August 2014

The most up-to-date version of this publication is available online at www.mpca.net.

Data for Section 330 funded Health Centers and FQHC Look-Alikes listed in this directory is derived from the U.S. Department of Health and Human Services' Health Resources and Services Administration's Uniform Data System (2013), or provided by the organizations. Data listed for other organizations was provided by the organizations.

Michigan Primary Care Association's (MPCA) federal grant program titled "State and Regional Primary Care Associations" allows MPCA to provide technical assistance and support to health centers in Michigan and is 100% funded by federal dollars at a current annual level of \$1,069,988.00.

About MPCA

WHO WE ARE, WHAT WE DO

Michigan Primary Care Association (MPCA) is a leader in building a healthy society in which all residents have convenient and affordable access to quality health care. Our mission is to promote, support, and develop comprehensive, accessible, and affordable community-based primary health care services to everyone in Michigan.

For over 30 years, MPCA has been the voice for Health Centers and other community-based providers in Michigan. MPCA got its beginnings in the late 1970s as a networking organization of Health Centers and stakeholders interested in fostering primary care in rural underserved communities across the state. With the realization that urban communities also had great health care needs, the Association quickly broadened its scope to include urban Michigan communities as well. Today, 40 Michigan Health Center organizations provide quality, affordable, comprehensive primary and preventive health care for over 600,000 Michiganders annually at 240 sites across the state. Information about Michigan Health Centers begins on page 16.

MEMBERSHIP

Active membership is open to providers of comprehensive and community-based primary care, including organizations and individuals which support MPCA's mission.

Associate membership is open to individuals or organizations that do not provide primary care and that support the mission of MPCA. **Student membership** is available to any student enrolled in a secondary or post-secondary Michigan institution. Visit www.mpca.net for more information.

OUR SERVICES

► **Clinical Support & Quality Improvement** A core focus of MPCA's Clinical Services Department is to support the delivery of quality primary health care services in Michigan through training and support in: Patient Centered Medical Home recognition and sustainability, meaningful use incentives, data driven quality improvement processes, Uniform Data System (UDS) clinical measures, evidence-based chronic disease management, patient safety, and infectious disease and immunization health care initiatives.

► **Communications** MPCA communicates internally and externally through our website, weekly *eUpdate*, and social networking sites. We also facilitate Peer Communication Networks to promote information sharing, educational opportunities, and peer-to-peer networking among Michigan Health Center staff.

“Our mission is to promote, support, and develop comprehensive, accessible, and affordable community-based primary health care services to everyone in Michigan.”

- ▶ **Community Development** With the goal of 100% access to health care in Michigan and zero health disparities, MPCA assists communities in determining the best approach to providing access to care.
- ▶ **Data Analysis** MPCA analyzes a variety of data to highlight the need for redistributing the supply of primary care, dental health, and mental health professionals to areas with the highest need; support proposals presented to grantmakers, policymakers, legislators, and partner organizations; and identify trends and interventions to improve the health of underserved communities and vulnerable populations.
- ▶ **Education & Training** MPCA hosts education and training events throughout the year to strengthen and improve the ability of Michigan Health Centers to deliver high-quality health care to medically underserved communities.
- ▶ **Operational Support** MPCA provides direct support to Michigan Health Centers in the areas of billing and finance, emergency management, compliance with program requirements, board governance, and many others. We also support the sharing of best practices through numerous Peer Communication Networks.
- ▶ **Outreach & Enrollment** MPCA provides training and peer learning opportunities, offers technical assistance, and curates resources across a wide spectrum of health coverage programs including Medicaid, MICHild, the Healthy Michigan Plan, and health plans offered in the Health Insurance Marketplace. MPCA's outreach, education, and enrollment services support Michigan Health Centers and other partners in providing community-based assistance for patients and community members to gain and maintain access to comprehensive, affordable health insurance coverage.
- ▶ **Policy & Advocacy** MPCA works with policymakers and elected officials advocating for policies that assure all Michigan residents have access to quality, affordable primary and preventive health care within their communities. Each year MPCA identifies policy priorities that will improve the ability of Health Centers to provide quality health care services to all in need, and monitors proposed policies that may affect Health Centers and access to care. MPCA staff spend significant time educating members about policy and legislative issues impacting Health Centers and the importance of grassroots advocacy.
- ▶ **Special Populations** MPCA works with members and partner agencies to better understand and respond to the needs of Michigan's homeless individuals and families, residents living with HIV, and migrant and seasonal farmworkers.

