would cut Lanai out of the system altogether. Lanai is not essential to the system, either commercially or scientifically. The system which we had already adopted, however, made it imperative to use Lanai. "With the new system suggested by Mr. Gray which will be put into operation, messages can be sent by wireless telegraph from one channel station to

elegraph from one channel station to the other without fear of breaking into a message from the other side. The overland telegraph wire will take care overland telegraph wire will take care puired if Pletts was sending the message, Mr. Pletts replied "No. I think it is Hobbs."

Mr. Hobbs was in attendance on the Molokai instrument near Lae o ka Laau point. Mr. Gray directed his energies to attracting the attention of the messages between the channel stations. The messages will go straight to their proper destinations, for the first pole away from the transmitting instrument will intercept them. This will delay the sending of regular messages between the channel stations. The messages will go straight to their proper destinations, for the first pole away from the transmitting instrument will intercept them. This will delay the sending of regular messages between the channel stations. The messages will go straight to their proper destinations, for the first pole away from the transmitting instrument will intercept them. This will delay the sending of regular messages between the channel stations. The messages will go straight to their proper destinations, for the first pole away from the transmitting instrument will intercept them. This will delay the sending of regular messages between the channel stations.

tate the business very much."

A telegraph line will be run from Walaize to Mr. Cross' city office, where Mr. Hitchcock will attend to the graph key, and receive messages from all comers.

### THE STORM ON RAILWAY

Six feet or more had been printed Part of Track Washed Away Near Keaau.

> Wainlun and all the section of the Cuhu Rallway beyond Walanae were cut off from the section on this side by a severe washout which occurred early yesterday morning. The storm which broke ever Honolula during the night was fed all stong the Oahu coast and at Walanac was

the very first authentic message flashed through the air from Molokai to Oahu was a funny one, occasioned by Mr. Hobbs' experiences with Manager Cross' Chinese cook. The message was directed to Mrs. Cross and read:

"To Mrs. Cross and read:

"To Mrs. Cross and read:

"To Mrs. Cross thindy kill Ah Sam for me because he did not pack up that small box nor the tin opener. My cone gratulations on your getting the first Molokai-Kaimuki wireless insessage.

"F. E. HOHBS."

Thus the Molokai shannel, more than fort pailor wide, was bridged in five seconds, for the replies were made within that short space of lipe damager (from was sent) to five early to nothing the first within that short space of lipe damager (from was sent) to five early in the sampler (from was informed as an experiments with the kite, and the Kaimuki slating and preparations early in the space of the results of the space of the track further down the first was first and the latter of the space of the was made and preparations of the presence of the was made and proparations of the presence of the was made and proparations of the presence of the was made and proparations of the presence of the was made and proparations of the presence of the was made and proparations of the presence of the was made and proparations of the presence of the was made and proparations of the presence was at one for the presence of the was made and proparations of the proparation of the proparat

# Her Only Regret

Remedy for All Woman's file.

Nobody who sees Mrs. Mary M. Peabody, of 42 Water Street. Haverhill, Mass., to-day will find it easy to believe that she has passed her 63d year and has endured more suffering than comes to the ordinary lot of women. How she regained health and happiness is best told in her own words. She says:

"Last winter and spring I had the grip which left my system all run down, I also suffered from female weakness and troubles peculiar to women. I had no strength and no ambilion. My friends did not think that I would live and I was afraid that I was going into consumption. "I recalled the benefit that Dr. Williams" Fink Pills for Pale People had done me in a former fliness, and last July I began taking them. They did not disappoint me. I used several boxes of them and from a total wrock I was made a healthy woman. My only regret is that I did not know of Dr. Williams' Pink Pills for Pale People when I had the change of life. I am now enjoying the best of health, cat heartily and sleep soundly—all due to Dr. Williams' Pink Pills for Pale People.

"There are many facts about my case that I do not care to have published but I will gladly answer any woman who cares to write me shout the subject."

Subscribed and sworn to before me this first day of September, 1899.
THOMAS W. QUINDY, Justice of t. e. Peace.

Dr. Williams' Pink Pills for Pale People are an unfailing specific for such diseases as iocomotor ataxis, partial paralysis, St. Vitus' dance, sciatica, neuralita, rheumatism, nervous headache, the after effects of the grip, palpitation of the heart, pale and sallow complexions, and all forms of weakness either in male or female.

We live by our blood, and on it. We thrive or starve, as our blood is rich or poor.

There is nothing else to live | on or by.

When strength is full and spirits high, we are being refreshed, bone muscle and brain, in body and mind, with continual flow of rich blood. This is health.

When weak, in low spirits, no cheer, no spring, when rest is not rest and sleep is not sleep, we are starved; our blood is poor; there is little nutriment in it.

Back of the blood, is food, to keep the blood rich. When it fails, take Scott's emulsion of 8 cod-liver oil. It sets the whole body going again—man woman and child.

We'll send you a little to try, if you like. SCOTT & BOWNE, 400 Pourl street, New York

## MORE WATER FOR

Irrigation in Hawaii.

Agriculture in the Hawaiian Islands appears to be seriously handicapped by the fact that the land must be irrigated, and that water for this purpose ed and filled with pure water. Watermaster Brown hopes to get appropriations from the Legislature next february to put in a supply piping for Kalbii, Punniu and sparsely settled parts of Waikiki. He says the reservoirs are new in good shape. They have been cleaned and filled with pure water. The pumpbut plant at Kalihi which has often been described in the Advertiser is in complete order and will commence regular pumping as soon as the heavy rainfall is ended.

Patent-back ledgers a specialty at the GAZETTE Bindery, von Holt block

### From Massachusetts for Plantations

FROM THE EAST

A meeting of the stockholders of the Ki- NEW BEDFORD, Mass., Nov. 1 .hei Plantation Company has been called Frank Alves of New York, representfor a somewhat unusual purpose, and un- ing George E. Baldwin, who is interested in the Hawaiian Sugar Planta-The Kihel plantation consists of about tion Association, is in the city looking 9,000 acres of cane land, a part of which for white laborers. He arrived here belonged to H. P. Baldwin individually, Sunday, and if what he says is correct and the remainder to him and L. A. he has secured quite a large party in Thurston jointly. The land had never heen used for anything but pasture, until surface water in large quantities was dis
States.

Mr. Alves states that he expects to covered on the adjoining land of the Hawalian Commercial Company, when Bald-win and Thurston began developing water or, their own land, found an abundance

construction of a pumping plantation nearly doubled in price; coal and labor bave also risen greatly, and unavoidable but expensive delays in securing and installing the elaborate pumping plants required, have been suffered. In addition to this a severe financial stringency has prevailed for over a year, making it extremely difficult for many stockholuers to meet assessments. Meanwhile the company instead of erecting its own mill, has made a contract to grind at the Spreckelswille mill. All of these circumstances were unexpected. If they had been foreseen, they doubtless would have affected the valuation of the land in the minds of the essessable stock subscribers. Under these circumstances Mr. Baldwin has thought that it would be fair to the emigrants who are unemployed or who profess to be without work.

