TOUGH TRACTORS. TRIED-&-TRUE TOOLS.

Mahindra is one of the fastest growing tractor brands in North America and the World's No. 1 selling farm tractor.⁽¹⁾ We put our heart and soul into customer service, quality, and value.

Mahindra implements are a superior choice. They're engineered to be as tough as our tractors, with value-packed features, then field-tested to ensure they meet the strictest standards. We overbuild them for years of uninterrupted performance so you can focus on transforming the property you own into the land you love!

In this guide, we've taken the time to eliminate the guesswork by matching all current-selling tractors to available implements. But if you are a novice, no worries! There are 500 Mahindra dealers ready to guide you toward the right tool.

FRONT-MOUNTED, TRACTOR-POWERED SNOW BLOWERS

MAINTAINING DRIVEWAYS, PARKING LOTS, AND ROADS

Mahindra front-mounted snow blowers, powered by a rear PTO-connected belt drive system, allow operators to quickly blow powdery and wet snow at a great distance and in one pass. Commercial-duty models are used in airports, churches, hospitals, city roads, schools, and shopping centers, while residential-duty blowers rapidly clear home driveways and sidewalks. Consider adding on a cab, snowdrift cutters, headlights, and a remote-controlled spout deflector.

FEATURES & BENEFITS

- Stout auger and impeller, with shear bolt protection and heavy-duty gear box, aggressively chops and disperses snow and ice
- 10- and 12-gauge housing with double-walled bottom base and reversible and replaceable scrape blade help protect snowblower housing against damage
- 44-to 66-inch models Include long-lasting, zero-maintenance 2-inch timing belt to eliminate vibration and minimize noise
 - Adjustable and replaceable skid shoes for gliding over various terrains with ease
 - For most models, easily switch to blade or broom using an interchangeable mounting frame

REAR-MOUNTED TRACTOR-POWERED SNOW BLOWERS

MAINTAINING DRIVEWAYS, PARKING LOTS, AND ROADS

Mahindra rear-mounted snow blowers, PTO-powered using a 3-point connection, allow operators to blow powdery and wet snow quickly at a great distance and in one pass. Commercial-duty models can be used in airports, churches, hospitals, city roads, schools, and shopping centers, while residential-duty blowers rapidly clear home driveways and sidewalks. Consider adding on a cab, snowdrift cutters, headlights, and a remote-controlled spout deflector.

Pic shown here with optional 360° view soft cab (SKU No. BERMXCAB for eMax and Max models).

FEATURES & BENEFITS

- Heavy-duty auger and impeller with shear bolt protection, aggressively chops and disperses snow and ice
- Double-walled bottom base and reversible and replaceable scrape blade help protect snowblower housing against damage
- Adjustable and replaceable skid shoes glide over various terrains with ease
- On hydraulic chute models, upgrade to electric chute rotation (freeing up a hydraulic connection)

