## PLACEMENT TEST for the LIFEPAC CURRICULUM

## Instructions

This test is designed to aid the teacher in proper placement of the student into the LIFEPAC curriculum. It has two sections: the Student Test and the Answer Key. The Answer Key is an insert in the Student Test and may be removed when testing begins.

This is not a timed test and the student should be given an opportunity to answer each question adequately. If the student becomes bogged down and the test seems too difficult, skip to the next section. If the test is still too difficult, this child's academic skill level has been reached and testing may stop. Each test level should take no longer than one hour. Students should not use a calculator for any of the tests.

Testing should begin approximately two grade levels below the student's current or just completed grade level. For example, a student entering fifth grade [500] should begin testing at the third grade [300] level. (Of course, a second grader could not test below the first grade level [100]). This allows for proper grade level placement as well as identification of any learning gaps that the student may have.

Once the test has been administered, it is ready to be scored. The teacher or parent does all of the scoring except for those who are using one of our placement services. Use the Answer Key to mark all incorrect answers on the Student Test. Next, record the total number of correct answers in the box beneath the LIFEPAC number in the left hand column. Each numbered question equals one point. When all tests have been graded, transfer the number correct by LIFEPAC to the Student Placement Worksheet on page AK-16 of the Answer Key. Then add the total number of points per grade level.

| Test | Level | Test | Level | Test | Level | Test | Level |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $101-110$ | Level 1 | $201-210$ | Level 2 | $301-310$ | Level 3 | $401-410$ | Level 4 |
| $501-510$ | Level 5 | $601-610$ | Level 6 | $701-710$ | Level 7 | $801-810$ | Level 8 |

FIRST GRADE TEST ADMINISTRATORS: Test administrators may assist students in reading instructions when necessary; however, care should be taken as too much support may alter test results. First grade students may answer questions on the test pages or the right hand column. The right hand column is available for test administrators to mark whether the response was correct or incorrect. Each question equals one point. There are ten possible points per section. Put all answers on the blanks to the right of the questions unless instructed to do otherwise.

GRADE LEVEL PLACEMENT: A student can be placed academically using the rule that he/she has successfully passed the test for any given level if he/she achieves a Total Score of 70 points or more.

This student places at grade level $\qquad$ .

LEARNING GAPS: Learning gaps can be easily identified with the placement test. If a student receives points of 6 or less on any individual test, he/she has not shown mastery of the skills in that particular LIFEPAC. If desired, these LIFEPACs may be ordered and completed before the student begins his assigned grade level curriculum.

Learning gap LIFEPACs for this student are $\qquad$

It is not unusual for a student to place at more than one level in various subjects when beginning the LIFEPAC curriculum. For example, a student may be placed at 5 th level in Bible, mathematics, science and social studies but 4th level in language arts. The majority of school time should be concentrated on the areas of lower achievement with the ultimate goal of equal skill mastery in all subjects at the same grade level.