Able-bodded men are to be paid \$22 per month for eight months in the year, while employed in the fields, and \$15.50 per day for four months, while in the mills. Women and children over 14 years of age are to be paid from \$10 to \$15 per month. In case of extra work the prospectus makes flattering offers, especially as ten hours is the stipulated day's work. It is also agreed in the contracts which each individual signs that the company shall furnish medical treatment free of expense to the emigrants who are unemployed or who profess to be without work.

Able-bodded men are to be paid \$22 per month for eight months in the year, while employed in the fields, and \$15.50 per day for four months, while in the mills. Women and children over 14 years of age are to be paid from \$10 Milliani street from Queen to Halekau-will at the \$15,000 cash. The stipulated day's work. It is also agreed in the contracts which each individual signs that the company shall furnish medical treatment free of expense to the emigrants who are unexpected. If they had been forest and the number of the number of Public Works Mc-Candless stated yesterday to an Advertiser reporter that the property owners look upon the matter in this light.

Su thought that it would be fair to the as-thought that it would be fair to the as-sersable stockholders to reduce the lands. amount of stock paid for the land to \$1,-

amount of stock paid for the land to \$1,60,000 by surrendering into the treasury stock to the amount of \$500,000. He has offered to contribute the bulk of this him self and L. A. Thurston has agreed to make up the difference to the round \$500,000. This action is irrespective of the action which may be taken by any other helders of paid up stock.

The meeting of stockholders is called to consider this proposition, and, if accepted, to decide whether the surrendered stock shall be held in the treasury, or whether the capital stock shall be reduced \$500,000.

PAHIA WILL STILL

Briefly, the conditions under which these laborers have been secured are given above, and in speaking of his work in this city, Mr. Alves says he has been much more successful than he anticipated. But those who make this venture will find that they are not making the trip for fun, for the company is thus resorting to free transportation, etc., is determined that each signer of a contract shall work for the wage paid him, and according to Mr. Alves it is work in dead earnest.

One interesting fact in connection with this matter is that there are 200 residents of our city who are ready to enter into the arrangements, and among them, Mr. Alves says, are seven. Briefly, the conditions under which

among them, Mr. Alves says, are several families.

### Mamaiian Gazette.

SEMI-WEEKLY. SSUED TUESDAYS and FRIDAYS

WALTER G. SMITH, EDITOR.

PRIDAY . . NOVEMBER 16, 1904.

The Gear combination is in danger of apoplexy over the dire disaster of Democratic and Independent fusion. They were just preparing to get into bed with Hob themselves, and its just too mean for anything for those measely Democrats to come along and speak first. This reminds us of the man who postponed popping the question for a day, because he had a bott on his nose Meanwhile his rival stepped in and secured the lady. Delays are danger ous; but there are others. George Markham and Bipikane had not been gethered in at last accounts.

#### EN IS SCRATCHING JUSTIFIABLE.

The Republican states that Henry Waterhouse was defeated by support-ers of A. V. Gear, who registered a silent protest by voting against him.

The Republican guessed right when it said that the A. V. Gear combination defeated Mr. Waterhouse; but it was not so successful as to the means adopted. The "silent protest" method was all right as far as it went; but the iniquity of Waterhouse's candidacy did not strike the iron into enough souls to secure his defeat, and some of Gear's good gold dollars were required to supplement the "silent protest" pro-

we had understood that the one deadly sin in party politics was to bolt or scratch the party ticket, either in

whole or in part. Mr. Gear is one of the strict constructionists upon the party fealty question, and it would be of interest to the new and uninitiated American citisens of Hawaii to hear from the local fountains of political wisdom what circumstances, conditions and principles warrant bolting the party ticket by scratching one of the party nominees and what, if any, other facts, warrant a member of the party in spending money to defeat a party nominee.

If Mr. Gear is too busy to devote any time to the question, perhaps Judge Humphreys can spare enough time from the judicial duties of fining jurymen and clerks and proving in his paper that the judges of the Supreme Court ought to be sent to jall, to explain the mystery.

This community is young and unso phisticated, and needs to be educated in the fine points of American politics by those who know all about it. When man may honorably and properly bolt his party ticket or when he may scratch it, and when he may not, are practical questions which will arise at every election, and now that there are concrete object lessons with which to illustrate the subject, is the time when wisdom will sink the deepest.

We all know that scratching and bolting are heinous sins when committed by a mugwump; now let us know when and why they become a virtue when committed by a thoroughbred Republican.

#### JUDGE HA RTWELL'S STATEMENT.

The miserable slander that President Dole sent Judge Hartwell to Washing ton last winter to lobby for his appointment as governor, has been believed by no one, and the only effect of its continuous reiteration by the little clique which banked on Sewall's appointment, has been to demonstrate to the community their unfitness to control even a econd rate afternoon paper, much les a government, by showing them to be narrow-minded and desperately un-

If ever there was an instance in which the office sought the man, and in which the man refused to lift a finger to forward his own candidacy, that instance was the appointment of Sanford R Dole as Governor of Hawaii. It is beyond comprehension, how men with a full knowledge of Mr. Dole's dignified. unselfish character, and of his high ideals of the duties of a public official. can find it in their hearts to malign and hound him, month in and month

It is well, however, for historical purposes, to have Judge Hartwell's statement, published elsewhere, on record,

The absolute necessity of having some representative of Hawaii at Washington, when the fundamental act which was to fix Hawaii's status for years to come was under consideration, was so manifest that it would seem as though the plain statement of the case were a sufficient explanation of why Mr. Hartwell was sent to Washington. There will never again be a time when such momentous questions, of such vital interest to Hawaii, will be before Congress. Would it not have been supreme folly, and would not the Government have been plainly dereliet in its duty, if the matter had been left to drift, without some one to inform, explain and suggest? But noall this had to be ignored—and a miserable pretense concacted that this was private lobbying expedition. Bah! It humiliating to think that living. nineteenth century Americans can be so narrow-minded and warped

And these men are the ones who are new proclaiming themselves as the would-be re-organizers and saviors of the Republican party!

Hawaii is one of a few places in the world inhabited by white people that does not know or is not able to find out the results of the Presidential elec-Every part of the United States. including the West and East Indian possessions, barring only Hawall and Tutuila, have been in touch with the news for more than a work. We shall have to wait until the 17th for data shout the returns of the 6th. It is 64 such times that Hawaii realises, is most strenuous fashion, the need of a suble to the Coast.

