Standard VESA	75mm or 100mm

### M21

Corner Sleeve	M21
Desktop	1.375"
Converts to	45° corner
Width	22"
Depth	18"

## HOW TO CHOOSE YOUR COMPONENTS

Mesa offers a full range of ergonomic keyboarding solutions for virtually every requirement. Here is a quick guide to help you choose the components that are best suited to your needs.

**Choose your Arm first.** After you've determined your general requirements, look at which line suits your needs. For example, some arms use low profile ball bearings while others use a teflon glide. Look for features such as Lift-n-Lock™, dial tilt and single knob control.

**Positive tilt lockout.** Some of our arms offer positive tilt lock out that restricts the positive tilt, limiting the range of movement to -15°/0°.

**Decide which neck length is required.** Mesa manufactures both the S series for straight workstations and the X series for corner workstations.

**Choose your package.** Nearly all Mesa trays will work with the full range of arms. Choose the package that best suits your requirements. Or choose individual components from the price list to create your own custom system.
