THE POWER OF PLATINUM PROTECTS AGAINST RUST-JACKING FOR 3-YEARS/300,000-MILES.

Our “Brake-Through” Technology Is Now Longer-Lasting Technology.

It's hard to improve on an original – especially a game-changing original such as PlatinumShield®, but that's exactly what our team of engineers did. And it's going to pay even bigger dividends for Meritor® customers.

At Meritor, we continue to invest in our PlatinumShield technology to improve performance and durability. Meritor engineers are continually conducting research and testing to discover ways to improve our PlatinumShield coating process. The result is PlatinumShield III, our third-generation coating with advanced engineering that maximizes resistance to rust-jacking.

In developing PlatinumShield III coating, our aftermarket engineering team discovered a refinement in the process that provides superior adhesion of the coating to the surface of the shoe. Superior adhesion enables the coating to protect the brake shoe for a significantly longer time on the road, increasing the shoe's durability to withstand the corrosion caused by highway de-icing chemicals. The result is a quantum leap in technological performance that creates a new standard of brake-shoe durability. PlatinumShield III coating provides unsurpassed resistance to rust-jacking and corrosion while extending the life of your brakes.

As a result, Meritor new and reman brake shoes with PlatinumShield III coating deliver everything you expect from a worldwide brake leader, including our 3-Year/300,000-Mile warranty against rust-jacking.

Why Does Rust-Jacking Require a Long-Lasting Solution?

- Rust-jacking often shortens the life of brake shoes and brake linings, preventing truck operators from getting the full life out of their equipment.
- Rust-jacking is a field condition caused by harsh anti-icing liquids in winter road solvents, combined with thawing and freezing moisture that penetrates the brake shoe coating and causes rust to build up on the brake shoe table.
 
- As rust builds up, it pushes outward against the lining, “jacking” it up between the rivets, until the lining cracks.
 
- Once the lining cracks, driving is unsafe, and the lining must be replaced, cutting short the brake shoe life and denying truck operators its full value – often with a thick amount of lining remaining.
- Rust-jacking is found most often where intense brake heat cannot dry out the shoe table. Typically, it occurs in front shoes.

How Did Our Brake Engineers Originally Solve The Rust-Jacking Problem?

Introduced in 2009, PlatinumShield was created to address a real-world corrosion problem that had long beset the trucking industry. In order to develop a real-world solution, our brake experts re-created actual road conditions. We subjected lined brake shoes to brake applications on a dynamometer before subjecting them to a salt spray test. That way, brake shoes reached the salt spray test with wear and tear that more closely approximated actual highway results.

Next, in our ASTM B-117 salt spray test, brake shoes were sprayed with modern anti-icing road solvents and salt water for 408 hours. We observed how rust forms on brake shoe tables, and tested the corrosion-resistance of countless paints and coatings.

Of all the brake shoes and coatings tested, we found that our PlatinumShield coating did the best job of protecting the shoe table by preventing micro-abrasions, so rust-jacking simply does not occur during the expected life of the brake shoe.

Corrosion Resistance Testing of PlatinumShield III vs. a Competitor.

Meritor engineers recently conducted a competitive corrosion-resistance benchmark evaluation between PlatinumShield III coating and a competitor's corrosion-resistant shoe coating. Both shoes were salt spray tested for 400 hours per ASTM B-117 to measure corrosion resistance. Results can clearly be seen in the post-testing photos. The superior performance of the PlatinumShield III coating resulted in a corrosion rating of 9 on the ASTM scale, while the competitor's corrosion-resistant shoe coating rated 1 on that scale.

Results after a 400-hour ASTM B-117 salt spray test

With PlatinumShield III, we've completely changed expectations for brake shoe life. In fact, PlatinumShield III meets our desired criteria:

- It rates higher than 8 on the ASTM scale.
- Meritor brake shoes with PlatinumShield III coating offer an industry-leading full 3-Year/300,000-Mile warranty against rust-jacking.

Our proprietary PlatinumShield III coating is available on new and remanufactured Meritor and Fras-le® brand brake shoes.

MERITOR AFTERMARKET PARTS WARRANTY

We warrant all new parts for one year from date of shipment to the buyer against defective material or workmanship (but not against damage caused by accident, abuse or improper installation, maintenance or repair) when such parts are used on vehicles the specifications of which have been approved by our Engineering Department.

As the exclusive remedy under this warranty, we will, at our option, repair or replace such parts free of charge, or take back the nonconforming parts and refund the monies paid by buyer for such parts, if found on examination by us to be nonconforming and if any necessary return charges are prepaid.

If it is necessary to return any parts under this warranty, buyer agrees not to make any deduction on account thereof from remittances on current accounts while claims are in the process of disposition. Any expense incurred without our consent for repairs or replacement will not be allowed.

THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS, IMPLIED OR STATUTORY, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE. IN NO EVENT SHALL SELLER BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY NATURE.

Only genuine Meritor replacement parts are covered by this aftermarket parts warranty.