#### "FIRING THE MISSIONARIES."

The auti-missionary program which Mr. Farrington was easily led in divuige has an ancient and finally smell. For over seventy-five years straingers have tested up on this leach with the threat, as Parrington puts it, to five the men of connectors and responsibility whom people without such hans of character are more upt in flout as "missionaries," Unifortary these distinguish have failed and next of them have had an unhappy eading for

time of the pioneers in the auth-migatonary element, a man named Charl m, was a consult here in 1921-25. He took offence at the new laws to rectric transcenness and the social will and put himself at the head of & faction both, for a time, caused the missionaries and the native government which they maintained, some announce and embarranement. In the resulting entroversy, however, decent citizens easily held their ground. Chapiton was hally brought to terms as a disturber of the peace by the captain of American man-of-war who, is a subsequent report of his inquiry about the missionaries wrote that "not one jot or fittle, not one lota, derogatory to their characters as men or as ministers of the gospel of the strictest order, could be made to appear against the missionaries by the united efforts of all who

onspired against them." In 1853 mailhinis from California began a campaign against the so-called missionary" cabinet of that year, holding it responsible for the spread of the smallpex, but they achieved nothing except the supersession of one "mission ary" minister whom they did not like by another towards whom they felt no more favorably, and who, with his colleagues, kept the government running

in the safe old way. The reign of Kalakana witnessed the intrigues of one great radical polltician and several small ones to overthrow the influence of the conservative white party in the affairs of Hawaii-Walter Murray Gibson, Celso Caesar Moreno and Volney and Clarence Ashford. Gibson's career was remarkable and, for a time, it threatened to dominate the politics of these Islands during the lifetime of the man. Gibson believed, as Moreno did, that the "missien-aries" were men to endure rather than to fight. How gravely he mistook their character the events of ten or more years ago attest. The ex-Mormon leader and the evil genius of Kalaka un went easily into power and grew bolder with practice, finally developing a policy of extravagance and fantastic adventure which strained the patience of responsible men to the breaking point. The "missionaries" assembled, one blow was struck and the Gibsonian idol came down like the image with the brazen cheek and the feet of clay. Moreno's reign lasted but three days and it was brought to grief under a dangling noose. The Ashfords then tried their hands but the only imprint they ever made on the history of Hawaii was caused by their downfall.

Viewing the fate of the politicians and factions that have in turn butted their heads against the rock of Hawaiian conservatism we can afford to smile at the threats of the little flock of job-chasers whose tale-bearer and handy chiffonier is the editor of the Bulletin. The comic aspect of the thing is increased by the fact that, but a few short weeks ago, they were all on their knees to the "missionaries" begging for the money to run a campaign and agreeing to throw a Jonah overboard if they could get it. went around with cap in hand pleading for the money with which he hoped to bid for personal favor at Washington-got it and then left the party of which he is supposed to be the official head to its fate. It was "Good Tige, Good Tige" to the "missionary" then: it is "fire the missionary," now that the money has been spent and the job-chasers are unhappy.

It will be a rare show when these peanut politicians bring their popguns and toy swords to the firing line and attempt to do what Walter Murray Gibson with his massed artillery failed to achieve. It will be a joke to see them range up to be counted, as they were once counted on an uproarious political evening in the Drill Shed. And it will be funnier yet when the nondescript collection of "firers" hoist the white flag as usual and wig-wag this message: "If you'll let us have a campaign fund we'll knife any one on our side you don't like."

#### "KNIFING" THE PARTY.

The following appeared in yesterday's Republican: Knowing that the cause of the Republican defeat was mainly due to its actions and those it represents, the Advertiser now boldly lies about it by declaring, "The Republican says that the Republicans were defeated because the Gear combination bolted and refused to vote the straight ticket." The Republican never said anything of the kind and the Advertiser knows it, and furthermore the Advertiser knew it was stating a distinct lie when it printed the words quoted

Well, neighbor, let's see about this: On November 8th, the morning after election, the "Republican" editorially assigned, among other causes of the partial Republican defeat, the reason that the missionaries had dictated the nominations. "Such action could have but one result. It alienated nearly all of the best and most effective party workers. They were either coldly indifferent or openly hostile to the ticket nominated with one or two exceptions."

On November 9th it said: "The defeat of Mr. Henry Waterhouse \* \* \* \* is but natural when the political considerations are taken into account. The Republicans of the Fourth Representative District, in the party primaries last September, declared against the nomination of Mr. Waterhouse for senator. A. V. Gear was the choice of the Republicans of the Fourth District as one of the Republican candidates for the senate . . But of course this made no difference to the party wreckers and they proposed to thrust his (Waterhouse) candidacy down the throats of the voters regardless of whether they wanted it or not. Now note the result. Mr. Waterhouse is the worst beaten man on the ticket. \* \* \* \* The resentment against the methods with which Mr. Waterhouse's nomination was secured, told at the polls. The silent opposition to him was not so much an opposition to Mr. Waterhouse personally as to the infamous methods which forced his name upon the ticket." . .

Now for a bit of analysis; First we are told that "all of the best and most effective party workers" were "alienated," and "coldly indifferent" or "openly hostile" to the toket nominated, "with one or two exceptions."

Who were these "alienated," "indifferent" and "openly hostile" workers? Certainly not the "missionaries," for we are told that they had dictated the ticket. Certainly not the supporters of Waterhouse, for the indifference and other kinds of enumerated hostility were directed against him. By process of elimination, who is there left but the supporters of A. V. Gear for we are told that he was their first and only love, and his failure to get the nomination caused "silent opposition," "resentment," "alienation," "cold indifference," open hostility," besides other vaguely hinted at but uncatalogued evidences of mental pain usually conducive to what the "regular" dyed in the wool politician calls "bulfing" a candidate or a party.

The plain English of both editorials is that the Gear supporters defeated Waterhouse. Moreover it is the truth; but the fat-witted Republican was so anxious to damn the "missionaries" that it did not at first perceive that it was giving Gear's treachery away. Now that it realizes its blunder it is trying to bluff out of it. It will be in order now for the Humphreys' end of the would-be machine to deny that Humphreys, the apostle of straight party voting, scratched the Republican ticket himself.

We shall also expect to hear that while the Gear end of the combination was spending money to defeat Waterhouse, it was being done solely in the interest of harmony and party success. Or perhaps there is a more charitable explanation. Doubtless when Judge Humphreys' paper published a double column article with burid headlines, violently attacking the Republican Territorial administration, on the day before election, it was done in the belief that the paper's character for faking was so well established that no one would believe its fantastic yarn, but would, on the contrary, draw the conclusion that the administration was all right.