- ▶ **VirtualCHC & HIT Network** VirtualCHC provides technology-based solutions for common needs of Health Centers. It offers access to hosted applications such as electronic health and dental records, secure email, and more - all over the Internet. It also can provide a powerful custom reporting solution, including working with Health Center staff on report development. Consulting services are available for anything from assisting with vendor selection to local IT support. VirtualCHC serves as a Health Center's HIT department.
- ▶ **Workforce Development** MPCA places a strong emphasis on developing and monitoring workforce development initiatives to increase the effectiveness of health professional recruitment and retention programs for MPCA and Michigan Health Centers.

BOARD OF DIRECTORS

MPCA is guided by an eleven member Board of Directors comprised of eight executive directors serving as regional board representatives, one member representing the Health Center Board Member Committee, one member representing the Clinical Services Committee, and one member representing the Finance Officers Network. The Executive Committee consists of board president, president-elect, treasurer, secretary, and the Health Center Board Member Committee chair. The Chief Executive Officer serves on the Board and Executive Committee as an ex officio member.

The fundamental principles on which Health Centers were established nearly 50 years ago set them apart from other providers of health care:

- ▶ Located in or serve medically underserved areas or populations
- ▶ Governed by a community board composed of 51 percent or more of Health Center patients who represent the population served
- ▶ Provide comprehensive primary health care services as well as support services (e.g. education, translation, transportation) that promote access to health care
- ▶ Services available to all with fees adjusted based on ability to pay
- ▶ Meet strict performance and accountability requirements regarding administrative, clinical, and financial operations as established by the federal government

Michigan Health Centers are part of a nationwide network of 1,200 Health Centers spread across 50 states and all U.S. territories that provide care for over 22 million people in over 9,000 locations.

About HEALTH CENTERS

The term “Health Center” is used to refer to Health Center Program grantees and Federally Qualified Health Center Look-Alikes

Of Michigan’s 40 Health Centers, 35 are Health Center Program grantees, 4 are FQHC Look-Alikes, and 1 is both a Health Center Program grantee and an FQHC Look-Alike.

Each Health Center’s staffing models, facilities, scope of services, and approaches are tailored to meet the unique needs of its patients and surrounding communities. Many individuals have difficulty accessing medical care because of where they live, the language they speak, and their complex health care needs. Health Centers provide culturally appropriate health care that is close to where patients live, at times that are convenient, and in languages patients can understand.

Health Centers have professionally trained health care teams. These teams may include board-certified or board-eligible physicians, nurses, nurse practitioners, physician assistants, certified nurse midwives, medical assistants, mental health and substance abuse professionals, dentists, and dental hygienists. The clinicians of each team work together to provide a core of primary and preventive health services to individuals and families throughout all life stages, from pediatric through geriatric.

Four types of Health Centers as described on pages 14 and 15 are funded under Section 330 of the Public Health Service Act. These Health Centers are also called Federally Qualified Health Centers (FQHCs) and they must meet the following requirements:

- ▶ Be located in or serve a Medically Underserved Area/Population (MUA or MUP) as designated by the Health Resources and Services Administration; health care is needed but scarce in these areas
- ▶ Operate under a patient-majority board of directors
- ▶ Provide comprehensive primary health, oral health, and mental health/substance abuse services, as well as supportive services such as translation and transportation assistance, that promote access to health care to everyone in the community in all stages of the life cycle
- ▶ Charge uninsured patients for services on a sliding-fee scale that is based on their family size and income

SECTION 330E *Community Health Centers*

Community Health Centers were developed in 1965 in response to community need for improved health services for inner city populations. As part of the federal government's War on Poverty, funding was made available for communities to establish primary care centers to provide comprehensive health services, regardless of ability to pay. Although there have been many changes in the Health Center program over the years, its foundation remains the same—to provide high-quality primary and preventive health care to people in rural and urban medically underserved areas. Medical underservice is defined by a shortage of professionals or health services and high rates of poverty and infant mortality. It may also include special considerations, such as lack of Medicaid providers, lack of bilingual services, or a large percentage of uninsured persons.

SECTION 330G *Migrant Health Centers*

Migrant Health Centers were established in 1962 to provide comprehensive primary care services to migrant and seasonal agricultural workers and their families in a culturally sensitive environment. Like Community Health Centers, Migrant Health Centers provide comprehensive health care services to their target population at a price that is affordable and regardless of insurance status. Migrant Health Centers use culturally-sensitive clinical protocols, bilingual health personnel, and lay outreach workers. In 2013, five Migrant Health Centers served 15,352 migrant and seasonal farmworkers in Michigan (approximately 17% of the state's migrant and seasonal population).

