

# Mask Manufacturing Directory

July 2020

# Mask Manufacturing Directory

To help meet increased demand for medical equipment and PPE due to the COVID-19 pandemic the Victorian Government has worked with local industry to prepare a series of directories.

This directory identifies local companies that manufacture masks or provide input materials such as fabrics. The directory includes three sections:

1. **Reusable fabric mask suppliers**
2. **Surgical & respirator mask suppliers**
3. **Fabric suppliers**

## **Ethical Clothing Australia**

The directory states where a company is Ethical Clothing Australia accredited. Ethical Clothing Australia's accreditation is focused on ensuring that local textile, clothing and footwear workers are being paid appropriately, receiving all the legal minimum entitlements and working in safe workplaces throughout the entire supply chain. The supply chain audit covers design, pattern making, cut, make, trim and dispatch, and all value adding services. In line with our policy, Victorian Government purchases can only be made from businesses that are ECA-accredited only.

## **Disclaimer**

Whereas every effort has been made to verify the details in this directory the Victorian Government accepts no responsibility to guarantee the delivery of products or services by the organisations listed in the directory nor does inclusion in the directory guarantee the placement of orders or contracts. It remains beholden on any user of the directory to conduct normal commercial due diligence.

For inclusion in future editions of this directory please contact [medicalPPEsupplies@djpr.vic.gov.au](mailto:medicalPPEsupplies@djpr.vic.gov.au)

# Reusable fabric mask suppliers

# A.BCH

**Contact:** Courtney Holm

T: 03 3762 1656 | E: [hello@abch.world](mailto:hello@abch.world) | W: <http://abch.world>

A: Studio 2, Level 1, 25 Easey Street, Collingwood, VIC 3066

# A.BCH

## Company Profile

A.BCH is a circular fashion label on a mission to transform the way people buy, wear and discard clothing.

A.BCH has recognised a need for community masks that don't take medical grade PPE away from health workers.

The A.BCH mask is a refined, garment-like mask that is both comfortable and breathable for long periods of community use. Available in a range of monochromatic colours and engineered to feel good and look good.

## Products/Services

The A.BCH Dust Mask is a 2 ply 100% organic cotton mask, crafted from a thick, naturally moisture repelling rib outer and light jersey inner. It suits most faces due to its adjustable ties (around the head for the best seal and coverage) as well as a flexible wire nose bridge.

It is reusable, washable at 60 degrees and 100% compostable at the end of its life.

Mask purchases come with a user manual for how to put on, wear and wash the mask effectively and safely.

**Ethical Clothing Australia accredited**

# AFI Branding

**Contact:** Brad Buchanan

T: 0413 672 403 | E: [brad@afibranding.com.au](mailto:brad@afibranding.com.au) | W: [www.afibranding.com.au](http://www.afibranding.com.au)

A: 33 Lakewood Blvd, Carrum Downs, VIC 3201

## Company Profile

AFI Branding is a leader in fabric signage solutions for the retail, events and exhibitions sectors and provides customised solutions including manufacturing personal protective equipment (PPE).

AFI has capacity to manufacture large volumes of masks using fabric sourced from Germany and China. Mask design can be adapted to suit specific requirements.

## Products/Services

Manufacture of durable reusable masks.

Fluid resistance provided by the hydrophobic outer layer, with the inner layer absorbent by design. The mask has an adjustable nose bridge and cotton ties that can be adjusted for any head size.

The outer fabric has a mesh warp-knit structure that provides a strong scaffolding for the inner particle filter layer, without obstructing the passage of air.

The particle filter layer is made of strong yet lightweight 50 gsm non-woven polypropylene that offers very little resistance to air flow and yet still blocks the passage of even small fluid particles.

# Albion

**Contact:** Louise Lorkin, Director

T: 0488 232 369 E: [louise@albionst.com](mailto:louise@albionst.com) W: [www.albionsports.com](http://www.albionsports.com)

A: Lvl 3/3.06, 15-87 Gladstone Street, South Melbourne VIC 3205

## Company Profile

Victorian based Albion has been operating since 1941. The company provides sports clothing and protective equipment.