Again, when, after Waterhouse was nominated. Gear was hiring men to carry petitions around asking that Waterhouse be put off the ticket and Genr's name substituted therefor, he was doing so in the consciousness and belief that enthusiasm for Waterhouse would be stimulated, by such course, and to demonstrate thereby that he, Gear, was consumed by devotion to the party interests to such an extent that he was willing to pay for the priviof sacrificing himself on the party altar.

Both of these explanations are plausible, and the Advertiser is willing to publish, free of charge, apologies from both Mr. Humphreys and Mr. Gear, to their party associates, or having "knifed" the party organization in its very first campaign:

them a free sea much longer all Chic like a stream of sewage through a much ness parts landing places and stream of sewage through a much all the accuracy of Mr. Quinn's report will hardly be challenged by anytholy under fareign jurisdiction. under fereign jurisdiction.

The removed fusion of the Ind-pendoth and the Diminerate is a sound move for both partten, from their bury standpoint and will in the and he for the Benefit of the Territory as a whole

It is a good move for the Democrat coause up to date, their party dor tener have taken such a slight hold upon Hawaiian voters that at the late justion their entire ticket was piled up a heap outside of the walls, leaving one to tell the tate. It is all right to do the martyr act and die in the wilderness for the sake of glory, if you must, but there is much more profit and satisfaction in electing a man and apturing an office once in a while,

It is sound politics for the Independnts for several reasons. In the first place there is little room in American olities for third parties. Third parties is a rule represent the fad of a few, or ome principle which is being pressed. to the front prematurely. The Inde-pendent party in Hawaii represents seither fad nor principle. It is a temerary aggregation, brought together by a temporary issue—that of race prejudice—based on false premises, and ertificially stimulated by a "whoop-herup" campaign. Denouncing all haoles as snakes and cockroaches, and drawing a color line against the whites has been successful at this first campaign been successful at this first campaign.
by a marrow majority; but such thin FACTS ABOUT material as this is not enough to form a foundation for a permanent party. and it will scarcely last through to the next election. Hate and revenge are not lasting qualities among Hawaiian voters, and unless the Independents amalgamate with some other party or adopt some principles other than pawing and mumbling over the bones of dead issues, they will die of the dry rot.

The amalgamation will be of advanage to the Republican party, because it will hasten as well as exemplify the removal from local politics of the race place. ssue, an issue which is directed more against the Republican than against the Democratic party. It will be most advantageous to the

the field of rubbish and bringing directly, face to face, the principles of the two parties. If the Republican organization remains in the hands of conservative men, seeking the general good, and not trying to establish a clique to dictate to the remainder of the party, it need have little to fear in a free field and a fair contest with the doctrines of Democracy. The fortunes and interests of Hawali are so bound up with those of the Republican party, that the party can look forward with confidence to the day when election will turn on reason and principles of government and not on prejudice and

fusion of the Democrats and the Independents take place

#### A PROBLEM FOR ANTI-MISSION-ARIES.

It may be of interest to the missionary haters to figure out how it happens that the only Republican Senator from Hawaii, John D. Paris, is a sionary's son; that the only Republican Senator from Maui, H. P. Baldwin, is of the same accursed breed; that the only Republican Representative from Maui, C. H. Dickey is a missionary's son-in-law; that one of the two white Republican Senators elected on Oahu, Geo. R. Carter, is a missionary's grandson, and one of the most prominent of the anti-machine men; and that the only white man elected on Kauai, S. W. Wilcox, is the son of a missionary.

Only one man connected with a mis sion family, who was a candidate for election, Henry Waterhouse, was de-

He was a candidate for Senator on Republican ticket on Oahu, and rethe Republican ticket on Oahu, and received 1671 votes. This vote is 362 higher than the highest vote secured by the Democrats, viz.: 1309 for J. O. Carter. It is 1997 votes more than were received by Lilikalani, the tail-ender The land appears to be well located for Juming the caps to the mill. eceived by Lillkalani, the tail-ender of the Democratic ticket. It is only 322 less than the highest vote for the Independent ticket, 1993 for Kalauokalani, and is 124 greater than the lowest on

the Independent Senatorial ticket. It does not appear, after all, that the native Hawalian has yet been fully educated up to his privileges; for, as ative Hawaiian voters are in an overwhelming majority in every one of these districts, it is evident that the poor deluded kanakas cast a heavy vote for the blankety-blank missionaries. Their dear friends Humphreys Gear and Company should see to this

#### LIGHT IN DARK PLACES.

It is no pleasure to the Advertiser go into the scandals of the late Repu ican campaign but in view of a v palpable attempt to turn the blame t the political defeat of Henry Water house from the men who have earned it, a decent respect for the truth of local history impels us to print some inside data which reveals one at least of these vaunting party patriots in his true light.

In a signed letter A. V. Gear says he did not instigate the petition which, in the midst of the canvass, organized a bolt from Waterhouse. Eleven men have signed statements which show that Mr. Gear not only instigated this disloyal petition but paid for having it carried about. In other words Mr. Gears flatly contradicted by nearly a dozen witnesses and the hollowness of his oasts of party fealty shown. Further vidence, were it necessary, could be had from the returns of the precincts where the Gear element is strongest and from the admissions of the machine press soon after election. There are also more paid petition-carriers to hear from.

It is easy for Mr. Parrington to delly transporting them from here to the end treasure is atoleit in quite the old Mr. Quinn's statement that he said the distinct deput, the way ought to be "smashbackler way. It would pay the missionaries were to be "fired." but as

# **OLAA PLANTATION**

The following is a report by W. G. Tay-

or on Olan Plantation; At the request of acquaintances and

friends, who desire my opinion of the present status and future prospects of the plantation of the Olaa Sugar Company. I Makena, Kawaihae, Mahlakona, Lau-subscribe my name to the following, an account of a careful inspection of the Returning, will sail from Hilo on Friaccount of a careful inspection of the

LAND.-The company owns in fee simple 15,000 acres of first-class sugar lands, and in addition 4,000 acres equally good, under a forty-years lease; in all about Lahaina, Kahului, Nahiku, Hana, Ha-Republican party, however, by clearing 19,000 acres. In addition to this there are several thousand acres, owned by others, touches at above named ports, arriving at Honolulu Sunday mornings. tributary to the company's flumes mill. About 1,000 acres of this land planted and under contract to the co-pany, will be ground at their mill.

ROADS.—There are forty miles of good cads traversing the plantation. This inludes the Government road and four teen miles of equally good roads con-structed by the company, a boon alike to the sightseer and to those who carry on

present crop, which will be ground soon as the mill is completed, compt 4,023 acres. In addition to this there 1,000 acres of cane on outside lat In the interest of Hawaii, let the which will also be handled at the com-

any's mill.