FRONT-MOUNTED SNOW BLADES

CLEAR DRIVEWAYS AND PARKING LOTS

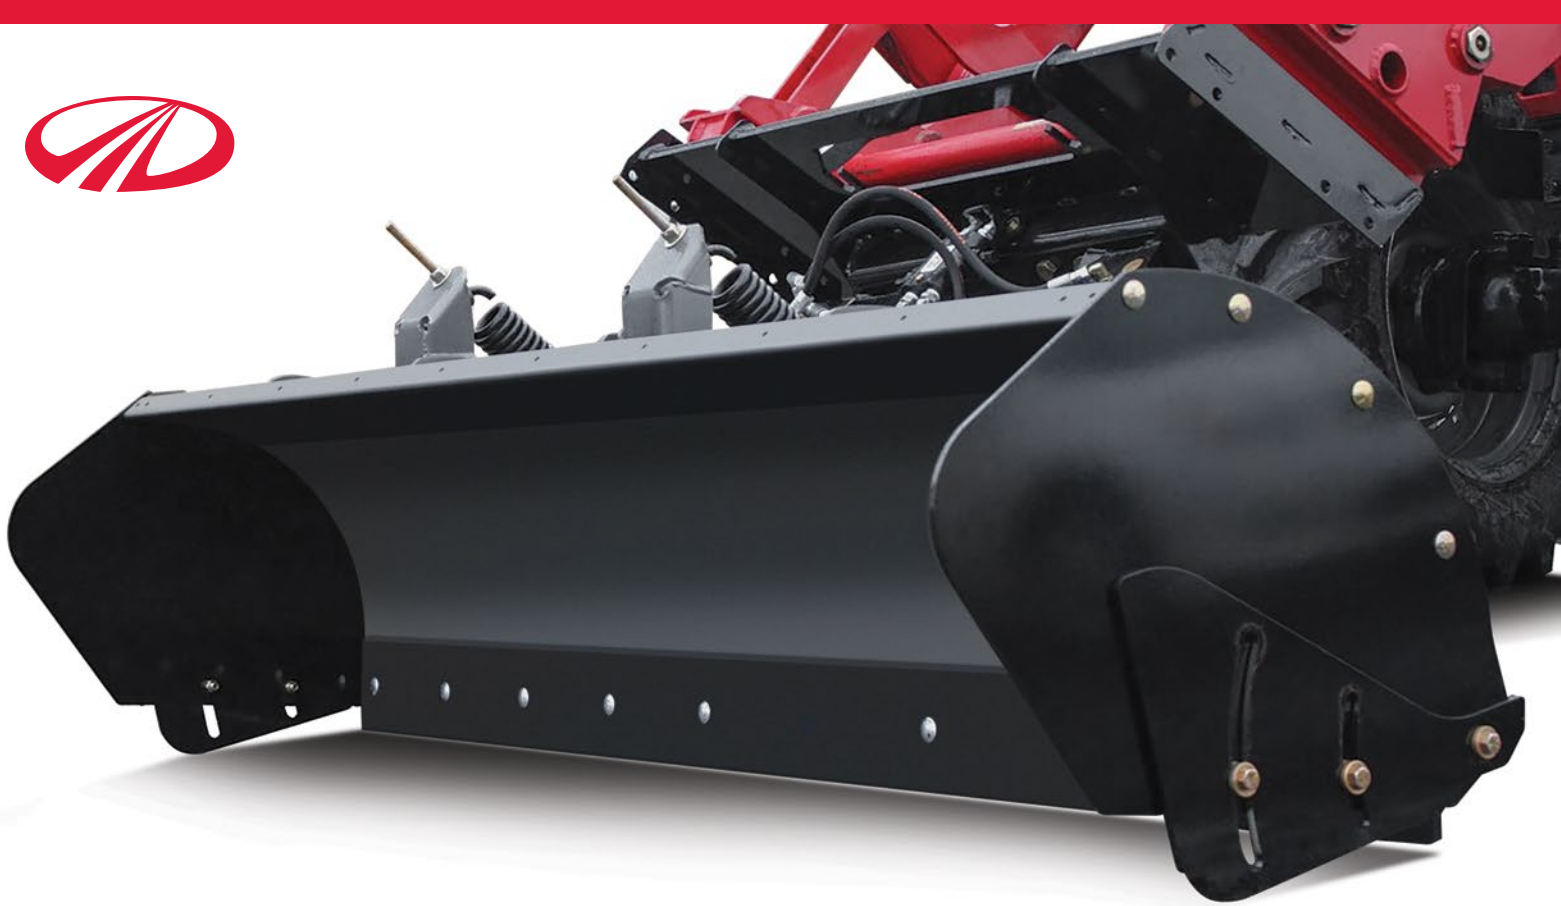

Mahindra front-mounted snow blades are ideal for moving vast amounts of snow and ice quickly. A hydraulic-powered blade pivots left and right, and stays firm to the ground, improves efficiency while leaving behind strategically placed windrows. Our snow blades are excellent at back dragging, too, getting very close to curbs, garages, or other structures.

FEATURES & BENEFITS

- Controls at your fingertips for lifting, lowering, and 25° left or right blade rotation using hydraulic loader valves
- Equipped with trip spring protection system to help prevent blade and tractor damage
- Heavy-duty steel, adjustable and replaceable skid shoes, and reversible and replaceable scraper bar for long product life
- Optional side plates for containing snow in straight push scenarios like narrow alleys or sidewalks
- Easily switch to blower or broom using an interchangeable mounting frame

SPECIFICATIONS

SKID-STEER SNOW BLADES

CLEAR BARNs, DRIVEWAYS, PARKING LOTS, AND ROADS

Mahindra skid-steer snow blades are stellar performers at farms, churches, neighborhoods, shopping centers, and other venues that operate many front attachments. Not just for snow, these blades remain firm on the ground at all times, removing vast amounts of aggregate in a single pass while leaving behind strategically placed windrows. Use for back dragging, too, getting very close to curbs, garages, or other structures.

FEATURES & BENEFITS

- Adjustable V-Blade locks into straight, V, and scoop configurations at angles up to 30° in frontward and backward directions
- For straight blades, five manual locking positions range from 0° to 25° left and right
- Equipped with trip spring protection system to help prevent blade and tractor damage
- Heavy-duty steel, adjustable and replaceable skid shoes, and reversible and replaceable scraper bar for long product life
- Scraper blades float and tilt 5° helps maintain ground contour contact
- Shown here with optional side plates to help channel aggregate and reduce windrowing

SKID-STEER SNOW PUSHES

PUSH, BACK DRAG, AND STACK SNOW OR OTHER DEBRIS

If you want to avoid making windrows, a Mahindra skid-steer snow push is your best bet to contain, push and stack snow. What's more, its commercial-duty enclosed design has no moving parts that can break or malfunction. It's quicker at clearing snow in a parking lot than its snow plow cousin, and is great for moving other materials, too, including manure and food in feedlots. Snow pushes can be found working around farms, parking lots, city and side streets, and other venues that operate many skid-steer attachments.

FEATURES & BENEFITS

- Strong steel housing, durable skid shoes and reinforced side plates capture and remove even the heaviest snow without leaving windrows or spillover
- Reversible and replaceable steel cutting edge designed to clear snow on concrete and asphalt
- Optional pull back kits for back dragging snow from buildings, fences and confined areas
- Optional marker kits for increased plow edges visibility

SPECIFICATIONS

FRONT-MOUNTED TRACTOR-POWERED ROTARY BROOMS

SWEEP PARKING AREAS, AND RAKE OR DETHATCH LAWNS

Mahindra front-mounted rotary brooms, powered by a rear PTO-connected belt drive system, are superb at rapidly sweeping snow and debris from parking lots, driveways, and walkways. What's more, they can be hydraulically adjusted for proper down force whether raking leaves and dethatching lawns, extending brush life. You'll see them operating at airports, churches, hospitals, schools, and shopping centers and in and around equine facilities, estates, and neighborhoods.

FEATURES & BENEFITS

- We offer rotary brooms for compact, compact-utility tractors and utility tractors
- Stay comfy and seated when hydraulically adjusting brush down force pressure or angling the broom left or right
- Easily switch to blower or blade using an interchangeable mounting frame
- 1-year light commercial-duty warranty for peace-of-mind