## Products/Services

Albion is currently producing reusable masks constructed from Australian made polyester sports mesh.

The masks are sublimated printed and provide greater moisture management with a washable filter treated with silver ion technology for virus inactivation.

The masks can be treated with ViralOff® Polygiene® technology, providing 99.99% reduction of viruses on products, that have been tested against viruses like Influenza A, Corona and Hepatitis. All masks can be custom made with corporate or team logos.

Currently Albion can produce up to 5000 reusable masks per week and can increase capacity based on demand.

# ArmaSkin/Ventou

**Contact:** Ian Bridger or Vlad Libeson

T: 03 9325 1766 | E: [sales@armaskin.com](mailto:sales@armaskin.com) W: [www.armaskin.com](http://www.armaskin.com) | [www.ventou.com.au](http://www.ventou.com.au)

A: 10 Pearl St, Brooklyn, Victoria 3012

## Company Profile

ArmaSkin/Ventou is a manufacturer and supplier of general purpose, high grade, reusable face masks. ArmaSkin masks utilise new composite textile technology for inherently anti-microbial reusable face masks.

## Products/Services

Reusable face mask utilising proprietary composite textile that incorporates silicone and wool. Masks are made in Melbourne from Australian knitted wool.

Silicone is known for its anti-microbial properties due to its inherent nano rough surface structure and hydrophobic characteristic. The silicone polymer is coated onto wool which is also has inherent anti-microbial properties, resulting from the extremely fibrous, nano scaled structure, with superior moisture transportation. This combination is believed to have properties necessary for an effective reusable face mask. Masks are easily breathable, comfortable to wear and have an adjustable closure strap.

More generic masks that are cheaper are also being manufactured, available from [www.ventou.com.au](http://www.ventou.com.au).

# The Social Studio

**Contact:** Luka Rey

T: 03 9417 2143 | E: [luka@thesocialstudio.org](mailto:luka@thesocialstudio.org) | W: [www.thesocialstudio.org](http://www.thesocialstudio.org)

A: 128 Smith Street, Collingwood VIC 3066

## Company Profile

The Social Studio is a non for profit social enterprise that creates opportunities for people of refugee and new migrant backgrounds to work in fashion.

In response to the COVID-19 crisis, The Social Studio has directed manufacturing efforts towards producing urgently needed PPE, including scrubs and masks.

Product link <https://tssmedicalscrubs.myshopify.com>.

## Products/Services

Reusable, one size fits all masks made of four layers of 100% cotton fabric and one layer of interfacing which acts as a filter. Masks are to be washed at 60 degrees after each use.

The use of interfacing means no added filter is required and the mask doesn't droop. The fit of the mask is designed so breathing is easy.

# Med-Con Pty Ltd

**Contact:** Steven Csiszar, General Manager

T: 03 5822 6600 | E: [steve@medcon.com.au](mailto:steve@medcon.com.au) | W: [www.medcon.com.au](http://www.medcon.com.au)

A: 415 New Dookie Rd, Lemnos VIC 3631

## Company Profile

Established in 1989, Med-Con Pty Ltd (Med-Con) is an Australian owned company based in Shepparton. The company specialises in the manufacture and or import of surgical face masks, disposable head wear, protective shoe covers, protective apparel, sterilisation equipment, disinfectants and medical storage equipment.

## Products/Services

Med-Con can provide disposal surgical face masks (levels 1, 2 and 3) with ties or loops. The masks comprise 3-layers with an ultra-soft non-reactive inner layer to maximize facial comfort. They provide varying levels of bacterial protection for the wearer depending on level of mask. The masks provide particulate protection in clinical and industrial applications. Med-Con masks test at a PFE of 99.1% with a particle size of 0.1µm. A delta pressure of less than 1.5 units optimises users' breathability.

Med-Con holds relevant International Organisation for Standardisation (ISO) and Therapeutic Goods Administration (TGA) accreditation for their products.