LAND UNDER PREPARATION. About 4,000 acres have been fully cleared. and several hundred acres plowed, for the succeeding crop. This, added to the rettoons from the first crop, and to a much larger area of plant cane on outside lands, will make a very large crop for the season following. WATER,—An abundant supply for flum-

per twenty-four hours during the dryest season for a period of twenty years.

FLUMES.—A system of flumes will be ready by the time the mill is completed, and will comprise in all thirteen miles of water flume and thirty-six miles of plan. ing the cane to the mill has been develtation flumes

SUGAR WORKS,-A large mill is now being built, with all modern appliances, and of sufficient capacity for all future eady to harvest.

BUILDINGS.-The houses, stables and other buildings on the plantation are improvements of the first order. A new and commodious office is under way, and will solely at the risk of the shipper, be completed in a few weeks. It is located near the mill and railroad, and supplied with a fire-proof vault, suitable rooms for the manager, engineers and

fluming the cane to the mill.

fluming the cane to the mill.

Irrigation is unnecessary here, as the rainfall is ample. The stand of cane is good, and the growth for the time planted from annually:

Is phenomenal.

The work generally that has been successfully completed since the inception of the plantation, during a period of fourteen or fifteen months, and during the labor troubles, must be successfully complete the control of the control bor troubles, must be seen to be fully appreciated, and is a marvel of well-directed energy and executive ability. Taking into consideration the large area of good canculty; cane land, and the economic features of Fifty control of the place, it is apparent that Olaa will be one of the largest, if not in the van, of the large plantations of the Islands, not only in output but in profitable returns. A visit to this property will well repay se interested in this industry W. G. TAYLOR.

Determination of Validity of the Election.

### OPINION OF E. P. DOLE

Attorney General's Reply to Lawyers Presenting Loebenstein's

At the Governor's council yesterday the protest of A. R. Loebenstein against the election of Nich. Russell of Hawaii the election of Nich. Russell of Hawaii "Neither in England nor in the Unite to the Legislature was discussed. At- States are there many offices of the legis Congress. Attorney General Dole said

correct, and when the rule was held specified in the constitution of enterines. In they were constituted or for did not wish to be reported as in presentation of the office. A majority of the contract of th

Callaghan: 8 111, 128-125.)
Machem's Treatise on the Law or Public Coffices and efficiers, to which you have called my attention as an authority that an information in the inture of qui warrante may be maintained before the decident takes possession of the office deciares: (Section 42.) "It is indispensable to the jurisdiction in quo warranto that he respondents should be shown to have been in the actual possession and user of the office. It is not enough that he should claim the office, but an actual user much be shown."

be shown."

1. The constitution of the United States in my opinion, deprives the local ports of jurisdiction in the premises, and makes the valuity of the congressional electrical a question with which the Attorney-time end of the Territory has nothing to do Article 1, Section 5 of the Constitution declares that: "Each house shall be the judge of the elections, raturns and qualifications of its own members."

Neither in England age in the United

torney General Dole reported that Loc- lative character-which can be said to l benstein's lawyers had lodged the protest with him and asked his endorse-ment thereon, the ground taken being that the election was without authority of law, the Legislature having yet to provide for the election of Delegate to Congress. Attorney General Dole said Congress. Attorney General Dole said that he had replied to the lawyers that he had no official concern in the matter. At length his reply was as follows:

Territory of Hawaii,
Office of the Attorney-General.
Honolulu, H. I., Nov. 14th, 1900.

I beg to acknowledge receipt of your favor of the 12th inst. saying, that as attorneys for Mr. A. B. Loelenstein you wish to test the question whether, under same power over the election of members. wish to test the question whether, under same power over the election of members existing laws, a delegate to Congress can as the houses of Congress. This jurisdiction of the legally elected in this Territory; and tion over the election of members excludes asking "permission to file, on behalf of the jurisdiction of the courts, although the Attorney-General, a proceeding in the the canvassers may be compelled by manistrate of quo warranto to test the right damus to conduct the canvass, declaring of one R. W. Wilcox to obtain a certificate of election to the said Congress, glving the person holding a certificate the prima facie right to the seat, and com-

of one R. W. Wilcox to obtain a certificate of election to the said Congress, and try his title to the said office."

1. It goes without saying, that in a matter of this kind, official duty must be paramount to political and personal considerations. The Attorney-General, acting as representative of a government, should be equally fair to men of all parties. An information in the nature of quo warranto being brought in the name of the Attorney-General is, in effect, an allegation on the part of the government that the person claiming the office is not entitled to it. It is an attempt to prevent him from holding it. The papers you have drawn for me to endorse are entitled Tertitory of Hawail, on the complaint of A. B. Loebenstein, vs. Robert W. Wilcox, and the complaint begins. "The Territory of Hawail, on the complaint of A. B. Loebenstein, vs. Robert W. Wilcox, and the complaint begins. "The Territory of Hawail, on the complaint of A. B. Loebenstein, vs. Robert W. Wilcox, and the complaint begins. "The Territory of Hawail, on the complaint of A. B. Loebenstein, vs. Robert W. Wilcox, and the complaint begins. "The Territory of Hawail, on the complaint of A. B. Loebenstein, vs. Robert W. Wilcox, and the complaint begins. "The Territory such contests shall be conducted. The courts of common pleas in the several counties are especially designated as the fauthority' before which the election of sheriffs, and the various other county of sterification to hear and determine any conplainant, can it repudiate its own nets consistently with what plain people call a square deal?

2. If an information in the nature of quo warranto is the proper course in this own rest in regard to the election of governor, leutenant-covernor, judge of this court, or of the court of common pleas, and other state officers. This legislation being out merely permitted, but enloined by the cause, the court has discretion to allow it the district of the state of th

### GEAR'S DISLOYAL WORK IN THE POLITICAL CAMPAIGN

The following extract is from a letter fully printed elsewhere, in which A. V. Gear disclaims responsibility for the petition that was circulated in his favor during the late political campaign and against Henry Waterhouse, a regular Republican nominee for Senator:

Your action relieves me from any responsibility for any of the universally recognized weak points in the Republican Senatorial ticket. My action should convince you of the utter falsity of the impression emanating from members of the Executive Committee that I was personally instrumental in instigating the petition to which I have drawn your attention. From A. V. Gear's letter to Chairman Kennedy of the Republican Territorial Committee.

Now compare Mr. Gear's statement with these

This is to certify that during the progress of the political campaign in Honolulu, at the request of a friend of mine I called upon A. 7. Gear, at his office with Gear, Lansing & Co., and he asked me to circulate a petition which read as follows:

"We, the undersigned qualified voters of the Island of Oahu, do hereby request and urge that the name of Hon. A. V. Gear be placed on the ticket as candidate for Senator of the Third Senatorial District of the Territory of Hawaii, in place of - - - -

"Should the Hon. A. V. Gear consent to our nomination and if his name is placed on the ticket, we will use our best efforts to secure his election."