SECTION 330H *Health Care for the Homeless Centers*

Modeled after a demonstration project jointly funded by The Robert Wood Johnson Foundation and Pew Charitable Trust, the Health Care for the Homeless program was initiated in 1987 as part of the Stewart B. McKinney Homeless Assistance Act. In 1996, Congress passed the Health Centers Consolidation Act, which joined the Health Care for the Homeless program to the community, migrant, and public housing primary health care programs under a single authority called the Consolidated Health Center Program. The Health Care for the Homeless program provides federal grants to non-profit organizations to deliver primary health care and substance abuse services to homeless individuals and families. The Health Care for the Homeless program provides a multidisciplinary approach to the delivery of care by combining systems of primary care, substance abuse and mental health services, patient management, and education with aggressive outreach. Either through direct provision or through established links with other community agencies, 12 Health Centers in Michigan operate Health Care for the Homeless programs and serve 23,899 homeless individuals (approximately 28% of the state's homeless population).

SECTION 330I Public Housing Health Centers

The Public Housing Primary Care Program was established to support the provision of accessible and comprehensive preventive and primary health care services to residents of public housing. Health promotion and disease prevention are emphasized, and primary health care services are provided on the premises of public housing developments or at other locations immediately accessible to residents of public housing.

FQHC LOOK-ALIKES

Federally Qualified Health Center (FQHC) Look-Alikes are Health Centers that have been certified by the Centers for Medicare and Medicaid Services (CMS), based on recommendations provided by the Health Resources and Services Administration (HRSA)/Bureau of Primary Health Care (BPHC), as meeting all Health Center Program requirements. This certification makes them, like Health Center Program grantees, eligible for fair reimbursement through Medicaid and Medicare, and for participation in the 340B federal drug pricing program, and assists in recruiting and retaining providers through the National Health Service Corps and the State Loan Repayment Program. FQHC Look-Alikes do not receive funding under the Health Center Program.

INDIAN HEALTH SERVICE

The most prominent provider of health services to American Indians is the Indian Health Service (IHS). The IHS provides both direct care and contract care to members of federally recognized tribes on or near federal reservations. The IHS funds three MPCA members—American Indian Health & Family Services of Southeastern Michigan, Inc., Bay Mills Health Center, and Sault Tribe of Chippewa Indians—to provide urban Indians in Southeast Michigan, American Indians in Chippewa County, and Chippewa Indians in Saulte Ste. Marie respectively, with comprehensive health care services, which include medical, community health, dental, and mental health/substance abuse services.

RYAN WHITE CARE TITLE III CLINICS

Health care organizations funded under the Ryan White CARE Act Title III Early Intervention Services Program provide a comprehensive continuum of outpatient HIV primary care services including HIV counseling, testing, and referral; medical evaluation and clinical care; other primary care services; and referrals to other health services. Community Health Centers, Migrant Health Centers, and Health Care for the Homeless sites funded under Section 330 of the Public Health Service Act may receive Title III grants.

Health Centers...

INCREASE ACCESS TO HEALTH CARE

Health Centers are a key strategic tool in assuring that underserved areas and populations have access to health care. Today over 600,000 Michigan residents rely on a Health Center as their health care home—including individuals who are low income, uninsured, underinsured, elderly, minority, migrant and seasonal farmworkers, homeless, and those living with HIV/AIDS. If it weren't for Health Centers, many of these individuals would remain isolated from health care due to lack of insurance, inability to pay for services, and transportation, language, and cultural barriers. Health Centers overcome these barriers by providing coordinated, comprehensive, community-based health care to anyone who walks through their doors. The need for Health Center services continues to increase.

PROVIDE QUALITY CARE

The care that Health Centers provide is high quality and often exceeds national standards. Plus, Health Center patients value the quality care they receive. Aggregated data from patient experience surveys conducted by the MidWest Clinicians' Network in 2013 shows that 96.1% of patients surveyed described the treatment and advice they received from providers at Health Centers as good or excellent, and 96.2% reported that they would recommend their Health Center to friends and family.

Health Centers are a Good Investment

Health Centers reduce Medicaid costs. A study analyzing Michigan Medicaid claims showed that Michigan Health Centers are 8.4 percent more cost efficient in providing Medicaid services than are other providers. In brief, the study found that Michigan Health Centers save the Michigan Medicaid program \$12 per member per month, or \$144 per beneficiary per year. This equates to a projected total savings of \$15.9 million annually to the Medicaid program based on the number of adult Medicaid beneficiaries that Michigan Health Centers serve. Generally, the lower costs of Health Centers are due to reduced utilization by Health Center patients of more expensive Medicaid services, such as inpatient hospital services.

At the national level, Health Centers provide \$24 billion in annual savings, of which \$6 billion accrues to the states and federal government via Medicaid.

What's more, Health Centers serve as economic engines whose business operations significantly impact their communities' economy. They provide a source of stable employment and job training for community residents; purchase goods and services from local businesses; and engage in capital development projects that often act as catalysts for significant economic revitalization within their communities by attracting investment and other businesses to the community. In 2013, Michigan Health Centers provided 4,260.35 full time equivalent jobs in local communities across the state.
