INDUSTRY-LEADING WARRANTIES

As the leader in metal roofing, it's only fitting that our decades-long warranties outlast all others.

24 Gauge D2 Kynar 500 with OceanGuard

Thicker and stronger, our 24 gauge metal roof panels are engineered to perform in the harshest environments. In collaboration with PPG, Nu-Ray designed these panels to set the new standard in metal roofing. The quality is well worth the upgrade. The Az50 Zincalume/Galvalume base steel is coated in extra thick high-build primer and finished with PPG's D2 Kynar 500, so we can confidently offer a standard 50-year finish warranty—and a 15-year warranty, when activated, on finishes for projects located on coastal properties.

26 Gauge D2 Kynar 500

With 34+ years of experience, Nu-Ray has concluded that our 26 gauge panels utilizing a galvanized G-90 base finished in PPG's D2 Kynar 500 is the perfect roofing material for residential and light commercial applications. D2 Kynar incorporates reflective pigments—known as ULTRACool technology—provide superb solar reflectivity.

NRM Select SMP (Silicone Modified Polyester)

NRM Select SMP metal roofing makes our legendary luxury products more affordable than ever, without compromising the protection and appearance you expect from high quality metal roofing panels. NRM Select SMP panels feature our hallmark high-performance NRM-6000 and NRM-4500 panel systems finished with our Nu-Shield™ SMP (Silicone Modified Polyester) paint system. This unique combination enables you to accomplish your metal roofing or siding project on budget.

Protecting Nature & Natural Resources

All of Nu-Ray's metal roofing products are 100% recyclable. Excess material from the manufacturing process is recycled. And, because our metal roofing is warranted to last up to 50 years, natural resources are not sacrificed—in contrast to asphalt and cedar roofs that require much more frequent replacement.