Mr. Gear told me that if I would successfully circulate this petition and bring it back to him, I would be paid for so doing. 1 thereupon asked Mr. Gear what name was to be placed in the blank space in the petition, and he told me that the man in whose place he wished to run as candidate was Henry Waterhomse. I thereupon told him that as Henry Waterhouse was a friend of mine I would not consent to it.

W. H. KAHUMOKU, Halawa Ewa, H. T., November 8, 1900.

We, the undersigned, do hereby certify that Hawaii on special business for the cenduring the political campaign in Honolulu, at the request of different friends, we called upon A. V. Gear and were asked by him to circulate petitions replacing the name of Henry Waterhouse on the ticket as candidate for Senator of the Third Senatorial District of the Island of Hawaii, with the name of A. V. Gear. The petition also stated a determination for our best efforts to secure Mr. Gear's election.

After keeping these petitions for a short time and getting a few names signed thereto,

We know you will be greatly inter-ested in this testimonial. It tells you

how you can make your sickly child robust and bearty.

Mrs. A. Lawrence, of Bowden, South

Australia, sends us this picture of her child, with the following letter:

### AYER'S Sarsaparilla

I did so, and you would have been astonished to notice-the prompt change. All my friends say it was simply wonderful. Only four bottles made my weak and sickly child strong and healthy. I want to urge all mothers who have delicate children to try this tonic."

# Weak Children OCTOBER

### **Beat All Known Records** For Moisture.

Islands Rainfall Has Been Unprecedented as the Figures Show.

October was a record month for atmospheric disturbances. Professor Curtis J. Lyons, Territorial Meteorologist, gives the following figures of the mouth's weather.

Temperature mean for the month, 76.9 F., normal, 76.3, average dally maximum, \$2.1; average daily minimum, 71.8; average daily range, 10.6; greatest daily range, 19 degrees; least daily range, 6 degrees; highest temperature, \$7; lowest, 65.

Barometer average, 29,560; normal, 29,966 (corrected for gravity by -.06); highest, 20.11; lowest, 29.78; greatest tuenty-four hour change, .08. The house came a day or two before the torreptial rains of the 16th; the storm of the ten days following was a high baremeter storm; probably the S. W. side of a large cyclonic disturbance.

Relative humidity, 71.0; normal, 72.5; mean dew-point, 66.9; normal, 66.2; absolute moisture, 7.22 grains per cubic

foot; normal, 7.06. Rainfall, 6.88 inches; normal, 2.46; rain record days, 23; normal, 19; greatest rainfall in one day, 2.68; at Luaka-ha, monthly rainfall, 21.21; in one day (16th), 8.15; Kapiolani Park, 2.12 for the month. The artesian well level rose from 32.85 to 33.19 feet above mean sea level.

Approximate percentages of district rainfall as compared with normal: Hilo, 180 per cent; Hamakua, 125 to 220; Kobala, 170; Waimea, 150; Kona, 200; Kau, 300; Puna, 200; Maul, 150 to 200; Oahu, 150 to 400; Kauai, 150 to 250.

Average temperatures: Pepeekeo, mea, Hawaii, 2730 elevation, 77.3 and 66.6; Kohala, 585 elevation, 84.1 and 71.1; Kulaokahua, (W. R. Castle), 60 feet elevation, highest, 87; lowest, 66; average, 78.3; Kilauca, Kauni, 325 feet rees for the Agricultural bureau, will elevation, average maximum, 80.9; se sent to Eben P. Low, by Commis- average minimum, 71.7.

Earthquakes noted: Hilo, 10th, 11 p. m.; Hilo and Pepeekeo, 12th, 3:45 a. m.

### WHY THE CABLE 1S NOT BEGUN

Mystery Surrounding Dealings in Connection With it

Deepens.

with the proposed Pacific Cable service seems to be deepening, notwithstanding all the attempts to unravel it. The last reports of the Board, which were to be kept a secret, has in part leaked out, says the Michourne Age, and the most important point is the conclusion arrived at the effect that unless the 'joint purse' system was adopted so as to include the Eastern Extension Company's business the cable would be a financial failure. This, taken in con-nection with the statement made in writing by Lord Selborne on the subject on behalf of Mr. Chamberlain, in July, 1899, ir of importance.

In clause 20 of the despatch referred Indicating the intention of the British Government in connecting with the proposed Pacific cable, the fellowing There is no intention of working the cable on other than commercial line and at remunerative

To ensure the latter, it is now known the "loint purse" is a necessity, and hence, unless the Eustern Extension Company will join, the prospects of obtaining an enrity completion of the Pacific cable and a consequent reduction of rates can only be regarded as remote. As a fact, it is well known that the Eastern Cor cary has finally de-cided to have authing to do with the "point rurse" proposal, though doubt-less, private regulations are still being attempted to bring this about

their predecessors.

These new vessels are considerably "Executive Office, State of Texas, Austin, October 13, 1900.

"Gentlemen—I am directed by the Governor to acknowledge the receipt of your telegram, advising him of the transmission to him of three thousand three hundred dollars, being a contribution of the merchants of Honolulu for the relief of the storm sufferers on the Texas coast, and to express his sincere thanks for this generous donation, and to assure you that the beneficiaries of the same will ever grateficiaries of the same wil larger than the clipper ships with

masts. She was 273 feet in length, 42 feet beam, and 26 feet of hold. She was of somewhat over 2,000 tons burden and cost \$150,000. The seaworthiness of the iron sailing ship was early proved by the behavior of the "Starbuck" in a terrific gale around the Falkland Isl-The mystery which is permitted to broke nor stranded, and the general ef-surround all the dealings in connection ficiency of this class of craft is attested by the fact that the vessel in question

is to-day trading around the world.

As to whether the lately renewed activity in the construction of sailing vessels is to be permanent or temporary there is a wide divergence of opinon, even among men in the shipping world, and consequently it is equally uncertain whether the steady decrease in the sail tonnage owned in the United States can be stemmed.

SHIP BUILDING IN MAINE.

The full meaning of the discovery of new usefulness for salling vessels is inno wise better attested than by a glance at the condition of the ship-building industry on the coust of Maine industry. Shippards which had been closed for years have been re-opened

quite as successful and profitable as f ter of this century, and since the launching of the brig "Diana" in 1823 more than a hundred vessels have been turned out. About six years ago the Sewall yard was transformed to plant for building steel ships, and the "Dirigo," the first vessel of this class which they completed, bore the tinction of being the first steel sailing vessel ever built in America. The steel for this initial vessel was imported from Glasgow, but the material for the later vessels has been secured in America. The "Dirigo" has already made some remarkably speedy voyages.

The steel sailing ships "Erskine M.

