

Membership Brochure

ABOUT PMC

An educational and advocacy organization,
PMC promotes personalized medicine by
addressing regulatory, reimbursement and clinical
adoption issues critical to the field's advancement.
Based on the diversity of its membership, PMC has
become the pre-eminent source of knowledge about
personalized medicine and a force for shaping
policy about and increasing investment in the field.

The Coalition:

- Provides opinion leadership on policy issues that affect personalized medicine;
- Helps educate policymakers in government, industry and academia about the benefits of personalized medicine; and
- Serves as a forum for identifying and informing others of policies that could advance or impede the development of personalized medicine.

The Personalized Medicine Coalition, representing innovators, scientists, patients, providers and payers, promotes the understanding and adoption of personalized medicine concepts, services and products to benefit patients and the health system.

BENEFITS OF MEMBERSHIP

By joining PMC, organizations gain an opportunity to shape the future of the field by:

- Having a voice in creating a favorable policy environment for personalized medicine;
- Forging relationships with other stakeholders in personalized medicine; and
- · Sharing best practices
 - · Educational resources
 - · Forums for debate and consensus-driven solutions
 - Networking within and across domains

Members also learn about the latest trends and developments in science, policy and business through forums, newsletters and member-only updates.

Personalized medicine is transforming the practice of medicine, and the Personalized Medicine Coalition is playing a critical role in bringing together all of the stakeholders to help make that happen.

Raju Kucherlapati, Ph.D. Paul C. Cabot Professor of Genetics Professor of Medicine Harvard Medical School

The Role of the Personalized Medicine Coalition

Paradigm shifts, especially in medicine, do not happen just because the science or new technologies suggest they should. Based on that assumption, at the end of 2004, some 20 institutions representing all sectors of the health care ecosystem launched the Personalized Medicine Coalition (PMC). These founding institutions represented the pharmaceutical, biotechnology and diagnostic industries, tool manufacturers, academic health centers, venture capitalists, insurance companies and patient advocates.

With the growth of personalized medicine over the past decade, the Coalition has expanded to include more than 250 institutions across the health care spectrum. Along with raising personalized medicine's profile, PMC advocates for changes that will increase investment in personalized medicine and facilitate its adoption so that both patients and the health system will benefit from improved clinical care and increased overall value.

What is Personalized Medicine?

Personalized medicine is an evolving field in which physicians use diagnostic tests to determine which medical treatments will work best for each patient. By combining the data from those tests with an individual's medical history, circumstances and values, health care providers can develop targeted treatment and prevention plans.

PMC MEMBERSHIP

A 501(c)3 organization, PMC is an independent, non-partisan educational and advocacy organization with members that are committed to science-driven, evidence-based health care.
