

MAZDA CX-9

SKYACTIV TECHNOLOGY

When Driving Matters, excellent fuel efficiency should never come at the cost of performance. So, of course, our driving-obsessed engineers found a way to enhance both. It is called SKYACTIV TECHNOLOGY.

Every aspect of the vehicle is engineered to maximize driving dynamics and efficiency: from body construction and engine technology, to the chassis and transmission. Without compromising performance.

SKYACTIV TECHNOLOGY is just one of the ways Mazda makes driving better.

SKYACTIV-G The turbocharged petrol engine delivers crisp response and great torque.

SKYACTIV-BODY

Light, rigid and robust body that ensures safe and joyful driving.

SKYACTIV-DRIVE

Ideal transmission designed for smooth driving and efficiency.

SKYACTIV-CHASSIS

Lightweight chassis that delivers driving pleasure and comfort.

DISTINCTION IN SAFETY

You and your passengers' safety is always a priority. Mazda CX-9 comes equipped with a suite of i-Activsense advanced safety technologies as standard, assisting the driver to avoid potential hazards. Along with preventative features, crash-severity-reduction technology is activated in the event unavoidable impact.

i-ACTIVSENSE

Adaptive LED Headlights (ALH)

ALH increases visibility at night to help drivers stay vigilant by combining 3 technologies: Glare-free High Beam, Wide-range Low Beams and Highway Mode.

Driver Attention Alert (DAA)

The system activates at speeds above 65 km/h and begins to "learn" the driver's habits, then alerts the driver before fatigue becomes a factor.

Blind Spot Monitoring (BSM) Rear Cross Traffic Alert (RCTA)

By scanning blind spots behind your vehicle, sensors detect unseen vehicles to alert you during lane change or reversing.

Smart City Brake Support (SCBS) Front & Rear

SCBS automatically applies the brakes if it detects there is a danger of collision at forward speed of 4 - 80 km/h and reverse speed of 2 - 8 km/h.

Lane Departure Warning System (LDWS)

LDWS monitors road markings and alerts you if you are straying from your lane when travelling over 65km/h.

> Smart Brake Support (SBS) Front & Rear

SBS aims to help the driver avoid or reduce the severity of frontal collisions (between 15 -145 km/h), by automatically applying the brakes if there is a danger of collision.

Mazda Radar Cruise Control (MRCC)

lane departure.

Lane-Keep Assist System (LAS)

LAS adds to the LDWS by performing minor

steering corrections to re-center the vehicle

in its lane upon sensing an unintentional

MRCC maintains a set speed and minimum following distance from the car in front. If the car you are following reduces speed, your vehicle will automatically slow down as needed.

Variant		2.5L 2WD 2.5L AWD	
Engine Type		SKYACTIV®-G 2.5L Turbo	
Powertrain			
Туре		DOHC 16-Valve 4 Cylinder	
Displacement	сс	2,488	
Maximum Power	Hp / rpm	228/5,000	
Maximum Torque	Nm / rpm	420/2,000	
Compression Ratio		10.5 : 1	
Transmission		SKYACTIV® DRIVE 6-Speed Automatic with Manual Shift Mode