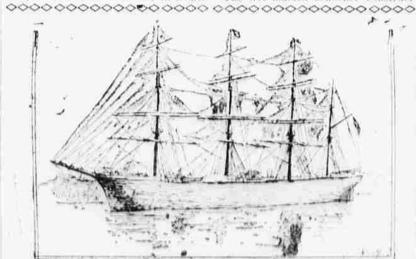

Phelps," "Arthur Sewall," and "Edward Sewall," which followed the "Dirigo" from the yard of Sewall & Com-Correspondence between High Sheriff the shipbullders, the "Red Jacket," which sailed from New York to Melbourne, 12,720 miles, in 6932 days, or the congestion of traffic on certain streets leading to the waterfront. Correspondence between the chamber and various railway systems of the Saile of that one-time pride of the shipbullders, the "Red Jacket," which sailed from New York to Melbourne, 12,720 miles, in 6932 days, or the "Sovereign of the Seas," which coverights to the waterfront. Correspondence between the chamber and various railway systems.

The wooden sailing craft have in their recent increases in size kept pac with the development which has charcterized their steel prototypes. When t was proposed to build a five-masted chooner as a successor to the thre and four-masted craft which had been in service for many years previous to 1898, the suggestion was laughed at in many quarters. Nevertheless five-masted vessels were constructed and proved a success. The same prophecies of failure greeted the plan, later, to construct a six-masted schooner, but the fall of 1999 will see the entrance into commission of the first latter class of carrier.

The ploneer five-masted schooner was the Nathaniel T. Palmer. She is 285 feet in length, 44 feet beam and 22 feet deep, and spreads 10,000 yards of canvas. A vessel which, when she went into commission early in 1899, was the largest fore and aft schooner and four-masted craft which had bee

FIRST AMERICAN IRON SHIP.

It must not be supposed that the sailing vessel of steel construction, or rather metal construction, is an absolute innovation. Early in 1883 there was iaunched at the shippard of John Roach, at Chester, Pa., the "Tillie E. Starbuck," a full rigged iron ship, the first metal sailing ship built in the "Starbuck" was also the first sailing vessel in the world to carry metal masts. She was 273 feet in length, 42

VILLAGE BLACKSMITH SAVEL HIS LITTLE SON'S LIFE. .

Mr. H. H. Black, the well known village blacksmith at Grahamsville, Sullivan county, N. Y. says: "Our little son, five years old, has always been subject to croup, and so bad have the attacks been that we have feared many times that he would die. We have had the doctor, and used many medicines, but Chamberlain's Cough Remedy is now our sole reliance. It seems to dissolve the tough mucus and by giving frequent doses when the croupy symptoms appear we have found that the dreaded croup is cured before it gets settled." There is no danger in giving this remedy, for it contains no opium or other injurious drug, and may be given as confidently to a babe as to an adult. For sale by all dealers and druggists, Benson, all dealers and druggists. Be Smith & Co., Ltd., agents, H. T.

What Philadelphian Says About Islands.

### PRAISESOURINSTITUTIONS

Climate Described as Delightful and the Push of the People Noted.

The following is from the Philadelphia Record and is written by the paper's special correspondent who was here until recently;

HONOLULU, Oct. 11 .- There is no municipal government in Honolulu and never has been," said Governor Sanford B. Dole, "but in all probability municipal corporations will be granted in the near future by the Territorial Legislature. The citizens of Honolulu are already considering this matter, and studying the question-discussing it publicly, and seeking to form public opinion in the direction of this possible municipal system. This system will be so framed that it will provide for not only the cities, but the towns and vitlages as well.

UP-TO-DATE IN MANY THINGS.

"While we have not the municipal form of government we have the conditions and many of the modern equipments-indeed, in many things we are right up to date. During the last two years we have expended about \$20,000 on public grounds, most of which has been within the capital city; over \$62,-000 for a well-equipped fire department \$81,000 for maintaining water works systems in Honolulu, Wailuku, Kahului, Hilo, Laupahoehoe, and Koloa; more than \$611,000 for roads, bridges and public works in general; and about \$20,000 for maintaining two electric light plants.

Our public health department is one of the best equipped and administered in the world. This, as you probably are aware, is due to the large number of lepers which we have to care for. Just for one item of segregation, support and treatment of lepers there was appropriated \$180,000 for the last two years, while, for the maintenance of the balance of the department, more than \$300,000 more was provided.

EDUCATION'S GREAT WORK.

"One of the prides of our island home is our public school system. The sum of \$620,000 was appropriated for the department of public instruction for the past two years. Education has wrought a great work among these simple isl-and people. One of the early missionaries was instrumental in starting a public school which was the beginning of our present perfected system.

When the Sandwich Islands Mission commenced its operation in 1820, nothing like education was known in the islands. The vernacular tongue had not even been reduced to a written language. At the present time it is rare to find a native Hawaiian who cannot read and write his native langunge. And there is a rapid change going on, but without retrogression. It consists of a rapid advance towards an equally universal command of English by the native people.

'Fully 20,000 pupils were enrolled in the public remoda of the Islands for the last fiscal or school year, of which about 7000 were native Hawalians, 4000 Portuguese, 2000 part Hawalians and the balance was made up of Chinese, Japanese, Americans, Germans, British, Scandinavian, and a few other foreigners. The average annual salaries

#### all teachers, \$631.80. COMPULSORY EDUCATION.

"Education is compulsory as to schools in general, and, with one or two of remembered colors. exceptions, is free as to public schools. "From 1884 to 1889," said Mr. Bennett, exceptions, is free as to public schools. The law requires that every child from 5 to 15 years of age, inclusive, shall atevery district, to enforce the computsory attendance clause. When schools were first started as State institutions, they were taught in the Hawalian language. English was introduced as the foreign population increased. When, in the course of time, the better classes of Hawaiians manifested a desire for English instruction, English schools were instituted in localities upon the mest of a certain number of the r. dents. Ald from the public treasury to sectarian schools is pro-Select schools, where tuition fees are charged, are permitted in the State system, and, as a matter of fact, exist in a group centering in the Honotulu High School.

HONOLULU A JOY OF THE EARTH. "Honolulu is not only the capital, but the commercial metropolis of Hawall. It is 'beautiful for situation,' and, ever since overtaken by civilization has been steadily advancing toward being 'the joy of the whole earth.' A large portion of the area within the city limits is on rather low land, and includes the business quarter and a can be trusted to re-considerable portion of the residential is soud in his line.

There are one hundred and fiftynthe index of street within the city life its, which are under the superintend-The effects are of an average width of fifty feet, and for the most part, made of inscalain or telford. It is enough to any old trouble shown itself.

Say, with regard to the character of the elecate that I think of Mother School's Sylling of them whereupon bloyels riding is at Berg Street. Paddington. Sydney.

But agreeable.

