AEROSPACE ENGINEERING

NON-CREDIT PROGRAM WITH TRANSCRIPT

DATES

July 29 - August 16, 2019 (3 weeks)

COURSES

1. FUNDAMENTALS OF AEROSPACE METALLIC MATERIALS (30 HOURS)

This course will present the fundamentals of metals as a material, light metals and super alloys as they are widely used in aerospace design, as well as hot working of metals. It offers 15 hours of labs as part of the 30 contact-hours.

2. INTRODUCTION TO ENGINEERING DESIGN OPTIMIZATION (15 HOURS)

This course will present basic optimization theory, algorithms and computational tools for engineering design. The student will learn to develop proper mathematical models to formulate design optimization problems and choose/apply appropriate optimization algorithms to solve them.

3. BASIC PRINCIPLES OF PROJECT MANAGEMENT (15 HOURS)

This course addresses fundamental project management principles and techniques and introduces tools and templates that can be immediately applied to address real life project situations. Participants learn how to clearly define a project outcome in terms of client and stakeholder expectations, how to develop a project charter, and how to create and monitor a project plan using MS Project 2010 software in a hands-on laboratory setting.

These courses are non-credit. A McGill Record of Study will be issued for these courses. The language of instruction is English (TOEFL IBT 79 or equivalent). Courses can be taken individually.

INTRODUCTION TO BIG DATA

NON-CREDIT PROGRAM WITH TRANSCRIPT

DESCRIPTION

Leverage your strengths in quantitative analysis to extrapolate meaningful business insights from large data sets. This program will introduce you to a practical toolkit to help you work with data at scale.

DATES

July 29 – August 16, 2019 (3 weeks)

COURSES

1. DATA SCIENCE FOR BUSINESS DECISIONS (30 HOURS)

This course aims to provide an overview of how data science can help drive business decisions and create new business models. The emphasis is placed on how to move from data to insight. The course explores the data science process and various challenges that data driven businesses face including ethics, data governance and privacy among others. The evolution of data technology and storage, as well as application of data science tools and techniques in different business areas such as customer and web analytics, operations analytics, human resources related analytics are explored through examples from various industries such as banking, healthcare, marketing, agriculture to name a few.

2. DATA AT SCALE (35 HOURS)

This course familiarizes participants with different aspects of large data sets and how they are managed both on site and in the Cloud. Emphasis is placed on providing participants with hands-on experience from data ingestion to analysis of large data sets, both data-at-rest or data-in-motion (streaming data), including defining Big Data and its 5 V's: Volume, Velocity, Variety, Veracity, and Value. Architectures of distributed databases and storage, ecosystems such as Hadoop and Spark are covered followed by introduction to Scala, Spark-Shell and PySpark.

These courses are non-credit. A McGill Record of Study will be issued for these courses. The language of instruction is English (TOEFL IBT 79 or equivalent). Courses can be taken individually.

PRE-REQUISITES

- Strong quantitative background
- Solid understanding of statistical concepts:
- Applicants must be currently enrolled in one of the following programs or hold a degree in:
 - Bachelor of Engineering (B.Eng.)
 - Bachelor of Science (B.Sc.)
 - Bachelor of Commerce in MIS (B.Com MIS)

Students without prior knowledge of Python must complete the following Python courses online and provide proof of completion prior to the start of the program:

MACHINE LEARNING

NON-CREDIT PROGRAM WITH TRANSCRIPT

DESCRIPTION

If you are interested in acquiring essential practical machine learning knowledge and skills, this program is for you.

DATES

July 29 – August 16, 2019 (3 weeks)

COURSES

1. STATISTICAL MACHINE LEARNING (30 HOURS)

This course introduces fundamental statistical machine learning concepts and tools using Python. Emphasis is placed on the following subjects: descriptive statistics, statistical distributions, random number generation, basic data visualization; linear regression; basic classification; error estimation; cross-validation, bias-variance trade-off; shrinkage methods; dimension reduction; beyond linearity: smoothing splines, local regression, additive models; tree and ensemble methods; powerful classifiers; unsupervised learning.

2. PRACTICAL MACHINE LEARNING (35 HOURS)

This course aims to introduce participants to essential machine learning methods and techniques through an end-to-end machine learning project. Emphasis is placed on practical experience with machine learning using Python programming language, scikit-learn and TensorFlow, as well as on understanding classification and training models. The course will provide an introduction to artificial Neural Networks, deep learning, convolutional and recurrent neural nets and reinforcement learning.

These courses are non-credit. Students are assessed and graded. A McGill Record of Study is issued. The language of instruction is English (TOEFL IBT 79 or equivalent). There are no other prerequisites.