THE PROLLEY IS COMING

Through street construction rately kept pace with expil exponents of the older to the past for so twelve years. In the re parrow, and in phone evoked, but In the newer parts they are laid off mostly at right angles, exceptions being in hilly sections. We have find horse are for over ten years, which have bust been superseded by the electric

rolley.

There are several public squares, the principal ones being Themselvance being themselvance in the British mays, who restored the Linahian flag to that spot in 1841. Evera square, after the late Queen Endaged Markill regrently ground, which a reservation for fold sports and few other squares, which are merely are spots. Concerts are given to a real public square of the concerts are given to a real public square. ere spots. Concerts are given togo

IMPETUS TO HOME BUILDINGS.

Within the short range of memori-ne residence quarters of Honolu-ers confined almost exclusively to the were confined almost exclusively to the lower portions of the city. Latterly the lower portions and the better class of the Hawalians have been pushing their way back to the slopes of Punchbors Eight or ten years ago two things of curred to give an immense impetuation building by landords. One was the laying out of building lots on Government lands in the environs and sealing them by public auction. The other thing was the starting of a building had loan association by a number of enterprising young mon, most of them living upon moderate salaries and

enterprising young mon, most of them living upon moderate salaries and week's or even day's wages.

"These two factors have completely revolutionized the aspect of Henolulu as viewed from both mountain and seas. They have also upset the proportion between landlords and tenants. It might be safe to say that there are a hundred and fifty independent homes owhers in Honolulu today where there owhers in Honolulu today where there were not more than ton a dozen vears. ere not more than ten a dozen years

GREAT PUBLIC BUILDINGS.

"The public buildings are as numerous as will be found in any city of its size in the States, the most imposing of which is the Executive building completed in 1883 at an expense of \$2340,000. We have hospitals, public libraries, churches, an opera house, Massenic temple, besides the other public buildings so common to the modern that after the news of the results of the President of the public buildings so common to the modern that after the news is received stocks.

city.

"Next in importance to the capital is the town of Hilo, commonly called 'the ambitious city.' It has elements that assure its increasing greatness in the future. It has a population of about 12,000. Its streets are lighted by electricity. It has a library and reading room, a volunteer fire department paid police force, and efficient water works system, newspapers, fraternal societies, improvements associations and a telephone exchange, having connection with all parts of the Island.

The brokers have big orders for stocks. The only stock that has not had any remarkable jump is Ookala which is still strong at 15 bid.

Among the stocks to take the rise in the market are Ewa from 27 to sales at 27%, and now held at 28%; Oahu from 147½ to sales at 157½, to sales at 150; Waislua from 112½ to a bid of 115 for 100 shares on yesterday's exchange.

REVOLUTIONARY ROAD BUILD-ING. "Road extension on the Islands within a few years past, has wrought revolutionary changes in methods of communication and transportation. Mark Twain's lugulations tales of spical was about his birting of bornes." ed woe about his hiring of horses, when he was here in the sixtles, would, f written today, be fiction uncontami-nated with truth. For, although the addle is the only recourse for a limit-d range of adventurous exploration, here is available, at every starting joint, a revised edition of animal from point, a revised edition of animal from the 'Soener' class that was Hobsen's choice for the reformed pilot of the Mississippi. Then, while making the lourney from one island to another, he occupied, when trying to sleep, a rud-bunk in a little schooner. Now, how-ever, he would find a comfortable statement in a nuclear stanner. So would be be able now, for the principal tateroom in a moder could be be able now. r the principal outes inland, to ricoach or a Beened ha knew carriags, with fixed and red arte fare, instead of having to buggl with an uncon-scionable freebooter for a four-pilliars ed bundle of boiles to rack him from

IT WAS NOT HIS FAULT.

The man who sits down to his supper rise in the esteem of his wife or of his cook. Excellent cooks have thrown up their situations, and gone off in a huff simply because the master of the house has casually remarked that there was a trifle too much sait in the soup.

Nevertheless, Mr. John Bennett, according to his own story, failed to get any satisfaction out of his meals for several years. Yet nobody complained of him, because it was not his fault. He would not have dreaded the comf men are \$745.50; of women, \$551.80; of ling of a meal time, as he actually did notify for the Celestial Empire, the land dread it, had he possessed the power to of his birth, returned to Honolulu yester choose his own feelings.

But alas! a deaf man may love musle, or a blind one long vainly for the sight

"I was a helpless victim of that tormenting and incorrigible complaint-intend either a public or a private school direction. How it came on me at the taught in English. Special police, cail-ed "truant officers," are appointed in up in the night and finding a thief in up in the night and finding a thief in your house. How he got in you may never exactly discover-not even by the aid of the police.
"What I do know is, that it annihi-

lated my appetite and spoiled my com-fort. The little I did worry down often ame up again-undigested, and consequently of no advantage to me.
"In fact, I dreaded the coming of

meal time and wished it were possible to get along without eating. But this is the horror of chronic dyspepsia—that one must eat in order to live, and that existence under such circumstances is careely worth baying.

of them-I never knew what it was to be well. Of all the medicines I resorted thing I heard of that had the slight-set hope in it, none did me any good: that is, none went to the bottom of my trouble. Any weary and hapless dys-peptic will understand what I mean.

ago now). I bought a tettle of Mother Seignl's Syrup of Mr. Sept. Powell, the chemist here in Paddington. He has been long in business in this place, and can be trusted to recommend only what

I need only add that the result of my using this medicine was for beyond my hopes or dreams. Before I had fin-tished the Brat bettle I was better, and after taking the Syrap a few weeks longer I was cared. You and really

It was at first reported that corthing had been seen of him Montaly afternoon or early Tuesday morning, and his friends proceeded to investigate. Silva was seen sitting in a hair with his face turned toward the loor. It took but an instant to discover that he was dead.

short. It took but an instant to discover that he was dead.

Dr. Pratt, executive officer of the Board of Health, however, says that Siva was attended by another man all Morday. This is partially borne out by the statement of Wilhelm, who was in Siva's house Monday afternoon and drank with him. Dr. Pratt said. There is no doubt whatever in my mind that the man fleel of a discase of long standing, which was perfectly apparance of the Portuguese consul. The door of his room was not kicked in as has been reported to you. On the contrary, there was a man in attendance on Siva all day Monday, and this same may was with him when he died. The symptoms at the time of death were not at all the same as those of the tree victims of yesterday and to day."

A certificate of burnal was issued by Dr. Pratt. Consul Canavarro and John M. Carbert for the east man of the dead man's effects, as it was rumored that Silva was possessed of considerable means.

The news of the death spread and the news of the death spread and the server of the death spread and the consent of Mr. Cathcart for the death was that trial and that evidence was in the fact hat trial and that evidence was in the stand Lahapa.
